1893-94	Revised	203,500	366,800	570,300
1894-95	Budget	111,400	325,800	437,200

The Post Office Savings Banks deposits would have shown the usual progressive increase but for the notice given of the reduction of the rate of interest from $3\frac{1}{2}$ to $3\frac{1}{8}$ per cent. with effect from the 1st of April next. The withdrawals this year have been heavy since the issue of the notification on 30th December, and only a small net receipt is estimated for next year.

194. The *minus* figure under the head of Loans to Municipalities in the table in paragraph 187 is due to certain large repayments made during the year. *Loans to Municipalities, etc.* It was stated in paragraph 100 of the last Financial Statement that the Bombay Port Trust took advantage of the favourable state of the money market to raise a 4 per cent. loan to repay Government in 1893-94 the balance of a $4\frac{1}{2}$ per cent. loan of Rx. 616,100. A similar application from the Bombay Municipality for the repayment of a balance of about 42 lakhs was granted in the course of the year. The gross amount placed at the disposal of Local Governments for advances to Local Bodies, etc., in 1894-95 is Rx. 833,700, while the similar allotments for the two preceding years were Rx. 608,200 in 1893-94 and Rx. 662,900 in 1892-93. It was necessary in the previous year to curtail the demands of the Local Governments on a consideration of the ways and means of the year, but the present state of the balances has enabled Government to provide for the full amount asked for next year.

195. The current year is now expected to close with a cash balance of *Cash balance.* Rx. 26,251,756 and for 1894-95 a closing balance of Rx. 21,684,256 is taken. The estimated transactions of the year thus result in a reduction in the balances by Rx. 4,567,500.

Section VII.—Summary.

196. The principal features in this Statement are—

- (1) The Accounts of 1892-93 have closed with a deficit of Rx. 833,412.
- (2) The Revised Estimates of 1893-94 show a deficit of Rx. 1,792,800, an amount somewhat in excess of that entered in the Budget Estimate, Rx. 1,595,100. There has been a decrease of Revenue under two important heads, Opium and Salt; but the Revenue generally has shown satisfactory progress, particularly the Railway Revenue. Notwithstanding the grant of Exchange Compensation Allowances, the expenditure of the year on the whole will not differ much from the amount entered in the Budget

Estimates. The rate of exchange is taken in the Revised Estimate at 1s. 2'6d. the rupee against the Budget rate of 1s. 2'75d.: this difference increases the direct charge under Exchange by Rx. 265,900.

- (3) A loan of Rx. 3,500,000 at $3\frac{1}{2}$ per cent. interest was raised in India at an average price of $\text{Rs. } 96-3-2\frac{1}{2}$ per centum. The balance (Rx. 1,341,400) of the $4\frac{1}{2}$ per cent. loans was notified for discharge; Rx. 1,100,000 will be paid this year: the whole amount ceased to bear interest from the 14th October 1893.
- (4) The Mints were closed to the free coinage of silver at the end of June 1893. For several months thereafter the Secretary of State was not able to sell Council Bills in any quantities. His drawings during 1893-94 are now estimated at £9,400,000, while the Budget Estimate was for £18,700,000. It has therefore been necessary to replenish the Home Treasury balances by temporary borrowing. The diminution in the drawings has at the same time caused a very large increase in the cash balances in India, which are now expected to amount on the 31st March 1894 to Rx. 26,251,756 against the Budget Estimate of Rx. 12,643,105.
- (5) The Budget Estimates for 1894-95 show a deficit of Rx. 301,900.
- (6) The deficit with which the Government of India were threatened in 1894-95 was between three crores and three-and-a-half crores of rupees. The measures by which the deficit has been reduced to the amount shown in the Estimates are—
 - (a) stringent economy in expenditure;
 - (b) the temporary suspension of a portion of the Famine Grant, Rx. 1,076,200;
 - (c) contributions from Provincial Governments, amounting to Rx. 405,000; and
 - (d) the imposition of Import Duties estimated to yield in 1894-95 a net return of Rx. 1,140,000.
- (7) Apart from the new taxation, the Revenues are expected to yield a substantial increase in 1894-95. But the Opium Revenue shows a considerable decrease, the net Opium Revenue being taken at Rx. 4,138,300 as compared with the Budget Estimate for 1893-94 of Rx. 5,061,200.
- (8) The rate of exchange is taken at 1s. 2d. the rupee as compared with 1s. 2½d. in the Budget Estimate of 1893-94, and there is an addition to the direct expenditure under Exchange of Rx. 1,371,500; Exchange Compensation Allowances are estimated to cost in 1894-95 Rx. 1,113,300, of which Rx. 400,400 will be Provincial. In consequence of the sterling borrowing necessitated by the failure to sell Council Bills during a part of 1893-94, the Interest charges in England in 1894-95 will be considerably increased, but other decreases in sterling expenditure nearly counterbalance that increase.
- (9) The Capital Expenditure on Railways and Irrigation Works not charged against Revenue is estimated at Rx. 3,643,100 in 1893-94 and at Rx. 4,000,000 in 1894-95. In 1893-94 there is in addition an expenditure on the Construction of Railways of Rx. 1,079,700

charged to the Famine Grant : expenditure from the Famine Grant on this account will not be incurred in 1894-95.

- (10) It is expected that the Secretary of State will in 1894-95 sell Council Bills to the amount of £17,000,000 and will raise temporary loans of £8,300,000, out of which he will use £6,000,000 to repay the temporary loans borrowed in 1893-94. These announcements are accompanied by the usual reservation of entire liberty to the Secretary of State to vary the amounts to be obtained by bills or raised by loan as he may find occasion.
- (11) It is estimated that the closing balance in the Treasuries in India on 31st March 1895 will amount to Rx. 21,684,256, and it is accordingly not intended to issue any public loan in India in 1894-95. Full liberty is however reserved to the Government of India to vary this intention in any way and to any extent which may be found expedient.
- (12) The programme embodied in the Budget Estimates of 1894-95 is described as a programme of retrenchment and of vigilance intended to tide the Government over a transition period.

J. WESTLAND.

- 60. Power of Local Government to make rules.
- 61. Exhibition of copies of rules.
- 62. Exercise of powers of Superintendent and Medical Officer.

THE SCHEDULE.

ENACTMENTS REPEALED.

The Prisons Act, 1894.

(Chapter I.—Preliminary—Sections 1-3. Chapter II.—Maintenance and Officers of Prisons.—Sections 4-7.)

An Act to amend the law relating to Prisons.

WHEREAS it is expedient to amend the law relating to prisons in British India, and to provide rules for the regulation of such prisons; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

1. (1) This Act may be called the Prisons Title, extent and Act, 1894. commencement.

(2) It extends to the whole of British India, inclusive of Upper Burma, British Baluchistan, the Santal Parganas, and the Pargana of Spiti; and

(3) It shall come into force on the first day of July, 1894.

(4) Nothing in this Act shall apply to civil jails in the Presidency of Bombay outside the city of Bombay, and those jails shall continue to be administered under the provisions of sections 9 to 16 (both inclusive) of Bombay Act II of 1874, as amended by subsequent enactments.

2. (1) On and after the said first day of July, 1894, the enactments mentioned in the schedule shall be repealed to the extent specified in the fourth column thereof.

(2) But all rules and appointments made, directions given and orders issued under any of those enactments shall, so far as they are consistent with this Act, be deemed to have been respectively made, given and issued under this Act.

(3) Any enactment or document referring to any of those enactments shall, so far as may be, be construed to refer to this Act or to the corresponding portion thereof.

Definitions. 3. In this Act—

(1) "prison" means any jail or place used permanently or temporarily under the general or special orders of a Local Government for the detention of prisoners, and includes all lands and buildings appurtenant thereto, but does not include—

(a) any place for the confinement of prisoners who are exclusively in the custody of the police;

(b) any place specially appointed by the Local Government under section 541 of the Code of Criminal Procedure, 1882; or

(c) any place which has been declared by the Local Government, by general or special order, to be a subsidiary jail;

(d) "criminal prisoner" means any prisoner duly committed to custody under the writ, warrant or order of any Court or authority

exercising criminal jurisdiction, or by order of a Court-martial:

(3) "convicted criminal prisoner" means any criminal prisoner under sentence of a Court or Court-martial, and includes a person detained in prison under the provisions of Chapter VIII of the Code of Criminal Procedure, 1882, or under the Prisoners Act, 1871:

X of 1882.
V of 1871.

(4) "civil prisoner" means any prisoner who is not a criminal prisoner:

(5) "remission system" means the rules for the time being in force regulating the award of marks to, and the consequent shortening of sentences of, prisoners in jails:

(6) "history-ticket" means the ticket exhibiting such information as is required in respect of each prisoner by this Act or the rules thereunder:

(7) "Inspector General" means the Inspector General of Prisons:

(8) "Medical Subordinate" means an Assistant Surgeon, Apothecary or qualified Hospital Assistant: and

(9) "prohibited article" means an article the introduction or removal of which into or out of a prison is prohibited by any rule under this Act.

CHAPTER II.

MAINTENANCE AND OFFICERS OF PRISONS.

4. The Local Government shall provide, for Accommodation for the prisoners in the territories under such Government, accommodation in prisons constructed and regulated in such manner as to comply with the requisitions of this Act in respect of the separation of prisoners.

5. An Inspector General shall be appointed for the territories subject to each Local Government, and shall exercise, subject to the orders of the Local Government, the general control and superintendence of all prisons situated in the territories under such Government.

6. For every prison there shall be a Superintendent, a Medical Officer (who may also be the Superintendent), a Medical Subordinate, a Jailer and such other officers as the Local Government thinks necessary:

Provided that the Governor of Bombay in Council may, with the previous sanction of the Governor General in Council, declare by order in writing that in any prison specified in the order the office of jailer shall be held by the person appointed to be Superintendent.

7. Whenever it appears to the Inspector Temporary accommodation for prisoners. General that the number of prisoners in any prison is greater than can conveniently or safely be

*The Prisons Act, 1894.**(Chapter III.—Duties of Officers.—Sections 8-16.)*

kept therein, and it is not convenient to transfer the excess number to some other prison,

or whenever from the outbreak of epidemic disease within any prison, or for any other reason, it is desirable to provide for the temporary shelter and safe custody of any prisoners,

provision shall be made, by such officer and in such manner as the Local Government may direct, for the shelter and safe custody in temporary prisons of so many of the prisoners as cannot be conveniently or safely kept in the prison.

CHAPTER III.

DUTIES OF OFFICERS.

Generally.

8. All officers of a prison shall obey the Control, and duties of officers of prisons. directions of the Superintendent; all officers subordinate to the Jailer shall perform such duties as may be imposed on them by the Jailer with the sanction of the Superintendent or be prescribed by rules under section 60.

9. No officer of a prison shall sell or let, nor shall any person in trust for or employed by him sell or let, or derive any benefit from selling or letting, any article to any prisoner or have any money or other business dealings directly or indirectly with any prisoner.

10. No officer of a prison shall, nor shall any person in trust for or employed by him, have any interest, direct or indirect, in any contract for the supply of the prison: nor shall he derive any benefit, directly or indirectly, from the sale or purchase of any article on behalf of the prison or belonging to a prisoner.

Superintendent.

11. (1) Subject to the orders of the Inspector General, the Superintendent shall manage the prison in all matters relating to discipline, labour, expenditure, punishment and control.

(2) Subject to such general or special directions as may be given by the Local Government, the Superintendent of a prison other than a central prison or a prison situated in a presidency-town shall obey all orders not inconsistent with this Act or any rule thereunder which may be given respecting the prison by the District Magistrate, and shall report to the Inspector General all such orders and the action taken thereon.

12. The Superintendent shall keep, or cause to be kept, the following records:—

(1) a register of prisoners admitted;

(2) a book showing when each prisoner is to be released;

(3) a punishment-book for the entry of the punishments inflicted on prisoners for prison-offences;

(4) a visitors' book for the entry of any observations made by the visitors touching any matters connected with the administration of the prison;

(5) a record of the money and other articles taken from prisoners;

and all such other records as may be prescribed by rules under section 59 or section 60.

Medical Officer.

13. Subject to the control of the Superintendent, the Medical Officer shall have charge of the sanitary administration of the prison, and shall perform such duties as may be prescribed by rules made by the Local Government under section 60.

14. Whenever the Medical Officer has reason to believe that the mind of a prisoner is, or is likely to be, injuriously affected by the discipline or treatment to which he is subjected, the Medical Officer shall report the case in writing to the Superintendent, together with such observations as he may think proper.

This report, with the orders of the Superintendent thereon, shall forthwith be sent to the Inspector General for information.

15. On the death of any prisoner, the Medical Officer shall forthwith record in a register the following particulars, so far as they can be ascertained, namely:—

(1) the day on which the deceased first complained of illness or was observed to be ill,

(2) the labour, if any, on which he was engaged on that day,

(3) the scale of his diet on that day,

(4) the day on which he was admitted to hospital,

(5) the day on which the Medical Officer was first informed of the illness,

(6) the nature of the disease,

(7) when the deceased was last seen before his death by the Medical Officer or Medical Subordinate,

(8) when the prisoner died, and

(9) (in cases where a post-mortem examination is made) an account of the appearances after death,

together with any special remarks that appear to the Medical Officer to be required.

Jailer.

16. (1) The Jailer shall reside in the prison, unless the Superintendent permits him in writing to reside elsewhere.

Jailer.

The Prisons Act, 1894.

(Chapter III.—Duties of Officers.—Sections 17-23. Chapter IV.—Admission, Removal and Discharge of Prisoners.—Sections 24-26.)
Chapter V.—Discipline of Prisoners.—Section 27.)

(2) The Jailer shall not, without the Inspector General's sanction in writing, be concerned in any other employment.

17. Upon the death of a prisoner, the Jailer shall give immediate notice thereof to the Superintendent and the Medical Subordinate.

Jailer to give notice of death of prisoner.

18. The Jailer shall be responsible for the safe custody of the records to be kept under section 12, for the commitment warrants and all other documents confided to his care, and for the money and other articles taken from prisoners.

Responsibility of Jailer.

19. The Jailer shall not be absent from the prison for a night without permission in writing from the Superintendent; but, if absent without leave for a night from unavoidable necessity, he shall immediately report the fact and the cause of it to the Superintendent.

Jailer to be present at night.

20. Where a Deputy Jailer or Assistant Jailer is appointed to a prison, he shall, subject to the orders of the Superintendent, be competent to perform any of the duties, and be subject to all the responsibilities, of a Jailer under this Act or any rule thereunder.

Powers of Deputy and Assistant Jailers.

Subordinate Officers.

21. The officer acting as gate-keeper, or any other officer of the prison, may examine anything carried in or out of the prison, and may stop and search or caused to be searched any person suspected of bringing any prohibited article into or out of the prison, or of carrying out any property belonging to the prison, and, if any such article or property be found, shall give immediate notice thereof to the Jailer.

Duties of gate-keeper.

22. Officers subordinate to the Jailer shall not be absent from the prison without leave from the Superintendent or from the Jailer.

Subordinate officers not to be absent without leave.

23. Prisoners who have been appointed as officers of prisons shall be deemed to be public servants within the meaning of the Indian Penal Code.

Convict officers.

XLV of 1860.

CHAPTER IV.

ADMISSION, REMOVAL AND DISCHARGE OF PRISONERS.

24. (1) Whenever a prisoner is admitted into prison, he shall be searched, and all weapons and prohibited articles shall be taken from him.

Prisoners to be examined on admission.

(2) Every criminal prisoner shall also, as soon as possible after admission, be examined under the general or special orders of the Medical Officer, who shall enter or cause to be entered in a book, to be kept by the Jailer, a record of the state of the prisoner's health, and of any wounds or marks on his person, the class of labour he is fit for if sentenced to rigorous imprisonment, and any observations which the Medical Officer thinks fit to add.

(3) In the case of female prisoners the search and examination shall be carried out by the matron under the general or special orders of the Medical Officer.

25. All money or other articles in respect whereof no order of a competent Court has been made, and which may with proper authority be brought into the prison by any criminal prisoner or sent to the prison for his use, shall be placed in the custody of the Jailer.

Effects of prisoners.

26. (1) All prisoners, previously to being removed to any other prison, shall be examined by the Medical Officer.

Removal and discharge of prisoners.

(2) No prisoner shall be removed from one prison to another unless the Medical Officer certifies that the prisoner is free from any illness rendering him unfit for removal.

(3) No prisoner shall be discharged against his will from prison, if labouring under any acute or dangerous distemper, nor until, in the opinion of the Medical Officer, such discharge is safe.

CHAPTER V.

DISCIPLINE OF PRISONERS.

27. The requisitions of this Act with respect to the separation of prisoners are as follows:—

Separation of prisoners.

(1) in a prison containing female as well as male prisoners the females shall be imprisoned in separate buildings, or separate parts of the same building, in such manner as to prevent their seeing, or conversing or holding any intercourse with, the male prisoners;

(2) in a prison where male prisoners under the age of eighteen are confined, means shall be provided for separating them altogether from the other prisoners and for separating those of them who have arrived at the age of puberty from those who have not;

(3) unconvicted criminal prisoners shall be kept apart from convicted criminal prisoners; and

(4) civil prisoners shall be kept apart from criminal prisoners.

The Prisons Act, 1894.

(Chapter V.—Discipline of Prisoners.—Sections 28-30. Chapter VI.—Food, Clothing and Bedding of Civil and Unconvicted Criminal Prisoners.—Sections 31-33. Chapter VII.—Employment of Prisoners.—Sections 34-36.)

28. Subject to the requirements of the last Association and foregoing section, convicted segregation of pri- ed criminal prisoners may be confined either in association or individually in cells or partly in one way and partly in the other.

29. No cell shall be used for solitary confinement unless it is furnished with the means of enabling the prisoner to communicate at any time with an officer of the prison, and every prisoner so confined in a cell for more than twenty-four hours, whether as a punishment or otherwise, shall be visited at least once a day by the Medical Officer or Medical Subordinate.

30. (1) Every prisoner under sentence of death shall, immediately on his arrival in the prison after sentence, be searched by, or by order of, the Jailer, and all articles shall be taken from him which the Jailer deems it dangerous or inexpedient to leave in his possession.

(2) Every such prisoner shall be confined in a cell apart from all other prisoners, and shall be placed by day and by night under the charge of a guard.

CHAPTER VI.

FOOD, CLOTHING AND BEDDING OF CIVIL AND UNCONVICTED CRIMINAL PRISONERS.

31. A civil prisoner or an unconvicted criminal prisoner shall be permitted to maintain himself, and to purchase, or receive from private sources at proper hours, food, clothing, bedding or other necessities, but subject to examination and to such rules as may be approved by the Inspector General.

32. No part of any food, clothing, bedding or other necessities belonging to any civil or unconvicted criminal prisoner shall be given, hired or sold to any other prisoner; and any prisoner transgressing the provisions of this section shall lose the privilege of purchasing food or receiving it from private sources, for such time as the Superintendent thinks proper.

33. (1) Every civil prisoner and unconvicted criminal prisoner unable to provide himself with sufficient clothing and bedding shall be supplied by the Superintendent with such clothing and bedding as may be necessary.

(2) When any civil prisoner has been committed to prison in execution of a decree in favour of a private person, such person, or his representative, shall, within forty-eight hours after the receipt by him of a demand, in writing, pay to the Superintendent the cost of the clothing and bedding so supplied to the prisoner; and in default of such payment the prisoner may be released.

CHAPTER VII.

EMPLOYMENT OF PRISONERS.

34. (1) Civil prisoners may, with the Superintendent's permission, work and follow any trade or profession.

(2) Civil prisoners finding their own implements, and not maintained at the expense of the prison, shall be allowed to receive the whole of their earnings; but the earnings of such as are furnished with implements or are maintained at the expense of the prison shall be subject to a deduction, to be determined by the Superintendent, for the use of implements and the cost of maintenance.

35. (1) No criminal prisoner sentenced to labour or employed on labour at his own desire shall, except on an emergency with the sanction in writing of the Superintendent, be kept to labour for more than nine hours in any one day.

(2) The Medical Officer shall from time to time examine the labouring prisoners while they are employed, and shall at least once in every fortnight cause to be recorded upon the history-ticket of each prisoner employed on labour the weight of such prisoner at the time.

(3) When the Medical Officer is of opinion that the health of any prisoner suffers from employment on any kind or class of labour, such prisoner shall not be employed on that labour but shall be placed on such other kind or class of labour as the Medical Officer may consider suited for him.

36. Provision shall be made by the Superintendent for the employment (as long as they so desire) of all criminal prisoners sentenced to simple imprisonment; but no prisoner not sentenced to rigorous imprisonment shall be punished for neglect of work excepting by such alteration in the scale of diet as may be established by the rules of the prison in the case of neglect of work by such a prisoner.

The Prisons Act, 1894.

(Chapter VIII.—*Health of Prisoners.*—Sections 37-39. Chapter IX.—*Visits to Prisoners.*—Sections 40-41. Chapter X.—*Offences in relation to Prisons.*—Sections 42-44.)

CHAPTER VIII.

HEALTH OF PRISONERS.

37. (1) The names of prisoners desiring to see the Medical Subordinate or appearing out of health in mind or body shall, without delay, be reported by the officer in immediate charge of such prisoners to the Jailer.

(2) The Jailer shall, without delay, call the attention of the Medical Subordinate to any prisoner desiring to see him, or who is ill, or whose state of mind or body appears to require attention, and shall carry into effect all written directions given by the Medical Officer or Medical Subordinate respecting alterations of the discipline or treatment of any such prisoner.

38. All directions given by the Medical Officer or Medical Subordinate in relation to any prisoner, with the exception of orders for the supply of medicines or directions relating to such matters as are carried into effect by the Medical Officer himself or under his superintendence, shall be entered day by day in the prisoner's history-ticket or in such other record as the Local Government may by rule direct, and the Jailer shall make an entry in its proper place stating in respect of each direction the fact of its having been or not having been complied with, accompanied by such observations, if any, as the Jailer thinks fit to make, and the date of the entry.

39. In every prison a hospital or proper place for the reception of sick prisoners shall be provided.

CHAPTER IX.

VISITS TO PRISONERS.

40. Due provision shall be made for the admission, at proper times and under proper restrictions, into every prison of persons with whom civil or unconvicted criminal prisoners may desire to communicate, care being taken that, so far as may be consistent with the interests of justice, prisoners under trial may see their duly qualified legal advisers without the presence of any other person.

41. (1) The Jailer may demand the name and address of any visitor to a prisoner, and, when the Jailer has any ground for suspicion, may search any visitor, or cause him to be searched, but the search shall not be made in the presence of any prisoner or of another visitor.

(2) In case of any such visitor refusing to permit himself to be searched, the Jailer may deny him admission; and the grounds of such proceeding, with the particulars thereof, shall be entered in such record as the Local Government may direct.

CHAPTER X.

OFFENCES IN RELATION TO PRISONS.

42. Whoever, contrary to any rule under section 60, introduces or removes, or attempts by any means whatever to introduce or remove, into or from any prison, or supplies or attempts to supply to any prisoner outside the limits of a prison, any prohibited article,

and every officer of a prison who, contrary to any such rule, knowingly suffers any such article to be introduced into or removed from any prison, to be possessed by any prisoner, or to be supplied to any prisoner outside the limits of a prison,

and whoever, contrary to any such rule, communicates or attempts to communicate with any prisoner,

and whoever abets any offence made punishable by this section,

shall, on conviction before a Magistrate, be liable to imprisonment for a term not exceeding six months, or to fine not exceeding two hundred rupees, or to both.

43. When any person, in the presence of any officer of a prison, commits any offence specified in the last foregoing section, and refuses on demand of such officer to state his name and residence, or gives a name or residence which such officer knows, or has reason to believe, to be false, such officer may arrest him, and shall without unnecessary delay make him over to a Police-officer, and thereupon such Police-officer shall proceed as if the offence had been committed in his presence.

44. The Superintendent shall cause to be affixed, in a conspicuous place outside the prison, a notice in English and the Vernacular setting forth the acts prohibited under section 42 and the penalties incurred by their commission.

*The Prisons Act, 1894.**(Chapter XI.—Prison-offences.—Sections 45-46.) **

CHAPTER XI.

PRISON-OFFENCES.

45. The following acts are declared to be prison-offences when committed by a prisoner:—

- (1) such wilful disobedience to any regulation of the prison as shall have been declared by rules made under section 59 to be a prison-offence;
- (2) any assault or use of criminal force;
- (3) the use of insulting or threatening language;
- (4) immoral or indecent or disorderly behaviour;
- (5) wilfully disabling himself from labour;
- (6) contumaciously refusing to work;
- (7) filing, cutting, altering or removing handcuffs, fetters or bars without due authority;
- (8) wilful idleness or negligence at work by any prisoner sentenced to rigorous imprisonment;
- (9) wilful mismanagement of work by any prisoner sentenced to rigorous imprisonment;
- (10) wilful damage to prison-property;
- (11) tampering with or defacing history-tickets, records or documents;
- (12) receiving, possessing or transferring any prohibited article;
- (13) feigning illness;
- (14) wilfully bringing a false accusation against any officer or prisoner;
- (15) omitting or refusing to report, as soon as it comes to his knowledge, the occurrence of any fire, any plot or conspiracy, any escape, attempt or preparation to escape, and any attack or preparation for attack upon any prisoner or prison-official; and
- (16) conspiring to escape, or to assist in escaping, or to commit any other of the offences aforesaid.

46. The Superintendent may examine any person touching any such offence, and determine thereupon, and punish such offence by—

- (1) a formal warning:

Explanation.—A formal warning shall mean a warning personally addressed

to a prisoner by the Superintendent and recorded in the punishment-book and on the prisoner's history-ticket;

- (2) change of labour to some more irksome or severe form;
- (3) hard labour for a period not exceeding seven days in the case of convicted criminal prisoners not sentenced to rigorous imprisonment;
- (4) such loss of privileges admissible under the remission system for the time being in force as may be prescribed by rules made by the Governor General in Council;
- (5) the substitution of gunny or other coarse fabric for clothing of other material, not being woollen, for a period which shall not exceed three months;
- (6) imposition of handcuffs of such pattern and weight, in such manner and for such period, as may be prescribed by rules made by the Governor General in Council;
- (7) imposition of fetters of such pattern and weight, in such manner and for such period, as may be prescribed by rules made by the Governor General in Council;
- (8) separate confinement for any period not exceeding six months:

Explanation.—Separate confinement means such confinement with or without labour as secludes a prisoner from communication with, but not from sight of, other prisoners, and allows him not less than one hour's exercise per diem and to have his meals in association with one or more other prisoners;

- (9) penal diet, that is, restriction of diet in such manner and subject to such conditions regarding labour as may be prescribed by the Local Government:

Provided that such restriction of diet shall in no case be applied to a prisoner for more than ninety-six consecutive hours, and shall not be repeated except for a fresh offence nor until after an interval of one week;

- (10) cellular confinement for any period not exceeding fourteen days:

Provided that after each period of cellular confinement an interval of not less duration than such period must elapse before the prisoner is again sentenced to cellular or solitary confinement:

EXPLANATION.—Cellular confinement means such confinement with or

*The Prisons Act, 1894.**(Chapter XI.—Prison-offences.—Sections 47-51.)*

without labour as entirely secludes a prisoner from communication with, but not from sight of, other prisoners :

- (11) solitary confinement for any period not exceeding seven days :

Provided that after each period of solitary confinement an interval of not less duration than such period must elapse before the prisoner is again sentenced to solitary or cellular confinement :

EXPLANATION.—Solitary confinement means such confinement with or without labour as entirely secludes the prisoner both from sight of, and communication with, other prisoners ;

- (12) penal diet as defined in clause (9) combined with solitary confinement as defined in clause (11) ;

- (13) whipping, provided that the number of stripes shall not exceed thirty :

Provided that nothing in this section shall render any female or civil prisoner liable to the imposition of any form of handcuffs or fetters, or to whipping.

47. Any two of the punishments enumerated in the last foregoing section may be awarded for any such offence in combination, subject to the following exceptions, namely :—

- (1) formal warning shall not be combined with any other punishment except loss of privileges under clause (4) of that section ;

- (2) penal diet shall not be combined with change of labour under clause (2) of that section, nor shall any additional period of penal diet awarded singly be combined with any period of penal diet awarded in combination with solitary confinement ;

- (3) solitary confinement shall not be combined with cellular confinement or with separate confinement, nor cellular confinement with separate confinement, so as to prolong the total period of seclusion to which the prisoner shall be liable ;

- (4) whipping shall not be combined with any other form of punishment except cellular or separate confinement and loss of privileges admissible under the remission system.

48. (1) The Superintendent shall have power to award any of the punishments enumerated in the two last foregoing sections, subject, in the case of separate confinement for a period exceeding one month, to the previous confirmation of the Inspector General.

(2) No officer subordinate to the Superintendent shall have power to award any punishment whatever.

49. Except by order of a Court of Justice, no punishment other than the punishments specified in the foregoing sections shall be inflicted on any prisoner, and no punishment shall be inflicted on any prisoner otherwise than in accordance with the provisions of those sections.

50. (1) No punishment of penal diet, either singly or in combination, or of whipping, or of change of labour under section 46, clause (2), shall be executed until the prisoner to whom such punishment has been awarded has been examined by the Medical Officer, who, if he considers the prisoner fit to undergo the punishment, shall certify accordingly in the appropriate column of the punishment-book prescribed in section 12.

(2) If he considers the prisoner unfit to undergo the punishment, he shall in like manner record his opinion in writing and shall state whether the prisoner is absolutely unfit for punishment of the kind awarded, or whether he considers any modification necessary.

(3) In the latter case he shall state what extent of punishment he thinks the prisoner can undergo without injury to his health.

51. (1) In the punishment-book prescribed in section 12 there shall be recorded, in respect of every punishment inflicted, the prisoner's name, register number and the class (whether habitual or not) to which he belongs, the prison-offence of which he was guilty, the date on which such prison-offence was committed, the number of previous prison-offences recorded against the prisoner, and the date of his last prison-offence, the punishment awarded, and the date of infliction.

(2) In the case of every serious prison-offence, the names of the witnesses proving the offence shall be recorded, and, in the case of offences for which whipping is awarded, the Superintendent shall record the substance of the evidence of the witnesses, the defence of the prisoner, and the finding with the reasons therefor.

(3) Against the entries relating to each punishment the Jailer and Superintendent shall affix their initials as evidence of the correctness of the entries.

The Prisons Act, 1894.

(Chapter XI.—Prison-offences.—Sections 52-54. Chapter XII.—Miscellaneous—Sections 55-59.)

52. If any prisoner is guilty of any offence against prison-discipline which, by reason of his having frequently committed such offences or otherwise, in the opinion of the Superintendent, is not adequately punishable by the infliction of any punishment which he has power under this Act to award, the Superintendent may forward such prisoner to the Court of the District Magistrate or of any Magistrate of the first class having jurisdiction, together with a statement of the circumstances, and such Magistrate shall thereupon inquire into and try the charge so brought against the prisoner, and, upon conviction, may sentence him to imprisonment which may extend to one year, such term to be in addition to any term for which such prisoner was undergoing imprisonment when he committed such offence, or may sentence him to any of the punishments enumerated in section 46 :

Provided that the District Magistrate may transfer the case for inquiry and trial to any Magistrate of the first class : and

Provided also that no person shall be punished twice for the same offence.

53. (1) No punishment of whipping shall be inflicted in instalments, or except in the presence of the Superintendent and Medical Officer or Medical Subordinate.

(2) Whipping shall be inflicted with a light ratan not less than half an inch in diameter on the buttocks, and in case of prisoners under the age of sixteen it shall be inflicted, in the way of school discipline, with a lighter ratan.

54. (1) Every Jailer or officer of a prison subordinate to him who shall be guilty of any violation of duty or wilful breach or neglect of any rule or regulation or lawful order made by competent authority, or who shall withdraw from the duties of his office without permission, or without having given previous notice in writing of his intention for the period of two months, or who shall overstay any leave granted to him, or who shall engage without authority in any employment other than his prison-duty, or who shall be guilty of cowardice, shall be liable, on conviction before a Magistrate, to fine not exceeding two hundred rupees, or to imprisonment for a period not exceeding three months, or to both.

(2) No person shall under this section be punished twice for the same offence.

CHAPTER XII.

MISCELLANEOUS.

55. A prisoner, when being taken to or from any prison in which he may be lawfully confined, or whenever he is working outside or is otherwise beyond the limits of any such prison in or under the lawful custody or control of a prison-officer belonging to such prison, shall be deemed to be in prison and shall be subject to all the same incidents as if he were actually in prison.

56. Whenever the Superintendent considers it necessary (with reference either to the state of the prison or the character of the prisoners) for the safe custody of any prisoners that they should be confined in irons, he may, subject to such rules and instructions as may be laid down by the Inspector General with the sanction of the Local Government, so confine them.

57. (1) Prisoners under sentence of transportation may, subject to any rules made under section 60, be confined in fetters for the first three months after admission to prison.

(2) Should the Superintendent consider it necessary, either for the safe custody of the prisoner himself or for any other reason, that fetters should be retained on any such prisoner for more than three months, he shall apply to the Inspector General for sanction to their retention for the period for which he considers their retention necessary, and the Inspector General may sanction such retention accordingly.

58. No prisoner shall be put in irons or under mechanical restraint by the Jailer of his own authority, except in case of urgent necessity, in which case notice thereof shall be forthwith given to the Superintendent.

59. The Governor General in Council may for any part of British India, and each Local Government with the previous sanction of the Governor General in Council may for the territories under its administration, make rules consistent with this Act—

- (1) defining the acts which shall constitute prison-offences ;
- (2) determining the classification of prison-offences into serious and minor offences ;
- (3) fixing the punishments admissible under this Act which shall be awardable for commission of prison-offences or classes thereof ;

*The Prisons Act, 1894.**(Chapter XII.—Miscellaneous.—Sections 60-62.)*

(4) declaring the circumstances in which acts constituting both a prison-offence and an offence under the Indian Penal Code may or may not be dealt with as a prison-offence ;

(5) for the award of marks and the shortening of sentences ;

(6) regulating the use of arms against any prisoner or body of prisoners in the case of an outbreak or attempt to escape ;

(7) defining the circumstances and regulating the conditions under which prisoners in danger of death may be released ;

(8) regulating the transfer from one part of British India to another of prisoners whose term of transportation or imprisonment is about to expire ; and,

(9) generally, for carrying into effect the purposes of this Act.

60. The Local Government may, subject to the control of the Governor General in Council, make rules consistent with this Act—

Power of Local Government to make rules.

(a) for the classification of prisons, and description and construction of wards, cells and other places of detention ;

(b) for the regulation by numbers, length or character of sentences, or otherwise, of the prisoners to be confined in each class of prisons ;

(c) for the government of prisons and for the appointment, guidance, control, punishment and dismissal of all officers appointed under this Act ;

(d) as to the food, bedding and clothing of criminal prisoners and of civil prisoners maintained otherwise than at their own cost ;

(e) for the employment, instruction and control of convicts within or without prisons ;

(f) for defining articles the introduction or removal of which into or out of prisons without due authority is prohibited ;

(g) for classifying and prescribing the forms of labour and regulating the periods of rest from labour ;

(h) for regulating the disposal of the proceeds of the employment of prisoners ;

(i) for regulating the confinement in fetters of prisoners sentenced to transportation ;

(j) for the classification and the separation of prisoners ;

(k) for regulating the confinement of convicted criminal prisoners under section 28 ;

(l) for the preparation and maintenance of history-tickets ;

(m) for the selection and appointment of prisoners as officers of prisons ;

(n) for rewards for good conduct ;

(o) for regulating the transfer of prisoners whose term of transportation or imprisonment is about to expire ;

(p) for the treatment, transfer and disposal of criminal lunatics or recovered criminal lunatics confined in prisons ;

(q) for regulating the transmission of appeals and petitions from prisoners and their communications with their friends ;

(r) for the appointment and guidance of visitors of prisons ;

(s) for extending any or all of the provisions of this Act and of the rules thereunder to subsidiary jails or special places of confinement appointed under section 541 of the Code of Criminal Procedure, 1882, and to the officers employed, and the prisoners confined, therein ; and,

(t) generally, in regard to the admission, custody, employment, dieting, treatment and release of prisoners, and for other purposes consistent with this Act.

61. Copies of rules, under sections 59 and 60. Exhibition of copies so far as they affect the government of prisons, shall be exhibited, both in English and in the Vernacular, in some place to which all persons employed within a prison have access.

62. All or any of the powers and duties conferred and imposed by this Act on a Superintendent or Medical Officer may in his absence be exercised and performed by such other officer as the Local Government may appoint in this behalf either by name or by his official designation.

PART V.

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 22nd March, 1894:—

NO. 6 OF 1894.

A Bill to amend sections 366 and 371 of the Code of Criminal Procedure, 1882.

WHEREAS it is expedient to amend sections 366 and 371 of the Code of Criminal Procedure, 1882; It is hereby enacted as follows:—

I. For section 366 of the said Code the following shall be substituted, namely:—
Substitution of new section for section 366, Act X, 1882.

"366. The judgment in every trial in any Criminal Court of original jurisdiction shall be pronounced, or the substance of such judgment shall be explained,—

(a) in open Court either immediately after the termination of the trial or at some subsequent time of which notice shall be given to the parties or their pleaders, and

(b) in the language of the Court, or in some other language which the accused or his pleader understands.

The accused shall, if he is in custody and the judgment is not one of discharge or acquittal, be brought up, or may, if he is not in custody and the judgment is not one of discharge or acquittal, be required by the Court to attend, to hear the judgment delivered.

For any cause which may appear to the Court to be sufficient and shall be recorded by it in writing, the Court may delegate its functions under this section with respect to the delivery of any judgment to any other Court within the limits of the jurisdiction of which the accused may be, and such other Court shall cause notice to be given to the parties or their pleaders of the day and place on and at which the judgment will be delivered as in this section authorised and required, and, when the judgment has been delivered, shall certify thereon the date and mode of delivery.

No judgment delivered by any Criminal Court shall be deemed to be invalid by reason only of the absence of any party or his pleader on the day or from the place notified for the delivery thereof, or of any omission to serve, or defect in serving, on the parties or their pleaders, or any of them, the notice of such day and place.

And nothing in this section shall be construed [I. L. R. 21 to limit in any way the extent of the provisions Cal. 121.] of section 537."

2. In section 371 of the said Code, for the words "The judgment shall be explained to the accused and on his application" the words "On the application of the accused" shall be substituted.

Amendment of section 371, Act X, 1882.

STATEMENT OF OBJECTS AND REASONS.

THIS Bill is the outcome of a reference made to the Government of India from the North-Western Provinces in 1892, and circulated by that Government in the same year for the opinions of Local Governments, High Courts and other authorities, respecting certain difficulties which in practice arise in the application of some of the provisions of Chapter XXVI of the Code of Criminal Procedure, 1882.

In connection with the subject of the Bill the Government has recently had the opportunity of perusing the case published at I. L. R. 21 Cal. 121.

ALEX. EDW. MILLER.

The 17th March, 1894.

S. HARVEY JAMES,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 22nd March, 1894:—

NO. 5 OF 1894.

A Bill to amend the Indian Penal Code and Act VI of 1864.

WHEREAS it is expedient to amend the Indian Penal Code and Act VI of 1864; It is hereby enacted as follows:—

Indian Penal Code.

1. For section 182 of the Indian Penal Code the following shall be substituted, namely:—
Substitution of new section for section 182, Act XLV, 1860.

"182. Whoever gives to any public servant any information which he knows or believes to be false, intending thereby to cause, or knowing it to be likely that he will thereby cause, such public servant—
False information, with intent to cause public servant to use his lawful power to the injury of another person.

(a) to do or omit anything which he ought not to do or omit if the true state of facts respecting which such information is given were known to him, or

(b) to use any lawful power or authority of such public servant for the benefit of such informant in a manner in which he would not have used it but for the receipt of such false information, or

(c) to use the lawful power of such public servant to the injury or annoyance of any person,

shall be punished with imprisonment of either description for a term which may extend to six months, or with fine which may extend to one thousand rupees, or with both.

"*Explanation.*—It shall not be necessary for the purpose of clause (c) to show an intention on the part of the informant to injure or annoy any particular person if a reasonable and natural consequence of the receipt of such information as aforesaid would be that the public servant would so act as to cause injury or annoyance to some person or persons.

Illustrations.

"(a) A informs a Magistrate that Z, a police-officer subordinate to such Magistrate, has been guilty of neglect of duty or misconduct, knowing such information to be false, and knowing it to be likely that the information will cause the Magistrate to dismiss Z. A has committed the offence defined in this section.

"(b) A falsely informs a public servant that Z has contraband salt in a secret place knowing such information to be false, and knowing that it is likely that the consequence of the information will be a search of Z's premises, attended with annoyance to Z. A has committed the offence defined in this section.

"(c) A falsely informs a policeman that he has been assaulted and robbed in the neighbourhood of a particular village, but does not mention the name of any person as one of his assailants. As a natural consequence of this information, the Police make enquiries and institute searches in the village to the annoyance of the villagers or some of them. A has committed an offence under this section.

"(d) A applies to be admitted as a pleader in a Court, and in support of his application falsely alleges in writing or otherwise that he has been admitted as an advocate in some other Court, his intention being thereby to obtain authority to practise the profession of a pleader for gain or reward. A has committed an offence under this section."

2. To Chapter XII of the said Code the following shall be added, namely:—
Addition of section to Chapter XII, Act XLV, 1860.

Prohibition of fictitious stamps.

"263A. (1) Whoever— [47 & 48 Vict., c. 7c s. 7.]

(a) makes, knowingly utters, deals in or sells any fictitious stamp, or knowingly uses for any postal purpose any fictitious stamp, or

(b) has in his possession, without lawful excuse, any fictitious stamp, or

(c) makes or, without lawful excuse, has in his possession any die, plate, instrument or materials for making any fictitious stamp,

shall be punished with fine which may extend to two hundred rupees.

"(2) Any such stamp, die, plate, instrument or materials in the possession of any person for making any fictitious stamp may be seized and shall be forfeited.

"(3) In this section—

(a) 'fictitious stamp' means any stamp falsely purporting to be issued by Government for the purpose of denoting a rate of postage, or any facsimile or imitation or representation, whether on paper or otherwise, of any stamp issued by Government for that purpose: and

(b) 'Government' shall, notwithstanding anything in section 17, be deemed to denote the person or persons authorised by law to administer executive government, not only in any part of British India, but also in any part of Her Majesty's dominions or in any foreign country."

3. For section 294 of the said Code the following shall be substituted, namely:—
Substitution of new section for section 294, Act XLV, 1860.

"294. Whoever in or near any public place, does any obscene act, or sings obscene acts and songs, to the annoyance of others, [The amendment has reference to an unreported case which occurred in the Madras Presidency.]

sings, recites or utters any obscene song, ballad or words, shall be punished with imprisonment of either description for a term which may extend to three months, or with fine, or with both."

& 39
c. 24.] 4. After section 477 of the said Code the following shall be added, namely:—
Addition of new section after section 477, Act XLV, 1860.

"477A. Whoever, being a clerk, officer or servant, or employed or acting in the capacity of a clerk, officer or servant, wilfully, and with intent to defraud, destroys, alters, mutilates or falsifies any book, paper, writing, valuable security or account which belongs to or is in the possession of his employer, or has been received by him for or on behalf of his employer, or wilfully, and with intent to defraud, makes or concurs in making any false entry in, or omits or alters or concurs in omitting or altering any material particular from or in, any such book, paper, writing, valuable security or account, shall be punished with imprisonment of either description for a term which may extend to seven years, or with fine, or with both.

"*Explanation.*—It shall be sufficient in any charge under this section to allege a general intent to defraud without naming any particular person intended to be defrauded or specifying any particular sum of money intended to be the subject of the fraud."

Act VI of 1864.

5. After section 6 of Act VI of 1864 (*an Act Addition to Act VI, to authorise the punishment of whipping in certain cases*), the following shall be added, namely:

"7. (1) In sections 3 and 4 of this Act the words 'same offence' include a minor offence made up of some or any of the particulars of which the offence for which the subsequent conviction is obtained consists

"(2) In section 5 of this Act, the expression 'juvenile offender' means an offender who in the opinion of the Court is under sixteen years of age, the opinion of the Court on such matter being final and conclusive."

STATEMENT OF OBJECTS AND REASONS.

The object of section 2 of this Bill is to give effect to the provisions of the Vienna Postal Convention which came into force on the 1st July, 1892. The other sections of the Bill are explained by the marginal notes against them. Section 4 has been inserted on the recommendation of Local Governments and Chambers of Commerce, the existing law having been held to be defective.

The 21st March 1894.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the Code of Criminal Procedure, 1882, was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 22nd March, 1894:—

WE, the undersigned, Members of the Select Committee to which the Bill to amend

the Code of Criminal Procedure, 1882, was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as revised by us, and with sections 44, 45 and 45A of the Code as they will stand if our

No. II.

A Bill to amend the Code of Criminal Procedure, 1882.

X of 1882. WHEREAS it is expedient to amend the Code of Criminal Procedure, 1882; It is hereby enacted as follows :—

1. In section 44 of the said Code the figures "143, 144, 145, 147, 148," shall be inserted between the figures "130" and the figures "302".

2. (1) For the part of section 45 of the said Code beginning with the words "Every village-headman" and ending with the words "under suspicious circumstances" the following shall be substituted, namely :—

"45. Every village-headman, village-accountant, village-watchman, village-police-officer, owner or occupier of land, and the agent of any such owner or occupier, and every officer employed in the collection of revenue or rent of land on the part of Government or the Court of Wards, shall forthwith communicate to the nearest Magistrate or to the officer in charge of the nearest police-station, whichever is the nearer, any information which he may obtain respecting—

(a) the permanent or temporary residence of any notorious receiver or vendor of stolen property in any village of which he is headman, accountant, watchman or police-officer, or in which he owns or occupies land, or is agent, or collects revenue or rent ;

(b) the resort to any place within, or the passage through, such village, of any person whom he knows, or reasonably suspects, to be a thug, robber, escaped convict or proclaimed offender ;

(c) the commission of, or intention to commit, in or near such village any non-bailable offence or any offence punishable under section 143, 144, 145, 147 or 148 of the Indian Penal Code ;

(d) the occurrence in or near such village of any sudden or unnatural death or of any death under suspicious circumstances ;"

(2) In the same section, after clause (e), added by section 2 of Act III of 1894, the following shall be inserted, namely :—

"(f) any matter likely to affect the maintenance of order or the prevention of crime or the safety of person or property respecting which the District Magistrate, by general or special order made with the previous sanction of the Local Government, has directed him to communicate information."

(3) After the same section the following section shall be added, namely :—

"45A. Subject to rules in this behalf to be made by the Local Government, the District Magistrate may from time to time appoint one or more persons to be village-headmen for the purposes of the last foregoing section in any village for which there is no such headman appointed under any other law."

SECTIONS 44, 45 AND 45A OF THE CODE OF CRIMINAL PROCEDURE, 1882, AS AMENDED BY ACT III OF 1894 AND PROPOSED TO BE FURTHER AMENDED BY THIS BILL.

44. Every person, whether within or without the presidency-towns, Public to give information of certain offences.

XLV of 1860. aware of the commission of, or of the intention of any other person to commit, any offence punishable under the following sections of the Indian Penal Code (namely), 121, 121A, 122, 123, 124, 124A, 125, 126, 130, 143, 144, 145, 147, 148, 302, 303, 304, 382, 392, 393, 394, 395, 396, 397, 398, 399, 402, 435, 436, 449, 450, 456, 457, 458, 459 and 460, shall, in the absence of reasonable excuse, the burden of proving which shall lie upon the person so aware, forthwith give information to the nearest Magistrate or police-officer of such commission or intention.

Any act committed at any place out of British India, which, if committed in British India, would be punishable under any of the following sections of the Indian Penal Code, namely, 302, 304, 382, 392, 393, 394, 395, 396, 397, 398, 399, 402, 435, 436, 449, 450, 457, 458, 459 and 460, shall be deemed to be an offence for the purposes of this section.

45. Every village-headman, village-accountant, village-watchman, village-police-officer, owner or occupier of land, and the agent of any such owner or occupier, and every officer employed in the collection of revenue or rent of land on the part of Government or the Court of Wards, shall forthwith communicate to the nearest Magistrate or to the officer in charge of the nearest police-station, whichever is the nearer, any information which he may obtain respecting—

(a) the permanent or temporary residence of any notorious receiver or vendor of stolen property in any village of which he is headman, accountant, watchman or police-officer, or in which he owns or occupies land, or is agent, or collects revenue or rent;

(b) the resort to any place within, or the passage through, such village, of any person whom he knows, or reasonably suspects, to be a thug, robber, escaped convict or proclaimed offender;

(c) the commission of, or intention to commit, in or near such village any non-bailable offence or any offence punishable under section 143, 144, 145, 147 or 148 of the Indian Penal Code;

XLV of 1860.

(d) the occurrence in or near such village of any sudden or unnatural death or of any death under suspicious circumstances;

(e) the commission of, or intention to commit, at any place out of British India near such village any act which, if committed in British India, would be an offence punishable under any of the following sections of the Indian Penal Code, namely, 302, 304, 382, 392, 393, 394, 395, 396, 397, 398, 399, 402, 435, 436, 449, 450, 457, 458, 459 and 460;

XLV of 1860.

(f) any matter likely to affect the maintenance of order or the prevention of crime or the safety of person or property respecting which the District Magistrate, by general or special order made with the previous sanction of the Local Government, has directed him to communicate information.

In this section—

(i) "village" includes village lands; and

(ii) the expression "proclaimed offender" includes any person proclaimed as an offender by any Court or authority established or continued by the Governor General in Council in any part of India in respect of any act which, if committed in British India, would be punishable under any of the following sections of the Indian Penal Code, namely, 302, 304, 382, 392, 393, 394, 395, 396, 397, 398, 399, 402, 435, 436, 449, 450, 457, 458, 459 and 460.

45A. Subject to rules in this behalf to be made by the Local Government, the District Magistrate may from time to time appoint one or more persons to be village-headmen for the purposes of the last foregoing section in any village for which there is no such headman appointed under any other law.

No. 138.—The following is published for general information :—

No. 0042 R. T.

GOVT. OF INDIA, PUBLIC WORKS DEPT.—RAILWAY TRAFFIC.

Calcutta, the 19th March 1894.

General Rules for working railways open for traffic.

Read—

Sections 8 and 47 of the Indian Railways Acts of 1879 and 1890, respectively.

Public Works Department notification No. 299, dated the 13th September 1880, publishing the General Rules for all railways in India, and Government of India circular No. 17 Railway, dated the 21st August 1880, promulgating those General Rules.

Government of India resolution No. 467 R. T., dated the 15th August 1890, published in the *Gazette of India*, dated the 28th August 1890, under Public Works Department notification No. 361, dated the 28th August 1890.

Endorsement by the Consulting Engineer to the Government of India for Railways, Lucknow, No. 421, dated the 3rd March 1894, forwarding letter from the Agent of the Bengal and North Western and Tirhoot railways, No. 1120, dated the 26th February 1894.

OBSERVATIONS.—The Agent of the Bengal and North Western and Tirhoot railways has applied that the General Rules for working open lines of railway in India, which have been published under Public Works Department notification No. 299, dated the 18th September 1880,—*vide* the *Gazette of India* of the 18th September 1880—as modified by Government of India resolution No. 467 R.T., dated the 15th August 1890, which was published under Public Works Department notification No. 361, dated the 28th August 1890,—*vide* the *Gazette of India* of the 28th August 1890,—may be made applicable to that portion of the Bengal and North Western railway which is situate between the Gogra Ghât station of that railway and the Bahramghât station of the Oudh and Rohilkhand railway, from the date on which it may be opened for the public carriage of passengers, animals, or goods.

RESOLUTION.—With the exception of rules 385, 386 and 387 which refer to the working of a single line of railway on the system termed “Train Despatching” in rule 3 of the said rules, the Governor General in Council is pleased to sanction the application of the General Rules for Indian railways, with the modifications cited in the foregoing observations, to that portion of the Bengal and North Western railway which is situate between the Gogra Ghât station of that railway and the Bahramghât station of the Oudh and Rohilkhand railway.

ORDER.—Ordered that the General Rules, with the modifications cited in the foregoing observations, which have already been published in the *Gazette of India* of the 18th September 1880 and the 28th August 1890, be further notified to the railway servants and to the public by a copy thereof being kept open to inspection, free of any charge, in the office of the station master of every station on the said railway.

Ordered, also, that this resolution be communicated to the Consulting Engineer to the Government of India for Railways, Lucknow, for information and guidance, and that it be published under a notification in Part I of the *Gazette of India*.

No. 139.—The Governor General in Council is pleased, under section 16 (1) of the Indian Railways Act (IX) of 1890, to sanction the use of locomotive engines, and of rolling stock to be drawn or propelled thereby, on that portion of the Bengal and North Western Railway which is situated between the Gograhat station of that Railway and the Bahram Ghat station of the Oudh and Rohilkhand Railway.

No. 140.—With reference to Public Works Department Code, Volume I, chapter II, paragraph 65, Mr. Harold Mackenzie Cortlandt Trotter is appointed to the Superior Accounts Branch in the rank of Deputy Examiner, class II, temporary, on probation, and is posted to the office of the Examiner of Public Works Accounts, Bengal.

No. 141.—The undermentioned officers of the Subordinate Revenue Establishment of State Railways, lent to the Bombay, Baroda and Central India Railway Company, are appointed to the Provincial Service of the Engineer Branch of the Public Works Department as Assistant Engineers, 3rd grade, supernumerary, on the State Railway List:—

Mr. J. Harkness.

„ H. G. Arnott.

The 22nd March, 1894.

No. 142.—During the absence of the Governor General in Council from Calcutta, Mr. G. W. Forrest, the officer in charge of the Records of the Government of India, and *ex-officio* Assistant Secretary to the Government of India in the Home Department, will have charge of that portion of the Public Works Department of the Government of India which is left in Calcutta.

No. 143.—The following reversions are ordered in the Accounts Branch:—

Names.	From	To	With effect from
Quinlan, F. P.	Examiner, 1st class, <i>temporary</i> .	Examiner, 2nd class.	8th March, 1894.
Stuart, H.	Examiner, 2nd class, <i>temporary</i> .	Examiner, 3rd class.	Ditto.
Sherlock-Hubbard, I. S.	Examiner, 3rd class, <i>temporary</i> .	Examiner, 4th class, 1st grade.	Ditto.
Wolfe, G. C.	Examiner, 4th class, 3rd grade, <i>temporary</i> .	Deputy Examiner, 1st grade.	Ditto.

No. 144.—Mr. A. J. Oldham, Executive Engineer, 1st grade, State Railways, is granted furlough for one year six months and twenty-six days, under Article 340 (b) of the Civil Service Regulations.

No. 145.—The following are published for general information :—

No. 0043 R. T.

GOVT. OF INDIA, PUBLIC WORKS DEPT.—RAILWAY TRAFFIC.

Calcutta, the 20th March 1894.

General Rules for railways under construction.

Read—

Sections 3 (4), 16 (2), 47 and 148 (1) of the Indian Railways Act (IX) of 1890.

Public Works Department notification No. 480½, dated the 30th October 1890, publishing in the *Gazette of India*, dated the 8th November 1890, Government of India resolution No. 736 R. T., dated the 17th October 1890, and the general rules for working railways under construction and not open for traffic which were framed by the Railway Conference of 1888 and recorded in Appendix M of its proceedings, with rules 7, 16 and 25 as modified in the memorandum accompanying Government of India letter No. 233 R. T., dated the 12th June 1890.

Endorsement by the Consulting Engineer to the Government of India for railways, Lucknow, No. 450, dated the 7th March 1894, forwarding letter from the Agent of the Rohilkund and Kumaon Railway Company, No. ⁸⁵⁸⁰_{G.I.}, dated the 5th March 1894.

OBSERVATIONS.—The Agent of the Rohilkund-Kumaon Railway Company has applied for leave to adopt on the Sonaripur extension of the Dudwa branch, and on the Bareilly grain siding, of the Rohilkund-Kumaon Railway the general rules for working railways under construction and not used for the public carriage of passengers, animals or goods which rules were published in the *Gazette of India* of the 8th November 1890, under Public Works Department notification No. 480½, dated the 30th October 1890.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the 'General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods', which were published under the notification referred to in the foregoing observations, to such portion or portions of the Sonaripur extension of the Dudwa branch, and of the Bareilly grain siding, of the Rohilkund and Kumaon railway as may on this date be under construction and not open for the public carriage of passengers, animals or goods.

ORDER.—Ordered, that the general rules, which have already been published in the *Gazette of India* of the 8th November 1890, be further notified to the railway servants and to the public by a copy thereof being kept open to inspection, free of any charge, in the office of the engineer in charge of the construction of the railway.

Ordered, also, that this resolution be communicated to the Consulting Engineer to the Government of India for railways, Lucknow, for information and guidance, and that it be published under a notification in Part I of the *Gazette of India*.

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof —

The sum of R50 for each of the said inventions.

No. 38 of 1888.—Mr. J. S. Burroughes' invention for improvements in the construction of billiard tables. (Specification filed 22nd September 1888.)

No. 68 of 1888.—Invention of the Farbenfabriken vormals Friedrich Bayer and Company for improvements in the manufacture of azo dyes. (Specification filed 29th October 1888)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fifth year from the date of the filing thereof—

The sum of R50 for each of the said inventions.

NOTICES.

Applications and all communications relating to the Inventions and Designs Act, 1888, should be placed under cover addressed "Secretary to the Government of India, Revenue and Agricultural Department (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Inventions and Designs Act, 1888, is open for the transaction of business on all days (except Sundays and Gazetted Holidays) from 11 A.M. to 4 P.M.

Applications for the registration of Trade Marks as " Designs " under Part II of the " Inventions and Designs Act (V of 1888) " are frequently received in the Office of the Secretary appointed under the said Act. It is hereby notified for general information that the Government of India are advised that Trade Marks are not " Designs " within the meaning of the said Act, and, therefore, are not capable of such registration.

G. W. FORREST,

Drawing Instruments, drawing materials, etc., are not available at the College Book Depot, but can be obtained from the Superintendent, Canal Foundry and Workshops, Roorkee.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo with numerous Plates.

First two Volumes are published in separate convenient sized Sections, as below, but can be bound up in Volumes if required.

VOLUME I.*

Section	I. Building Materials (in the Press).	
"	II. Masonry (1891),	R1-8
"	III. Carpentry (1889),	R1-8
"	IV. Earthwork	R1-8
"	V. Tools and Plant (never published).	

VOLUME II.*

Section	VI. Buildings (1891),	R1-8
"	VII. Bridges (in the Press).	
"	VIII. Roads (1888),	R2-0
"	IX. Railways (1891),	R1-8
"	X. Irrigation Works (1873),	R2-0

ROORKEE MANUAL OF APPLIED MECHANICS.

- Vol. I. Direct and Transverse Strain, principally by Analytical Methods (in the Press).
" II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

- VII. Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table. R3-8.
XIII. Drawing (by Lieut. R. Pultord, R.E.)† R8.
XIIIa. Drawing, First Principles of Geometrical (by do.) (4th edition). R1-4.
XIV. Simple Applied Mechanics, Parts I and II (in the Press).
XV. Examples of Estimating. Comprising a progressive series of Estimates (with plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (4th edition). R3-12.

* Date of Edition on sale.

† Originally published at R15, reduced to R8.

- XVI. Earthwork Estimating, with Practical Tables and Diagrams.** By Major A. M. Brandreth, R.E. R1.
- XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations.** 8a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Sections IX and X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

- Curve Tables, complete for laying any curve.** 4a.
- Scantlings of Timber for Roofs.** Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1-8.
- Useful Rules and Tables relating to Measurement of Timber.** Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.
- O'Callaghan's Earthwork Tables for India,** in one large sheet, 8a.; mounted on cloth, to fold up. R1-12.
- Tables for Computing Earthwork in Distributaries and small open Channels,** in use in Irrigation Department, N.-W. Provinces. (In the Press). R1-4.
- Specifications and Schedules of Prices for execution of various kinds of Work by Contract, etc.** By Major-General F. W. Peile, R.E. R3.
- Tyndall's Hand-Book of Specifications** (in the Press).
- The Indian Engineer's Pocket Book.** 4a.
- Wooden Bridges and Designs.** By Rai Kunhya Lal. R4.
- Blasting under Water** (2nd edition). 12a.
- Waugh's Instructions for Topographical Surveying.** R1-4.
- Analysis of Lime and Cement Stones.** By Murray Thomson, Esq., M.D., F.R.S.E. 6a.
- Roorkee Hydraulic Experiments** (in 3 Vols.—Text, Tables, and Plates). By Capt. A. Cunningham, R.E. R12.
- Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width.** R1-8.

MATHEMATICAL.

- Boileau's Tables of Wages and Rent, and of the value of goods.** Tables for converting Seers and Chittacks into Decimals of a Maund, and Annas and Pie into decimals of a Rupee. With a few others of general utility. (4th edition.) R2.
- Boileau's Tables of Log sin² $\frac{1}{2}$ P** (for computing time). 8a.
- Cape's Logarithms, with Tables of Squares, Cubes, etc.** (In the Press.) R1-4.
- Cape's Geometry.** R1-8.
- „ **Mechanics.** R2-4.

HINDUSTANI.

- Elements of Hindustani Grammar.** 4a.
- Technical Dialogues—English and Urdu.** R1-4.
- A Vocabulary of Common and Technical Words in English-Urdu.** R1-4.

NOTE AND FIELD-BOOKS, etc.

- Note-Books** (Section paper), large and small, each. R1-4.
- Surveying Field-Books** (ruled). R1.
- Levelling Field-Books** (English Pattern). R1-8.
- „ „ (Canal Pattern). R1-8.
- „ „ (College Pattern). R1-12.
- P. W. D. Note-Book** (in the Press). R1-4.
- „ **Measurement Book.** R1-4.
- Circular Card-board Protractors, 12 inches.** R1-8.

MISCELLANEOUS.

- Description of Venomous Snakes.** (The drawings of all the venomous snakes of Upper India, with description and all important information, extracted from the "Thanatophidia of India.") R1.
- Ditto ditto, in Urdu. R1-4.

- Perspective** (fully explained). By Col. A. M. Brandreth, R.E. R1-12.
- Calendars for 1891, 1892, and 1893,** each. R4-12.
- Sample Question Papers for 4th Grade Accounts Branch for 1891.** R1.
- Forms of Accounts, P. W. D., for Sub-Divisional Officers, in English.** R2.
- Memo. of Instructions for Road Project.** R1-8.
- Project for College Mess (sample Project).** R1-8.
- Ferrotpe Printing Processes.** 8a.

PLANS OF STATIONS.

- Lithographed Plans of the Cantonments and Regimental Lines in the different Military Stations of India.** Drawn to a uniform scale, and prepared for the Government of India, P. W. Department, between 1864 and 1868. (Useful for Executive Engineers and Superintending Engineers' Offices.)
- Bengal, 51 Plans. R5.
- Madras, 99 Plans. R10.
- Bombay, 91 Plans. R10.
- N.-W. Provinces, 104 Plans. R10.
- Oudh, 21 Plans. R2.
- Rajputana, 4 Plans. R2-4.
- British Burma, 19 Plans. R3-4.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(SECOND SERIES.)

- Quarterly Numbers of Vols. II, VIII, and IX of the Series** are available at R3-8 each, and Vol. XI at R2. Cloth covers for Volumes at R1 each.

(THIRD SERIES.)

- Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15** at R2-8 each.
- Index to Professional Papers, 1st and 2nd Series.** 8a.

FERROTYPE PRINTING.

- Chemicals and Lithographic Paper** for this process can be purchased from Thomason College Book Depot. Application to be made to the Curator.
- Apparatus for printing** can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

- Circulars containing the Rules of Admission to the different Classes held at the College** will be forwarded to applicants.

J. CLIBBORN, Major, I.S.C.,
Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

- The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series. The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively. In supersession of the previous advertisements, on and from the 1st January, 1894, the terms of subscription and sale will be

† These include Question Papers for Engineer and Upper Subordinate Classes, and Superior Accounts Branch, P. W. D.

as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

	Rs. a. p.	
	Without postage.	With postage.
For the complete Series, including postage.	10 0 0	12 8 0
For the Calcutta Series	6 0 0	7 0 0
„ each of the Madras, Bombay, and Allahabad Series.
„ a part of the Calcutta Series purchased separately, inclusive of postage in India
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, inclusive of postage in India

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	Rs. a. p.	
	Town.	Mofussil.
For the Calcutta Series; per copy	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series; per copy.	0 5 3	0 5 9
„ the Calcutta Series. For the year	7 8 0	8 6 3
„ each of the Madras, Bombay, and Allahabad Series. For the year	4 6 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1893 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.
For one issue	R 20	R 14	R 6
„ three issues	„ 55	„ 36	„ 24
„ six „	„ 100	„ 68	„ 43
„ nine „	„ 145	„ 96	„ 64
„ twelve „	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.	With postage.
	R s. p.	R s. p.
Bengal Law Reports, for one year	20 0 0	23 8 0
Single copies, Rs 2 per copy.		
Full Bench Rulings, Parts I and II	20 0 0	22 8 0
Bengal Secretariat Press, 10, Lyon's Range, Calcutta.		
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.		

INDIAN LAW REPORTS.

NOTICE TO SUBSCRIBERS.

Subscribers are hereby informed that, unless complaints of non-receipt of any number is made to the Publisher of the series within three months of the date of publication, the benefits of the subscription rates for copies lost in transit will not be allowed, and full rates will be charged. The price per copy of each of the four series at subscription rates and at full rates is shown below:—

	PER COPY.

REVENUE DEPARTMENT.

Horse Surra, Report on, Vol. I, by ALFRED LINGARD, M.B.M.S., Durham. Super royal quarto. R10 (R1-4.)

[Revised Advertisement.]

A Dictionary of the Economic Products of India.

By DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes and Volume VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings respectively will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L,

and Volume V contains the latter half of L to end of O; Vol. VI (which will consist of four parts), Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts I to IV of Vol. VI) during the current year, but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Indian Wheat Trade, Parts I, II and III, combined. Royal 8vo., limp cover. R1-8 (4a.)

Manual of the Land Revenue systems of India. By B. H. BADEN-POWELL. Revised Edition, in 3 Volumes.—Royal 8vo., cloth.

SUPPLEMENT TO
The Gazette of India.

No. 12.} CALCUTTA, SATURDAY, MARCH 24, 1894.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

FINANCIAL STATEMENT for 1894-95.

PART I.

GENERAL REVIEW.

PRELIMINARY.

In accordance with the Statutory Rules for the discussion of the Financial Statement of the Governor General in Council, I have caused a printed copy of the Financial Statement of 1894-95 to be delivered to each Member; and I proceed to submit to the Council the explanations I desire to offer with reference to it. Following the example set last year by Sir David Barbour, the prescribed Financial Statement will form the Second Part of the published compilation, and will set forth and explain in detail the various figures of the receipts and outgoings of the Government, being intended both for the information of the public, and as a permanent official record of the financial arrangements and prospects of the current and the approaching year. My accompanying explanation, which will form the first part of the compilation, is intended to give Honourable Members a more general view of the accounts and estimates, leaving fuller information regarding the details to be sought for in the more elaborate compilation, which has been printed and distributed in accordance with the rules.

2. I have so recently had occasion to lay before Honourable Members a review of our recent and present general financial position that I am to a certain extent discharged from the obligation to look on this occasion beyond the figures of the three years, the finance of which I have to explain, *viz.*, the past year, the current year and the coming year. I do not think that any Finance Minister has yet had the evil fortune to present figures which for all three years shew a deficit of Revenue, but I shall not waste the time of the Council in again going over the ground covered by the statement I laid before them three weeks ago, and bemoaning the adverse fate which a continually dwindling Rupee imposes upon us. I pass at once to the consideration of the accounts and estimates which it is my duty to explain.

ACCOUNTS, 1892-93.

3. The accounts of 1892-93, as finally made up, shew a deficit of Rx. 833,412, as compared with the deficit in the Revised Estimate of Rx. 1,081,900. The improvement, which amounts to Rx. 248,488, is composed of a number of small differences scattered over both the Revenue and Expenditure heads, none of which are large enough to require particular mention. In short, the Revised Estimate presented to the Council twelve months ago represented as accurately as an estimate could be expected to do the outturn of the year. The accounts were made up at an exchange a little less than 1s. 3d. per rupee; the total amount of Council Bills drawn during the year being £16,532,215 at the average rate of 1s. 2'985d.

4. The usual appropriation report, containing the Comptroller and Auditor General's review and comparison of the estimates and accounts of the year, was published in last week's *Gazette of India*; and with it the year's accounts are consigned to past history.

REVISED ESTIMATES, 1893-94.

+ 299,600 5. As compared with the Revised Estimates for 1892-93, which we have seen
 — 650,300 were very accurately justified by the final figures, the Budget Estimate of 1893-94
 — 60,800 provided under *Revenue* heads for better Land Revenue Rx. 299,600, worse
 + 487,500 Opium Revenue Rx. 650,300, worse Salt Revenue Rx. 60,800, better Railway
 et — 76,000 Revenue Rx. 487,500, and a number of minor differences. In the aggregate
 — the difference was a difference for the worse of Rx. 15,500.

6. The Revised Estimates of 1893-94 shew that we have had a very favour-
 able Land Revenue year, even after taking into account the fact that Rx. 207,200
 of the increase comes in, in Madras and Bombay, by deduction from, or charge
 to, other heads. The return is about 25½ crores, whereas we have never
 yet come up to 25, and is Rx. 335,100 in excess of Budget. But, on the
 other hand, the loss of Opium Revenue is by Rx. 621,800 greater than anti-
 cipated, and whereas the lowest figure recorded for many years has been
 Rx. 7,879,182, we this year estimate to receive only Rx. 6,694,400. The loss
 + 335,100 under Salt Revenue has been much greater than anticipated, being Rx. 241,600
 — 621,800 as compared with Budget Estimates. On the other principal Revenue heads,
 — 241,600 taken together there has been a gain as compared with Budget of Rx. 252,000.
 + 252,000 Railways have done extremely well during the year, the Revenue being taken at
 + 654,800 Rx. 654,800 better than Budget, and more than a crore better than last year.
 t + 378,500

7. These differences and a number of minor ones give us a net improve-
 ment of Rx. 423,800 upon the Budget Estimates on the Revenue side,* of which
 Rx. 104,900 goes to Provincial account, leaving Rx. 318,500 for Imperial.

1,595,100 8. The Budget Estimates of the year were for a deficit of Rx. 1,595,100 upon
 — 318,900 the year's account. With the improvement of Revenue which I have noticed, our
 — 1,276,200 Expenditure if kept within estimate would have brought out at the end of
 the year a deficit of only Rx. 1,276,200. Our deficit, however, stands at
 Rx. 1,792,800, or Rx. 516,600 greater than this figure. And indeed, as a short
 opium crop has saved us Rx. 370,100 on our estimated opium payments, I have
 really to explain Rx. 886,700 of excess of Expenditure over Estimate in 1893-94.

9. The only heads of *Imperial Expenditure in India* which shew any note-
 worthy excess of Expenditure over Estimate are Interest on Debt (Rx. 159,500),
 Working Expenses of State Railways (Rx. 151,500), and the Army Expendi-
 ture (Rx. 318,300). The excess under the first represents for the most part
 the discount on the Loan raised in August, which amounted to Rx. 133,000.
 The excess Expenditure under the second arises in connection with the larger
 traffic already referred to. Of the Army Expenditure Rx. 263,500 is due to
 Exchange Compensation Allowances: there has also been expenditure in excess
 159,500 of the Budget Grants of Rx. 21,500 for certain special military and political
 151,500 operations, of Rx. 48,100 for special expenditure in connection with the Gilgit
 318,300 Agency, and Rx. 26,700 for special purchases of horses and mules: on the other
 — 629,300 hand, savings are anticipated from some of the Budget Grants.
 — 89,000

540,300 We have saved Rx. 89,000 by short Expenditure upon Special Defences.

10. The items I have mentioned account for excess Imperial Expenditure in
 India of Rx. 540,300. The smaller differences result in a net saving of Rx. 26,600
 and the real excess in the total figures, after allowing for Opium, is Rx. 513,700.
 So that we have saved more than enough, in minor differences over the rest of
 the account, to pay for the Exchange Compensation Allowances to non-military
 officers. These were not included in the Budget, but are estimated at
 Rx. 137,800 under the non-military heads.

* I neglect for present purposes the fact that about Rx. 30,000 of this is due to the operation in 1893-94 of the New Tariff Act.

11. The *sterling expenditure* account compared with Budget Estimate shews £104,100 excess payments under Interest; excess marine charges £27,300; short charges for special defence works £66,000, giving, with a few smaller differences, a net excess of £65,800.

	104,100
	27,300
	—66,000
Net	<u>65,400</u>

12. The *exchange* upon the expenditure was estimated, at 1s. 2½d., to cost Rx. 9,935,900; it is now estimated at Rx. 307,200 more.

13. Adding together these items, the deterioration which I have explained on the expenditure side amounts to the figure above stated, namely—

	Rx.
Imperial Expenditure in India	513,700
Sterling Expenditure	65,800
Exchange	397,200
TOTAL	<u>886,700</u>

and leaves the year's account in deficit by Rx. 1,792,800.

14. I ought to mention as a matter of some public interest in connexion with the estimates of 1893-94, that the Royal Commission on Opium is expected to cost in India about Rx. 20,000, and in England about £1,500; of these amounts, half will be charged to Indian Revenues. The smallness of the expenditure is for the most part due to the fact that the Commissioners (except the one who was placed on the Commission as an officer of the Government of India) neither required nor received any remuneration for their services, being determined that their laborious task should cost as little as possible to the people of India.

BUDGET ESTIMATES, 1894-95.

15. In explaining the Budget Estimates for 1894-95 I ask the Council first to go back to my statement that the Revenue in the Revised Estimates of 1893-94 falls short of the Budgetted Expenditure of that year by Rx. 1,276,200. Our revenue of the coming year is largely estimated upon the basis of the Revised Estimates of the current year, and I propose first to shew, as compared with those Revised Estimates, what additional Revenue under the same heads we may expect to come into our account during the year 1894-95.

16. First, under the principal *Revenue* heads, the Estimates of Land Revenue show an increase of Rx. 211,300 upon the high figures of 1893-94; and Salt will, we hope, recover from its backward position of the current year, and bring us in an addition of Rx. 283,000. Under both these heads in fact we have some reason to think that certain short collections of February and March 1894 will come into the accounts of April or May, that is of 1894-95. On the other hand, we do not think it safe to take Opium at even the figure of 1893-94; our realisations are necessarily affected by the adverse exchange arising out of the low price of silver, and we estimate a falling-off of Rx. 300,800. The remaining principal heads show some increases and some decreases, but on the net account a decrease of Rx. 1,600, giving for this section of the accounts a net increase of Rx. 191,900. To this we have to add the estimated increase in Railways of Rx. 201,900 and in Irrigation of Rx. 144,200; but, on the other hand, we lose Rx. 160,400 under Mint Receipts (by reason of discontinuance of coinage). The net amount of all these is an increase of Rx. 377,600, which, by a number of minor differences under other heads, becomes Rx. 395,400. Of this total amount of increase of our revenues, Rx. 240,300 belongs to the Provincial account, and Rx. 155,100 to Imperial. In respect of Revenue, therefore, we expect on the Imperial account to be better off in the approaching year by only Rx. 155,100, as compared with the Revised Estimates of 1893-94; and the result therefore is that if we had on

—160,400
<u>+377,600</u>

our expenditure side merely to meet the same Imperial expenditure that was provided for in the Budget of last year, we would be, with the revenue we anticipate, in deficit by Rx. 1,276,200, less Rx. 155,100, or Rx. 1,121,100.

17. The deficit we will actually have to meet will be this amount *plus* any amount by which the expenditure for which we have to provide in the coming year exceeds that of the Budget Estimates of 1893-94. To find what this addition will be, take first the estimate of *Imperial expenditure in India*. The figures stand as follows:—

	Budget, 1893-94.	Budget, 1894-95.	Increase or Decrease.
	Rx.	Rx.	Rx.
Direct charges on Revenue	4,614,200	4,662,300	48,100
Interest	55,400	—113,400	—168,800
Post-Office, etc.	2,081,400	2,073,200	—8,200
Civil Departments	3,134,500	3,240,100	105,600
Miscellaneous	688,400	700,000	11,600
Famine	1,119,300	1,121,200	1,900
Railway Revenue Account	11,597,400	12,061,100	463,700
Irrigation	1,349,300	1,373,200	23,900
Buildings and Roads	1,878,500	1,507,800	—370,700
Army	15,693,500	16,169,200	475,700
Special Defence	252,300	113,500	—138,800
TOTAL	42,464,200	42,908,200	+ 444,000

18. The increases and decreases in this statement, which are less than Rx. 50,000, require no remark; they may be described as ordinary variations. The decrease under Interest merely means the transfer of more interest to the Railway Revenue account, the net increase under these two heads, Rx. 294,900, representing the additional working expenses and surplus-profits payments arising in connection with the larger traffic. Under Civil Departments we have a net increase of Rx. 105,600, of which the principal items are Rx. 28,500 under Administration (mostly Exchange Compensation allowance), Rx. 139,800 under Political (additional subsidy to the Amir Rx. 60,000, probable expenditure of demarcation under the treaty Rx. 50,000, Exchange Compensation Rx. 23,400); other increases Rx. 41,600 mostly due to the Exchange Compensation; savings in Police Rx. 26,900 (chiefly in Upper Burma); and savings under Marine Rx. 77,400 (mostly counterbalanced by short receipts).

19. The decrease of Rx. 370,700 under Buildings and Roads is due to economies forced upon us by our present financial condition. We have saved Rx. 194,200 by reducing the grant for Military Works, and Rx. 176,500 by cutting out practically every new work upon the Civil side (under India, General, and in Upper Burma) to which we are not absolutely committed.

20. The Army expenditure shows, as compared with the estimates presented last year, an increase of Rx. 475,700. Of this amount, the variations in pay and allowances which depend upon Exchange, alone account for Rx. 390,100.

For apart from the question of Exchange Compensation, the pay of the British Soldier is fixed in sterling, and the Rupee payment depends upon the rate of exchange annually fixed for the adjustment of transactions with the English Treasury. That rate was for 1894-95 fixed, as usual, upon the basis of the rates actually current in December last (namely 15½d.); but owing to the peculiar circumstances of the year, the rate has been declared "subject to

463,700
—168,800
294,900
28,500
139,800
41,600
—26,900
—77,400
Net . 105,600

revision hereafter, should it be deemed necessary, in consequence of the actual rate varying greatly from the official rate for any considerable length of time."

The balance of the excess, or Rx. 85,600, is composed of several items, of which a fuller account is given in the second part of this statement.

21. The *English expenditure* for which we have to provide is, on the whole account, £13,500 less than that of last year. We have an increase on account of interest of £288,500, owing chiefly to the temporary borrowings of which I shall have presently to give an account; on the other hand, there are savings of £33,300 on the Marine charges (as last year's estimates contained some special construction charges); of £12,600 under Territorial Pensions (due to the death of Maharaja Dhulip Singh); of £69,700 under Army charges (a balance between a large saving in Military stores and an increase in non-effective charges); and of £152,100 under Special Defence Works, the expenditure on which is coming to an end.

£	
+	288,500
—	33,300
—	12,600
—	69,700
—	152,100
—	34,300
TOTAL	—302,000
NET	—13,500

The other differences are small, and involve a net decrease of £34,300.

22. The *Exchange* upon our expenditure was in last year's Budget taken at 14½d., and came to Rx. 9,935,900. This year we take 14d. as our rate, and the Exchange comes to Rx. 11,307,400, so that we have an excess expenditure to provide for of Rx. 1,371,500.

23. Now, bringing all these increases of expenditure together, we have, as compared with Budget Expenditure of 1893-94—

	Rx.
In India—Imperial account—increase	444,000
In England, decrease	—13,500
For Exchange, increase	1,371,500
NET INCREASE	1,802,000

24. I have shown that our estimated revenue of 1894-95 falls short of the Budget expenditure of 1893-94 by Rx. 1,121,100; it therefore falls short of our budgetted expenditure of 1894-95 (so far as we have gone) by Rx. 2,923,100.

The difference between this and the 3½ crores I gave in my Statement of March 1st, is mainly in the reductions we have effected, chiefly under Buildings and Roads, both Military and Civil, in order to meet the shortness of our means.

SPECIAL MEASURES TO MEET THE DEFICIT.

25. This amount then, Rx. 2,923,100, is the deficit which we have to take special measures to meet. The first of these special measures is the re-imposition of Import Duties for which the Council passed a Bill on March 10th. The annual revenue to be obtained by that measure I then stated at Rx. 1,400,000, but the measure was modified in Select Committee by the reduction of the first-proposed duties on iron and steel, and I now put down the revenue at Rx. 1,350,000. I make a deduction of a little over ten per cent. for short collections the first year, and the actual figures passed into the estimates on account of the duties are—

	Rx.
Revenue (after deduction of Refunds)	1,200,000
Establishment	60,000
Net Produce	1,140,000

26. The next measure is that we are obliged to suspend the famine grant for

the time. This is, as has been often explained, the grant of surplus revenue to the construction of Protective Railways and Irrigation Works. Part of the original Rx. 1,500,000 is already pledged, that is, it is used to meet the loss to Government on its contracts in respect of the Bengal-Nagpur and Indian Midland Railways. That loss, in the coming year, is estimated at Rx. 368,800, and there is also an estimate of Rx. 10,000 for actual famine charges; so that of the whole grant only Rx. 1,121,200 is capable of being resumed, or rather withheld. We have deemed it expedient to allow Rx. 45,000 on account of certain Irrigation works, to remain charged against this head, but the remaining Rx. 1,075,200 will remain unspent in 1894-95. The principal Railway work which is being charged to this head at present is the East Coast Railway. And, as this work is classed also as a Productive work, a considerable grant has been given to it, under the head of Expenditure not charged against Revenue, so that this particular work will not very greatly suffer by the suspension of the grant. But this only means that the effect of the reduction is passed on to other Railway projects.

27. One other measure we have been obliged to take, namely, to call on Provincial Governments for contributions to our aid, in other words to force upon them severe economies, and appropriate the results to the benefit of our own account. The Government of India were most unwilling to have recourse to a measure which practically means the stoppage for the time of all administrative improvement, a measure which they feel must take all the heart out of Provincial Governments, by making them surrender all the fruits of careful administration, to fill the yawning gulf of our sterling payments. But as the Government of India said in addressing its demand to them, "the imperious necessity for imposing new taxation obliges the Government of India first to exhaust all available methods of increasing their resources; and this necessity is the only justification they can put forward for so soon making a practical revision of 'contracts' made only two years ago, and calling in balances which the Local Governments might legitimately claim as pledged to them for the purpose of administrative improvement."

28. The Government of India wish to acknowledge the readiness with which this demand has been met. The demand was issued on March 1st; it had been complied with by March 12th. Though not very large in amount, except in one case (that of Lower Burma), the demand comes so closely after the adjustment of assigned revenue to assigned expenditure, that it means in every case the adoption of active measures to restrict expenditure; and it must be remembered also that it comes after the Local Governments have already had, in the Exchange Compensation allowances, to meet new expenditure over and above their assignments.

29. The total amounts obtained from the Local Governments come to Rx. 405,000, their balances being, in nearly every case, reduced by the demand to the minimum prescribed by the Secretary of State.

30. By these three measures the deficit in our account is reduced by Rx. 2,621,200, namely:—

	Rx.
New Import Duties, net produce	1,140,000
Suspension of Famine Grant	1,076,200
Contributions from Local Governments	405,000
	<hr/>
	2,621,200
	<hr/>

from Rx. 2,923,100 to Rx. 301,900, at which figure it stands in the final statements.

31. I have already in my statement made in this place on March 10th given a full account of the reasons which have led to the Government accepting this deficit for the year 1894-95. I shall not weary the Council by a repetition of a subject then very elaborately discussed.

CLOSING OF THE MINTS.

32. The central fact of the Financial History of the year was the closing of the Mints on 26th June last. When the last Budget Estimates were presented to this Council, the Government of India were waiting for the Report of the Committee assembled under Lord Herschell's Presidency, to whom had been committed the examination of the Currency proposals of the Government of India. The Committee reported under date May 31st. Their recommendation was as follows:—

"It remains for us to state the conclusions at which we have arrived. While conscious of the gravity of the suggestion, we cannot, in view of the serious evils with which the Government of India may at any time be confronted if matters are left as they are, advise Your Lordship to overrule the proposals for the closing of the Mints and the adoption of a gold standard which that Government, with their responsibility and deep interest in the success of the measures suggested, have submitted to you.

But we consider that the following modifications of these proposals are advisable. The closing of the Mints against the free coinage of silver should be accompanied by an announcement that, though closed to the public, they will be used by Government for the coinage of rupees in exchange for gold at a ratio to be then fixed, say 1s. 4d. per rupee; and that at the Government treasuries gold will be received in satisfaction of public dues at the same ratio."

33. The Government of India having considered the Report, telegraphed to the Secretary of State on June 15th, proposing to take immediate action on this decision; the Secretary of State's consent was given on June 20th, and the necessary legislation was carried through on June 26th.

34. It was, of course, expected that the value of silver would be immediately affected by this change. It stood at about 38d. till June 25th, and then in four days it fell to 30½d. In July it recovered in the first week to 34d., but settled afterwards at about 32½d. In August and September it stood at about 34d. but it fell during October, and its price from then till the middle of January stood at about 32d. After this, a renewed fall set in, and in the first week of March the price was quoted at 27d.; at that price the metallic value of the rupee is about ten pence farthing.

35. Meantime, Silver legislation was taking place in the United States of America. Congress met on August 7th, and a Bill for the repeal of the silver purchase clause of the Law of 1890 was speedily introduced and was passed on August 28th by an unexpected majority. The Bill remained under discussion in the Senate from August 28th till October 30th, when it was passed after a strong opposition. It received the President's signature on November 1st. But it will be seen from my statement of the history of the price of silver that the legislation of the United States was practically a foregone conclusion. Its effect had been discounted, and the final passing of the law produced but little change in the price. The doubtful element in the case was the Indian legislation, and when that legislation became an accomplished fact, the price of silver immediately assumed a lower level.

36. During the months succeeding the closing of the Mints the price was favourably affected by a strong demand from India. The amounts imported into India during these months were Rx. 2,019,100, Rx. 781,400, Rx. 858,400, Rx. 1,127,400, Rx. 450,400, Rx. 926,600, Rx. 1,658,400, and in February Rx. 1,167,800. Total Rx. 8,989,500.

37. We have naturally been very much interested in the question what became in this country of these large imports of silver, but our enquiries have satisfied us that there has really been a very large demand for it for private use and possibly also for hoarding. The divorce between the value of coined and of uncoined silver brought about a state of things utterly unknown in Indian history—in the experience at least of any of the present generation—*vis.*, that uncoined silver could be sold at a profit for considerably less than its weight in coined silver. Silver dealers rushed in to make a profit out of the inability of the ordinary Indian to understand that it was not necessarily a profitable transaction to buy a tola of rupee-silver for fifteen annās. The question was violently agitated of imposing a silver import duty, so as to prevent a demand for silver that threatened to annihilate, by its own force, that balance of trade which had hitherto required settlement by Council Bills. But it was recognized that this demand for silver would have to be exhausted before our new Currency policy could have a fair chance, and it was determined to leave it to the operation of natural causes. The announcement was made upon January 18th that no duty would be placed on imported silver in aid of the Currency policy.

38. A certain amount of this silver, but not, so far as we can find, a very large amount, passed into Native States for use in coinage. It was easy to foresee that, by the closing of our Mints, our rupees would be appreciated with reference to the silver coinage of Native States, especially if measures were not adopted in these States to restrict their coinage in a corresponding measure. We advised the various Durbars to watch the current rate of exchange between their rupees and the Government rupee, and most of them stopped coinage very shortly after we had done it. The Native States are not, however, so favourably situated as we are, with reference to the maintenance of an appreciated coinage; for their rupees can, in most cases, be manufactured without elaborate machinery, and so far as we know (though we have not yet full information on the point), the local systems of currency are in very few cases strictly limited, like our own, to coin issued by the State in which it is current. We are, however, continuing to watch the effect of our policy upon the coin of Native States, and to advise them, from time to time, as to the economic effect of measures taken by ourselves or intended by them.

39. This excessive import of silver was not the only obstacle which our Currency measures had to meet with. We had been obliged, for reasons for which we were not responsible, to initiate these measures at the most unfavourable time of the year, namely, the beginning of the slack season—that is, the season when our exports are smallest; and the refusal of the Secretary of State to issue his Bills under 15½d. brought other importers into competition besides the importers of silver, and the balance of trade on the whole actually turned against India for a time. I think it is now recognized that the policy of refusing to issue Bills was a mistaken policy, and that it would have been better to issue Bills moderately so as to meet the demands on the Home Treasury. But the circumstances we had created were altogether new, and both officials and merchants and bankers had all to learn, by actual experience, what new economic forces had been called into existence, and how they affected the question of the appreciation of the rupee. The Secretary of State announced, on January 20th, his abandonment of his attempt to maintain a forced value for his Bills, and since then the course of commerce has given us ground for expecting that we shall be able to maintain the rupee at a value considerably above its metallic value, though not as yet approaching the limit at which there is any chance of its functions as a Currency beginning to be replaced by gold.

40. The first considerable issue of Council Bills was on 31st January, when a rate of 14½d. was obtained. The rate fell, till on the 26th February it stood at 13½d., but it has since then recovered to about 14d.

41. The question of the future value of silver is so doubtful that I hesitate to express any opinion regarding it. We are told that it has now touched bottom, but we have been told that very often, in past times, and yet it has sunk lower. I do not agree with those who think that if we were to open our Mints, we would benefit by enhancing the value of silver. It should be remembered that we can enhance that value only by actually absorbing a considerable share of the world's produce of the metal. But the absorption and coinage of a large amount of silver is an effect that can only follow, and be concomitant with, a fall in the value of the rupee. It is, in fact, economically, the effort of the Currency of the country to adapt itself, by increase in volume, to its decrease in value. In other words, if the opening of our Mints is to enhance the value of silver, it can do so only by a process which involves the depreciation of the value of the rupee; and therefore, as it seems to me, no enhancement of the value of silver, brought about by our opening our Mints, can be of any advantage to us.

42. I think that even those who do not believe in the ultimate success of our currency legislation, must at all events admit that we have, by its means, escaped an immediate disaster; and those who believe that the only way of issue from the difficulty lies through bimetallism, will admit that they are several steps nearer its realization when the rest of the world has ceased to rely on India's consent to bear the main portion of the burden of silver-depreciation.

SECRETARY OF STATE'S OPERATIONS.

43. By the circumstances to which I have alluded, the sale of Council Bills was practically in suspense from July 1893 to January 1894, inclusive. The Secretary of State had estimated to raise £18,700,000 by Bills, of which £1,189,200 was the estimated amount of net payments to Railway Companies, the remainder representing the current requirements of the year. During the first three months of the year he issued Bills for £5,722,799, an unusually large amount, which raised his sterling balance on June 30th to £4,173,925; but from that date till the end of January the amounts received were, in each of the seven months, £51,750, £78,250, £6,672, £4,791, £609,544 (in November), £20,937, £90,658, giving a total of only £862,602.

44. During this period, therefore, the Secretary of State had to carry on his transactions by borrowing. The high balance of June 30th carried him over July and August, and besides this balance he had at that time over £400,000 in hand on account of a borrowing and repaying transaction provided for in the Budget Estimates. He had estimated to raise £1,300,000 of 3 per cent. stock to pay off Railway debentures, and though he raised most of this amount in July, the repayments were not complete till October. His cash balance, however, was very low in the end of August, namely, £460,903. In September

he issued 3½ per cent. debentures for £1,386,000, and borrowed temporarily

£500,000; and the net temporary borrowings in subsequent months were—October £1,500,000, November £750,000, December £750,000, January £2,750,000, giving a total of £6,250,000.

45. The figures as made up on actual accounts till the end of January, and estimates received from the Secretary of State for the two last months give us—

	Till January : Accounts.	February and March Ac- counts and Estimates.	Total for year.
Funds raised by Permanent Debt	1,386,000	...	1,386,000
Council Bills	6,585,400	2,814,600	9,400,000
Temporary Borrowing (net)	6,250,000	—250,000	6,000,000
	<hr/> 14,221,400	<hr/> 2,564,600	<hr/> 16,786,000

It will be seen therefore that the Estimate of Council Bills now made falls short by £9,300,000 of the Estimate of last March, and that this amount has been made up by permanent debt £1,386,000, temporary debt £6,000,000, a reduction in the cash balance of £1,013,000: total £8,399,000; besides reductions in the payments to Railway Companies and on account of remittances.

46. We have *per contra* an enormous accumulation of silver in our Treasury Balances in this country. The £8,399,000 of debt incurred, and cash balance reduced, during the year are represented, at an exchange of 15*d.*, by Rx. 13,438,400 in this country, and our cash balances in India being practically increased by this amount, stand at the close of January, February, and March at the unprecedented figures of Rx. 23,802,200, Rx. 25,016,500 and Rx. 26,251,800 (estimated).

47. Next year, it will be seen that it is not the present intention of the Secretary of State to draw Bills on our accumulations of silver in order to pay off his temporary debt. He proposes to borrow £8,300,000, of which £6,000,000 will be used to discharge the temporary obligations outstanding at the end of the current year; and the rest is required for his ordinary transactions. The amount for which he proposes to draw, £17,000,000, is only the expenditure of the year, with the addition of the Capital outlay on account of State Railways, and a portion of his remittance payments. It must, as usual, be understood that these figures are given with reservation of entire liberty to the Secretary of State to vary his borrowings and his drawings as he may find occasion.

LOANS IN INDIA.

48. In the Budget Estimates of 1893-94 we proposed to raise a loan of Rx. 3,000,000. On July 14th, while we were still in ignorance of the approaching failure of Council Bills, a notification was issued calling for tenders for Rx. 3,500,000 at 3½ per cent., and at the same time notice was issued for the discharge of such part of the 4½ per cent. loans of 1878 and 1879 (excluding the 7 shillings per cent. portion) as still remained unconverted, under previous notifications, into four per cents. The loan was raised at an average of Rs. 96-3-2½ per cent., producing Rx. 3,366,130, against a nominal value of Rx. 3,499,100 (as Rx. 900 remained unissued). Of the 4½ per cent loan we estimate to have paid off Rx. 1,100,000 during the current year, leaving Rx. 241,447 undischarged. The three-and-a-half per cents. are now above par.

49. It is hardly necessary to say that with our huge silver balances, we have no intention of raising a loan in India during the year for which estimates are now being presented.

CONCLUSION.

50. Such then is our programme for the approaching year,—a programme of retrenchment and of vigilance, intended to tide us over what I have called a transition period. The means which we have adopted in our Budget Estimates of nearly balancing our Revenue and Expenditure, are means which will hardly be available a second time. It is at some risk that we suspend even for one year the provision of a crore or a crore and a half which we shall certainly require if a famine season comes upon us : we cannot call our financial position safe till we find ourselves again with that crore to the good. The forty lakhs also which we obtain from the Provincial Governments exhausts for the time that source of relief from temporary difficulties. A year hence, as I said a fortnight ago, we shall certainly have to reconsider our position, and we hope by that time to have a much more definite knowledge of the conditions upon which our future financial position rests.

PART II.

DETAILS OF ACCOUNTS AND ESTIMATES.

Section I.—Accounts of 1892-93.

51. The Revised Estimates for the year 1892-93 showed a deficit of Rx. 1,081,900. As anticipated by Sir D. Barbour in paragraph 18 of the Financial Statement of March last, I am now able to state that the actual deficit is somewhat less. The final Accounts have been closed with a deficit of Rx. 833,412.

52. Explanations of the variations under the several heads of the Account figures from those of the Budget and Revised Estimates will be found in the Appropriation Report published in the *Gazette of India* of the 17th Instant. The following statement contains a general comparison of the Revised Estimates with the Accounts of the year:—

		Revised Estimate.	Accounts.	Accounts, better.	Accounts, worse.
REVENUE.					
India	Rx.	89,683,000	89,819,707	136,707	...
England	£	211,400	220,233	8,833	...
Exchange	Rx.	126,800	132,498	5,698	...
TOTAL	Rx.	90,021,200	90,172,438	151,238	...
EXPENDITURE.					
India—					
Imperial, Provincial, and Local	Rx.	64,965,100	65,021,394	...	56,294
Adjustment of Provincial and Local Surplus or Deficit	Rx.	—363,800	—177,359	...	186,441
NET	Rx.	64,601,300	64,844,035	...	242,735
England	£	16,563,600	16,334,541	229,059	...
Exchange	Rx.	9,938,200	9,827,274	110,926	...
TOTAL	Rx.	91,103,100	91,005,850	97,250	...
Deficit	Rx.	1,081,900	833,412	248,488	...

1893. General
ills.

53. The total Revenue and total Expenditure in India were higher than taken in the Revised Estimate by Rx. 136,707 and Rx. 56,294, respectively, giving a net improvement of Rx. 80,413. The distribution of these variations between Provincial and Imperial was as follows:—The Imperial Revenue fell short of the Revised Estimate by Rx. 19,678, and the Imperial Expenditure exceeded the Revised Estimate by Rx. 86,350, while the Provincial and Local Revenue exceeded the Revised Estimate by Rx. 156,385, and the Provincial and Local Expenditure fell short of the Revised Estimate by Rx. 30,056. Consequently there was an improvement in the Provincial and Local Section of the Accounts of Rx. 186,441, and a deterioration in the Imperial Section of Rx. 106,028.

In England there was a reduction in Expenditure, including Exchange, of Rx. 339,985, and an increase of Revenue of Rx. 14,531; these together yield

an improvement in England of Rx. 354,516. Deducting from the last figure Rx. 106,028, the amount of the deterioration in the Imperial Section of the Accounts in India, we arrive at the net amount of Rx. 248,488, by which the deficit of the Accounts fell short of that estimated in March last.

54. The larger part of the increase in Revenue in India occurred under the 1892-93. Revenue Principal Heads of Revenue, Rx. 130,375. The Army Receipts were also in India. under-estimated by Rx. 57,243.

55. The Army Expenditure in India was under-estimated in the Revised 1892-93. Estimates by Rx. 66,891. Under other heads the Expenditure on the whole Expenditure in India. was slightly less than the Revised Estimate.

56. The Army Expenditure in England fell short of the Revised Estimate 1892-93. by £133,504 and the Special Defence Expenditure by £48,668, owing in both Expenditure in England. cases chiefly to the progress in the supply of stores being smaller than was anticipated.

57. The Expenditure not charged to Revenue amounted to Rx. 3,986,290, 1892-93. being very slightly less than the amount taken in the Revised Estimate.

Section II.—Revised Estimate of 1893-94.

58. The following statement contains a general comparison of the figures of the Budget and Revised Estimates of 1893-94 :—

			Budget.	Revised.	Revised, better.	Revised, worse.
REVENUE.						
India Rx.		89,690,900	90,121,000	430,100	...
England £		193,500	187,700	...	5,800
Exchange Rx.		121,300	120,800	...	500
TOTAL	. Rx.		90,005,700	90,429,500	423,800	...
EXPENDITURE.						
India—						
Imperial, Provincial, and Local	. Rx.		66,572,300	66,548,400	23,900	...
Adjustment for Provincial and Local Surplus and Deficit	. Rx.		—751,200	—478,800	..	272,400
NET	. Rx.		65,821,100	66,069,600	...	248,500
England £		15,843,800	15,909,600	...	65,800
Exchange Rx.		9,935,900	10,243,100	...	307,200
TOTAL	. Rx.		91,600,800	92,222,300	...	621,500
DEFICIT	. Rx.		1,595,100	1,792,800	...	197,700

59. There has been a moderate increase in the Revenue; and the total 1893-94. General Expenditure in India has been restricted to a sum slightly less than the Estimate Results. of March last; but the Imperial Expenditure in India and the Expenditure in England have exceeded the Budget Estimate, and the slight fall in the rate of exchange from 1s. 2'75d. to 1s. 2'6d. has caused an increase in the direct charge for exchange of Rx. 265,900. The net result is that it is now anticipated that the deficit of the year will exceed that entered in the Budget Estimate by Rx. 197,700, and will amount to the very considerable sum of Rx. 1,792,800. Probably the deficit will be somewhat reduced when the accounts of the year are made up.

60. The increase in the Revenue in India above the Budget Estimate amounts on the whole only to Rx. 430,100. But the Revenues generally have increased in a very satisfactory manner, and it is the heavy falling off in the receipts from Opium and Salt that has reduced the net increase to the amount named. Of the improvement of Rx. 430,100, the sum of Rx. 325,200 is Imperial and Rx. 104,900 Provincial and Local.

61. The only heads under which the Revenue will fall short of the Budget Estimates by any considerable amount are :—

	Rx.
Opium	621,800
Salt	241,600
Provincial Rates	220,800
Marine	54,700
Gain by Exchange	78,000

62. The decrease under Opium is in the receipts from the sale of Bengal Opium, and is due partly to the small crop having necessitated a reduction of 351 chests in the quantity sold, but mainly to the average price realised being only Rs. 1,109 a chest as compared with Rs. 1,250 taken in the Budget Estimate.

63. The decrease under Salt is largest in Madras, amounting to Rx. 140,200 ; there it is due, not to any reduction in the quantity of salt issued, but to the fact that purchasers have again begun, probably in consequence of the fall in the price of Government securities, to avail themselves of the option of deferring payment of duty for six months on lodging security. In Northern India the falling off is considerable, amounting to Rx. 120,000, and represents an actual reduction in the quantity of salt issued. Owing to a failure of manufacture at the Sambhar Lake, the price of that salt had to be raised, and this necessarily had the result of reducing the sales of it. This ought not, however, to have caused a reduction of Salt Revenue in the whole of India, as Salt from other sources should in ordinary course have taken the place of the Sambhar Salt ; but this has not occurred to nearly the full extent of the reduction in Northern India.

64. The decrease in Provincial Rates occurs in Madras. Part of it is nominal, being caused by a change in classification which transfers certain quit-rents, amounting to Rx. 141,100, from this head to Land Revenue. The remainder is due to the suspension of the Village Cess in Madras for one year (1st July 1893 to 30th June 1894), the accumulated balance of the local fund to which the receipts from the cess appertain being sufficient to meet a year's expenditure.

65. The decrease under Marine occurs in the Imperial Marine Department and is nominal, being counterbalanced by a reduction in Expenditure ; recoveries on account of ships or launches built or other work done at the Government Dockyards for Local Governments being now taken on the Dockyard Accounts as deductions from Expenditure instead of as Revenue. The decrease would have been larger had it not been for large receipts, amounting to Rx. 19,300, not anticipated in the Budget Estimate, from the hire of vessels of the Indian Marine.

66. The uncertainty in estimating the transactions which pass under the head of Gain by Exchange was explained in paragraph 48 of the Financial Statement of last March.

67. The following are the more important increases of Revenue in India :—

	Rx.
Land Revenue, including that due to Irrigation	311,500
Stamps	116,900
Excise	212,900
Forest	88,300
State and Guaranteed Railways	646,300

68. Part, Rx. 141,100, of the increase under Land Revenue is nominal, as explained in paragraph 64 above. A considerable part, Rx. 66,100, of the increase in Bombay is also nominal, as it occurs in the adjustment of alienated Land Revenue, and is counterbalanced by an increase in Expenditure. See paragraph 77 below. The remainder, Rx. 104,300, represents the real increase and is contributed to by all Provinces, except the North-Western Provinces and Oudh, Burma and the Central Provinces.

69. The increase under Stamps occurs in all Provinces except Burma. The increase under Excise is also general, the largest increases being in Bengal, Rx. 60,000; Madras, Rx. 50,000; Bombay, Rx. 46,000; and the North-Western Provinces and Oudh, Rx. 30,000.

70. The largest part of the increase under Forest occurs in Burma, where, owing to a favourable season and the development of forest operations, it is anticipated that the receipts will exceed the Budget Estimate by Rx. 85,000.

71. The Railway Revenue has developed in a most satisfactory manner. The Budget Estimate took credit for a considerable increase in the receipts above those of 1892-93; but the returns up to date justify the anticipation that the Estimate will be exceeded by nearly two-thirds of a crore of rupees. Almost every Railway has shared in the general prosperity, the only exception of note being the Burma Railway, on which the development of traffic has experienced a check for reasons believed to be of a temporary nature: the prices of paddy have been low, and the cultivating classes in Burma have consequently been less well off than usual.

72. The decrease in the sterling Revenue is accounted for by the fact that the Secretary of State, owing to the failure for a time to sell Council Bills, had for a great part of the year no balance available, as usual, for temporary investment. The receipts under Interest are therefore expected to fall short of the Budget Estimate by £10,400. The receipts under most other heads will also be less than the estimates by small amounts; but the aggregate of these decreases is more than counterbalanced by an increase of £13,700 under Army Receipts in England. *1893-94. Revenue in England.*

73. The Imperial Expenditure in India is expected to exceed the Budget Estimate by Rx. 143,600, while the Provincial and Local Expenditure will be less than the Estimate by Rx. 167,500. The difference between these two is the Rx. 23,900 shown in paragraph 58 as the reduction of the Expenditure in India below the Budget Estimate. This figure is the net result of a number of increases and decreases. *1893-94. Expenditure in India.*

74. Before referring to the several increases and decreases, one cause of increased expenditure under most heads may be mentioned. In August last the Government of India decided to give to European and Eurasian officers not domiciled in India some compensation for the losses being suffered by them in consequence of the great and continued fall in the rate of exchange. The form which the portion of this compensation that affects Expenditure in India took was the grant to such officers of an allowance, payable monthly with salary, and designated Exchange Compensation Allowance, sufficient to enable each officer to remit to Europe one-half his salary, subject to a maximum limit of £1,000 a year, at a privileged rate of exchange, which was fixed till further orders at 1s. 6d. the rupee. The allowance is payable as a percentage on salary, varying with the rate of exchange assumed as the market rate for the quarter, and calculated to yield an amount equal to the difference between one-half salary converted at 1s. 6d. and one-half salary converted at the average market rate. The average market rate adopted for the payments of Exchange Compensation Allowance in each quarter is the average Calcutta demand rate for the *Exchange Compensation Allowances.*

three months ending on the 15th of the month preceding the quarter. The allowances were granted with effect from the 1st April 1893. The rates taken as the average market rates for calculating the payments in each quarter have been—

	s.	d.
April to June 1893	1	2½
July to September 1893	1	3½
October to December 1893	1	3½
January to March 1894	1	3½
Average for the whole year	1	3½

75. The following table shows the payments of Exchange Compensation Allowance as taken in the Revised Estimates under each head of Account, Imperial and Provincial:—

	Imperial.	Provincial.	TOTAL.
	Rx.	Rx.	Rx.
3. Land Revenue	4,200	40,400	44,600
4. Opium	2,500	...	2,500
5. Salt	2,800	300	3,100
6. Stamps	100	100	200
7. Excise	500	200	700
9. Customs	900	1,600	2,500
11. Forest	7,100	4,700	11,800
12. Registration	100	100
15. Post Office	3,400	...	3,400
16. Telegraph	8,500	...	8,500
17. Mint	1,800	...	1,800
18. General Administration	13,400	23,800	37,200
19 A. Law and Justice: Courts of Law	3,200	64,700	67,900
19 B. Law and Justice: Jails	1,300	4,000	5,300
20. Police	4,800	25,800	30,600
21. Marine	5,200	700	5,900
22. Education	300	10,100	10,400
23. Ecclesiastical	8,900	...	8,900
24. Medical	1,200	21,800	23,000
25. Political	12,600	2,500	15,100
26. Scientific and other Minor Departments	9,200	1,400	10,600
30. Stationery and Printing	300	600	900
37. Construction of Railways	100	100
38. State Railways: Working Expenses	20,300	1,800	22,100
39. Guaranteed Companies (Land and Super- vision)	3,100	...	3,100
41. Miscellaneous Railway Expenditure	1,700	...	1,700
42. Major Works: Working Expenses	3,300	5,700	9,000
43. Minor Works and Navigation	1,700	...	1,700
44. Military Works	9,600	...	9,600
45. Civil Works	4,300	21,700	26,000
46. Army: Effective	*263,500	...	*263,500
47. Special Defence Works	1,600	...	1,600
TOTAL	401,300	232,100	633,400

* This is the net amount paid, after making from the amounts due the prescribed deductions on account of family remittances at the favourable rate of 1s. 4½d. which were made between April and August before the orders granting the Exchange Compensation Allowances issued. These orders withdrew the privilege of making family remittances through the Government Account.

The distribution of the Provincial total of Rx. 232,100 among the several Provinces is as follows:—

	Rx.
Central Provinces	13,800
Burma (Lower)	19,700
Assam	7,800
Bengal	45,000
North-West Provinces and Oudh	42,700
Punjab	30,100
Madras	38,400
Bombay	34,600
TOTAL	232,100

76. The more important increases of Expenditure in India in 1893-94 as compared with the Budget Estimates are—

	Rx.
Assignments and Compensations	81,400
Interest	157,000
Law and Justice—Courts of Law	89,600
Political	97,500
Stationery and Printing	58,600
State Railways—Working Expenses	171,600
Army	318,300

*1893-94. Increases
of Expenditure
in India.*

77. The increase under Assignments and Compensations occurs almost entirely in Bombay: the debit and credit adjustments of alienated Land Revenue—adjustments peculiar to that Province—have been increased in consequence of the actual area of certain alienated lands in Sind having been found to be larger than the area previously recorded: there is a similar increase on the Revenue side under Land Revenue. See paragraph 68 above.

78. The increase under Interest represents the discount on the $3\frac{1}{2}$ per cent. loan for Rx. 3,500,000 raised in August last, and the portion of the interest on that loan payable in the year 1893-94, diminished by the saving in the interest on the $4\frac{1}{2}$ per cent. paper which was notified for discharge in October. When the Budget Estimate was framed last March, no provision was made for the interest on the new loan, as it was then assumed that it would be issued at 4 per cent., and that the interest payable during the year would be covered by the premium on the loan.

79. The grant of Exchange Compensation Allowances accounts for the larger part of the increase under Law and Justice. But in some Provinces also temporary appointments of Judges not provided for in the estimate have had to be sanctioned or continued.

80. The increase under Political is due chiefly to the enhancement by Rx. 60,000 a year of the subsidy paid to the Amir of Afghanistan, which was agreed to in the negotiations of Sir Mortimer Durand, and to the cost of Sir Mortimer Durand's Mission to Cabul. The Herat Mission, the visit to Mekran of the Agent to the Governor General in Baluchistan, the exploration of the Borkhampti Country, the Kinchaing Mission, and the Anglo-Siamese Boundary Commission have also added to the expenditure under this head.

81. Most of the Provinces show an increase of Expenditure on Stationery and Printing: and the demands on the Calcutta Stationery Office have necessitated considerably larger purchases in this country than were anticipated.

82. The increase of Expenditure on State Railways was caused by the larger traffic and was necessary to earn the larger receipts.

83. The larger part of the increase under Army is due to the grant of Exchange Compensation Allowance, the charge to this head being Rx. 263,500 as

given in the table in paragraph 75. The following supplementary grants were also sanctioned during the year, namely—

	Rx.
For the Kachin, South Lushai and Kelat operations	21,500
For the Gilgit Agency	48,150
For the purchase of additional horses to replace those taken to Egypt by the 7th Dragoon Guards	16,900
For rations on the field service scale in the Chin country	16,200
Other smaller grants	14,550
TOTAL	117,300

On the other hand it is anticipated that the Budget Grants for the year will in some cases prove to have been higher than necessary.

84. The more important decreases of Expenditure in India as compared with the Budget Estimates are—

	Rx.
Land Revenue	57,700
Opium	370,800
Forest	69,700
Police	84,000
Marine	115,000
Civil Works	145,400
Special Defences	89,000

85. The decrease under Land Revenue occurs chiefly in the North-Western Provinces and Oudh, Rx. 23,700, Bombay, Rx. 18,400, and Assam, Rx. 12,200. In the North-Western Provinces and Oudh the Expenditure on Survey and Settlement has been restricted below the Estimate: in Bombay the payments to Village officers have been less than the Estimate, and some new establishments for which provision was made have not yet been entertained: in Assam the direct payments for the collection of Land Revenue are declining with the substitution of Tahsils for collection through Mauzadars, and in that Province also some new establishments provided for have not yet been entertained.

86. The reduction in Opium Expenditure is caused by the failure of the crop: the Estimate provided for the payments for an average crop.

87. The Budget grants under Forest have proved to be higher than necessary in all Provinces, the saving being largest in Madras and Bombay.

88. The decrease under Police is distributed over all the Provinces: the amounts entered in the Budget Estimates were generally too liberal, provision being made for schemes of re-organisation and improvement not fully ready to be brought into operation, as well as for the full existing scale of expenditure.

89. Most of the saving under Marine occurs in the Imperial Marine Department and is nominal, being counterbalanced by the reduction in Revenue, as explained in paragraph 65 above. There is also a reduction of Rx. 30,100 in Bengal and Burma, due to the progress in the construction of certain new vessels having been slower than was anticipated.

90. The decrease under Civil Works occurs in the Provincial and Local Expenditure of most of the Provinces, the largest reductions being in Madras and Lower Burma. The progress in some works for which provision was made in the Budget Estimate has not been so great as anticipated.

91. The execution of some works for which provision was made in the Estimate for Special Defences has been postponed: hence the saving under that head.

92. The main cause of the excess of £65,800 in the Expenditure in England was the failure to sell Council Bills for a time, which necessitated borrowing and increased the Interest charges. The increase due to this cause amounts to £84,600. Discount on the Loan of £1,300,000 and on India Debentures, for which no provision was made in the Budget Estimate, amounted to £19,500, and raised the total excess under Interest to £104,100. The Expenditure in England on Special Defence Works will be less than the Estimate by £66,000, the indents for stores sent from India having been reduced in consequence of the postponement of works mentioned in the preceding paragraph. The variations in other heads are smaller, and result in a slight excess over the Budget Estimate.

93. The increase in the Sterling payments accounts for Rx. 41,300 of the increase in the charge under Exchange. The remaining Rx. 265,900 is due to the fall in the rate of exchange from 1s. 2.75d. as estimated in March 1893 to 1s. 2.6d. realised upon the remittances of the year.

Section III.—Budget Estimate of 1894-95.

94. The following Statement compares the Revenue and Expenditure in India and in England in the Budget Estimates of 1894-95 with that in those of 1893-94:—

		1893-94.	1894-95.	1894-95, better.	1894-95, worse.
REVENUE.					
India	Rx.	89,690,900	91,728,000	2,037,100	...
England	£	193,500	173,200	...	20,300
Exchange	Rx.	121,300	123,700	2,400	...
TOTAL	Rx.	90,005,700	92,024,900	2,019,200	...
EXPENDITURE.					
India—					
Imperial, Provincial, and Local	Rx.	66,572,300	66,373,500	198,800	...
Adjustment of Provincial and					
Local Surplus or Deficit	Rx.	—751,200	—1,184,400	433,200	...
Net	Rx.	65,821,100	65,189,100	632,000	...
England	£	15,843,800	15,830,300	13,500	...
Exchange	Rx.	9,935,900	11,307,400	...	1,371,500
TOTAL	Rx.	91,600,800	92,326,800	...	726,000
DEFICIT	Rx.	1,595,100	301,900	1,293,200	...

95. The general features of the year 1894-95, as compared with the Budget Estimates of 1893-94, may be enumerated as follows: A substantial increase of Revenue, amounting to Rx. 837,100; an increase of Revenue net (after deducting the increased cost of establishment) of Rx. 1,140,000 by the imposition of new taxation; a large increase of Expenditure in India by the grant of Exchange Compensation Allowances to the services; a large reduction of Expenditure in India secured by the stoppage of all optional Expenditure chargeable to the Famine Grant and by stringent measures of economy under other heads; an increase in the Interest charges in England with reduction of other sterling Expenditure; and a large increase under Exchange caused by the fall in the value of the rupee from 1s. 2½d. to 1s. 2d.

The net result is a considerable improvement: the deficit will be Rx. 301,900 as compared with Rx. 1,595,100 in the Estimates of 1893-94. The reasons

why it has been decided by the Government of India to accept a deficit in the Estimates were fully explained to the Council* on March 10th.

1894-95. Revenue
in India.

96. The Revenue in India in 1894-95 is expected to exceed that taken in the Budget Estimates of 1893-94 by Rx. 2,037,100. Of this, the sum of Rx. 1,200,000 is secured by the imposition of new taxes.

The increase in Imperial Revenue is Rx. 2,096,900, while there is a decrease of Rx. 59,800 in Provincial and Local Revenue. The distribution between Imperial and Provincial would have been different but for the contributions which the Provincial Governments have been called on to pay in consideration of the severe financial straits of the Imperial Government.

The amounts paid by the several Provinces are:—

	Rx.
Central Provinces	43,000
Lower Burma	180,000
Assam	16,000
Bengal	30,000
North-Western Provinces and Oudh	50,000
Madras	30,000
Bombay	56,000
	<hr/> 405,000 <hr/>

The contributions are brought upon the Estimates and Accounts by transferring the amount from the Provincial to the Imperial share of the receipts under Land Revenue: the Provincial Revenues being thereby diminished and the Imperial Revenues increased. The amount of the contributions levied being Rx. 405,000, the distribution of the increase of Revenue of Rx. 2,037,100, in ordinary course and apart from the special and extraordinary measure resorted to help towards securing equilibrium in the Imperial Budget Estimate, would have been Imperial Rx. 1,691,900 (or if we exclude the new Customs Revenue, Rx. 491,900) and Provincial and Local Rx. 345,200.

1894-95. Decrease
of Revenue in
India.

97. The only decreases of Revenue of importance are—

	Rx.
Opium	922,600
Provincial Rates	181,800
Mint	162,800
Marine	74,400

98. The loss under Opium occurs in the receipts from the sale of Bengal Opium, and is caused chiefly by the difference in the market price. Last March the current prices justified the assumption of an average price of Rs. 1,250 a chest: now it is not safe to assume a higher price than Rs. 1,070 a chest. The difference of Rs. 180 a chest means a loss of Rx. 761,400. The

* Extract from the Hon'ble Mr. Westland's speech in the Legislative Council on 10th March 1894:—

"The view which Your Excellency's Government has taken is, that we are at present in a transition period and that whatever measures we take, whether they are sufficient or insufficient to fill up the deficit in the accounts of the year 1894-95, they must be looked upon as only provisional and temporary. We are still passing through—it may be said we have only just entered upon—that currency crisis upon the settlement of which depends our future finance. Whether we shall be able to establish our rupee at what we may call a favourable figure, is a question the solution of which must practically be left to experiment. Until two months ago circumstances were against us, and the experiment was practically in suspense. The period during which we have been able to watch the effect of commercial operations upon our currency is not yet more than a few weeks old—far too short a time to enable us to judge whether the falling rupee is to carry us into perpetually increasing difficulties, or whether a recovery from its present low figure is to give us some respite from our financial troubles and anxieties. Even since my statement was laid before the Council, there has been a change; whether it is a merely temporary one or not, it is nevertheless an important change—in the aspect of the matter. Time has not yet declared on the one side or on the other, and it is impossible for any one as yet to pronounce whether our financial position is going to improve or going to deteriorate. It is a serious confession to make, but it is nevertheless true, that our financial position in the immediate future depends upon circumstances absolutely outside our control, and that we can do little more than watch in what direction the forces are working which will in the end either bring us security from these perpetual variations or still more serious troubles than any we have yet had to provide against."

"This then is the position we had to meet. Do what we will, the year 1894-95 must be a transition period—a period at the end of which, we have every reason to hope, we shall be far better able than we now are, to judge in what direction our finance is progressing."

"Under these circumstances, the question that presented itself to us was whether we were to assume that all hope of the recovery of the rupee, within some measurable distance of time, was lost, and to adopt heroic measures which would place ourselves at once in a position to meet our current rate of expenditure, even with the rupee at fourteen pence; or whether we should for the present adopt a policy of waiting for further developments, making all the temporary arrangements we could for tiding over a year of extreme difficulty, and meantime merely lay the foundation of the fiscal measures to which, in the event of our ultimately having to fill the whole estimated deficit of 3½ crores, we would be obliged to have recourse."

rest of the decrease is in consequence of the reduction in the probable quantity to be sold necessitated by the poor crops of last and previous years.

99. The decrease in Provincial Rates is the result of a decrease in Madras of Rx. 251,100 and an increase in other Provinces of Rx. 69,300. The improvement in the other Provinces is the normal increase in the rates, which increase with the Land Revenue. Of the decrease in Madras, Rx. 151,500 is nominal, being the amount transferred to Land Revenue in consequence of the change of classification described in paragraph 64 above: the remainder is caused by the suspension of the collection of the cess mentioned in the same paragraph during the first three months of the year, and by the rate at which the cess will be levied from 1st July next being lower than in the past.

100. The closing of the Mints to the free coinage of silver accounts for the loss of Revenue under Mint: as no silver will be tendered for coinage, there will be no seignorage receipts.

101. The decrease under Marine is nominal, as explained in paragraph 65 above.

102. The following are the more important increases of Revenue in India anticipated in 1894-95:—

	Rx.
Land Revenue, including that due to Irrigation	599,300
Stamps	127,700
Excise	171,700
Customs	1,207,700
Assessed Taxes	53,700
Forest	57,200
Post Office	56,200
State and Guaranteed Railways	858,900
Irrigation—Major Works	67,900

1894-95. Increases
of Revenue in
India.

103. Of the increase under Land Revenue, a portion, Rx. 151,500, in Madras, and Rx. 69,800 in Bombay, is nominal, for reasons explained in paragraphs 99 and 68 above. Bengal being permanently settled, shows a slight increase only, and the small Provinces under the direct administration of the Government of India show hardly any improvement on the whole. In the North-Western Provinces and Oudh there is a substantial falling off; but that is merely the result of a correction of an error in estimating. The Estimates of the last few years in that Province have not been realised, and it has been ascertained that sufficient allowance was not made in them for the normal arrears of revenue left uncollected at the end of the financial year: a larger allowance for arrears is made in the Estimate for 1894-95.

Excluding the North-Western Provinces, Bengal and India—General, all the other Provinces show substantial increases in the amount of Land Revenue, these being the result of Survey and Settlement operations in temporarily settled districts, and of the expansion of cultivation in provinces where the amount of the Revenue depends on the extent of cultivation.

104. The improvement in the Stamp Revenue, though unequally distributed over the Provinces, is general throughout India with the exception of Burma, where there has been a check to the development of this branch of income.

105. The increase in the Excise Revenue is also general, Burma being the only exception: the decrease in Burma is due to the adoption of the policy in regard to opium which was described in paragraph 71 of last year's Financial Statement.

106. The increase under Customs is due to the new duties imposed by Act VIII of 1894. The Customs Revenue has not done well in 1893-94, and had there been no change in the duties, it would not have been possible to anticipate any appreciable increase in this head of Revenue.

107. The increase under Assessed Taxes represents the normal development of this branch of Revenue, the amount of increase being somewhat greater than usual; with the exception of Bengal and Bombay, all provinces share in this increase, Madras being the largest contributor.

108. Most Provinces contribute to the increase under Forest, which is of rather more than the normal annual growth of this head of Revenue, the specially large increase being in Burma.

109. The increase under Post Office represents the normal annual progress of the Department, the amount being somewhat higher than usual, as the Revenue increased at more than the average rate in 1893-94.

110. The Railway Revenue is taken at an amount somewhat higher than that which will be realised in 1893-94. The increase is justified either by additional mileage recently opened or to be opened next year, or in the case of lines under development, by the steady growth of traffic.

111. The increase under Irrigation occurs mainly in the Punjab, an extension of irrigation from the Western Jumna, the Bari Doab, and the Chenab Canals being expected. The revenue from the Sirhind Canal was low in 1893-94, owing principally to the closure of the canal for silt clearance for three months: the normal revenue is expected in 1894-95.

1894-95, Expenditure in India.

112. The Expenditure in India in 1894-95 on the whole will be of about the same amount as in the Budget Estimate of 1893-94. Imperial Expenditure will be less by Rx. 572,200, while Provincial and Local Expenditure will be more by Rx. 373,400, the net result being the small excess of Rx. 198,800 shown in the table in paragraph 94. This approximate equality is the final result of many large variations in both directions.

1894-95, Exchange Compensation Allowances.

113. The following table gives the same information for 1894-95 in regard to the Exchange Compensation Allowances as is given above for 1893-94 in the table in paragraph 75. In estimating the amounts for 1894-95, 1s. 2d. the rupee has been assumed as the average market rate of the year:—

	Imperial.	Provincial.	TOTAL.
	Rx.	Rx.	Rx.
3. Land Revenue	6,700	75,100	81,800
4. Opium	3,900	...	3,900
5. Salt	5,100	500	5,600
6. Stamps	100	300	400
7. Excise	800	400	1,200
9. Customs	1,600	2,600	4,200
11. Forest	12,000	8,200	20,200
12. Registration	100	100	200
15. Post Office	4,900	...	4,900
16. Telegraph	14,400	...	14,400
17. Mint	3,400	...	3,400
18. General Administration	22,800	38,700	61,500
19 A. Law and Justice: Courts of Law	5,500	110,000	115,500
19 B. Law and Justice: Jails	2,100	6,700	8,800
20. Police	8,900	44,700	53,600
21. Marine	10,100	1,300	11,400
22. Education	500	17,000	17,500
23. Ecclesiastical	15,500	...	15,500
24. Medical	2,400	37,100	39,500
25. Political	23,400	4,100	27,500
26. Scientific and other Minor Departments	12,800	2,200	15,000
30. Stationery and Printing	400	800	1,200
38. State Railways: Working Expenses	47,900	2,900	50,800
39. Guaranteed Companies (Land and Supervision).	5,200	...	5,200
41. Miscellaneous Railway Expenditure	1,900	...	1,900
42. Major Works: Working Expenses	5,700	10,100	15,800
43. Minor Works and Navigation	3,200	...	3,200
44. Military Works	16,900	...	16,900
45. Civil Works	7,900	37,600	45,500
46. Army: Effective	465,800	...	465,800
47. Special Defence Works	1,000	...	1,000
TOTAL	712,900	400,400	1,113,300

The distribution of the Provincial total of Rx. 400,400 among the several Provinces is as follows :—

	Rx.
Central Provinces	22,600
Burma (Lower)	33,100
Assam	13,900
Bengal	72,700
North-West Provinces and Oudh	73,900
Punjab	51,100
Madras	69,300
Bombay	63,800
TOTAL	400,400

114. The more important increases of Expenditure in India are—

	Rx.
Assignments and Compensations	98,700
Land Revenue	74,500
Customs	64,700
General Administration	67,400
Law and Justice—Courts of Law	141,500
Police	82,600
Medical	56,100
Political	146,200
Stationery and Printing	55,300
State Railways—Working Expenses	314,300
Ditto Interest	158,000
Army	475,700

*1894-95. Increases
of Expenditure in
India.*

115. Of the increase under Assignments and Compensations the larger part, Rx. 72,200, occurs in Bombay and is nearly counterbalanced by an increase of the receipts under Land Revenue, see paragraph 103 above. Most of the balance occurs in the Central Provinces, where payments are to be made to certain zemindars as compensation for the resumption of their Abkári rights by the Government—a step considered expedient in the interests of efficient Excise administration.

116. The increase under Customs is for the establishment required to collect the new Import duties.

117. From the table in paragraph 113 above it will be seen that the Exchange Compensation Allowances account for the greater portions of the increases under Land Revenue, General Administration, Law and Justice—Courts of Law, Police and Medical. The remainder of the increases under these heads represents the ordinary growth of expenditure required to meet the wants of the country under the services mentioned.

118. The Exchange Compensation Allowances account for Rx. 27,500 of the increase under Political. There is also an increase of Rx. 60,000 in the subsidy of the Amir of Afghanistan; and a provision of Rx. 50,000 has been made for the expenditure which will be incurred in connection with the Afghan border demarcation.

119. The increase under Stationery and Printing is explained in paragraphs 81 and 157: no appreciable reduction of the charges under this head below those of 1893-94 can be hoped for.

120. The increase in the Working Expenses of State Railways is an accompaniment of the increased revenue, and that in the Interest Charges is a transfer from Ordinary Debt following the yearly addition to the Capital Expenditure.

121. The more important increases in the Estimate of Army Expenditure for 1894-95 as compared with the estimate for 1893-94 are as follow :—

	Rx.
Exchange Compensation Allowances and alteration in the pay of British soldiers due to different value of the rupee—net	390,100
Smaller allowance for short strength of troops, based on recent actuals (Rx. 63,100 were deducted in 1893-94 and only Rx. 46,100 in the estimate for 1894-95)	17,000
Amount deducted from the <i>Budget Estimate</i> , 1893-94, for probable savings owing to the absence in Egypt of the 7th Dragoon Guards for a part of the year. Full provision is necessary in 1894-95	31,000
Pay of officers on the Unattached List of the British Army who are candidates for the Indian Staff Corps under clause 25, I. A. C., 1892	12,600
Increase in cost of food for men and animals	49,000
Increased provision for malt liquor	35,900
Increased provision for the Kashmir and Gilgit transport arrangements	40,000
Increased provision for railway charges for the conveyance of troops and stores	27,400
Provision for the additional staff, etc., required for part of the year under the new organisation on the abolition of the Presidency Army system	10,000
Replacement of the mobilisation equipments, stores, etc., destroyed by fire at Peshawar	38,200
Increased purchases of transport animals to complete establishment, due to casualties and castings	23,700
Larger provision for volunteer corps with reference to authorised establishments, and an increase in the number of efficient	11,300

The more important decreases are as follow :—

	Rx.
Withdrawal of a battalion of British infantry from the Indian establishment, 20 privates being added to each of the remaining battalions	15,700
Fewer local supplies required for ordnance factories, partly counterbalanced by larger provision for camp equipage	16,700
Reduced provision for capitalised pensions and for pensions of officers drawing their pensions in India	11,700
Smaller provision for charges for special expeditions	132,000
The omission of the following special grants made in 1893-94, namely :—	
Reconstitution of Hindustani regiments	12,500
Hutting charges of the Native Army beyond those allowed by regulation	25,900
Purchase of land	10,100
Establishment of new cantonment general hospitals at certain stations in Bengal	10,000

1894-95. Decreases
of Expenditure in
India.

122. The important decreases of expenditure in India are—

	Rx.
Interest	113,200
Marine	105,500
Construction of Protective Railways	1,054,300
Construction of Railways	50,700
Military Works	194,200
Civil Works	408,600
Special Defence Works	138,800

123. The saving under Interest is the result of the annual transfer from Ordinary Debt to Debt on account of the Capital Outlay on Railways and Irrigation Works. That transfer is partly counterbalanced this year by the addition to the Public Debt of Rx. 3,500,000 borrowed at $3\frac{1}{2}$ per cent. interest in August to October 1893, less the diminution of the debt by the notification for discharge of the balance, Rx. 1,341,400, of the $4\frac{1}{2}$ per cent. loans.

124. Of the decrease under Marine, the portion, Rx. 65,200, which occurs in the Imperial Marine Department is nominal, as explained in paragraph 65 above. The remainder occurs chiefly in Burma and Bengal: so many new vessels and launches will not be constructed for the Local Governments next year as in 1893-94.

125. The decrease under Construction of Railways is due to the approaching completion of the Mayavaram-Mutupet Provincial Railway in Madras, the provision for expenditure on that Railway being only Rx. 17,500 as compared with Rx. 67,500 in the Budget Estimate of 1893-94.

126. The decrease under Special Defence Works is secured by the practical completion of the expenditure on those works: in view of the financial position, and for other reasons, several of the not very large number of sanctioned works, which remain to be carried out, have been either postponed or abandoned.

127. The reduction under Construction of Protective Railways and that under Military Works, amounting together to Rx. 1,248,500, have been made expressly as measures of economy to help the Government towards securing equilibrium between Revenue and Expenditure.

128. Of the reduction under Civil Works, the sum of Rx. 176,500 was made from Imperial Expenditure directly with the object described in the preceding paragraph. And of the remainder the larger part is made in Provincial Expenditure indirectly with the same object, the reductions being made to enable the Provincial Governments to pay to the Imperial Government the contributions which they were called on to pay in order to reduce the deficit in the Estimates of 1894-95. Some of the Local Governments have however made the required reductions under other heads of expenditure.

129. It may be mentioned that very strict economy has been insisted on in other Expenditure also, and that the grants under many other heads than those mentioned in the two preceding paragraphs would have been larger had it not been for the efforts made to reduce the deficit in the Estimates. In fact the difficulties of the position have for the last year or two obliged the Government to take every feasible measure to reduce or restrict its current expenditure.

130. The Expenditure in England in 1894-95 will be on the whole less by £13,500 than that entered in the Budget Estimate of 1893-94. *1894-95, Expenditure in England.*

131. The only head under which an increase of importance in the expenditure in England is anticipated is Interest, which shows an excess over the Budget Estimate of 1893-94 of £288,500. This is due to the sterling borrowing necessitated by the failure to sell Council Bills during a great part of 1893-94.

132. There are reductions of £33,300 under Marine, as the *Warren Hastings*, for the construction of which a large provision was made in 1893-94, has been completed, of £152,100 under Special Defence Works, the reason being the same as explained in paragraph 126 above in regard to the expenditure in India under the head, and of £166,800 under Army Effective Charges, the amount of Clothing and Ordnance Stores, and the payments to the War Office being less than in 1893-94. The Non-Effective Army Charges are, on the other hand, increased by £97,100: it is feared that the maximum of the Non-Effective sterling Army Charges has not yet been reached.

133. The increase of Rx. 1,371,500 in the Exchange on Expenditure in England is due to the fall in the rate from 1s. $2\frac{3}{4}$ d. to 1s. 2d. the rupee. *1894-95, Exchange.*

Section IV.—Examination of the Estimates under the more important heads of Revenue and Expenditure.

Punjab	2,271,527	2,346,567	2,356,434	2,427,400	2,474,100	2,477,900
Madras	4,851,279	4,422,633	5,157,847	5,150,000	5,340,200	5,371,600
Bombay	4,506,601	4,507,223	4,644,122	4,639,700	4,767,900	4,770,100
TOTAL	24,754,205	24,638,963	25,627,634	25,972,800	26,284,300	26,572,100
Shown under XXIX.—Irrigation	708,996	673,189	722,306	815,600	792,000	868,500
Shown under I.—Land Revenue	24,045,209	23,965,774	24,905,328	25,157,200	25,492,300	25,703,600
EXPENDITURE—						
District Administration	2,142,653	2,209,498	2,245,258	2,270,263	2,291,900	2,367,500
Other charges	1,533,943	1,625,628	1,691,087	1,842,037	1,761,900	1,819,300
TOTAL	3,676,596	3,835,126	3,936,345	4,112,300	4,053,800	4,186,800

134. The figures in the above table show the distribution of the Land Revenue among the several Provinces. The feature which has distinguished this head of Revenue for many years appears again in the Estimates for 1894-95, namely, a progressive increase in consequence of increase of assessment on re-settlement and of extensions of cultivation in the Provinces where the revenue depends on the amount of land under cultivation. Setting aside the small Provinces classed under "India—General," and the permanently-settled Province of Bengal, the only Province which does not show an increase is the North-Western Provinces and Oudh: as explained in paragraph 103, this is due to more careful estimating and not to any actual falling off or to any change of policy in that Province. The Explanations in paragraphs 68 and 99 may also be referred to.

135. The Budget Estimate of receipts in 1893-94 from Bengal Opium was based on the assumption that 43,704 chests would be sold at an average price of R1,250 a chest. The yield of the crop being small, and the reserve having been exhausted, it became necessary to reduce the sales in the last three months of the year by 351 chests. This reduction accounts for a diminution of the receipts by Rx. 43,900. The high prices of 1892-93 were not maintained. The prices in April, May and June showed a distinct falling off: in July the price fell very low in consequence of the apprehensions and uncertainty caused by the passing of the Currency Act a few days before the sale: in subsequent months there was a large recovery; but the average price for the whole year was only R1,109 a chest. This lower price is the cause of the bulk of the falling off in the Bengal receipts.

136. The price realised at the sale this month was R1,095 a chest, and the tendency has since been downwards. It is therefore not considered safe to assume for 1894-95 a higher average price than R1,070 a chest.

The quantity of Bengal Opium to be sold in the first nine months of 1893-94 was settled by the notification in June last: the quantity to be sold in the last three months cannot be settled till June next; but for the purpose of the Budget Estimate it is assumed that 42,300 chests will be sold in the whole year, being less by 1,404 than the quantity assumed for 1893-94 in the Budget Estimate of that year.

These reductions in price and quantity account for the considerable diminution on the receipts from Bengal Opium in 1894-95.

137. The exports of Malwa Opium through Bombay have fluctuated considerably from month to month in 1893-94. But the final result of the year promises to be an export of about the same amount as in 1892-93. The Revised Estimate for 1893-94 and the Budget Estimate for 1894-95 have accordingly been placed at approximately the same figure as the actual receipts of 1892-93.

Excise Opium in.
1893-94 and
1894-95.

138. The receipts from the sale of Excise Opium tend to increase from year to year with the increase in Excise Revenue. The Budget Estimate of 1893-94 was placed lower than it otherwise would have been, because of the intended adoption from 1st June of the very restrictive measures in regard to opium in Burma described in paragraph 71 of the Financial Statement of last March. The arrangements for the change took longer to mature than was expected, and the new rules were brought into force only from 1st January 1894. This postponement and the general increase of the receipts in other Provinces have caused the increase in the Revised Estimate for 1893-94. The restrictive measures will be in force in Burma during the whole of 1894-95, and the reduction in receipts caused thereby more than counterbalances the increases in other Provinces.

Opium Expendi-
ture in 1893-94
and 1894-95.

The expenditure on an average crop of opium was provided for in the Budget Estimate of 1893-94. The crop was again considerably below the average, and the expenditure this year has been less than the Estimate by Rx. 370,800. In 1894-95 provision is as usual made for the payments which an average crop requires.

(a) Chiefly excise on local manufacture. | (b) Chiefly duty on imported salt.

139. The reasons of the falling off in Salt Revenue in 1893-94 have been explained in paragraph 63 above. The reasons are of such a nature that there is no likelihood of their producing a similar effect on the Revenue of next year. The Budget Estimate for 1894-95 has therefore been taken at a figure considerably higher than the probable Revenue of this year, but still less than the Revenue actually secured in 1891-92 and 1892-93.

140. The saving in the Expenditure this year occurs chiefly in Northern India and in Madras: the season was unfavourable for manufacture, and the manufacturing charges are smaller than usual.

STAMPS.

	Accounts, 1890-91.	Accounts, 1891-92.	Accounts, 1892-93.	1893-94.		1894-95, Budget.
				Budget.	Revised	
REVENUE.						
Court Fees and Plain Paper	2,733,612	2,887,774	2,995,369	2,979,869	3,076,200	3,070,100
Commercial and other Stamps	1,255,761	1,297,281	1,374,200	1,376,659	1,396,600	1,405,200
Other Revenue	79,597	77,101	78,971	77,572	78,200	77,500
TOTAL . Rx.	4,068,969	4,262,156	4,448,540	4,434,100	4,551,000	4,561,800
Charges—						
India Rx.	84,620	89,531	91,170	90,600	94,300	95,000
England (Stores)	34,218	34,105	31,277	39,400	39,400	49,000
Exchange Rx.	11,181	14,811	18,817	24,700	25,300	35,000
TOTAL . Rx.	130,019	138,447	141,264	154,700	159,000	179,000

141. The Stamp Revenue continues to increase. Burma is the only Province which does not contribute to the increase this year: depression of trade is alleged as the reason, but fluctuations in Stamp Revenue in a particular year can seldom be ascribed with confidence to any particular cause.

EXCISE.

REVENUE.	Accounts, 1890-91.	Accounts, 1891-92.	Accounts, 1892-93.	1893-94.		1894-95, Budget.
	Rx.	Rx.	Rx.	Budget. Rx.	Revised. Rx.	Rx.
Bengal	1,046,484	1,113,397	1,159,458	1,150,000	1,210,000	1,210,000
North-Western Provinces . .	513,508	524,303	549,877	540,000	570,000	570,000
Madras	1,199,746	1,213,964	1,211,146	1,230,000	1,280,000	1,290,000
Bombay	999,067	1,025,462	1,025,696	1,020,000	1,066,000	1,070,000
Other Provinces	1,188,975	1,240,138	1,296,266	1,205,900	1,231,900	1,177,600
TOTAL	4,947,780	5,117,264	5,242,443	5,145,900	5,357,900	5,317,600
Charges	175,053	190,097	193,013	208,800	194,100	205,200

142. The Excise Revenue shows this year a fully normal increase. With the exception of Burma all Provinces share in the increase, the North-Western Provinces being now included among the Provinces whose Excise Revenue is increasing. The decrease in Burma, owing to the measures alluded to in paragraph 138 above, has not been so great in 1893-94 as assumed in the Budget Estimate, as the introduction of those measures took place later than intended: the full effect of them will be felt in 1894-95.

PROVINCIAL RATES.

REVENUE.	Accounts, 1890-91.	Accounts, 1891-92.	Accounts, 1892-93.	1893-94.		1894-95, Budget.

Customs Revenue.

144. The Customs Revenue has since 1890-91 shown a tendency to decline. Even with the addition of some receipts in the last three weeks of the year from the new duties imposed from the 10th March by Act VIII of 1894, the Revenue in 1893-94, though higher than in 1892-93, is expected to be slightly less than the Budget Estimate.

For next year without the new duties the estimate would have been about the same as the Budget Estimate for 1893-94. The new duties, as explained in Part I of this Statement, are expected to yield in 1894-95 an additional revenue, after deduction of refunds and drawbacks, of Rx. 1,200,000 in all: Rx. 180,000 under "Petroleum," and Rx. 1,020,000 under "Other Import Duties."

Customs Expenditure in 1894-95.

145. The imposition of the new duties necessitates a considerable increase of establishment: to meet the cost of this a sum of Rx. 60,000 has been added to the Estimate of Expenditure in 1894-95.

ASSESSED TAXES.

Interest Receipts in India.

149. The reductions in the receipts in India shown in the Revised Estimate for 1893-94 and in the Budget Estimate for 1894-95 are caused by the repayment by the Bombay Port Trust of a loan of Rx. 616,100 on 1st April 1893 and by the Bombay Municipality of a loan of Rx. 420,000.

Interest Receipts in England.

The Secretary of State has not had in 1893-94 any large amounts available from his cash balance for temporary investment at interest, and expects that the same will be the case in 1894-95. Hence the reduction in the Sterling Interest receipts.

Interest Expenditure in India.

150. A loan of Rx. 3,500,000 at $3\frac{1}{2}$ per cent. was raised in August—October 1894 at an average price of $\text{Rs } 96-3-2\frac{1}{2}$ pies per cent.; and on the other hand, the balance, Rx. 1,341,400, of the $4\frac{1}{2}$ per cent. loan was notified for discharge in October. The discount of Rx. 133,000 on the new loan increases the Interest charges of 1893-94; and about three months' interest on the new loan is payable in the year.

In 1894-95 a whole year's interest is payable amounting to Rx. 122,500; but on the other hand, there is a saving of Rx. 60,363 from the discharge of the $4\frac{1}{2}$ per cent. loan.

The interest transferred to the Public Works Debt on account of the new Capital Expenditure on Railways and Canals amounts to Rx. 205,100 in 1893-94 and Rx. 179,200 in 1894-95.

Sterling Interest charges.

The increases in the Sterling Interest charges in the Revised Estimate for 1893-94 and in the Budget Estimate for 1894-95 are due to the borrowing operations in England described in paragraphs 181, 182 and 186 below in the Ways and Means Section of this Statement.

Savings Banks Interest charges.

The interest on Savings Banks Balances has been increasing yearly with the growth of the deposits. The reduction in 1894-95 is caused by the reduction of which notice was given on 30th December 1893 in the rate of interest from $3\frac{3}{4}$ per cent. to $3\frac{1}{8}$ per cent. Allowance is also made for the probability that that reduction will cause a diminution in the rate of increase of the Savings Bank Balances.

Other Interest items.

The Interest on Other Obligations, apart from the Savings Bank interest, is a small item which does not vary much, the "other obligations" being in many cases permanent ones.

151. Both the receipts and charges of the Post Office and of the Telegraph Department increase from year to year with the development of the Departments. The net financial result in both Departments tends to improve. *Post Office and Telegraphs.*

152. The position of the Mints has been entirely changed by the enactment in June last of Act VIII of 1893, by which the free coinage of silver was stopped. For the present the Mints are only required for the coinage of small silver and copper. The seignorage receipts accordingly entirely disappear in 1894-95. The expenditure of the Mints shows a diminution in the Budget Estimate of 1894-95 as a consequence of the cessation of the coinage of rupees, but the permanent establishments have not as yet been reduced. *The Mint.*

CIVIL DEPARTMENTS.

(a) Includes Upper Burma charges.

153. The grant of Exchange Compensation Allowances has added largely to the expenditure in India under all the heads included in this group, as will be seen from the tables in paragraphs 75 and 113. Explanations of increases due to other causes will be found in paragraphs 80, 117 and 118.

MISCELLANEOUS CIVIL CHARGES.

	Accounts, 1890-91.	Accounts, 1891-92.	Accounts, 1892-93.	1893-94.		1894-95, Budget.
	Rx.	Rx.	Rx.	Budget. Rx.	Revised. Rx.	Rx.
Territorial and Political Pensions	527,569	557,959	541,592	529,400	513,000	485,000
Civil Furlough and Absentee Allowances	232,747	276,362	334,194	341,000	330,100	357,600
Superannuation Allowances and Pensions	3,051,541	3,321,109	3,781,008	3,789,300	3,824,300	3,984,500
Stationery and Printing	592,436	602,885	647,973	635,100	689,600	679,800
Miscellaneous	274,223	285,307	233,075	243,300	262,100	247,100
TOTAL	4,678,516	5,046,622	5,537,840	5,538,100	5,619,100	5,754,000

154. The expenditure on Political Pensions tends to decrease with the death of the old pensioners, as the additions made to the list are now small. The death of the Maharajah Duleep Sing causes the larger portion of the reduction in 1894-95.

155. The expenditure on Civil Furlough and Absentee Allowances would be fairly stationary but for the decision to pay those allowances in England at the favourable rate of exchange of 1s. 6d.; this causes an increase to the charges with every fall in the market rate of exchange.

156. The expenditure on Superannuation Allowances is increasing from year to year. The pension list has not yet reached its maximum limit: and the cost of pensions paid in England increases with the fall in exchange, all pensions paid there being now practically fixed in sterling in consequence of the concession of a fixed rate of conversion of 1s. 9d. the rupee for pensions fixed nominally in rupees.

157. The Stationery and Printing charges increase from year to year owing to the yearly increasing amount and complexity of public business.

158. But little expenditure on direct Famine Relief has been necessary this, or is anticipated next, year.

159. As explained in Part I, the financial necessities have compelled the stoppage of expenditure on Railways from the Famine Grant. For the same reason, the expenditure on Protective Irrigation Works has also been restricted to the amounts required to carry on works already begun.

RAILWAY REVENUE ACCOUNT.

160. The following table exhibits the main features of the Railway Revenue Account from 1890-91 :—

161. The gross traffic receipts from State Railways are now expected to exceed the Budget Estimate in the current year by Rx. 483,800, while the working expenses are increased by Rx. 171,600, the net improvement being Rx. 312,200. *State Railways, 1893-94.*

The Budget Estimate was prepared for an increase of Rx. 476,700 over the Actuals of 1892-93, while the improvement now expected in the gross traffic receipts of 1893-94 over the Actuals of 1892-93 is Rx. 960,500.

The Railways named below contribute the increases, as compared with the Budget Estimate, noted against them :—

	Increase. Rx.
East Indian	170,000
Rajputana-Malwa	70,000
Eastern Bengal	80,000
North Western	180,000
Southern Mahratta	70,000
Oudh and Rohilkhand	15,000

These good results are due to an increase in coaching traffic, owing partly to the *Magh Mela* at Allahabad, and to improvement in jute, wheat, seeds, and coal traffic. These increases are to a certain extent absorbed by a fall in the receipts from other Railways of which the undernoted are the most important :—

	Decrease.
	Rx.
South Indian	40,000
Burma	87,500
Indian Midland	12,500

These decreases are the results of a falling-off in the goods traffic, owing to unfavourable crops and to dull markets.

Guaranteed Railways, 1893-94.

162. The gross receipts of the Madras Railway and the Bombay, Baroda and Central India Railway show improvements of Rx. 85,000 and Rx. 115,000 respectively, but indications are not wanting of a falling-off upon the first-named Railway. The Great Indian Peninsula showed a considerable falling-off in the earlier months of this year, but has been doing better lately. The net traffic receipts expected from the three Railways are Rx. 153,100 better than the Actuals of 1892-93, and Rx. 162,500 better than Budget Estimate of 1893-94.

State Railways, 1894-95.

163. The gross receipts of State Railways are estimated for 1894-95 at Rx. 164,600 in excess, and the net traffic receipts at Rx. 21,900 in excess of the Revised Estimate for 1893-94. These very moderate additions are fully justified by increased mileage. It is not considered safe to anticipate the larger revenue which several of the lines are bringing this year. The estimates of the East Indian Railway, the Eastern Bengal Railway, and the North-Western Railway are all placed below the receipts expected in 1893-94. The large deterioration in the "net result" shown in the table in paragraph 160 is caused by the addition of interest charges in India and by the increase in the charge for Exchange on interest and annuities paid in England.

Guaranteed Railways, 1894-95.

164. The net traffic receipts of the three Guaranteed Railways are placed at Rx. 48,000 in excess of the Revised Estimate, and Rx. 201,100 in excess of the Actuals of 1892-93. The Madras line is not expected to do better than in the present year, and it has not been thought prudent to calculate upon a repetition in 1894-95 of the most favourable results attained by the Bombay, Baroda and Central India in the current year. On the other hand, an improvement of Rx. 85,000 is expected on the Great Indian Peninsula Railway, on which the depression in 1893-94 has been abnormal.

IRRIGATION.

IRRIGATION.	Accounts, 1890-91.	Accounts, 1891-92.	Accounts, 1892-93.	1893-94.		1894-95. Budget.

Receipts	178,899	194,114	185,866	198,400	194,000	203,700
Expenditure	902,276	1,073,896	1,008,142	915,700	918,800	946,700
STATISTICS OF MAJOR WORKS.						
Capital Outlay to March	27,487,656	28,320,703	28,923,097	29,791,603	29,693,098	30,308,898

165. The Revised Estimate of receipts is Rx. 18,100 below the Budget Estimate of 1893-94. This small decrease is the result of very considerable variations. A reduction of Rx. 20,000 occurs in the Punjab owing to restriction of irrigation due to abundant rainfall, while the North-Western Provinces contribute an excess of Rx. 25,200 owing to under-estimate of income from flow-irrigation and a general under-estimate of the revenue. Bengal also shows an improvement of Rx. 5,000. The share of land revenue is increased by Rx. 15,400 in the Punjab on the Bari Doab Canal, but it is decreased by Rx. 39,200 in Madras owing to an increase budgeted for not having been realised on account of the late date on which orders were issued in connection with the new settlement in the Tanjore District.

166. The irrigation revenue is expected in 1894-95 to exceed the Revised Estimate of 1893-94 by Rx. 144,200.

This improvement falls under—

	Imperial,	Provincial and Local,	TOTAL,
	Rx.	Rx.	Rx.
Direct Receipts—			
Major Works	83,000	—25,000	58,000
Minor Works	6,400	3,300	9,700
Share of Land Revenue—			
Major Works	76,500	...	76,500
TOTAL	165,900	—21,700	144,200

The Imperial share of the improvement under direct receipts from Major Works is Rx. 83,000, and is mainly due to an increase of Rx. 80,900 in the Punjab. The estimated increase of Rx. 76,500 under share of land revenue is due chiefly to the introduction of the new settlement in the Tanjore District of the Madras Presidency.

167. The financial results obtained from Irrigation Works for which Capital and Revenue Accounts are kept during the years 1891-92 and 1892-93 are given below :—

				1891-92.	1892-93.
				Rx.	Rx.

169. The expenditure in India continues to increase. Generally speaking the causes may be said to be—the fall in the rate of Exchange, which affects the amount of pay given to British troops in India, and the percentage of pay granted as Exchange compensation; the increase in the number of volunteers; the

greater cost of ammunition and appliances manufactured in India in consequence of the adoption of more elaborate and scientific armaments; the development of local manufactures of all kinds whereby the home charges have been reduced at the expense of the Indian Estimates; the occupation of Gilgit; and the increase in the price of food-supplies in India.

The expenditure in England shows promise of reduction. Exceptionally heavy outlay on Ordnance stores began in 1887-88 in connection with the arming of British troops with magazine rifles, with the supply of the new breech-loading field guns to Batteries in India, and with the completion of the mobilization reserves. These measures have now been practically completed.

This reduction in the Home charges is, however, to some extent counter-balanced by the increase in the effective charges due to the grant of deferred pay to the British Army, and by the increase in non-effective charges, namely, the pension charges for British troops who have served in India, and the pay and pension of non-effective and retired officers of the Indian service.

The increase under Exchange is due to the fall in the rate.

SPECIAL DEFENCE WORKS.

170. The following table shows the expenditure on "Special Defence Works":—

*Expenditure on
Defence Works
since their
commencement.*

	Rx.

1892-93	458,060
1893-94 Budget Estimate Rx. 536,600; Revised Estimate .	342,000
1894-95 Budget „	152,300
	<hr/> 4,460,173

*Revised Estimate,
1893-94.*

171. The difference of Rx. 194,600 between the Revised and Budget Estimates is due to the expenditure in England on armaments and stores having been over-estimated and also to a reduced programme of works in India. The Budget Estimate for 1894-95 is less than the Revised Estimate for 1893-94 by Rx. 189,700, owing to the postponement of several works and to the approaching completion of the supply of stores and armaments for the Aden defence works.

172. The total expenditure on special defence works being estimated at Rx. 5,030,000, if the amounts provided in the Estimates for 1893-94 and 1894-95 are spent, there will remain Rx. 569,827 for Expenditure in 1895-96 and future years.

Section V.—Capital Expenditure on Public Works not charged against Revenue.

173. The Capital Outlay on Railways and Irrigation Works not charged to Revenue has been for many years limited to an annual sum of Rx. 3,500,000. As it was considered desirable to push on the construction of those useful works at a more rapid rate than that limit allowed, it was decided when the Famine Grant was restored that the whole amount available from that grant, after meeting direct Famine Relief Charges and the net charge on account of the Bengal-Nagpur and Indian Midland Railways, should be devoted to the

construction of Protective Railways. Accordingly, since 1890-91 the total limit on the annual Capital Expenditure on Railways and Canals has been Rx. 3,500,000, not charged to Revenue, *plus* the amount available from the Famine Grant, usually about Rx. 1,100,000.

In June 1892 the Secretary of State authorised the Government of India to increase the annual expenditure not charged to Revenue by Rx. 500,000 above the limit of Rx. 3,500,000 in cases where the Government of India are satisfied that the money can without inconvenience be supplied to enable Companies to undertake new lines of railway and extensions.

In 1894-95, as already explained, the financial necessities require the temporary suspension of the Famine Grant. The ordinary programme for Capital Expenditure has therefore had to be restricted to Rx. 3,500,000. The additional Rx. 500,000 provisionally sanctioned by the Secretary of State in June 1892 has also been entered in the Estimates in case it may be required for expenditure by Companies, and this provision brings the total estimate of the expenditure not charged to Revenue up to Rx. 4,000,000.

48.—STATE RAILWAYS—CONSTRUCTION.

174. The Budget grant for 1892-93 amounted to Rx. 4,615,000 as under :—

1892-93.

	Rx.
Normal amount provided under "Not charged to Revenue"	3,500,000
<i>Deduct</i> —Provision for Irrigation Works	550,000
	<hr/>
Leaving for Railways	2,950,000
<i>Add</i> —for Bareilly-Rampur-Moradabad Railway	375,000
„ for Jherria Extension of East Indian Railway	160,000
	<hr/>
Total under 48	3,485,000
Provided under 34	1,011,700
„ „ 37	118,300
	<hr/>
	4,615,000

175. The Revised Estimate for that year provided for a total expenditure of Rx. 4,589,100 against which the actual expenditure incurred amounted to Rx. 4,640,893, thus exceeding the Revised Estimate by Rx. 51,793 and the Budget provision by Rx. 25,893.

The details are :—

	Revised. Rx.	Actuals. Rx.
48—State Railways—Construction	3,436,700	3,455,199
34—Construction of Protective Railways	993,900	984,469
37—Construction of Railways (charged against Revenue in addition to that under Famine Insurance)	158,500	201,225
	<hr/>	<hr/>
TOTAL	4,589,100	4,640,893

176. The amounts provided for Railway Construction in the Estimates are as follow :—

Revised Estimate,
1893-94, and
Budget Estimate,
1894-95.

	Budget, 1893-94.	Revised, 1893-94.	Budget, 1894-95.
	Rx.	Rx.	Rx.
34—Construction of Protective Railways	1,054,300	1,079,700	...
48—State Railways—Construction	2,800,000	2,947,700	3,450,000
	<hr/>	<hr/>	<hr/>
TOTAL	3,854,300	4,027,400	3,450,000

77. The distribution of the amounts of the Revised Estimate for 1893-94 and of the Budget Estimate for 1894-95 is as follows:—

	Revised, 1893-94.	Budget, 1894-95.
<i>Expenditure by State agency—</i>

TOTAL GRANT	4,027,400	3,450,000

49.—IRRIGATION.

178. The figures of Accounts and Estimates for Capital Expenditure on Irrigation Works not charged to Revenue are—

Accounts, 1890-91.	Accounts, 1891-92.	Accounts, 1892-93.	1893-94.		Budget, 1894-95.
			Budget.	Revised.	
Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
483,849	729,664	531,091	750,000	695,400	550,000

The difference of Rx. 54,600 between the Revised and Budget Estimates represents the amount transferred to the grant under 48—State Railways. The decrease in the provision for the ensuing year is due to the restricted programme of expenditure necessitated by the existing financial pressure.

Section VI.—Ways and Means.

HOME TREASURY.

179. The Budget and Revised Estimates for 1893-94 and the Budget Estimate for 1894-95 of the transactions of the Home Treasury are as follow :—

	Budget, 1893-94.	Revised, 1893-94.	Budget 1894-95.

Add—Closing Balance	1,972,526	959,988	1,711,488
TOTAL	24,025,026	20,455,788	22,174,188

180. The most important event affecting the Ways and Means of the year was the failure for a time to sell bills on India after the closure of the Indian mints, with effect from 26th June 1893, to the free coinage of silver. It is now estimated that the total drawings of the Secretary of State in 1893-94 will be £9,400,000 against £18,700,000 entered in the Budget Estimate. The deficiency is met (1) by temporary loans to the extent of a net sum of £6,000,000; (2) by the issue of India 3½ per cent. debentures for £1,386,000; (3) by a reduc-

1893-94. Council Bills.

tion in the cash balances of £1,012,538; and (4) by reduced payments on account of Expenditure not charged to Revenue, of family remittances of officers from India, and of issues to Railway Companies.

1893-94.
Permanent
Sterling Debt.

181. It was stated in paragraph 93 of the last Financial Statement that a 3 per cent. sterling loan of £1,300,000 would be raised in 1893-94 for the discharge of Oudh and Rohilkhand and South Indian Railway Debentures and for advances to Railway Companies. This loan was raised at an average price of £98 17s. 3d. per cent.

In addition to the above loan, the Secretary of State issued in September 1893 £1,386,000 India 3½ per cent. debentures repayable after five years in 1898. This issue was required to meet to some extent the demands on the Home Treasury during the period in which the Council Bills were not sold.

1893-94.
Temporary Ster-
ling Loans.

182. It has already been mentioned that the failure of Council Bills for a time necessitated the provision of funds in England by temporary loans in 1893-94. The entries in the Revised Estimate on this account are as follow:—

		£
<i>Temporary Debt incurred—</i>		
Loans on security of India Bills	6,000,000	
Loans on security of East India Bonds	4,750,000	
	<hr/>	
TOTAL	10,750,000	
<i>Temporary Debt discharged—</i>		
Loans on security of East India Bonds	4,750,000	
	<hr/>	
NET	6,000,000	

The India Bills have a currency of six months only and were raised—

- (1) £2,000,000 in November 1893 at an average rate of interest of £2 16s. 7d. per cent. per annum;
- (2) £1,500,000 in December at £2 12s. 3d. per cent.; and
- (3) £2,500,000 in January at £2 7s. 7d. per cent.

The loans on the security of East India Bonds were raised from time to time according to the requirements of the Home Treasury, and have been discharged with funds obtained by the issue of India Bills.

1893-94.
Payments to Rail-
way Companies.

183. The net payments to Railway Companies will be less by £508,400 than taken in the Budget Estimate. Most of the reduction occurs in the issue of funds for Stores and Establishment charges. The estimates of these issues are based on information supplied by the companies, and generally prove too high.

1893-94. Deposits
and Advances.

184. The net receipts on account of "Deposits and Advances" are now expected to exceed the Budget Estimate owing to smaller advances having been made on account of Expenditure in England on Defence Works at Aden recoverable from the Imperial Government.

1893-94. Remit-
tances from India

185. The reduction in the net payments on account of remittances is caused by (1) the abolition in August 1893, when Exchange Compensation Allowances were granted, of the system under which Military and some other officers were allowed to make family remittances through the Government Account; (2) the payments for railway stores having been less than the estimate; and (3) considerable repayments by Her Majesty's Treasury and other Public Departments in respect of advances or services in India.

1894-95.
Home Treasury.

186. Provision is made in 1894-95 for a net payment to Railway Companies of their Deposits of £911,400 and for other net disbursements, excluding Loans and Council Bills, of £17,637,100.

It will be seen that the present intention of the Secretary of State is to draw in 1894-95 £17,000,000 by bills on India, and to borrow by temporary loans a net sum of £2,300,000, partly to meet the net disbursements and partly to replenish the Home Treasury balances which have been reduced considerably below the normal amount in the current year. 1894-95.
Ways and Means.

The gross amount of the temporary loans is entered at £8,300,000; but provision is made for the repayment of the outstanding balance of those loans raised in 1893-94, namely, £6,000,000.

It should be understood that, in stating the present intentions of the Secretary of State, no sort of pledge is given that he will adhere to the programme.

INDIA.

187. The following is a summary of the Estimate of Ways and Means in India:— Ways and Means
in India.

	1893-94.		1894-95.
	Budget.	Revised.	Budget.
RECEIPTS.			
1. Excess of Revenue in India over the Expenditure charged against it	Rx. 23,869,800	Rx. 24,051,400	Rx. 26,538,900
2. Public Loan	3,000,000	3,499,100	...
3. Loan from Rampur State	220,000	220,000	...
4. Increase of the Unfunded Debt, mostly Savings Bank Deposits, net	882,200	598,400	490,500
5. Other items, net	700,500	1,138,100	885,100
6. For Remittance to Secretary of State, net	1,374,200	882,700	1,107,000
Add—Opening Balance	15,204,205	15,271,756	26,251,756
TOTAL	45,250,905	45,661,456	55,273,256
OUTGOINGS.			
7. Excess Expenditure charged to Provincial Balances.	751,200	478,800	1,184,400
8. Expenditure not charged to Revenue.	1,661,600	2,334,600	2,517,100
9. Rupee Loan discharged	5,000	1,101,000	151,000
10. Loans to Municipalities, etc., net	—288,200	—858,300	491,100
11. Issues on Capital Account to Railway Companies, net.	376,400	152,800	102,500
12. Council Bills—Sterling Amount	18,522,100	9,857,500	17,000,000
13. Do. Exchange	11,579,700	6,343,300	12,142,900
Add—Closing Balance	12,643,105	26,251,756	21,684,256
TOTAL	45,250,905	45,661,456	55,273,256

The headings in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others refer to purely Indian transactions.

188. It has been explained in Part I of this Statement that the failure to sell Council Bills for a time has led to a large accumulation of cash balances in India. It is now expected that the balance in the Indian Treasuries on 31st March 1894 will be Rx. 26,251,756 against Rx. 12,643,105 taken in the Budget Estimate. The increase of Rx. 13,608,651 is fully explained by the smaller payments of Council Bills, which with Exchange are entered in the Revised Estimate at Rx. 16,200,800 against Rx. 30,101,800 taken in the Budget Estimate. The other noticeable features in the Ways and Means of this year are (1) an increase of Rx. 500,000* in the 3½ per cent. Public Loan of the year; (2) the 1893-94.
Main Features.

* The amount entered in the statement in paragraph 187 is Rx. 499,100; the difference of Rx. 900 is due to a tenderer for that amount having failed to take up his allotment.

repayment of the greater part—Rx. 1,100,000—of the outstanding balance of the $4\frac{1}{2}$ per cent. loans; (3) an unanticipated receipt from the Bombay Municipality of Rx. 420,600, the amount of the balance of its loan due to Government; (4) a reduction of Rx. 283,800 under "Unfunded Debt;" this is due to the growth of the Savings Banks balance being less than anticipated—a result of the notice of reduction in the rate of interest from 1st April 1894; and (5) a reduction in the receipts for remittances to England owing to the discontinuance of family remittances through Government of Military and other officers.

1893-94.
New $3\frac{1}{2}$ per cent.
loan of
Rx. 3,500,000.

189. By Notification No. 2984, published in the *Gazette of India Extraordinary* of 14th July 1893, tenders were invited for a Public Loan of Rx. 3,500,000 at a rate of interest of $3\frac{1}{2}$ per cent. per annum. The tenders received were opened simultaneously at Calcutta, Madras, and Bombay on the 15th August 1893. The average rate of issue was Rs 96-3-2 $\frac{1}{2}$ pies per cent.

In the Budget Statement of last year the probable amount of the loan in the year was stated as three crores. It was subsequently decided to discharge the outstanding balance of the $4\frac{1}{2}$ per cent. loans, which matured on 15th September 1893, amounting to about 134 lakhs. This necessitated an increase in the amount of the new loan. An improvement in the cash balances, due to the repayment to the Government by the Bombay Municipality of a loan of 42 lakhs and to other causes, rendered it possible to restrict the increase to 50 lakhs. It was considered that the credit of the Indian Government now stands sufficiently high to justify the offer of $3\frac{1}{2}$ per cent. only on the new loan instead of 4 per cent., the rate at which the Government of India has borrowed in India for many years. The quoted market price of the $3\frac{1}{2}$ per cent. paper is now above par.

Discharge of $4\frac{1}{2}$
per cent. loans.

190. Simultaneously with the issue of the Notification inviting tenders for the new $3\frac{1}{2}$ per cent. loan of 1893-94 the balance of the $4\frac{1}{2}$ per cent. loans of 1878 and 1879 (except the 7 shillings per cent. portion) was notified for discharge on 14th October 1893 by Notification No. 2985, dated 14th July 1893. An option was given to pay in $4\frac{1}{2}$ per cent. Notes the amounts due on tenders for the new loan. It is now expected that the total payments in discharge of the $4\frac{1}{2}$ per cent. loans will be Rx. 1,100,000 in the current year and Rx. 150,000 in 1894-95, and the estimates have been prepared accordingly.

1894-95.
Main Features.

191. The Budget Estimate of 1894-95 provides for the payment of Council Bills for £17,000,000. Though the sterling amount is less than the Budget Estimate of 1893-94 by £1,700,000, equivalent at 1s. 2d. the rupee to Rx. 2,914,300, the decrease in the rupee payments will be only Rx. 958,900.

Owing to the large accumulation of cash balances, it will not be necessary to raise any loan in India in 1894-95, but, on the other hand, provision has been made to meet in full the demands of Local Governments and Administrations for advances to Municipalities and Local Bodies and also to meet an expenditure of Rx. 500,000 on Railway Construction in excess of the ordinary limit of Rx. 3,500,000 fixed for such expenditure from loans and balances.

Public loan.

192. Though it has above been stated that it is not the present intention of the Government of India to raise any loan in 1894-95, yet full liberty is reserved, as usual, to alter the programme now announced to any extent that may be considered desirable.

193. The following are the details of the transactions of Savings Banks *Savings Banks.* during the last few years :—

YEAR.						Net additions to deposits ca. h.	Interest.	Total addition.
						Rx.	Rx.	Rx.
1887-88	656,300	224,000	880,300
1888-89	685,00	261,800	947,000
1889-90	—362,900	272,200	—90,700
1890-91	250,700	279,700	530,400
1891-92	517,900	306,200	824,100
1892-93	548,900	339,400	888,300
1893-94	Budget	438,600	372,400	811,000
1893-94	Revised	203,500	366,800	570,300
1894-95	Budget	111,400	325,800	437,200

The Post Office Savings Banks deposits would have shown the usual progressive increase but for the notice given of the reduction of the rate of interest from $3\frac{3}{4}$ to $3\frac{1}{8}$ per cent. with effect from the 1st of April next. The withdrawals this year have been heavy since the issue of the notification on 30th December, and only a small net receipt is estimated for next year.

194. The *minus* figure under the head of Loans to Municipalities in the *Loans to Municipalities, etc.* table in paragraph 187 is due to certain large repayments made during the year. It was stated in paragraph 100 of the last Financial Statement that the Bombay Port Trust took advantage of the favourable state of the money market to raise a 4 per cent. loan to repay Government in 1893-94 the balance of a $4\frac{1}{2}$ per cent. loan of Rx. 616,100. A similar application from the Bombay Municipality for the repayment of a balance of about 42 lakhs was granted in the course of the year. The gross amount placed at the disposal of Local Governments for advances to Local Bodies, etc., in 1894-95 is Rx. 833,700, while the similar allotments for the two preceding years were Rx. 608,200 in 1893-94 and Rx. 662,900 in 1892-93. It was necessary in the previous year to curtail the demands of the Local Governments on a consideration of the ways and means of the year, but the present state of the balances has enabled Government to provide for the full amount asked for next year.

195. The current year is now expected to close with a cash balance of *Cash balances.* Rx. 26,251,756 and for 1894-95 a closing balance of Rx. 21,684,256 is taken. The estimated transactions of the year thus result in a reduction in the balances by Rx. 4,567,500.

Section VII.—Summary.

196. The principal features in this Statement are—

- (1) The Accounts of 1892-93 have closed with a deficit of Rx. 833,412.
- (2) The Revised Estimates of 1893-94 show a deficit of Rx. 1,792,800, an amount somewhat in excess of that entered in the Budget Estimate, Rx. 1,595,100. There has been a decrease of Revenue under two important heads, Opium and Salt; but the Revenue generally has shown satisfactory progress, particularly the Railway Revenue. Notwithstanding the grant of Exchange Compensation Allowances, the expenditure of the year on the whole will not differ much from the amount entered in the Budget

Estimates. The rate of exchange is taken in the Revised Estimate at 1s. 2'6*d.* the rupee against the Budget rate of 1s. 2'75*d.*: this difference increases the direct charge under Exchange by Rx. 265,900.

- (3) A loan of Rx. 3,500,000 at $3\frac{1}{2}$ per cent. interest was raised in India at an average price of Rs. 96-3-2 $\frac{1}{2}$ per centum. The balance (Rx. 1,341,400) of the $4\frac{1}{2}$ per cent. loans was notified for discharge; Rx. 1,100,000 will be paid this year: the whole amount ceased to bear interest from the 14th October 1893.
- (4) The Mints were closed to the free coinage of silver at the end of June 1893. For several months thereafter the Secretary of State was not able to sell Council Bills in any quantities. His drawings during 1893-94 are now estimated at £9,400,000, while the Budget Estimate was for £18,700,000. It has therefore been necessary to replenish the Home Treasury balances by temporary borrowing. The diminution in the drawings has at the same time caused a very large increase in the cash balances in India, which are now expected to amount on the 31st March 1894 to Rx. 26,251,756 against the Budget Estimate of Rx. 12,643,105.
- (5) The Budget Estimates for 1894-95 show a deficit of Rx. 301,900.
- (6) The deficit with which the Government of India were threatened in 1894-95 was between three crores and three-and-a-half crores of rupees. The measures by which the deficit has been reduced to the amount shown in the Estimates are—
 - (a) stringent economy in expenditure;
 - (b) the temporary suspension of a portion of the Famine Grant, Rx. 1,076,200;
 - (c) contributions from Provincial Governments, amounting to Rx. 405,000; and
 - (d) the imposition of Import Duties estimated to yield in 1894-95 a net return of Rx. 1,140,000.
- (7) Apart from the new taxation, the Revenues are expected to yield a substantial increase in 1894-95. But the Opium Revenue shows a considerable decrease, the net Opium Revenue being taken at Rx. 4,138,300 as compared with the Budget Estimate for 1893-94 of Rx. 5,061,200.
- (8) The rate of exchange is taken at 1s. 2*d.* the rupee as compared with 1s. 2 $\frac{3}{4}$ *d.* in the Budget Estimate of 1893-94, and there is an addition to the direct expenditure under Exchange of Rx. 1,371,500; Exchange Compensation Allowances are estimated to cost in 1894-95 Rx. 1,113,300, of which Rx. 400,400 will be Provincial. In consequence of the sterling borrowing necessitated by the failure to sell Council Bills during a part of 1893-94, the Interest charges in England in 1894-95 will be considerably increased, but other decreases in sterling expenditure nearly counterbalance that increase.
- (9) The Capital Expenditure on Railways and Irrigation Works not charged against Revenue is estimated at Rx. 3,643,100 in 1893-94 and at Rx. 4,000,000 in 1894-95. In 1893-94 there is in addition an expenditure on the Construction of Railways of Rx. 1,079,700

charged to the Famine Grant : expenditure from the Famine Grant on this account will not be incurred in 1894-95.

- (10) It is expected that the Secretary of State will in 1894-95 sell Council Bills to the amount of £17,000,000 and will raise temporary loans of £8,300,000, out of which he will use £6,000,000 to repay the temporary loans borrowed in 1893-94. These announcements are accompanied by the usual reservation of entire liberty to the Secretary of State to vary the amounts to be obtained by bills or raised by loan as he may find occasion.
- (11) It is estimated that the closing balance in the Treasuries in India on 31st March 1895 will amount to Rx. 21,684,256, and it is accordingly not intended to issue any public loan in India in 1894-95. Full liberty is however reserved to the Government of India to vary this intention in any way and to any extent which may be found expedient.
- (12) The programme embodied in the Budget Estimates of 1894-95 is described as a programme of retrenchment and of vigilance intended to tide the Government over a transition period.

J. WESTLAND.

Average of the corresponding periods of 1891 and 1892	93	2,316	2,409	7	44	16	33	23	77

(b) Not passengers.
(c) Of these, three were not passengers.

2. As compared with the average of the two corresponding periods of 1891 and 1892, the number of accidents to trains, rolling stock, permanent-way, etc., during the six months ending the 30th June, 1893, shows an increase of 129 or of 5·35 per cent., with an increase of 649 miles or of 3·75 per cent. in the mean mileage worked, and of 1,218,300 miles or of 3·66 per cent. in the train-mileage run.

3. The chief variations occurred under "Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line," 17 against 35; "Trains running over cattle on the line," 1,207 against 1,107; "The bursting of tubes, etc., of engines," 105 against 67; "The failure of machinery, springs, etc., of engines," 242 against 226; "The failure of axles," 21 against 36; "The failure of couplings," 138 against 115; "Broken rails," 36 against 24; "The flooding of portions of permanent-way," 50 against 14; "Fire in trains," 84 against 115; "Fire at stations or involving injury to bridges or viaducts," 28 against 42; and "Other accidents," 108 against 134.

4. "Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line" showed a decrease of 18 accidents, *viz.*, 6 under "Serious" and 12 under "Minor." The decrease under "Serious" was equally distributed over six railways, while that under "Minor" was chiefly due to there having been 6 accidents less on the Eastern Bengal (state) railway and 3 less each on the Bengal and North-Western railway including the Tirhoot section and the Burma (state) railway.

5. The number of cattle accidents was largest on the Southern Mahratta railway, *viz.*, 323; next to that line comes the South Indian railway with 163; then the Eastern Bengal (state) railway with 93; the East Indian railway with 83; the Rajputana-Malwa state railway with 78; the North-Western (state) railway with 71; the Great Indian Peninsula railway with 68 and the Oudh and Rohilkhand (state) railway with 60.

As compared with the average of the corresponding periods of the two previous years, the chief increases occurred on the Southern Mahratta, the Great Indian Peninsula and the South Indian railways, *viz.*, 33, 26 and 19 accidents, respectively.

In relation to train-mileage run the number was highest on the Southern Mahratta railway, which gave an average of 1 accident in 4,827 train-miles, the Dibru-Sadiya railway coming next with an average of 1 in 5,553; then the Nizam's Guaranteed State, the South Indian, the Eastern Bengal (state) and the Bengal-Nagpur railways with average of 1 in 6,291, 1 in 10,003, 1 in 17,040 and 1 in 17,766, respectively.

The lowest number recorded relatively to train-mileage run was on the Bombay, Baroda and Central India railway, *viz.*, 1 in 179,442; the Great Indian Peninsula railway coming next with an average of 1 in 93,951; then the Morvi railway with 1 in 80,343, the North Western (state) railway with 1 in 65,909, the East Indian railway with 1 in 64,004 and the Jodhpore-Bickaneer railway with 1 in 51,603.

6. Under "The bursting of tubes, etc., of engines," there was an increase of 38 accidents, with an increase of 25 on the Southern Mahratta railway alone.

7. The number of accidents from "The failure of machinery, springs, etc., of engines" was more by 16. The principal variations were an increase of 56 on the Great Indian Peninsula railway, and decreases of 24 on the East Indian railway and of 13 on the Bengal-Nagpur railway.

8. There was a decrease of 15 accidents from "The failure of axles," made up of 3 under "Serious" and 12 under "Minor." The decrease under "Serious" was due to a falling off of one each on four railways, and that under "Minor" chiefly to decreases of 4 and 5 on the Rajputana-Malwa state and the Jorhát railways, respectively.

9. Under "The failure of couplings," the accidents numbered 138 against 115, of which 10 against 1 took place on the South Indian railway and 15 against 5 on the Dibru-Sadiya railway.

10. Of the increase of 12 accidents under "Broken rails," the Bengal-Nágpur railway was responsible for 9.

11. "The flooding of portions of permanent-way" showed an increase of 10 accidents under "Serious" and 26 under "Minor." The Bhávnagar-Gondal-Junágarh-Porbandar railway recorded 12 against *nil* under "Serious," while the chief increases under "Minor" were contributed by the Rajputana-Malwa state and the Southern Mahratta railways, *viz.*, 9 and 6, respectively.

12. Under "Fire in trains," there was a decrease of 31 accidents, of which 2 were under "Serious" and 29 under "Minor." The decrease under "Minor" was chiefly due to the number recorded on the Great Indian Peninsula railway having fallen from 40 to 17.

13. The decrease under "Fire at stations, or involving injury to bridges or viaducts" was chiefly due to a falling off of 17 accidents on the Eastern Bengal (state) railway.

14. The cases recorded under the head "Other accidents" fell from 134 to 108, which was chiefly accounted for by a decrease of 15 accidents on the East Indian railway.

15. The casualties to passengers, and to servants in the employ of railways or of contractors from accidents not coming under the classification adopted in paragraph 1, were, as compared with the average of the corresponding periods of 1891 and 1892, in the case of passengers, 29 killed and 84 injured against 33 killed and 99 injured, and, in the case of servants, 87 killed and 288 injured against 89 killed and 273 injured. (For details, *vide* abstract No. 2.)

16. Compared with the average of the corresponding periods of the two previous years, the mean mileage open was 17,938 miles against 17,289 miles, the train-mileage run amounted to 34,470,156 miles against 33,251,856 miles, and the number of passengers carried was 64,095,006 against 60,141,308. There were seven accidents for every 100,000 train-miles run.

Out of a total of 64,095,006 passengers travelling, only one passenger was killed and 18 were injured by accidents to trains as classified in paragraph 1. This gives an average of one casualty in 3,373,421 persons travelling and an average of one in 148,891,421 miles travelled.

Including casualties to passengers from causes other than accidents to trains, rolling stock, etc. (*vide* paragraph 15), the total numbers of passengers killed and injured were 30 and 102 respectively, giving an average of one killed in 2,136,500, and one injured in 628,382, or an average, on the total number of killed and injured, of one in 485,568 passengers travelling.

17. The total casualties to persons from all causes, including trespassers, cases of suicide, etc., were 296 killed and 459 injured against 306 killed and 499 injured, the average of the two corresponding periods of 1891 and 1892. (For details, *vide* abstract No. 2.)

18. In addition to the above, 26 persons were reported to have been killed and 130 injured in yards, workshops, etc., and 294 persons to have died in carriages and at stations from causes unconnected with the working of trains.

19. The accidents, for the second quarter of 1893, are dealt with in the following note:—

Note on accidents for the 2nd quarter of 1893.

The following table gives the number of accidents, as classified in paragraph 1 of the previous note, which resulted in loss of, or injury to, life and limb, and shows the railways on which they occurred:—

RAILWAYS.	Number of accidents during the 2nd quarter of 1893.	PASSENGERS AND OTHERS.		SERVANTS.		TOTAL.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.

Eastern Bengal (state)	1	1	1	...
Great Indian Peninsula	3	...	2	...	2	...	4
Madras	1	1	...	1
Rajputana-Malwa	1	1	...	1
TOTAL	2	2	...	6	2	8
Average of the two corresponding quarters of 1891 and 1892	3	31	8	19	11	50

2. *East Indian railway.*—On the 12th May, 1893, a collision took place between a passenger and a goods train at the Agra junction station, owing to the passenger train having been run in disregard of danger signals. A railway servant was slightly injured.

3. *Bengal-Nágpur railway.*—On the 11th June, 1893, the roof lamp of a third class carriage of a down mail train exploded at mile $\frac{262}{14}$ between Bilaspur and Párághát stations. A passenger in attempting to walk along the foot boards to report the accident to the guard fell off the train and died from the injuries received.

4. *North Western (state) railway.*—On the 27th June, 1893, a trolly was run over by a down ballast train in a tunnel between Mangi and Dirgi stations. The accident was due to the carelessness of the train staff and to the trolly not having been properly protected. A trolly-man was slightly injured.

5. *Eastern Bengal (state) railway.*—On the 11th April 1893, a cart was run into by an up mixed train at a level-crossing at mile $\frac{15}{8}$ on the Southern section, owing to the gate not having been closed in time. The cartman was killed.

6. *Great Indian Peninsula railway.*—On the 23rd April 1893, a down goods train, while being shunted at the Dadar station, ran into some vehicles containing mules. The accident was due to careless shunting and defective signalling. Two men in charge of the mules were slightly injured.

On the 29th April, 1893, a down goods train was derailed at mile $\frac{173}{16}$ near Nándgaon, owing to the foot boards of the brake-vans having struck against a piece of rock which had been blasted from the side of a cutting. A cooly was injured.

On the 5th May, 1893, a down goods train was wrongly admitted on to the loop line at Khaigaon and collided with an up goods train standing there. A railway servant was slightly injured, and there was also considerable damage to rolling stock.

7. *Madras railway*.—On the 12th June, 1893, a heavy material truck was run into by a locomotive wood train at mile $\frac{212}{12}$, south-west line. A railway servant was injured.

8. *Rajputana-Malwa railway*.—On the 25th May 1893, a collision took place between the front and rear portions of an Up goods train at mileage $\frac{417}{17}$ between Erinpura Road and Mori Stations. The train was stopped between these stations owing to the engine having run short of water. The front portion of the train was taken a short distance ahead of the rear portion and the engine then uncoupled and went for water. When the engine returned, the brakesman released the brakes of the front portion before it was properly coupled to the engine, and the front portion of the train consequently ran back and collided with the rear portion. The brakesman was seriously injured.

ORDER.—Ordered, that the above note, with the abstract returns,

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab.

The Chief Commissioners of the Central Provinces, Burma, and Assam.

The Resident at Hyderabad.

The Resident in Mysore.

The Agents to the Governor-General for Rajputana, Central India, and Baluchistan.

The Director General of Railways.

The Consulting Engineers to the Government of India for Railways, Calcutta, Central Division, Lucknow and Assam.

be communicated for information to the Local Governments and Administrations, and to the officers noted in the margin.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Ordered further, that this note, with the abstract returns, be published in the Supplement to the *Gazette of India*.

F. B. HEBBERT,

Under Secretary.

Documents accompanying.

Abstract returns of accidents for the six months ending the 30th June, 1893,

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the six months ending 30th June 1893, as KILLED or INJURED ON ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

	Killed.	Injured.
PASSENGERS :—		
From accidents to trains, rolling-stock, permanent-way, etc.	1	18
By accidents from other causes, including accidents from their own want of caution or misconduct	29	84
SERVANTS :—		
From accidents to trains, rolling-stock, permanent-way, etc.	1	14
By accidents from other causes, including accidents from their own want of caution or misconduct	87	268
OTHER PERSONS :—		
Whilst passing over railways at level-crossings	6	5
Trespassers	130	44
Suicides	30	4
Miscellaneous, not included in either of the above	3	2
TOTAL .	296	459

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the week ending at 8 a.m. on
Saturday, March 10th, 1894.**

The abnormal weather conditions prevailing at the close of the previous week were followed, on the morning of the 4th by a very rapid fall of the barometer in Upper India, and the formation of a deep depression over that area, with pressure nearly half an inch below the normal in the North and Central Punjab. Heavy rain fell in the Punjab and adjacent Hill Districts. This depression filled up as rapidly as it had formed, and by the next morning it had almost entirely disappeared, only a shallow residual depression being discernible, apparently passing along the Himalayan Mountain Districts. But pressure had given way in North-east India and the Bengal depression noticed last week was again prominent. By next morning the centre of this depression had passed over into Assam and North Bengal, and by the morning of the 7th it had filled up. A large and general increase of pressure had taken place, improving the weather conditions very considerably; and the weather continued fine and settled over nearly the whole country for the next two days. On the morning of the 10th March pressure fell briskly in a narrow tract of country, stretching from the Simla and Naini Tal Hills to the Central Deccan, apparently indicating that a depression of some intensity had formed over the Western Himalayas. This caused strong winds at the Upper India Hill stations and at Ludhiana, and thunder and hail storms in the area of disturbance. The weather in other parts of India continued fine. The mean temperature for the whole of India for the week was very nearly normal, being only 0·3 in defect.

On the 4th March there was a very rapid fall of pressure over Upper India, causing a deep depression, with steep gradients, over the whole of North-western India. Pressure was nearly half an inch below the normal in the North and Central Punjab. It had risen in North-East India and was very uniform in that area, though still largely in defect, and it was also more or less considerably below the normal in the Deccan and Madras. Winds in North-West India had increased in force and were cyclonic in character in Upper India. General rain had fallen in the Punjab and adjacent Hill Districts, the largest falls reported being Murree, 2·57 inches and Rawalpindi, 2·47 inches. Several other stations reported over one inch. By the morning of the 5th a rapid increase of pressure had taken place over Upper India and the depression of the day previous had disappeared, though a local fall of pressure at the Hill stations of the North-Western Provinces indicated the presence of a shallow residual depression apparently passing along the Himalayan Mountain Districts. Pressure had fallen in the Bombay Coast Districts and also in Bengal, causing the Bengal depression to be more marked than it was the day before. Winds had increased in force at

the head of the Bay. Rain had fallen over the greater part of the North-Western Provinces, South-East Punjab, and the Himalayan Hill Districts, Chakrata and Mussoori receiving over 2 inches, and Dehra Dun, Ranikhet, Simla, Roorkee, Murree and Delhi over one inch. Pressure changed very irregularly during the next twenty-four hours, increasing in the Punjab, South Burma and Lower Burma, and decreasing elsewhere. The centre of the Bengal depression had shifted to Assam, North Bengal and the adjacent Hill Districts. Pressure continued below the normal over the whole of India, the largest defect being in North-East India, Upper India and Baluchistan. The large defect in pressure in North Bengal and Assam had given rise to westerly winds over the Gangetic Plain, and in North and Central Bengal; and very strong winds were reported from Darjeeling, averaging 27 miles an hour. Thunder-storms occurred in Bengal, Assam and Upper Burma. The heaviest reported rainfalls, however, did not exceed one inch. On the 7th a large and general increase of pressure had taken place, the rise in North-East India in some parts amounting to as much as quarter of an inch. The distribution of pressure was largely modified and the general weather conditions considerably improved. Chittagong reported one inch of rain and Mandalay '66 inch. A few other stations reported showers, but they were in all cases light and of little importance. Humidity had generally decreased over the whole of Northern India and at Darjeeling was only 14 per cent. Pressure continued to rise in India during the next twenty-four hours, and by the morning of the 8th it was approximately normal in North-Western and Central India, but was still considerably in defect in North-Eastern India. It had fallen slightly in Burma. Ante-cyclonic conditions were established in North-Western India and fine settled weather prevailed over nearly the whole country. Winds were more northerly than usual in Rajputana, Central India and the Deccan. Thunder-storms had occurred in East and South Bengal and in Upper Burma, accompanied in some cases with moderate to heavy rain. Chittagong received 2'96 inches and Barisal, 1'09 inches. Pressure continued to rise, and by the morning of the 9th it was in slight excess in Sind and Baluchistan. It was still low in North Bihar and Bengal, where it was nearly a tenth of an inch in defect. Weather continued fine, and very low humidities were recorded at some stations in the northern half of the Peninsula, Pachmarhi registering only 17, Sholapur 18, and Amraoti 21 per cent. Skies were, however, partially clouded in the North Punjab, indicating a probable disturbance, chiefly affecting the interior and higher mountain ranges. On the 10th this disturbance was more clearly indicated by a brisk fall of pressure extending from the Simla and Naini Tal Hills to the Central Deccan. The fall was greatest in the Simla Hills and it is probable that a depression of some intensity had formed over the Western Himalayas between Simla and Murree. This caused strong winds at the hill stations in Upper India and winds had strengthened to some extent over the whole of the Punjab. Thunder storms and hail-storms occurred in the Punjab, Cherat reporting a fall of '81 inch, Murree of '67 inch and Srinagar of '45 inch. In other parts of the country, however, the weather continued fine and pressure had increased in North-East India and Upper Burma. The air was abnormally dry in Central India, the Central Provinces and North Deccan.

Temperature.—The following table shows the variations of the mean tem-

perature from the normal on each day of the week for the different Provinces of India :—

PROVINCE.	MARCH 1894.							Mean variation of week.
	4th.	5th.	6th.	7th.	8th.	9th.	10th.	
Burma	0	0	0	0	0	0	0	0
Bengal and Assam	+2'0	+1'3	+1'0	+0'7	+1'5	+0'8	—0'7	+0'9
North-Western Provinces and Oudh	+2'3	+3'6	+2'1	+0'5	—1'0	—2'6	—0'8	+0'6
Punjab	+1'2	+0'8	—3'0	—4'1	—3'5	—3'2	—2'4	—2'0
Bombay	—2'6	—2'6	—3'9	—2'9	—4'7	—3'4	—5'4	—3'6

Madras	+3'5	—1'9	—2'9	—1'8	—1'4	—1'4	—2'9	—1'3
	+3'8	+3'6	+3'7	+3'1	+2'9	+3'2	+2'1	+3'2
MEAN FOR WHOLE OF INDIA	+2'2	+1'3	—0'4	—0'8	—1'7	—1'4	—1'6	—0'3

The principal feature of the temperature of the week was the advance of a cool wave from the north-west which passed over India, making its influence felt by the close of the week as far east as Burma. On the first day of the week temperature was in excess of the normal in every Province, with the exception of the Punjab. As the cool wave advanced eastwards, however, the temperatures of the different provinces were each lowered to below normal, the gradual advance day by day being clearly discernible, until by the last day of the week the temperatures of all the Provinces with the exception of Bombay and Madras were in defect. The temperature of Madras was in excess throughout the week, and the highest maximum in India was in every day registered at Cuddapah. The mean temperature of the week was nearly normal in Burma, Bengal, Bombay and the Central Provinces: it was 3'2° in excess in Madras and 3'6° in defect in the Punjab. For the whole of India for the whole week it was very nearly normal, being but 0°3 in defect.

Rainfall.—The rainfall for the week has been confined almost entirely to Northern India. With the exception of very small amounts in some of the divisions no rain fell in Bihar, the Central Provinces, Berar, Rajputana, Central India, and the whole of the Peninsula. Rain fell in 31 of the 52 rainfall divisions, the largest average falls being those of 3'25 inches in the Punjab Hill Districts, 1'49 inches in Assam (Surma), 1'44 inches in Eastern Bengal, and 1'39 inches in the North-West Punjab. In five other divisions the rainfall amounted to over half an inch; in 15 of the remaining 22 it did not exceed one-tenth of an inch. The rainfall exceeded the normal for the week in Arakan, Eastern and Deltaic Bengal, Assam, North Oudh, Submontane Districts of the North-West Provinces and in all the divisions of the Punjab with the exception of Punjab (South). It also probably exceeded the normal in Upper Burma, but the normal rainfall for this part of the country has not yet been ascertained. The rainfall period of 4th to 10th March, the data for which are given in the last three columns of the annexed rainfall table, is identical with the week under review, and the variations from the normal are necessarily the same. The largest excess was in the Hill Districts of the Punjab, where the rainfall was 2'39 inches above the normal.

The heaviest falls during the week were registered at Chittagong, 6'91 inches (nearly 3 inches of which fell on one day, the 8th), Silchar, 5'11 inches, Palampur (Kangra), 4'69 inches, Salar (Vizagapatam), 3'60 inches, Simla and Murree, 3'18 inches, and Hazara (Abottabad), 3'01 inches.

W. A. BION,

Acting Assistant Meteorological Reporter
to the Government of India.

Simla, the 15th March, 1894.

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.
DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of
the Crops.

Madras.—*For week ending 17th March.*—Rainfall good in Tinnevely and parts of Madura, fair over the rest of the Southern districts, Nilgiris, and Malabar, and light showers in parts of Coimbatore and Trichinopoly. Agricultural operations limited as usual at this time of the year. Standing crops generally good and benefited in places by the rain. Harvest continues with fair to average outturn. Pasture getting scarce in parts, but fodder generally sufficient. Cattle in good condition. Prices practically stationary.

Bombay.—*For week ending 21st March.*—Slight rain in parts of five districts. Standing crops damaged by blight, rust, or insects in parts of three districts; otherwise good, except cotton in Broach. Reaping of late crops progressing throughout the presidency, and ploughing and sowing operations continue in four districts. Cotton-picking continues in seven districts. Agricultural stock good. Scarcity in parts of Baroda :—Numbers on relief works 568, and not 2,093 as given last week. Prices steady except in two districts.

Bengal.—*For week ending 17th March.*—There was rain during the week in East Bengal and parts of South West Bengal, and a few showers also fell in Orissa. The general prospects of the standing crops are favourable except in Noakhali and Chittagong where some damage was recently caused by heavy rain and hail-storms. The cultivation of lands for the sowing of early rice and jute is in progress. The spring crops are being gathered and a good outturn is expected. The manufacture of sugar is still going on. The collection of opium is being pushed on rapidly, but the outturn will be to some extent reduced owing to the prevalence of blight and west winds. Indigo is doing well. The *mahua* (*Bassia latifolia*) crop in Chota Nagpur and the Sonthal Parganas is promising. Cattle are generally reported well, and the supply of fodder and water is sufficient. The price of common rice is generally steady.

North-Western Provinces and Oudh.—*For week ending 21st March.*—Weather seasonable. Harvesting of spring crops, collection of opium, and sugarcane sowings in progress. Prospects favourable. Prices generally steady.

Punjab.—*For week ending 21st March.*—No rain, except in the Rawalpindi and Dera Ismail Khan districts. The extra spring crop is being sown in Dera Ismail Khan. Cotton sowings in progress. Land is being prepared for the autumn crops. Prospects of standing crops good. The spring crops in parts of Lahore have been injured by field rats. Cattle are generally in good condition and fodder is sufficient throughout the province. The poppy crop is in good condition. Prices falling in two districts rising in two others; stationary elsewhere.

Central Provinces.—*For week ending 21st March.*—Cloudy weather has again set in giving showers in places. The wheat crop of Damoh is reported to have been destroyed by rust, and it is feared that the outlook there is as

serious as in the adjacent district of Saugor. The pulse crop is fair in both districts. The wheat outturn is poor in Hoshangabad as well as in the Upper Narbada Valley districts. In the Nagpur country the yield is better, and in Chhattisgarh prospects are fairly satisfactory. Prices are rising.

Burma.—*For week ending 17th March.*—Rain has fallen in Katha and the Ruby Mines in Upper Burma and in Kyaukpyu in Lower Burma. In Lower Burma harvesting of the main paddy crop has been completed. In Upper Burma transplanting of dry-weather paddy nearly completed; other operations progressing favourably, except in the Pakokku sub-division where the sudden rise of the river has destroyed the dry-weather crops. In Lower Burma the price of paddy is stationary in all districts except Akyab, where there has been a slight fall. The price of rice has risen in Prome and Akyab. In Upper Burma the price of paddy has risen slightly in three districts and has fallen slightly in three others. The price of rice has risen considerably in Magwe.

Mysore and Coorg.—*For week ending 21st March.*—**MYSORE:** Standing crops in good condition. *Ragi (Eleusine coracana)* harvested in Bangalore and rice harvested in the Hassan district and sown in parts of the Tumkur and Shimoga districts. Prices risen in two districts.

COORG: Rainfall good. Threshing of *ragi (Eleusine coracana)* in progress. Water and fodder for cattle sufficient. Very seasonable showers have fallen over the coffee districts and prospects of a good blossom are excellent. Prices stationary.

Assam.—*For week ending 20th March.*—Weather warm. Early rice ploughing and sugarcane-pressing progressing. Condition of cattle good. Fodder and water sufficient.

Berar and Hyderabad.—*For week ending 21st March.*—**BERAR:** Rainfall moderate. Weather warm. Harvesting of spring crops almost completed. Threshing of wheat and linseed in progress in Ellichpur. Fodder and water sufficient. Prices slightly risen in the Chickli taluka.

HYDERABAD: No rain during the week. Harvesting of spring crops in progress. Weeding of hot-weather crops continues in some places. Prices steady.

Central India.—*For week ending 21st March.*—Report not received.

Rajputana.—*For week ending 21st March.*—Agricultural operations, standing crops, and cattle generally satisfactory. Harvesting going on. Pasturage or fodder sufficient. Prices falling in two States, rising in one, fluctuating in one, and steady elsewhere.

Kashmir.—*For week ending 20th March.*—Weather fine. Prospects of spring crops generally good. Rapeseed healthy. Ploughing for autumn crops commenced. Prices stationary.

Nepal.—*For week ending 17th March.*—Weather warm and pleasant. Prospects fair.

M. FINUCANE,
Offg. Secretary to the Government of India.

The Gazette of India,

EXTRAORDINARY.

PUBLISHED BY AUTHORITY.

CALCUTTA, FRIDAY, JANUARY 26, 1894.

The following Notification will be issued to-morrow morning and is now published in advance for the information of those concerned :—

HOME DEPARTMENT.

NOTIFICATION.

PUBLIC.

Calcutta, the 27th January, 1894.

No. 176.

His Excellency the Marquess of Lansdowne will leave Government House *en route* for England at 9-15 A.M. on Saturday, the 27th instant. His Lordship will embark with his suite from Prinsep's Ghât on board the R.I.M.S. *Warren Hastings*.

His Excellency the Viceroy and Governor General desires that the same honours which were accorded to himself upon his recent arrival in Calcutta shall be paid to the Marquess of Lansdowne upon the occasion of His Lordship's leaving Calcutta after resigning the office of Viceroy and Governor General of India.

A Guard of Honour of British Infantry and a Guard of Honour of the Administrative Battalion Presidency Volunteers will be drawn up opposite the grand entrance of Government House. A Guard of Honour of Native Infantry will be drawn up opposite Prinsep's Ghât.

The line of route from the entrance of Government House to Prinsep's Ghât will be lined throughout by troops under the orders of the Brigadier-General Commanding the Presidency District.

A Royal Salute will be fired from the ramparts of Fort William as the Marquess of Lansdowne leaves Government House, and another Royal Salute will be fired as Lord Lansdowne embarks at Prinsep's Ghât.

All officers of Government (excepting those mentioned below) will be in attendance upon the grand staircase of Government House. Consular officers and other

representatives of Foreign Governments at Calcutta and non-official gentlemen are invited to be present on the grand staircase.

The Marquess of Lansdowne will be escorted from Government House to Prinsep's Ghât by the Viceroy's Body Guard and the Calcutta Light Horse.

The Lieutenant-Governor of Bengal, attended by his personal staff, will be present at Prinsep's Ghât.

The Members of the Governor General's Council will also be present at Prinsep's Ghât.

The following officers will be in attendance at Prinsep's Ghât:—

Secretaries to the Government of India.

The Commissioner of the Presidency Division.

One of the Secretaries to the Government of Bengal.

The Brigadier-General Commanding the Presidency District, with the district staff.

The Commissioner of Police, Calcutta.

The Chairman of the Commissioners of Calcutta.

The Sheriff of Calcutta.

The Magistrate of the 24-Parganas.

An Aide-de-Camp to the Viceroy will attend upon the Marquess of Lansdowne as far as Diamond Harbour.

The troops will not be withdrawn until the receipt of orders to that effect.

Full dress will be worn by the troops and by Civil and Military Officers on this occasion, and morning dress by all gentlemen not entitled to wear uniform.

CALCUTTA, THURSDAY, JANUARY 25, 1894.

HOME DEPARTMENT.

NOTIFICATION.

PUBLIC.

Calcutta, the 25th January, 1894.

No. 122.

The Right Honourable Victor-Alexander Bruce, Earl of Elgin and Kincardine, P.C., LL.D., Lord Bruce of Kinloss and Lord Bruce of Torry, in the Kingdom of Scotland, and Baron Elgin, of Elgin, in the United Kingdom, appointed by the Queen-Empress to be Her Imperial Majesty's Viceroy and Governor General of India, arrived by the East Indian Railway at Howrah at 5 P.M. (Calcutta time) this day, attended by his personal staff and an Aide-de-Camp to the Viceroy. The Earl of Elgin was received at the Howrah Railway Station by the Secretaries to the Government of India, the Military Secretary and Aides-de-Camp to the Viceroy, the Commissioner of Burdwan, one of the Secretaries to the Government of Bengal, the Brigadier-General Commanding the Presidency District with the District Staff, the Commissioner of Police, Calcutta, the Chairman of the Commissioners of Calcutta, the Sheriff of Calcutta and the Magistrate of Howrah. The Earl of Elgin then proceeded to Government House, where he was received by His Excellency the Viceroy and Governor General, His Honour the Lieutenant-Governor of Bengal, and the Members of the Governor General's Council.

2. At 8-30 A. M. (Calcutta time) on the 27th instant the Right Honourable the Earl of Elgin, accompanied by the Members of the Governor General's Council, will proceed from the Throne Room to the Council Chamber in Government House, where His Lordship's Commission from Her Majesty the Queen-Empress will be read by the Home Secretary.

3. A Royal Salute will then be fired from the ramparts of Fort William in honour of the Earl of Elgin on his assumption of the office of Viceroy and Governor General of India.

A Guard of Honour of British Infantry and a Guard of Honour of the Administrative Battalion, Presidency Volunteers, will be drawn up opposite the grand entrance of Government House.

All Officers of Government stationed at Calcutta will be in attendance at Government House upon the occasion. Consular Officers and other Representatives of Foreign Governments at Calcutta and non-official gentlemen are invited to be present on the grand staircase.

Full dress will be worn by Civil and Military Officers and morning dress by gentlemen not entitled to wear uniform.

CALCUTTA, FRIDAY, JANUARY 26, 1894.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Calcutta, the 26th January 1894.

With reference to paragraphs 2 and 3 of the Home Department Notification of 25th January 1894, it is notified that Gentlemen entitled to the Private Entrée at Government House will enter by the South-West Gate, alight at the South Entrance, and proceed through Government House to the top of the Grand Staircase.

The carriages of Gentlemen (except such as have the Private Entrée) will enter by the North-East Gate, set down at the Grand Staircase, and pass out by the North-West Gate.

The Public Gates of Government House compound will be closed at 8.20 A. M., Calcutta time, after which no carriages will be allowed to enter the compound till after the departure of the Marquess of Lansdowne.

After the assumption of the Office of Viceroy and Governor-General of India by the Right Honourable the Earl of Elgin, His Excellency the Marquess of Lansdowne will leave Government House for Prinsep's Ghât *en route* for England at 9.15 A. M. (Calcutta time), on Saturday, the 27th January 1894.

The *cortège* will pass out by the North-East Gate, Government Place East, past Hardinge Statue, South of the Eden Gardens and along the Strand Road.

By Command,

WILLIAM BERESFORD, *Colonel,*
Military Secretary to the Viceroy.

NOTIFICATIONS.

EMIGRATION.

Calcutta, the 27th March, 1894.

No. 756-29.—The following draft of a proposed amendment of the rules under the Indian Emigration Act (XXI of 1888) is published under Section 81 of that Act for the information of persons likely to be affected thereby, and notice

is hereby given under that section that the draft will be taken into consideration by the Governor General in Council after the expiry of one month from this date.

2. Any objection or suggestion which may be made by any person with respect to the draft before that date will be received and considered by the Governor General in Council.

Draft of proposed amendment.

In the heading of column 15 of Form No. 4 appended to Rule 13 and of column 14 of Forms Nos. 5 and 10 appended to Rules 26 and 52 respectively of the Rules relating to Colonial Emigration made under Section 80 of the Indian Emigration Act (XXI of 1883) the words "and residence" shall be inserted.

FORESTS.

The 27th March, 1894.

No. 354-F.—With reference to the Notification of this Department, No. 199-F., dated the 15th ultimo, Mr. Ribbentrop resumed charge, on return from privilege leave, of the Office of Inspector General of Forests, on the forenoon of 22nd March, 1894, from which date Mr. Hill reverted to his appointment of Conservator of the Central Forest Circle in the North-Western Provinces and Oudh.

SURVEYS.

The 28th March, 1894.

No. 873—50.—Lieutenant P. J. F. Macaulay,

R.E., is appointed to the Survey of India Department as Assistant Superintendent, 2nd grade, with effect from 17th March, 1894.

The 29th March, 1894.

No. 784-26.—ERRATUM.—In the amendment published with Notification No. 659, dated the 16th March, 1894, in the *Gazette of India* of the 24th March, 1894, for "31 days" read "31st day."

M. FINUCANE,

Offg. Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Fort William, the 26th March, 1894.

No. 445-G.—During the absence of the Governor-General in Council from Calcutta, the Under-Secretary to the Government of Bengal, in the Judicial, Political, and Appointment Departments, will have charge of that portion of the Foreign Department which is left in Calcutta.

The 28th March, 1894.

No. 460-G.—The services of Lieutenant C. B. Thornhill, Indian Staff Corps, Officiating Wing Officer, Bhopal Battalion, are replaced at the disposal of the Military Department, with effect from the 7th November, 1893.

The 29th March, 1894.

No. 467-G.—The following appointments are made in the Berar Commission, with effect from

the 28th January, 1894, and until further orders, consequent on the grant of furlough to Captain W. Hastings, Indian Staff Corps, Deputy Commissioner of the 3rd class:—

Mr. C. E. Biddulph, Assistant Commissioner of the 1st class, and Officiating Special Assistant Commissioner, to officiate as a Deputy Commissioner of the 3rd class, as a temporary measure.

Captain C. Chamier, Indian Staff Corps (since deceased), Assistant Commissioner of the 2nd (officiating 1st) class, to officiate as a Special Assistant Commissioner, up to the 4th February, 1894.

Mr. R. A. Simpson, Assistant Commissioner of the 2nd class, to officiate as an Assistant Commissioner of the 1st class.

Mr. Balkrishna Kashinath Joshi, Assistant Commissioner of the 3rd class, to officiate as an Assistant Commissioner of the 2nd class.

No. 646-E.—The following Order of Her Majesty in Council, published in the *London Gazette* of the 30th January, 1894, is republished for general information:—

AT the Court at Osborne House, Isle of Wight, the 29th day of January, 1894.

PRESENT,

The QUEEN'S Most Excellent Majesty.

Lord Steward.
Sir William Vernon Harcourt.
Sir Henry Ponsonby.

Sir John Cowell.
Sir Philip Currie.

WHEREAS by the Extradition Acts, 1870 and 1873, it was amongst other things enacted that, where an arrangement has been made with any foreign State with respect to the surrender to such State of any fugitive criminals, Her Majesty may, by Order in Council, direct that the said

Acts shall apply in the case of such foreign State; and that Her Majesty may, by the same or any subsequent Order, limit the operation of the Order, and restrict the same to fugitive criminals who are in or suspected of being in the part of Her Majesty's dominions specified in the Order, and render the operation thereof subject to such conditions, exceptions, and qualifications as may be deemed expedient; and that if, by any law made after the passing of the Act of 1870 by the Legislature of any British possession, provision is made for carrying into effect within such possession the surrender of fugitive criminals who are in or suspected of being in such British possession, Her Majesty may, by the Order in Council applying the said Acts in the case of any foreign State, or by any subsequent Order, suspend the operation within any such British possession of the said Acts, or of any part thereof, so far as it relates to such foreign State, and so long as such Law continues in force there and no longer:

And whereas by an Act of the Parliament of Canada passed in 1886, and entitled "An Act respecting the Extradition of Fugitive Criminals," provision is made for carrying into effect within the Dominion the surrender of fugitive criminals:

And whereas by an Order of Her Majesty the Queen in Council, dated the seventeenth day of November, one thousand eight hundred and eighty-eight, it was directed that the operation of the Extradition Acts, 1870 and 1873, should be suspended within the Dominion of Canada so long as the provision of the said Act of the Parliament of Canada of 1886 should continue in force and no longer:

And whereas a Treaty was concluded on the twenty-second day of May, one thousand eight hundred and eighty-nine, between Her Majesty and The President of the Argentine Republic, for the mutual extradition of fugitive criminals, which Treaty is in the terms following:—

HER Majesty the Queen of the United Kingdom of Great Britain and Ireland, and His Excellency the President of the Argentine Republic having judged it expedient, with a view to the better administration of justice and to the prevention of crime within the two countries and their jurisdictions, that persons charged with or convicted of the crimes or offences hereinafter enumerated, and being fugitives from justice, should, under certain circumstances, be reciprocally delivered up, have named as their Plenipotentiaries to conclude a Treaty (that is to say):

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, Her Chargé d'Affaires *ad interim* Mr. George Jenner;

And His Excellency the President of the Argentine Republic, His Excellency Doctor Don Norberto Quirno Costa, Secretary of State for the Department of Foreign Affairs;

Who, after having communicated to each other their respective Full Powers, found in good and due and form, have agreed upon and concluded following Articles:—

ARTICLE I.

The High Contracting Parties engage to deliver up to each other, under certain circumstances and conditions stated in the present Treaty, those persons who, being accused or convicted of any of the crimes or offences enumerated in Article II, committed in the territory of the one Party, shall be found within the territory of the other Party.

ARTICLE II.

Extradition shall be reciprocally granted for the following crimes or offences:—

1. Murder (including assassination, parricide, infanticide, poisoning), or attempt or conspiracy to murder.
2. Manslaughter.
3. Administering drugs or using instruments with intent to procure the miscarriage of women.
4. Rape.
5. Carnal knowledge or any attempt to have carnal knowledge of a girl under 16 years of age, if the evidence produced justifies committal for those crimes according to the laws of both the Contracting Parties.

JUZGANDO conveniente Su Majestad la Reina del Reino Unido de la Gran Bretaña e Irlanda, y su Excelencia el Presidente de la República Argentina, á objeto de una mejor administracion de justicia y de impedir la perpetracion de crímenes dentro de los dos países y sus jurisdicciones, que los individuos acusados ó convictos de los crímenes ó delitos mas adelante enumerados, y que hayan huido de la justicia, sean reciprocamente entregados en ciertas circunstancias, han nombrado sus Plenipotenciarios para concluir un Tratado, á saber:

Su Majestad la Reina del Reino Unido de la Gran Bretaña e Irlanda á su Encargado Interino de Negocios en la República, Señor Jorge Jenner; Y su Excelencia el Presidente de la República, Argentina, á su Ministro Secretario de Estado en el Departamento de Relaciones Exteriores, Doctor Don Norberto Quirno Costa;

Los cuales, despues de haberse comunicado sus respectivos Plenos Poderes, hallados en buena y debida forma, han convenido y concluido los Art culos siguientes:—

ARTICULO I.

Las Altas Partes Contratantes se comprometen á entregarse reciprocamente, en las circunstancias y condiciones expuestas en el presente Tratado, aquellas personas que, acusadas ó convictas de cualquiera de los crímenes ó delitos enumerados en el Artículo II, cometidos en el territorio de una de las Partes, fueran halladas dentro del territorio de la otra.

ARTICULO II.

La extradicion se concederá reciprocamente por los siguientes crímenes delitos:—

1. Asesinato (incluso el asesinato con violencia, parricidio, infanticidio, ó envenenamiento), ó la tentativa ó conspiracion para asesinar.
2. Homicidio.
3. La administracion de drogas ó el empleo de instrumentos con el proposito de procurar el aborto.
4. Estupro.
5. Conocimiento carnal ó las tentativas de tenerlo con una niña menor de diez y seis años, siempre que el testimonio aducido justifique el enjuiciamiento por esos crímenes, segun las leyes de las dos Altas Partes Contratantes.

6. Indecent assault.
 7. Kidnapping and false imprisonment, child-stealing.
 8. Abduction.
 9. Bigamy.
 10. Maliciously wounding or inflicting grievous bodily harm.
 11. Assault occasioning actual bodily harm.
 12. Threats by letter or otherwise, with intent to extort money or other things of value.
 13. Perjury or subornation of perjury.
 14. Arson.
 15. Burglary or housebreaking, robbery with violence, larceny, or embezzlement.
 16. Fraud by a bailee, banker, agent, factor, trustee, director, member, or public officer of any Company, punishable with imprisonment for not less than one year by any law for the time being in force.
 17. Obtaining money, valuable security, or goods by false pretences; receiving any money, valuable security, or other property, knowing the same to have been stolen or unlawfully obtained, the value thereof exceeding 1,000 dollars, or £200 sterling.
 - 18.—(a.) Counterfeiting or altering money, or bringing into circulation counterfeited or altered money.
 - (b) Knowingly making, without lawful authority, any instrument, tool, or engine adapted and intended for the counterfeiting of the coin of the realm.
 - (c.) Forgery, or uttering what is forged.
 19. Crimes against bankruptcy law.
 20. Any malicious act done with intent to endanger the safety of any person travelling or being upon a railway.
 21. Malicious injury to property, if such offence be indictable.
 22. Piracy and other crimes or offences committed at sea against persons or things which, according to the laws of the High Contracting Parties, are extradition offences, and are punishable by more than one year's imprisonment.
 23. Dealing in slaves in such manner as to constitute a criminal offence against the laws of both States.
- The extradition is also to be granted for participation in any of the aforesaid crimes, provided such participation be punishable by the laws of both Contracting Parties.
- Extradition may also be granted at the discretion of the State applied to in respect of any other crime for which, according to the laws of both the Contracting Parties for the time being in force, the grant can be made.

ARTICLE III.

Either Government reserves the right to refuse or grant the surrender of its own subjects or citizens to the other Government.

ARTICLE IV.

The extradition shall not take place if the person claimed on the part of Her Majesty's Government, or the person claimed on the part

6. Atentado contra el pudor.
 7. Robo y secuestro de un ser humano, sustraccion de niño.
 8. Rapto.
 9. Bigamia.
 10. Lesiones ó daño corporal grave hecho intencionalmente.
 11. Ataque á las personas del que resulte grave daño corporal.
 12. Amenazas, ya sea por medio de cartas ó de otra manera, con la intencion de sacar dinero ú otros objetos de valor.
 13. Perjurio ó tentativas de conseguirlo.
 14. Incendio voluntario.
 15. Robo, ú otros crímenes ó sus tentativas cometidas con fractura, robo con violencia, hurto y malversacion de valores publicos ó particulares.
 16. Fraude cometido por un depositario, banquero, agente, comisionado, fideicomisario, director, miembro ó empleado publico de cualquiera Compañia, siempre que sea considerado como crimen con pena no menor de un año por una ley que esté en vigor.
 17. El obtener dinero, garantías de valor, ó mercaderias con pretextos falsos; recibir dinero, garantías de valor ú otros bienes, sabiendo que han sido robados ó habidos indebidamente, y excedido su valor de mil pesos ó 200/. (doscientas).
 - 18.—(a.) Falsificacion ó alteracion de moneda, circulacion de moneda falsificada ó alterada.
 - (b) Fabricacion á sabiendas y sin autorizacion legal de cualquier instrumento, herramienta, ó aparato adaptado y destinado á la falsificacion de la moneda nacional.
 - (c) Falsificacion ó alteracion de firmas ó valores, ó circulacion de lo falsificado ó alterado.
 19. Crímenes contra las leyes de bancarrota.
 20. Cualquier acto hecho con intencion criminal, y que tenga por objeto poner en peligro la seguridad de una persona que se encuentre viajando en un ferro-carril, ó que se halle en él.
 21. Daño hecho con intencion criminal á la propiedad, siempre que la ofensa sea procesable.
 22. Pirateria, y otros crímenes ó delitos cometidos en el mar sobre las personas ó sobre las cosas, y que, segun las leyes respectivas de las dos Altas Partes Contratantes, sean delitos de extradicion y tengan mas de un año de pena.
 23. Trata de esclavos, de manera tal que constituya una ofensa criminal contra las leyes de ambos Estados.
- Debe tambien concederse la extradicion por la participacion en cualesquiera de los precitados crímenes, siempre que esa participacion sea punible por las leyes de ambas Partes Contratantes.
- Puede tambien concederse la extradicion segun lo juzgue conveniente el Estado al que se hiciere el pedido con motivo de cualquier otro crimen que, segun las leyes que esten vigentes á la sazón, dé lugar á ella.

ARTICULO III.

Cada una de las dos Altas Partes Contratantes se reserva el derecho de negar ó conceder la entrega de sus propios súbditos ó ciudadanos.

ARTICULO IV.

La extradicion no tendrá lugar si el individuo reclamado por el Gobierno de Su Majestad, ó el individuo reclamado por el Gobierno de la

of the Government of the Argentine Republic, has already been tried and discharged or punished, or is still under trial in the territory of the Argentine Republic or in the United Kingdom respectively, for the crime for which his extradition is demanded.

If the person claimed on the part of Her Majesty's Government, or on the part of the Government of the Argentine Republic, should be under examination for any other crime in the territory of the Argentine Republic or in the United Kingdom respectively, his extradition shall be deferred until the conclusion of the trial and the full execution of any punishment awarded to him.

ARTICLE V.

The extradition shall not take place if, subsequently to the commission of the crime, or the institution of the penal prosecution or the conviction thereon, exemption from prosecution or punishment has been acquired by lapse of time, according to the laws of the State applying or applied to.

It shall likewise not take place when, according to the laws of either country, the maximum punishment for the offence is imprisonment for less than one year.

ARTICLE VI.

A fugitive criminal shall not be surrendered if the offence in respect of which his surrender is demanded is one of a political character, or if he prove that the requisition for his surrender has, in fact, been made with a view to try or punish him for an offence of a political character.

ARTICLE VII.

A person surrendered can in no case be kept in prison or be brought to trial in the State to which the surrender has been made, for any other crime, or on account of any other matters, than those for which the extradition shall have taken place, until he has been restored, or has had an opportunity of returning to the State by which he has been surrendered. This stipulation does not apply to crimes committed after the extradition.

ARTICLE VIII.

The requisition for extradition shall be made through the Diplomatic Agents of the High Contracting Parties respectively.

The requisition for the extradition of an accused person must be accompanied by a warrant of arrest issued by the competent authority of the State requiring the extradition, and by such evidence as, according to the laws of the place where the accused is found, would justify his arrest if the crime had been committed there.

If the requisition relates to a person already convicted, it must be accompanied by the sentence of condemnation passed against the convicted person by the competent Court of the State that makes the requisition for extradition.

A sentence passed *in contumaciam* is not to be deemed a conviction, but a person so sentenced may be dealt with as an accused person.

ARTICLE IX.

If the requisition for extradition be in accordance with the foregoing stipulations, the com-

República Argentina, ya hubiese sido enjuiciado y puesto en libertad ó castigado, ó continuará procesado en el territorio de la República Argentina ó en el Reino Unido respectivamente, por el crimen por el que se demande su extradición.

Si el individuo reclamado por el Gobierno de Su Majestad, ó por el Gobierno de la República Argentina, estuviera detenido por cualquier otro crimen en el territorio de la República Argentina ó en el Reino Unido respectivamente, su extradición será aplazada hasta la terminación del juicio y la completa ejecución del castigo que le fué impuesto.

ARTICULO

La extradición no tendrá lugar si, después de cometido el crimen ó de instituida la acusación criminal ó de condenado el reo, surgiera la prescripción, según las leyes del Estado requeriente, ó requerido.

No tendrá igualmente lugar cuando, según las leyes de cada país, la mas alta pena del delito sea menor de un año de prisión.

ARTICULO VI.

Un criminal fugado no será entregado si el delito por el cual se solicita su extradición es de carácter político, ó si dicho criminal probase que el pedido de extradición se ha hecho en realidad con la mira de enjuiciarlo ó castigarlo por un delito de carácter político.

ARTICULO VII.

Un individuo entregado no puede en caso alguno ser detenido ni enjuiciado en el Estado al que se haga la entrega, por otro crimen ó por otros asuntos que no sean aquellos que hayan motivado la extradición, hasta tanto haya sido devuelto, ó haya tenido una oportunidad de regresar al Estado que lo entregare. Esta estipulación no se aplica á crímenes cometidos después de la extradición.

ARTICULO VIII.

La requisitoria de la extradición se hará por los Agentes Diplomáticos de las Altas Partes Contratantes respectivamente.

La requisitoria para la extradición de un individuo acusado ha de ser acompañada de orden de prisión, dada por autoridad competente del Estado que requiera la extradición, y de aquellas pruebas que, según las leyes del lugar donde sea hallado el acusado, justificarian su prisión si el crimen hubiese sido cometido allí.

Si la requisitoria se relaciona con persona ya condenada, deberá venir acompañada de la sentencia condenatoria dictada contra la persona condenada por el Tribunal competente del Estado que haga la requisitoria para la extradición.

Una sentencia dictada en rebeldía no ha de reputarse condenatoria; pero á una persona así sentenciada puede tratarse como á persona acusada.

ARTICULO IX.

Si la requisitoria para la extradición está de acuerdo con las precedentes estipulaciones, las

petent authorities of the State applied to shall proceed to the arrest of the fugitive.

autoridades competentes del Estado requerido procederán á la prision del fugitivo.

ARTICLE X.

A fugitive criminal may be apprehended under a warrant issued by any Police Magistrate, Justice of the Peace, or other competent authority in either country, on such information or complaint, and such evidence, or after such proceedings, as would, in the opinion of the authority issuing the warrant, justify the issue of a warrant if the crime had been committed or the person convicted in that part of the dominions of the two Contracting Parties in which the Magistrate, Justice of the Peace, or other competent authority exercises jurisdiction: provided, however, that in the United Kingdom the accused shall, in such case, be sent as speedily as possible before a Police Magistrate in London. He shall, in accordance with this Article, be discharged, as well in the Argentine Republic as in the United Kingdom, if within the term of thirty days a requisition for extradition shall not have been made by the Diplomatic Agent of his country in accordance with the stipulations of this Treaty. The same rule shall apply to the cases of persons accused or convicted of any of the crimes or offences specified in this Treaty, and committed on the high seas on board any vessel of either country which may come into a port of the other.

ARTICULO X.

Puede aprehenderse á un criminal fugitivo en virtud de un mandato de prision, dictado por cualquier Juez de Instruccion ó de Paz, ú otra autoridad competente en cualquiera de los dos paises, mediante aquellas pruebas, informes ó denuncias, y aquellos procedimientos, que en la opinion de la autoridad que dé el mandato justificarian análogo mandato si el crimen se hubiera cometido ó la persona hubiera sido condenada en aquella parte de los dominios de las dos Partes Contratantes donde ejerza jurisdiccion el Juez de Instruccion ó de Paz, ú otra autoridad competente: bajo la condicion, sin embargo, que en el Reino Unido el acusado ha de ser remitido, en tal caso, á la mayor brevedad, á Londres, á disposicion de algun Juez de Instruccion. De conformidad con este Artículo, el acusado será puesto en libertad tanto en la República Argentina como en el Reino Unido, si dentro del plazo de treinta dias no hubiera hecho una requisitoria para la extradicion el Agente Diplomático de su pais de acuerdo con las estipulaciones de este Tratado. La misma regla se applicará á los casos de personas acusadas ó condenadas por cualquiera de los crímenes ó delitos especificados en el presente Tratado, y que se hubieran cometido en alta mar abordo de un buque de cualquiera de los dos paises que entrase en un puerto del otro.

ARTICLE XI.

The extradition shall take place only if the evidence be found sufficient, according to the laws of the State applied to, either to justify the committal of the prisoner for trial, in case the crime had been committed in the territory of the same State, or to prove that the prisoner is the identical person convicted by the Courts of the State which makes the requisition, and that the crime of which he has been convicted is one in respect of which extradition could, at the time of such conviction, have been granted by the State applied to; and no criminal shall be surrendered until after the expiration of fifteen days from the date of his committal to prison to await the warrant for his surrender.

ARTICULO XI.

Solo tendrá lugar la extradicion, en el caso de hallarse suficiente el testimonio, segun las leyes del pais requerido, ya sea para justificar el enjuiciamiento en el caso de que se hubiera cometido el crimen en el territorio del mismo Estado, ya sea para comprobar la identidad del preso como la persona condenada por los Tribunales del Estado que hace la requisitoria, y que el crimen por el que se le haya condenado es de aquellos con motivo de los cuales podria, en la época de dicha condenacion, haberse concedido la extradicion por el Estado requerido; y ni gun criminal será entregado hasta despues de pasados quince dias, contados desde la fecha de su encarcelacion á esperar la órden para su entrega.

ARTICLE XII.

In the examinations which they have to make in accordance with the foregoing stipulations, the authorities of the State applied to shall admit as valid evidence the sworn depositions or statements of witnesses taken in the other State, or copies thereof, and likewise the warrants and sentences issued therein, and certificates of, or judicial documents stating, the fact of a conviction, provided the same are authenticated as follows:—

1. A warrant must purport to be signed by a Judge, Magistrate or officer of the other State.

2. Depositions or affirmations, or the copies thereof, must purport to be certified under the hand of a Judge, Magistrate, or officer of the other State, to be the original depositions or affirmations, or to be true copies thereof, as the case may require.

3. A certificate of, or judicial document stating, the fact of a conviction must purport to be

ARTICULO XII.

En los exámenes que deben practicar de conformidad con las precedentes estipulaciones, las autoridades del Estado requerido aceptarán como testimonio válido las deposiciones juramentadas ó las declaraciones de testigos tomadas en el otro Estado, ó copia de ellas, y tambien las ordenes de prision y sentencias allí dictadas y certificados del hecho de una condena ó documentos judiciales que le declaren, con tal que esten, autenticados como sigue:—

1. Una orden de prision debe parecer firmada por algun Juez, Magistrado, ó empleado del otro Estado.

2. Las deposiciones, ó afirmaciones, ó las copias de estas, deben demostrar que certifican, mediante la firma de algun Juez, Magistrado, ó empleado del otro Estado, ser las deposiciones ó afirmaciones originales, ó copias fieles de ellas, segun lo requiera el caso.

3. Un certificado del hecho de una condena ó documento judicial que la declare, debe demos-

certified by a Judge, Magistrate, or officer of the other State.

4. In every case such warrant, deposition, affirmation, copy, certificate, or judicial document must be authenticated either by the oath of some witness, or by being sealed with the official seal of the Minister of Justice, or some other Minister of the other State; but any other mode of authentication for the time being permitted by the law of the country where the examination is taken may be substituted for the foregoing.

ARTICLE XIII.

If the individual claimed by one of the High Contracting Parties in pursuance of the present Treaty should be also claimed by one or several other Powers on account of other crimes or offences committed upon their respective territories, his extradition shall be granted to that State whose demand is earliest in date.

ARTICLE XIV.

If sufficient evidence for the extradition be not produced within two months from the date of the apprehension of the fugitive, or within such further time as the State applied to, or the proper Tribunal thereof, shall direct, the fugitive shall be set at liberty.

ARTICLE XV.

All articles seized which were in the possession of the person to be surrendered at the time of his apprehension shall, if the competent authority of the State applied to for the extradition has ordered the delivery of such articles, be given up when the extradition takes place; and the said delivery shall extend not merely to the stolen articles, but to everything that may serve as a proof of the crime.

ARTICLE XVI.

All expenses connected with extradition shall be borne by the demanding State.

ARTICLE XVII.

The stipulations of the present Treaty shall be applicable to the Colonies and foreign possessions of Her Britannic Majesty, so far as the laws for the time being in force in such Colonies and foreign possessions respectively will allow.

The requisition for the surrender of a fugitive criminal who has taken refuge in any of such Colonies or foreign possessions shall be made to the Governor or chief authority of such Colony or possession by the Chief Consular officer of the Argentine Republic in such Colony or possession.

Such requisition may be disposed of, subject always, as nearly as may be, and so far as the law of such Colony or foreign possession will allow, to the provisions of this Treaty, by the said Governor or chief authority, who, however, shall be at liberty either to grant the surrender or to refer the matter to his Government.

Her Britannic Majesty shall, however, be at liberty to make special arrangements in the British Colonies and foreign possessions for the surrender of Argentine criminals who may take refuge within such Colonies and foreign possessions, on the basis, so far as the law of such

trar que está otorgada por algun Juez, Magistrado, ó empleado del otro Estado.

4. En todos los casos dicha orden, deposicion, afirmacion, copia, certificado, ó documento judicial debe autenticarse, ya sea mediante juramento de algun testigo, ya sea mediante el sello oficial del Ministro de Justicia, ó de algun otro Ministro del otro Estado; pero cualquiera otra manera de autenticar que esté permitida á la sazón por la ley del país donde se practique el exámen, puede sustituirse á las precedentes.

ARTICULO XIII.

Si el individuo reclamado por una de las Altas Partes Contratantes conforme al presente Tratado tambien lo fuera por otra ú otras Potencias con motivo de otros crímenes ó delitos cometidos en sus respectivos territorios se concederá la extradicion al Estado cuya requisicion fuere de fecha mas antigua.

ARTICULO XIV.

Si no se exhibiera testimonio bastante para la extradicion dentro de los dos meses despues de la fecha en que se aprehendió al fugitivo, ó dentro del nuevo plazo que designe el Estado requerido ó el correspondiente Tribunal del mismo, el fugitivo será puesto en libertad.

ARTICULO XV.

Todo objeto que esté en posesion del individuo que haya de entregarse y que se le tome al tiempo de aprehenderlo, será entregado al efectuarse la extradicion si la autoridad competente del Estado requerido para la extradicion ha ordenado la entrega de dichos objetos; y dicha entrega se hará extensiva no solo á los objetos robados, sino á cualquier otro que pueda servir de comprobante del crimen

ARTICULO XVI.

Todos los gastos conexos á la extradicion estarán á cargo del Estado que la requiera.

ARTICULO XVII.

Las estipulaciones del presente Tratado se aplicarán á las Colonias y posesiones exteriores de Su Majestad Británica, en cuanto lo permitan las leyes que estan á la sazón en vigor en dichas Colonias y posesiones exteriores.

La requisitoria para la entrega de un criminal fugitivo refugiado en alguna de, dichas Colonias ó posesiones exteriores, será, hecha al Gobernador ó autoridad principal de dicha Colonia ó posesion por el Agente principal Consular de la República Argentina en dicha Colonia ó posesion.

Conocerá de dicha requisitoria (sugetándose siempre, en cuanto le sea dado y en cuanto lo permitan las leyes de dicha Colonia ó posesion exterior, á las prescripciones de este Tratado) dicho Gybernador ó autoridad principal, el cual tendrá, sin embargo, la facultad ó bien de conceder la entrega ó de referir el asunto á su Gobierno.

Su Majestad Británica tendrá, no obstante, la facultad de hacer arreglos especiales en las Colonias y posesiones exteriores Británicas para la entrega de criminales Argentinos que se refugien en dichas Colonias y posesiones exteriores, sobre la base, en cuanto lo permita la

Colony or foreign possession will allow, of the provisions of the present Treaty.

Requisitions for the surrender of a fugitive criminal emanating from any Colony or foreign possession of Her Britannic Majesty shall be governed by the rules laid down in the preceding Articles of the present Treaty.

ARTICLE XVIII.

The present Treaty shall come into force ten days after its publication in conformity with the forms prescribed by the laws of the High Contracting Parties. It may be terminated by either of the High Contracting Parties by a notice not exceeding one year, and not less than six months.

The Treaty, after receiving the approval of the Congress of the Argentine Republic, shall be ratified, and the ratifications shall be exchanged at Buenos Ayres as soon as possible.

In witness whereof the respective Plenipotentiaries have signed the same, and have affixed thereto the seal of their arms.

Done at Buenos Ayres, on the twenty-second day of May, one thousand eight hundred and eighty-nine.

(L.S.) G. JENNER.

ley de dicha Colonia ó posesion exterior, de las estipulaciones del presente Tratado.

Las requisitorias para la entrega de un criminal fugitivo que emanen de alguna Colonia ó posesion exterior de Su Majestad Británica serán regidas por las reglas sentadas en los precedentes Artículos del presente Tratado.

ARTICULO XVIII.

El presente Tratado entrará en vigor diez dias de publicado conforme á las formas prescriptas por las leyes de las Altas Partes Contratantes.

Podrá darlo por terminado cualquiera de las Altas Partes Contratantes, previo aviso que no pase de un año y no baje de seis meses.

El Tratado, despues de aprobado por el Congreso de la República Argentina, será ratificado, y las ratificaciones serán cangeadas en Buenos Aires á la posible brevedad.

En fé de lo cual los respectivos Plenipotenciarios lo han fiamado, y le han puesto el sello de sus armas.

Hecho en Buenos Aires, á los veintedos dias del mes de Mayo de mil ocho cientos ochento y nueve.

(L.S.) N. QUIRNO COSTA.

And whereas the ratifications of the said Treaty were exchanged at Buenos Ayres on the fifteenth day of December, one thousand eight hundred and ninety-three.

Now, therefore, Her Majesty, by and with the advice of Her Privy Council, and in virtue of the authority committed to Her by the said recited Acts, doth order, and it is hereby ordered, that from and after the ninth day of February, one thousand eight hundred and ninety-four, the said Acts shall apply in the case of the Argentine Republic and of the said Treaty with the Argentine Republic.

Provided always, and it is hereby further ordered, that the operation of the said Extradition Acts, 1870 and 1873, shall be suspended within the Dominion of Canada so far as relates to the Argentine Republic and to the said Treaty, and so long as the provisions of the Canadian Act aforesaid of 1886 continue in force, and no longer.

C. L. Peel.

No. 1131-I.—Whereas His Highness the Maharaja of Bikanir (Bikanir being a Native State within the meaning of the Native Coinage Act, IX of 1876) has, pursuant to the authority contained in section 5 of the said Act, caused to be provided at the Mint of Bombay silver which has been coined under the said Act into four lakhs and ten thousand rupees, and has requested the Government of India to declare that a tender of payment of money, if made in rupees so coined, shall be a legal tender in British India:

And whereas the silver so provided has been coined into rupees of fineness identical with that prescribed by law for rupees of the Government of India:

And whereas the rupees so coined are identical in weight with the rupees of the Government of India, and the devices upon their obverse and reverse differ from the devices on coins now made or issued by the Bikanir State, and have been approved by the Governor-General in Council, and upon each of the rupees so coined its value in money of the Government of India is inscribed in the English language:

And whereas the said Maharaja on behalf of himself, his heirs, and successors has undertaken to abstain, during a term of thirty years from the date of this notification, from coining silver and copper in his own Mint, and has also undertaken that no coins resembling coins for

the time being a legal tender in British India shall, after the expiration of the said term, be struck under his or their authority or with his or their permission at any place within or without his or their jurisdiction:

And whereas the said Maharaja has formally declared that a tender of payment of money, if made in silver coins of the Government of India, shall, in the territories subject to His Highness, be a legal tender in the cases in which payment made in such coins would under the law for the time being in force, be a legal tender in British India:

And whereas the said Maharaja, for himself, his heirs, and successors, has agreed that the law and rules for the time being in force respecting the cutting and breaking of coin of the Government of India reduced in weight by reasonable wearing or otherwise, or counterfeit, or called in by proclamation, shall apply to the coins made for the said Bikanir State under the said Act, and that the said State will defray the cost of cutting and breaking them:

And has also agreed not to issue the same coins below their nominal value, and not to allow any discount or other advantage to any person in order to bring them into circulation:

And has also agreed that, if at any time the Government of India call in their coinage in silver and copper, he, the said Maharaja, his heirs, or successors, will, if so requested by the

Government of India, call in, at his or their own expense, all the said rupees so coined for him :

Now, therefore, the Governor-General in Council, in consideration of the premises and in exercise of the power conferred by the Native Coinage Act (IX of 1876), section 3, is pleased to declare that a tender of payment of money, if made in the said rupees coined under the said Act for the said State of Bikanir, shall, subject to the provisions of the Indian Coinage Act (XXIII of 1870), be a legal tender in British India.

The 30th March, 1894.

No. 473-G.—Colonel W. F. Prideaux, Indian Staff Corps, Resident of the 2nd class, and Resident in Meywar, is appointed to be Resident at Jeypore, with effect from the date of assuming charge, *vice* Colonel H. P. Peacock, Bengal Cavalry, whose services are replaced at the disposal of the Military Department.

Roberts, Indian Staff Corps, 24th (Punjab) Regiment of Bengal Infantry, Deputy Assistant Commissary General, 2nd class (on probation), Commissariat Transport Department in India, was on leave in India (p. a.) from 2nd to 19th February, 1894, under the leave rules for the Staff Corps.

No. 307.—Colonel A. J. C. Birch, Indian Staff Corps, is permitted to reside out of India.

ORGANIZATION.

MOBILIZATION.

No. 308.—With the approval of the Right Hon'ble the Secretary of State for India, the

Governor-General in Council is pleased to direct the publication of the following regulations for the Indian Army Reserve of Officers :—

INDIAN ARMY RESERVE OF OFFICERS.

Retired Officers not liable to further service, Volunteers, Civil Officers, and Private Gentlemen—

1. The following officers and gentlemen may be granted commissions as officers of the Indian Army Reserve :—

For Infantry.

- (a) Officers who having retired from Her Majesty's Indian Military Forces are not liable for further service.
- (b) Officers who having retired from Her Majesty's other Regular Forces are not liable to recall to military service under War Office rules.
- (c) Indian Volunteers, except soldiers on the Unattached List.
- (d) Officials other than Military Officers in the service of the Government in India.
- (e) Private gentlemen residing in India.

For Cavalry.

Any of the above who are serving in mounted corps.

Officers thus commissioned shall, during their employment on army service, have and exercise the authority of officers of corresponding rank in Her Majesty's Regular Forces (but junior in each grade), with respect to any of Her Majesty's Regular Forces in India.

OFFICERS RETIRED FROM THE ARMY.

2. An officer who was retired from Her Majesty's Regular Forces in India, without liability for further service, shall be eligible for appointment as—

a Field Officer up to the age of 45 years ;
Captain up to the age of 40 years ;
Lieutenant or Second-Lieutenant up to the age of 35 years ;

and may be granted a commission as an Indian Army Reserve Officer in a rank not higher than that in which he retired.

No such officer will be eligible for employment after the age of 57.

INDIAN VOLUNTEERS, CIVIL OFFICIALS IN THE SERVICE OF THE GOVERNMENT OF INDIA AND PRIVATE GENTLEMEN.

3. A commission as Second-Lieutenant may be given to any gentleman fulfilling the conditions of clauses (c), (d), (e), of paragraph 1 up to the age of 30 years : provided—

- (a) that he is recommended for a commission by the Local Government, and
- (b) that he has obtained a certificate of proficiency such as is granted to a Captain of Volunteer Forces in India, for which purpose, if not an officer of Indian Volunteers, he may be attached to a Volunteer corps in India and appear before a board of Officers under Army Regulations, India, Volume IX, Section V; or that he shall, after being attached to

a regiment or battalion of the Regular Forces for a period of not less than one month, satisfy a board of officers composed as directed in Army Regulations, India, Volume II, paragraph 1312, and the Queen's Regulations, 1892, Section IX, paragraph 19, that he possesses a satisfactory amount of military knowledge for the rank of Lieutenant.

General Regulations.

4. Commissions will be issued to officers of the Indian Army Reserve when they are actually called up for service. If, however, an officer desires it, his commission may be prepared and issued at any time on payment of the stamp duty of thirty shillings.

5. Commissions will not be granted to candidates who are not medically fit for service or whose character and qualifications are not satisfactory, but the limitation as to age and the qualifications prescribed may, subject to the approval of Her Majesty, be dispensed with in cases where the Governor-General in Council may, on the recommendation of the Commander-in-Chief in India, consider that the exigencies of the service rendered it desirable that those provisions should not be enforced.

6. The name of every officer shall be borne on one of two special lists, one for Cavalry and one for Infantry, from which Subalterns and Captains shall be removed at the age of forty-five years, Majors at the age of fifty years, Lieutenant-Colonels at the age of fifty-five years, and the Colonels at the age of fifty-seven years; unless the Governor-General in Council, on the recommendation of the Commander-in-Chief in India, shall in any particular case consider that the exigencies of the service render it desirable that this rule should not be enforced.

7. Officers of the Indian Army Reserve of proved merit in the field may, under special circumstances, be recommended to Her Majesty for commissions in the Regular Army.

8. Officers desirous of resigning the Indian Army Reserve must, if in India, submit their applications to the Local Government, and, if residing out of India, to the Secretary of State for India.

9. The Governor General in Council may at any time dispense with the services of an officer, subject to the approval of Her Majesty the Queen.

10. Officers of the Indian Army Reserve who desire to proceed out of India for any longer period than six months, must submit their applications for leave of absence to the Local Government in whose territories they may be residing, or to the Government of India if employed in any department directly subordinate to that Government.

Employment on Army Service.

11. All Officers of the Indian Army Reserve shall be liable to be called to army service in time of emergency by general or special notification in the *Gazette of India*.

12. Any such officer may, with his own consent and on the recommendation of the Commander-in-Chief in India, be recalled to army service at any time by special notification in the *Gazette of India*.

13. An officer called to army service may be employed in the Indian Army regimentally, or on the army staff, or in any department, and shall, on being called to army service,—

(a) if appointed to a corps, have no claim arising out of his rank to any appointment in such corps, except such as he may be nominated to by competent authority.

(b) if appointed to a department, be placed at the bottom of the lowest grade of that department: Provided that an ex-departmental staff officer re-appointed to the same department shall be posted to the grade in which he last served, and that the head of the department shall with the approval of the Government of India have power, under exceptional circumstances, to appoint an officer to any grade which he may consider to be best in the interests of the service.

14. Officers called to army service shall rank among themselves according to the dates of their respective commissions, but junior in their rank to officers who have retired from the Indian Army with liability for further service.

15. An officer belonging to the Volunteer Forces shall, while on army service, be borne as a supernumerary to the establishment of the regiment of Volunteer Forces to which he belongs.

Promotion.

16. An officer shall at any time be eligible for promotion.

17. Promotion to a Lieutenancy will be given by the Governor-General in Council, subject to Her Majesty's approval, after a service of not less than three years as a Second-Lieutenant and on the recommendation of the Commander-in-Chief in India or the Local Government.

Declaration.

18. Every officer before receiving a commission will be required to make a declaration before a Magistrate in the following form:—

"I, the undersigned, hereby promise and declare that I will serve Her Majesty the Queen, Empress of India, her heirs and successors, as an officer of the Indian Army Reserve of Officers, until my resignation shall be accepted, and, if I am called to army service, be accepted by notification in the *Gazette of India*, and that I will serve in any part of India or in any other place in which any portion of Her Majesty's Indian Forces may be serving and in any branch or department of the service to which I may be appointed.

Signed this day of 18 ."

Witness.

19. Applicants for commissions may state the branch or department of the Army in which they would prefer to be employed in the event of their being called out for service. These wishes will be recorded, and will, as far as the exigencies of the service may permit, be considered in appointing the officers to corps and departments.

Pay, Pensions, Gratuities, Passages.

20. Officers shall be entitled to receive, from the date of the notification in the *Gazette of*

India calling them to army service, to the date on which they cease to be employed on army service, the same rates of pay and allowances as officers of the Indian Army of corresponding rank and holding similar appointments in the same branch or department of the service. In the case of officers residing out of India, the pay and service will be held to commence from the date of landing in India.

21. Officers shall also be entitled to free passage from and to their homes, in India or elsewhere, when called out and when no longer required for army service.

22. An officer who has been called to army service, and whose services are no longer required, shall, unless his services have been dispensed with for misconduct, be entitled to three months' full pay and allowances of the appointment in which he was last serving, reckoned from the date on which he ceased to be employed on army service.

23. Officers shall, while on army service, be entitled to the same advantages, as regards pensions for wounds, as may be accorded by Army Regulations, India, Volume I, Part I, to officers of the same rank of the regular forces. They shall also be entitled to receive medals, batta, and compensation for losses on the same scale as officers of the Regular Forces of corresponding rank.

24. The widows and children of officers called to service, under paragraphs 11 and 12, and dying while on army service, shall have the same rights in regard to pensions and compassionate allowances as may be accorded by the Royal Warrant in force for the time being to the widows and children of officers of the Regular forces.

Special Rules for Cavalry Reserve Officers appointed under Rule 1.

25 (A) Officers of the Native Cavalry Reserve will be required, until they attain the age of 40, to attend the Head-Quarters of the Native Cavalry regiment most conveniently placed with respect to their homes for an annual training of 14 days, which at their own request may be extended up to two months. Such training will be accepted as qualifying for the capitation grant in the Volunteer Corps to which the officers belong. The details of attendance will be arranged by General Officers Commanding the districts to which the Volunteer Corps belong, in communication with the districts in which the training is to be undergone.

(B) The rank of these officers while going through their annual training will be that held by them in the Indian Army Reserve, irrespective of any rank they may hold in their Volunteer Corps. During the actual period of training they will receive pay at the rate of ₹10 per diem, and free passage by rail from and to their homes for themselves, one charger, and one personal servant.

(C) Officers on attaining the age of 40 will not be required to undergo further training, nor will they be liable to be called up for active service except in cases of emergency. They will, however, remain in the Reserve subject to retirement at the ages and under the conditions laid down in rule 6.

(D) Officers detailed to serve with a regiment of Native Cavalry in the field will be required to

join with one charger. A second charger and if necessary, saddlery will be provided on loan by Government, or on payment, subject to repurchase by Government at a valuation. They will receive Staff Corps rates of pay and staff pay as squadron officers from date of leaving their station to join. They will rank among themselves according to the date of their commissions as Lieutenants, those not already promoted to that rank being so promoted on joining.

Uniform.

26. Officers, as officers of the Indian Army Reserve, are not required to provide themselves with any uniform until their services are actually required.

They are however authorised, when not actually in performance of duty with the Volunteer Forces, or in a Government Department for which a special uniform is prescribed, to wear the following uniform:—

(A) *Tunic*.—Scarlet cloth, with blue cloth collar and cuffs. The collar ornamented with $\frac{1}{4}$ inch lace along the top, and gold Russia braid at the bottom, the cuffs pointed with $\frac{1}{4}$ inch lace round the top, and a tracing of gold Russia braid $\frac{1}{4}$ inch below the lace, terminating in a crow's foot and eye; eight buttons in front and two at the waist behind; the skirt closed behind with a plait at each side, and lined with white; the front, collar and skirt plaits edged with white cloth, $\frac{1}{4}$ inch wide; shoulder-straps of twisted round gold cord, universal pattern, lined with scarlet, a small gilt button at the top, badges of rank in silver, the letters "I. A. R." in silver or silver embroidery will be worn below the badges of rank.

Field Officers have a row of braided eyes below the lace on the collar; three bars of lace along the top of the cuff, showing $\frac{1}{4}$ inch of the facings between the bars; and the braiding on the sleeve is in the form of eyes below the lace for Colonels and Lieutenant-Colonels only. The lace on the sleeve extends to ten inches from the bottom of the cuff.

Captains have no braided eyes on the collar, and only two bars of lace along the top of the cuff; the tracing of the braid below the lace on the sleeves is plain without eyes.

Lieutenants have one bar of lace only on the cuff, extending to $9\frac{1}{4}$ inches from the bottom of the cuff. In other particulars the lace and braiding are the same as those of Captains.

Second-Lieutenants.—As for Lieutenants but without badges of rank.

Lace.—Gold, two-vellum pattern.

Buttons.—Gilt, burnished, with crown and scalloped edge.

Waist-plate.—Round gilt clasp, with Royal Cypher and crown on the centre piece, and the words "Indian Army Reserve" on the outer circle.

Helmet.—As worn by Infantry officers in India.

Puggie.—White Muslin.

Forage cap.—As for infantry of the line, with Royal Cypher and crown embroidered in gold in front.

All the other articles of uniform as for officers of infantry of the line, but with the letters "I. A. R." on the shoulder-straps in gilt metal or in gold embroidery on garments for which cloth or serge straps are authorized.

(B) An officer retired from the army may wear the uniform of his late regiment.

(C) Officers of the Native Cavalry reserve called up for training under Rule 25-A, will wear the uniform of the Volunteers Corps to which they belong.

27. When called to army service, all officers of the Indian Army Reserve, if not already in possession of khaki uniform, will be required to provide themselves with a field service uniform of the pattern prescribed for the corps or department to which they may be appointed for duty.

No. 100 of 1894.—William Hawkins and Thomas Hawkins, both of 38, Queen's Road, Buckland, Portsmouth, in the County of Hants, Mechanics, for im-provements in gene-rators to be used in the production of hydrogen gas.

No. 101 of 1894.—Paul Dubian, of 10, Rue de Paradis, Marseilles, in the Republic of France, Engineer, for improvements in or connected with steam generators.

No. 770 P.—Specifications of the undermentioned inventions have been filed under the provisions of Act V of 1888, in the Office of the Secretary appointed under the Inventions and Designs Act, 1888. Copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director, Department of Land Records and Agriculture, North-Western Provinces and Oudh. A copy of every specification is open to public inspection, from 11 A.M. to 4 P.M., at the Office of the Secretary appointed under the Inventions and Designs Act, 1888, in the Imperial Secretariat Buildings, Government Place, West, Calcutta, upon payment of a fee of one rupee. A certified copy of any specification will be given to any person requiring the same on payment of the expense of copying.

No. 333 of 1893.—Lloyd Heber Chase, of "Namoi," Hawthorn Road, Caulfield, near Melbourne, in the Colony of Victoria, Civil Engineer, for an improved optical fore-sight for rifles and other firearms and ordnance. (Filed 13th March 1894.)

No. 17 of 1894.—Elisha Gray, of Highland Park, Lake County, State of Illinois, United States

of America, Professor of Physics, for improvements in telautographs, or writing telegraphs. (Filed 15th March 1894.)

No. 25 of 1894.—Henry Christopher Mance, K.B., of Manora, Newnham Road, Bedford, in the County of Bedford, England, Civil Engineer, for improvements in heliographs. (Filed 15th March 1894.)

No. 771 P.—The fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 22 of 1889.—The Honourable Erastus Wiman, of New York, United States of America, for improvements relating to the pulverization or reduction of mineral or other substances and to apparatus therefor. (From 1st April 1894 to 31st March 1895.)

No. 18 of 1890.—Nathaniel Greening, of Warrington, in the County of Lancaster, England, for improvements in wire weaving looms. (From 3rd April 1894 to 2nd April 1895.)

No. 772 P.—Whereas the inventors of the under-mentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888) [or within the further time allowed under section 8, sub-section (4) of the said Act], the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased:—

No. 178 of 1889.—Mr. J. C. Martin's invention for improvements in treating or imparting body or opacity to sulphate of baryta and other sulphates and substances, and the manufacture from materials so treated of white and tinted or coloured pigments. (Specification filed 19th December 1889.)

No. 181 of 1889.—Mr. J. Higginson's Invention for improvements in apparatus for grinding the flats of revolving flat carding engines. (Specification filed 20th December 1889.)

No. 224 of 1889.—Mr. J. Clarke's invention for improvements in carding engines. (Specification filed 23rd December 1889.)

No. 241 of 1889.—Mr. W. E. Hobbs' invention for improvements in and relating to machinery for the prevention of accidents. (Specification filed 21st December 1889.)

No. 248 of 1889.—Mr. J. Alves' invention for an improved concentrating table. (Specification filed 20th December 1889.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs50 for each of the said inventions.

No. 108 of 1888.—Mr. C. D. Aria's invention for improvements in or applicable to moderator and carcel lamps to render them capable of burning mineral oils. (Specification filed 20th December 1888.)

Fee in respect of the continuance of an exclusive privilege—

(a) After the filing of the specification and before the expiration of the fifth year from the date of the filing thereof—

The sum of Rs50.

NOTICES.

Applications and all communications relating to the Inventions and Designs Act, 1888, should be placed under cover addressed "Secretary to the Government of India, Revenue and Agricultural Department (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Inventions and Designs Act, 1888, is open for the transaction of business on all days (except Sundays and Gazetted Holidays) from 11 A.M. to 4 P.M.

Applications for the registration of Trade Marks as "Designs" under Part II of the "Inventions and Designs Act (V of 1888)" are frequently received in the Office of the Secretary appointed under the said Act. It is hereby notified for general information that the Government of India are advised that Trade Marks are not "Designs" within the meaning of the said Act, and, therefore, are not capable of such registration.

G. W. FORREST,
*Secy. under the Inventions and
Designs Act, 1888.*

**AGENT TO THE GOVERNOR-GENERAL AND CHIEF COMMISSIONER,
BALUCHISTAN.**

NOTIFICATION.

Quetta, the 21st March, 1894.

No. 1770.—In exercise of the powers conferred upon him by Section 3, Chapter II, of the British Baluchistan Forest Regulation, 1890, the Chief Commissioner of British Baluchistan is hereby pleased to declare the undermentioned land to be State Forest, with effect from 15th April, 1894:—

No.	Name of Forest.	Civil District.	Area in Acres.	BOUNDARIES.				REMARKS.
				East.	South.	West.	North.	
1	Kach Mangi.	Thal-Chotli.	9,400	A line of pillars from near the bottom of the stream following a spur to the top of the range.	The crest of the range to about one mile beyond the "Lakri" peak.	Thence a line of pillars down the northern face of the hill for about half mile in a northerly and then in a north-easterly direction almost to the Sibi-Quetta Military Road.	A line of pillars at an average distance of five hundred yards above the road and the bottom of the valley.	This is a rectangular block comprising the north slopes of the hill from ridge to valley. The upper limit situate nearly opposite Kach and the lower skirting the sheet rock which forms the Chappar hill.

JOHN OWENS,

Presidency Postmaster, Calcutta.

REDUCTION IN PRICE OF CINCHONA FEBRIFUGE.

From 1st April, 1891, and until further orders, Cinchona Febrifuge can be purchased by all Government officers and by any one taking *ten pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates—four-ounce tin, *R2-8*; eight-ounce tin, *R5*; one pound tin, *R10*. The general public can be supplied by the Superintendent, Botanical Garden, *for cash only* at the under-noted rates—per four-ounce tin, *R3*; per eight-ounce tin, *R6*; per pound tin, *R12*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

জ্বরদ্ব সিনকোনার মূল্য কম করণ ।

১৮৯১ সালের এপ্রেল মাসের ১লা তারিখ অবধি বাবং অত্র আজ্ঞা না হয় তাবৎ কলিকাতার বোটানিকেল গার্ডেনের অর্থাৎ কোম্পানির বাগানের সুপারিন্টেন্ডেন্টের নিকট গবর্ণমেন্টের কর্তৃচরিত্রগণ এবং অপর কোন ব্যক্তি এক কালীন দশ পৌণ্ড জর করিলে নিম্নলিখিত হিসাবে জ্বরদ্ব সিনকোনা পাইবেন অর্থাৎ চারি ওল টিন ২১০ টাকার, আট ওল টিন ৬, টাকার ও এক পৌণ্ড টিন ১০, টাকার পাইবেন। সর্ব সাধারণে কোম্পানির বাগানের সুপারিন্টেন্ডেন্টের নিকট নগদ মূল্যে এই এই হিসাবে অর্থাৎ চারি ওল টিন ৩, টাকার, আট ওল টিন ৬, টাকার এবং এক পৌণ্ড টিন ১২, টাকার পাইতে পারিবেন। কলিকাতার প্রধান প্রধান ইউরোপীয় ও দেশীয় ঔষধ বিক্রেতাগণও এই ঔষধ বিক্রয় করিয়া থাকেন। উপরোক্ত হার ছাড়া চারি ওল টিনের ১০, আট ওল টিনের ১০ ও এক পৌণ্ড টিনের ১০ ডাক মাতুল দিতে হইবে।

PURE SULPHATE OF QUININE.

Manufactured at the Bengai Government Cinchona Plantation.

The price of this Quinine is as follows :—

1 Pound tin, *R10*, or, post free, *R10-12*

½ " *R 8*, " *R 8-8*
¼ " *R 4*, " *R 4-8*

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta. It can be had either white or coloured pink.

বঙ্গদেশের গবর্ণমেন্টের সিনকোনা আবাদে প্রস্তুত বিভিন্ন কুইনাইন ।

এই কুইনাইনের নিম্নলিখিত মূল্য, বহা—

১ এক পৌণ্ড টিন . ১০ বা ডাকমাতুল বিনা ১০০
½ আধ " ৭ বা ডাকমাতুল বিনা ৭০
¼ শিক " ৪ বা ডাকমাতুল বিনা ৪০

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধরূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিনকোনাইন ও সিনকোনা চাইন নামক অপরূপ কারের সহিত ইচ্ছা পূর্বক মিশান হয় নাই তাহার প্রমাণ দিওরাই বাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেন্টের কর্তৃচরিত্রগণের নিকট বিক্রয় করা বাইবে এবং কলিকাতার দিক্‌শ্বর শিবপুরের কোম্পানির বাগানের সুপারিন্টেন্ডেন্টের নিকট পাওয়া বাইতে পারিবে। ইহা অন্য বা পাটল বর্ণের পাওয়া বাইতে পারিবে।

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo with numerous Plates.

First two Volumes are published in separate convenient sized Sections, as below, but can be bound up in Volumes if required.

VOLUME I.*

Section	I. Building Materials (in the Press).
"	II. Masonry (1891), <i>R1-8</i>
"	III. Carpentry (1889), <i>R1-8</i>
"	IV. Earthwork <i>R1-8</i>
"	V. Tools and Plant (never published).

VOLUME II.*

Section	VI. Buildings (1891), <i>R1-8</i>
"	VII. Bridges (in the Press).
"	VIII. Roads (1888), <i>R2-0</i>
"	IX. Railways (1891), <i>R1-8</i>
"	X. Irrigation Works (1873), <i>R2-0</i>

ROORKEE MANUAL OF APPLIED MECHANICS.

- Vol. I. Direct and Transverse Strain, principally by Analytical Methods (in the Press).
" II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

- VII. Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table. *R3-8*.
XIII. Drawing (by Lieut. R. Pulford, R.E.)† *R8*.
XIIIa. Drawing, First Principles of Geometrical (by do.) (4th edition). *R1-4*.
XIV. Simple Applied Mechanics, Parts I and II (in the Press).
XV. Examples of Estimating. Comprising a progressive series of Estimates (with plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (4th edition). *R3-12*.

* Date of Edition on sale.

† Originally published at *R15*, reduced to *R8*.

- XVI. Earthwork Estimating, with Practical Tables and Diagrams.** By Major A. M. Brandreth, R.E. R1.
XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 8a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Sections IX and X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

- Curve Tables, complete for laying any curve.** 4a.
Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1-8.
Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.
O'Callaghan's Earthwork Tables for India, in one large sheet, 8a.; mounted on cloth, to fold up. R1-12.
Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. (In the Press). R1-4.
Specifications and Schedules of Prices for execution of various kinds of Work by Contract, etc. By Major-General F. W. Peile, R.E. R3.
Tyndall's Hand-Book of Specifications (in the Press).
The Indian Engineer's Pocket Book. 4a.
Wooden Bridges and Designs. By Rai Kunhya Lal R4.
Blasting under Water (2nd edition). 12a.
Waugh's Instructions for Topographical Surveying. R1-4.
Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6a.
Roorkee Hydraulic Experiments (in 3 Vols.—Text, Tables, and Plates). By Capt. A. Cunningham, R.E. R12.
Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. R1-8.

MATHEMATICAL.

- Boileau's Tables of Wages and Rent, and of the value of goods.** Tables for converting Seers and Chittacks into Decimals of a Maund, and Annas and Pie into decimals of a Rupee. With a few others of general utility. (4th edition.) R2.
Boileau's Tables of Log sin² $\frac{1}{2}$ P (for computing time). 8a.
Cape's Logarithms, with Tables of Squares, Cubes, etc. (In the Press.) R1-4.
Cape's Geometry. R1-8.
„ Mechanics. R2-4.

HINDUSTANI.

- Elements of Hindustani Grammar.** 4a.
Technical Dialogues—English and Urdu. R1-4.
A Vocabulary of Common and Technical Words in English-Urdu. R1-4.

- Circulars containing the Rules of Admission to the different Classes held at the College will be forwarded to applicants.**

* These include Question Papers for Engineer and Upper Subordinate Classes, and Superior Accounts Branch, P. W. D.

J. CLIBBORN, Major, I.S.C.,
Principal, Thomason College.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

- The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.**
The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.
In supersession of the previous advertisements, on and from the 1st January, 1899, the terms of subscription and sale will be

as follows for current issues, as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete Series, including postage.		Without postage.		With postage.

REVENUE DEPARTMENT.

Horse Surra, Report on, Vol. I, by ALFRED LINGARD, M.B., M.S., Durham. Super royal quarto. R10 (R1-4.)

[Revised Advertisement.]

A Dictionary of the Economic Products of India.

By DR. GEO. WATT, C.I.E.,

Expert on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes and Volume VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings respectively will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets,

etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Volume II embraces the letter C in 689 pages; Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L, and Volume V contains the latter half of L to end of O; Vol. VI (which will consist of four parts), Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year, but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Indian Wheat Trade, Parts, I, II and III, combined. Royal 8vo., limp cover. R1-8 (4a.)

Manual of the Land Revenue systems of India. By B. H. BADEN-POWELL. Revised Edition, in 3 Volumes:—

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART III.

Advertisements and Notices by Private Individuals and Corporations.

PROMISSORY NOTES.

Destroyed by Whiteants.

The three Government Promissory Notes, Nos. 219907, 219908, and 332563, of the 4 per cent. loan of 1865, for ₹500 each, the first two originally standing in the name of the late Ohick Chunder Chakrabarty, and the last one in the name of Makshada Dabee as administratrix of Ohick Chunder Chakrabarty; the above notes were never endorsed to any other person. Payment of the above notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicates in favour of the said Makshada Dabee, widow, and administratrix to the estate of the late Ohick Chunder Chakrabarty.

TARUK NATH CHATTERJEE,
Calcutta.

Lost.

The upper half of the Government Promissory Note, No. 305281, of the 4 per cent. loan of 1865, for ₹100, standing in the name of C. Sivasunkara Iyer, the proprietor, by whom it was never endorsed to any other person. Pay-

ment of the above note and the interest thereupon has been stopped at the Public Debt Office, Bank of Bengal, and application is to be made for accrued interest and for the issue of a duplicate in favour of the proprietor.

C. SIVASUNKARA,
*Commissariat Contractor,
Rajah Mood's Street, Secunderabad (Deccan).*

UNCOVENANTED SERVICE FAMILY PENSION FUND.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 29th March, 1894, and is hereby promulgated for general information :—

ACT NO. X OF 1894.

An Act to amend the Code of Criminal Procedure, 1882.

WHEREAS it is expedient to amend the Code of Criminal Procedure, 1882; It is hereby enacted as follows :—

1. In section 44 of the said Code the figures "143, 144, 145, 147, 148," shall be inserted between the figures "130" and the figures "302".

2. (1) For the part of section 45 of the said Code beginning with the words "Every village-headman" and ending with the words "under suspicious circumstances" the following shall be substituted, namely :—

"45. Every village-headman, village-accountant, village-watchman, village-police-officer, owner or occupier of land, and the agent of any such owner or occupier, and every officer employed in the collection of revenue or rent of land on the part of Government or the Court of Wards, shall forthwith communicate to the nearest Magistrate or to the officer in charge of the nearest police-station, whichever is the nearer, any information which he may obtain respecting—

(a) the permanent or temporary residence of any notorious receiver or vendor of

stolen property in any village of which he is headman, accountant, watchman, or police-officer, or in which he owns or occupies land, or is agent, or collects revenue or rent;

(b) the resort to any place within, or the passage through, such village, of any person whom he knows, or reasonably suspects, to be a thug, robber, escaped convict or proclaimed offender;

(c) the commission of, or intention to commit, in or near such village any non-bailable offence or any offence punishable under section 143, 144, 145, 147 or 148 of the Indian Penal Code;

(d) the occurrence in or near such village of any sudden or unnatural death or of any death under suspicious circumstances;"

XLV of 1860.

(2) In the same section, after clause (e), added by section 2 of Act III of 1894, the following shall be inserted, namely :—

"(f) any matter likely to affect the maintenance of order or the prevention of crime or the safety of person or property respecting which the District Magistrate, by general or special order made with the previous sanction of the Local Government, has directed him to communicate information."

(3) After the same section the following section shall be added, namely :—

"45A. Subject to rules in this behalf to be made by the Local Government, the District Magistrate may from time to time appoint one or more persons to be village-headmen for the purposes of the last foregoing section in any village for which there is no such headman appointed under any other law."

PART V.

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 29th March, 1894:—

NO. 7 OF 1894.

A Bill to amend the Dekkhan Agriculturists' Relief Acts, 1879 to 1886.

WHEREAS it is expedient to amend in manner hereinafter appearing the Dekkhan Agriculturists' Relief Acts, 1879 to 1886; It is hereby enacted as follows:—

1. (1) This Act may be called the Dekkhan Agriculturists' Relief Act, 1894; and it and the Dekkhan Agriculturists' Relief Acts, 1879 to 1886, may be cited collectively as the Dekkhan Agriculturists' Relief Acts, 1879 to 1894.

(2) This Act shall come into force on the first day of 189 .

2. In this Act, unless there is something repugnant in the subject or context,—

"section" means a section, and "Chapter" a Chapter, of the Dekkhan Agriculturists' Relief Acts, 1879 to 1886.

3. Sections 8, 9, 14, 15, 19 and 73, and the last seventeen words of section 7, are hereby repealed.

4. To section 1 the following shall be added after the words "Presidency of Bombay," namely:—

"or to any part or parts of any other such district or districts."

Substitution of new section for section 2.

5. For section 2 the following shall be substituted, namely:—

"2. In construing this Act, unless there is something repugnant in the subject or context, the following rules shall be observed, namely:—

"1st.—'Agriculturist' shall be taken to mean a person who by himself, or by his servants, or by his tenants being members of his family, earns his livelihood wholly or principally by agriculture carried on within the limits of a district or part of a district to which this Act may for the time being extend, or who ordinarily engages personally in agricultural labour within those limits.

"Explanations.—(a) An agriculturist who, without any intention of changing his status as such, temporarily ceases to earn his livelihood or to engage personally in agricultural labour as aforesaid does not thereby cease to be an agriculturist within this definition.

"(b) An inamdar who, without himself cultivating his lands, derives an income from rents received from his tenants is not, nor is an assignee of Government assessment or a mortgagee, as such, an agriculturist within this definition.

"2nd.—In Chapters II, III, IV and VI, and in section 69, the term 'agriculturist,' when used with reference to any suit or proceeding, shall mean a person who, when any part of the liability which forms the subject of that suit or proceeding was incurred, was an agriculturist within the meaning of that word as defined in the first rule then in force.

"3rd.—An agriculturist shall be deemed to reside where he earns his livelihood or personally engages in agricultural labour as aforesaid.

"4th.—'Money' shall be deemed to include agricultural produce, implements and stock.

"5th.—'Lease' shall be deemed to include a counterpart, kabuliyat, an undertaking to cultivate or occupy and an agreement to lease.

"6th.—'Standing crops' shall be deemed to include garden-produce attached to trees or to the soil."

Addition of new section after section 13.

6. After section 13 the following section shall be added, namely :—

"13A. (1) Notwithstanding anything in the last foregoing section, no agreement for the set-off of profits against interest and assessment and similar charges, without an account, made after the first day of 189 , shall be set aside where the Court is satisfied that the bond was given for the principal sum stated as consideration therein, and that such sum was actually paid to the borrower or by his order, and the mortgagee has been let into actual possession of the property and is cultivating it himself or by a tenant other than the mortgagor."

"(2) Where any such agreement as is mentioned in sub-section (1) is upheld, the accounts (if any) taken in the suit shall be taken in the manner directed by the last foregoing section but subject to such agreement."

7. To sub-section (3) of section 15 D the following shall be added, namely :—

"Every decree for redemption or foreclosure of any mortgage or for the sale of any mortgaged property at the instance of a mortgagee thereof shall name such future day, not being less than three months after the date of such decree, as the Court may think reasonable, for the payment by the mortgagor of the money payable under the decree, and no such foreclosure shall be made absolute nor shall any such sale take place before the day so named."

8. For the first seven words of section 61 Amendment of section 61. the following shall be substituted, namely :—

"The Local Government may appoint any officer to exercise".

9. In Chapter XI, before section 70, the following sections shall be inserted, namely :—

"69A. The last clause of section 258 of the Code of Civil Procedure XIV of 1882. Bar of application of section 258, Act XIV, 1882. shall not apply to payments out of Court made in any proceeding under this Act.

"69B. In taking an account in any suit under this Act interest shall be allowable on taking of account. awarded at the following rates :—

(a) the rate, if any, agreed upon between the parties or the persons (if any) through whom they claim, unless such rate is deemed by the Court to be unreasonable ; or,

(b) if such rate is deemed by the Court unreasonable, or if no rate was agreed upon, or, when any agreement between the parties or the persons (if any) through whom they claim, to set-off profits against interest and assessment and similar charges without an account has been set aside by the Court, such rate as the Court may deem reasonable."

10. In section 72, after the word "agriculturist" where that word first occurs, Amendment of section 72. the words "in any of the districts of Puna, Satara, Sholapur and Ahmadnagar,"

and in the same section, after the same word where that word afterwards occurs, the words "in any of the districts aforesaid," shall be added.

STATEMENT OF OBJECTS AND REASONS.

THE object of this comparatively short Bill is to introduce into the law known as the Dekkhan Agriculturists' Relief Acts a few changes suggested by a Commission which was appointed by the Government of India in 1891 to inquire into the working of the Acts. The larger projects recommended by that Commission have no bearing upon this Bill except in one particular which will be noticed presently, and but for one reason the Government of Bombay would have been quite content to leave the law as it stands and to defer the alterations now proposed until the Acts could be consolidated into one enactment. The reason which mainly induces the Local Government to approach this Council now is to be found in section 4 of this Bill. Already the law permits the extension of the Acts to any other districts, but it happens that the physical and agricultural condition of various talukas in the same district differs greatly, and the Government of Bombay in pursuance of past policy desires only to extend the Acts to those areas where they are really needed. Since this amendment required legislation, the opportunity has been taken to give effect to some of the recommendations of the Commission by repealing sections 8, 9, 15, 19, and 73 of the present law. Section 14 of the existing law is only repealed because it gains a wider application by being transferred to Chapter XI as 69B under section 9. By section 5 of the Bill the definition of "agriculturist" is slightly changed so as to make clearer the intention of the Legislature in the second rule and to exclude from the special law intended for agriculturists an owner of alienated land whose only title to be deemed an agriculturist in one of the districts to which the Acts apply arises from his receipt of rents from his tenants in that district. Section 6 is drafted in deference to the views of the Commission with only such conditions as appear indispensable. Section 7 provides an obviously desirable interval to enable the mortgagor in certain cases to find the money payable under a decree ; and section 9 recognises under 69A a practice common in the Dekkhan. Section 10 limits the special Limitation Law to the four districts in which the Act runs, and thus endeavours to meet the recommendation of the Commission who have proposed an alteration in the general Limitation Law. The other changes require no special notice.

W. LEE-WARNER,

The 28th March, 1894.

S. HARVEY JAMES,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the Presidency Small Cause Courts Act, 1882, was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 29th March, 1894:—

We, the undersigned, Members of the Select Committee to which the Bill to amend

the Presidency Small Cause Courts Act, 1882, was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

2. Section 2 of Bill as revised.—We have proposed to subject legal practitioners in Presidency Small Cause Courts to the same disciplinary authority as practitioners in

other subordinate Courts.

3. Section 3 of Bill as revised.—We have proposed to amend this section so as to dispense, in the case of advocates, vakils and attorneys of a Chartered High Court, with any specified period of standing at the bar as a qualification for appointment to Small Cause Court judgeships.

4. Section 4 of Bill as revised.—We have deemed it expedient to maintain this section in the form in which it was originally proposed, that is to say, to leave the procedure and practice of Presidency Small Cause Courts to be regulated by the High Court.

5. Section 5 of Bill as revised.—We have proposed to make it possible for Registrars to deal, under Chapter VII of the Act, with applications for the recovery of possession of immoveable property of small value.

6. Section 7 of Bill as revised.—We have so modified proposed section 19A as to bring it into closer accord with the actual practice of the Presidency Small Cause Courts.

7. Sections 8, 9 and 11 of Bill as revised.—These are the most important sections in the Bill. It is proposed by them to leave it to a plaintiff to institute a suit of value exceeding one thousand rupees in the Small Cause Court or in the High Court at his election, and to a defendant to move the High Court to bring such a suit on to its own file.

8. We have removed the last two sections of the Bill as it was last before the Council.

No. II.

A Bill to amend the Presidency Small Cause Courts Act, 1882.

XV of 1882. WHEREAS it is expedient to amend the Presidency Small Cause Courts Act, 1882; It is hereby enacted as follows:—

I. (1) This Act may be called the Presidency Small Cause Courts Act, 1894; and

(2) It shall come into force on the first day of

XV of 1882. **2.** In section 6 of the Presidency Small Cause Courts Act, 1882, hereinafter referred to as "the said Act," after the words "Code of Civil Procedure" the following shall be added, namely:—

XVIII of 1879. "and to be a Court subordinate to the High Court within the meaning of section 6 of the Legal Practitioners Act, 1879."

3. (1) For the proviso to the first paragraph of section 7 of the said Act the following shall be substituted, namely:—

"Provided that no person shall be appointed to be a Judge of such Court, or be authorised to exercise the powers of a Judge of such Court, unless he is—

24 & 25 Vict., c. 104. **(a)** an advocate of a High Court of Judicature established under the Indian High Courts Act, 1861, or

(b) a vakil or attorney of any such High Court, or

(c) a Judge of a Court of Civil Judicature of not less than five years' standing:

and that not less than one-third of the persons so appointed, including the Chief Judge, shall be advocates of one of the said High Courts."

(2) The last paragraph of section 7 of the said Act is hereby repealed.

Substitution of new section for section 9, Act XV, 1882, and temporary continuance of existing procedure and practice. **4.** For section 9 of the said Act the following shall be substituted, namely:—

"9. (1) The High Court may from time to time, by rules having the force of law,—
Procedure and practice of Small Cause Court.

(a) prescribe the procedure to be followed and the practice to be observed by the Small Cause Court either in supersession of or in addition to any provisions which were prescribed with respect to the procedure or practice of the Small Cause Court on or before the thirty-first day of December, 1893, in

or under the Presidency Small Cause Courts Act, 1882, or any other enactment for the time being in force, and

(b) cancel or vary any such rule or rules.

"Rules made under this section may provide, among other matters, for the exercise by one or more of the Judges of the Small Cause Court of any powers conferred on the Small Cause Court by this Act or any other enactment for the time being in force.

"(2) The law, and any rules and declarations made, or purporting to be made, thereunder, with respect to procedure or practice, in force or treated as in force in the Small Cause Court on the thirty-first day of December, 1893, shall be in force, unless and until cancelled or varied by rules made by the High Court under this section."

5. To section 14 of the said Act the following shall be added, namely:—
Addition to section 14, Act XV, 1882.

"Explanation.—For the purposes of this section an application for possession under section 41 shall be deemed to be a suit."

6. After section 18 of the said Act the following shall be added, namely:—
Addition to section 18, Act XV, 1882.

"18A. The Small Cause Court may allow a plaintiff at or before the first hearing of a suit in which a joint and several liability is alleged on a cause of action arising either wholly or in part within the local limits of the jurisdiction of the Court to abandon the suit as against any defendant who does not reside or carry on business or personally work for gain within such local limits, and to sue for a decree against such defendants only as do so reside, carry on business or personally work for gain."

7. To section 19 of the said Act the following shall be added, namely:—
Addition to section 19, Act XV, 1882.

"19A. Whenever the Court finds that for want of jurisdiction it cannot finally determine the question at issue in the suit, it may at any stage of the proceedings return the plaint to be presented to a Court having jurisdiction to determine the question. When the Court so returns a plaint, it shall comply with the provisions of the second paragraph of section 57 of the Code of Civil Procedure and make such order with respect to costs as it may think just, and the Court shall, for the purposes of the Indian Limitation Act, 1877, be deemed to have been unable to entertain the suit by reason of defect of jurisdiction. When a plaint so returned is afterwards presented to a High Court, credit shall be given to the plaintiff for the amount of the court-fee paid in

the Small Cause Court in respect of the plaint in the levy of any fees which according to the practice of the High Court are credited to the Government."

8. In section 21 of the said Act, after the Amendment of section 21, Act XV, 1882, the words "or value thereof" the words "and all suits whereof the amount or value of the subject-matter exceeds one thousand rupees" shall be inserted.

9. In section 22 of the said Act, for the Amendment of section 22, Act XV, 1882, the words "two thousand" the words "one thousand" shall be substituted.

Repeal of Act XV, 1882, section 23 and second schedule.

10. Section 23 of and the second schedule to the said Act are hereby repealed.

Substitution of new Chapter for Chapter VI, Act XV, 1882.

11. For Chapter VI of the said Act the following shall be substituted, namely:—

"CHAPTER VI.

"NEW TRIALS AND APPEALS.

"37. Save as otherwise provided by this General finality of Chapter or by any other decrees and orders of enactment for the time Small Cause Court. being in force, every decree and order of the Small Cause Court in a suit shall be final and conclusive.

"38. Where a suit has been contested, the New trial of contested cases. Small Cause Court may, on the application of either party, made within eight days from the date of the decree or order in the suit (not being a decree passed under section 522 of the Code of Civil Procedure), order a new trial to be held, or alter, set aside or reverse the decree or order, upon such terms as it thinks reasonable, and may, in the meantime, stay the proceedings.

"*Explanation*—Every suit shall be deemed to be contested in which the decree is made otherwise than by consent of or in default of appearance by the defendant.

"39. (1) In any suit instituted in a Small Cause Court in which the Removal of certain causes into High Court. amount or value of the subject-matter exceeds the sum of one thousand rupees the defendant or any one of the defendants may, before the day

fixed by the summons for the appearance of the defendant or within eight days after the service of the summons on him, whichever period shall last expire, apply *ex parte* on an affidavit setting forth the facts on which he relies for his defence to a Judge of the High Court for an order removing the cause into the High Court.

"(2) Unless the Judge is of opinion that the application has been made solely for the purpose of delay, the applicant shall be entitled to such order as of right, but it shall be lawful for the Judge, if he shall think fit, in and by such order to require the applicant to give security to a reasonable amount to be specified in the order for the payment of any costs which may become payable by him to the plaintiff in respect of the said suit, and such Judge may also, if he shall think fit, declare that the removal directed by such order shall be conditional upon the completion of such security within a reasonable time to be prescribed in the order.

"(3) If the applicant fail or neglect to complete the required security (if any) within the prescribed time (if any), the said order shall be discharged and the suit shall proceed in the Small Cause Court as if such order had never been made.

"40. (1) When a suit has been removed into the High Court under the Rules with respect to suits removed under the last foregoing section. last foregoing section, it shall be heard and disposed of by such Court in the exercise of its original jurisdiction, and the said Court shall have all the same powers and jurisdiction in respect thereof as if it had been originally instituted in such Court.

"(2) In every suit so removed as aforesaid the affidavit filed under section 39, sub-section (1), shall be treated as a written statement of the defendant tendered under section 110 of the Code of Civil Procedure unless the Court shall otherwise order. XIV of 1882.

"(3) In every suit so removed as aforesaid credit shall be given to the plaintiff for the amount of the court-fee paid in the Small Cause Court in respect of the plaint in the levy of any fees which according to the practice of the High Court are payable to the Government."

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR
GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING
LAWS AND REGULATIONS UNDER THE PROVISIONS OF
THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25
VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House on Thursday, the 22nd March, 1894.

PRESENT:

His Excellency the Viceroy and Governor General of India, P.C., I.L.D.,
G.M.S.I., G.M.I.E., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I.
The Hon'ble Sir A. E. Miller, K.T., Q.C.
The Hon'ble Lieutenant-General H. Brackenbury, C.B., R.A.
The Hon'ble Sir C. B. Pritchard, K.C.I.E., C.S.I.
The Hon'ble J. Westland, C.S.I.
The Hon'ble Sir A. P. MacDonnell, K.C.S.I.
The Hon'ble Sir G. H. P. Evans, K.C.I.E.
The Hon'ble Fazulbhai Vishram.
The Hon'ble C. C. Stevens.
The Hon'ble A. S. Lethbridge, M.D., C.S.I.
The Hon'ble Gangadhar Rao Madhav Chitnavis.
The Hon'ble H. F. Clogstoun, C.S.I.
The Hon'ble W. Lee-Warner, C.S.I.
The Hon'ble P. Playfair.
The Hon'ble Mahárájá Partáb Narayan Singh of Ajudhiá.

QUESTIONS AND ANSWERS.

The Hon'ble GANGADHAR RAO MADHAV CHITNAVIS asked:—

(1) Whether it is the fact that in the Central Provinces Sir Richard Temple, as Chief Commissioner, with the sanction of the Supreme Government, promised in public print a perpetual limitation of the Government demand on fulfilment of certain conditions?

(2) Whether it is the fact that, after sanction of such policy by the Supreme Government, Sir Richard Temple, as Chief Commissioner of the province publicly declared such policy to the people in public Darbars? If so, will the Government be prepared to confer perpetual limitation of the Government demand on such landholders as may have fulfilled the conditions laid down by Sir Richard Temple at the time, and who may come forward to ask for the settlement of such demand in perpetuity?

The Hon'ble SIR ANTONY MACDONNELL replied :—

"The proposal to make a permanent settlement of the land-revenue in India has been from time to time discussed; and in 1862 Sir Charles Wood, then Secretary of State for India, invited the Government of India to consider to what extent a permanent settlement could be immediately applied throughout the different provinces. In consequence enquiries were instituted, and it was apparently in connection with these enquiries that in his Administration Report on the Central Provinces for 1862-63 the Chief Commissioner, Sir Richard Temple, wrote :—

'The period over which the limitation of the Government demand, according to the new assessment, is to extend is thirty years for all districts alike. This has been sanctioned by Government. It has also been recommended that the boon of a permanent settlement, that is, the limitation of the Government demand in perpetuity, should be conceded to those landholders who might have brought their estates to a high state of cultivation. The Government have decided that after the lapse of ten years from the commencement of the new settlement, and therefore even within the period of that settlement, those landholders who may be thought worthy of the concession, and who may desire a perpetual limitation of the Government demand, may have their assessments revised with a view to such limitation in perpetuity being declared.'

"But the policy of the Government of India on this question had not been finally settled as Sir Richard Temple had supposed: a correspondence ensued in which the advantages of a permanent settlement of the province became more and more doubtful, and finally, in February, 1864, Lord Lawrence's Government declared that (I quote their words), 'bearing in mind the circumstance that much of the Central Provinces consists of a new country, that many of the Government officers are inexperienced in fiscal matters, and, lastly, that the Secretary of State has agreed that permanent settlements are not expedient in this Province, His Excellency in Council would not sanction their being made.'

"I have been unable to ascertain that Sir Richard Temple ever made in public Darbar any such declaration or promise as that stated in the Hon'ble Member's question; but, if he did, it is quite clear that he had no valid authority to make it.

"Sir Charles Wood's orders of 1862, to which I have referred, were suspended by the Duke of Argyll when Secretary of State in 1871, and were finally withdrawn by Lord Kimberley when Secretary of State in 1883 in the following words: 'I concur with Your Excellency's (Lord Ripon's) Government that the policy laid down in 1862 should now be formally abandoned.' In these circumstances the Government of India are not prepared to re-open the question of making a permanent settlement of the land-revenue in the Central Provinces."

The Hon'ble GANGADHAR RAO MADHAV CHITNAVIS asked :—

(a) Whether it is the fact that the receipts from the Patwari Fund constituted under section 144 of the Central Provinces Land-revenue Act, 1881, have always exceeded the expenditure debitable to it?

(b) Whether it is the fact that the balance (after meeting all charges) to the credit of this fund at the close of the official year ending 31st March, 1892, amounted to Rs. 3,95,000?

(c) Whether patwaris employed under the Act have been largely utilized in settlement work?

(d) Whether or not such number of patwaris could be conveniently reduced if strictly confined to village work for which they have been appointed under the Act?

(c) Will the Government be pleased to ask the Chief Commissioner to consider whether the rate realized from the proprietors and tenants for remunerating the patwaris might be regulated so as to make the receipts exactly equal to the expenditure?

The Hon'ble SIR ANTONY MACDONNELL replied :—

“The answers to the Hon'ble Member's question are—

(a) Not always; but generally there has been an excess of receipts over expenditure. For the five years ending March, 1893, the receipts of the Fund have been ₹20,88,593 and the expenditure ₹18,36,862.

“(b) The balance to credit of the Patwari Fund on 31st March, 1892, is reported by the Comptroller General to have been ₹3,95,943; but no recoveries for cost of supervising establishments have yet been made from the Fund under section 146A. of the Land-revenue Act in respect to districts of which the re-settlement has not yet been completed. In such districts the cost of these establishments has hitherto been paid from Provincial revenues. If these recoveries are made, the balance will be largely reduced.

“(c) Yes. It is the patwari's duty to assist in settlements, but, if the Hon'ble Member's question points to the employment of patwaris outside the limits of their own villages, I may say that such employment when it occurs is temporary, and devised with the object of promoting greater despatch in the work, and reducing the costs of the proceedings in the tahsil or circle. It ceases with the completion of the preliminary stages of the re-settlement operations.

“(d) and (e). On completion of the re-settlement of a district the usual procedure is to fix the circles within which the patwaris shall exercise their functions. This is done with strict regard to economy, and no larger staff of patwaris is entertained than is necessary. When the number of patwaris and of the supervising establishments is fixed, the cost is calculated and the rate of cess adjusted, so that income and expenditure shall balance as nearly as possible. No further orders on the point seem to be called for.”

The Hon'ble GANGADHAR RAO MADHAV CHITNAVIS asked :—

(a) Is it not the case that short-period settlements have been denounced in very strong terms in several despatches by the Secretary of State, the Government of India, and such officers as Sir Auckland Colvin and Sir Richard Temple?

(b) Whether it is the fact that the period of settlement in the Central Provinces has been lowered down during the current settlement in some districts even so low as only eleven or twelve years?

(c) Is Government aware that such policy has been the source of greatest anxiety and dissatisfaction to the people in the province? If so, will the Government be pleased to reconsider this policy and to extend the periods of the current settlements to reasonably long periods or at least to their former period?

The Hon'ble SIR ANTONY MACDONNELL replied :—

“It is the case that short-term settlements have been at various times objected to by various authorities, and the Government of India are not in favour of short-term settlements unless in exceptional cases, as, for example, when a tract of country hitherto inaccessible to trade is being opened up by a railway.

“It is the fact that the term of the current settlement in some districts of the Central Provinces has been fixed at about twelve years. One reason for this is that these districts were being opened up or tapped by the construction of railways, which have already produced a very great increase in the prices of agricultural produce and given an impetus to cultivation and progress in those districts. At the end of ten or twelve years the first effects of such improvements will have worn off, and a more normal state as regards prices and agriculture will have been reached. If in these circumstances the term of the settlement had been long, the State would lose its fair share of the profits

accruing to the districts by the construction of the railways. The rest of the country would then have to contribute that portion of the public burden which in equity should fall on the districts which have especially and largely profited from the public expenditure.

"I may here mention that an improved system of settlement procedure has been introduced, which provides for the continuous maintenance of village records-of-rights, and thus dispenses with the necessity for re-measurements and re-valuations of the soil at each revision of the contract, and saves the people all the harassment which has been looked on as one of the great objections to short-term settlements. It is a part of this new system that the re-settlement of each district is taken in hand in turn, and not of all simultaneously. This arrangement can only be brought about by making the settlement now in progress run for different terms in different districts, that is, by establishing a proper roster for the future. Thus, if the re-settlement of the Raipur District will run from twelve to thirteen years, that of the Bhandara District will probably run from twenty to twenty-three years.

"The Government of India are aware that the landowners of the Central Provinces wish for long-term settlements, and Your Excellency's Government desire to treat this wish with as much consideration as the general circumstances permit. The settlement now in progress in the Central Provinces may be regarded as a process of transition and as laying the foundation for a more settled system of fiscal administration."

The Hon'ble MR. PLAYFAIR asked :—

Whether a copy of the despatch from the Government of India to the Secretary of State on the subject of the proposed amendment of the law relating to Common Carriers in India, and dated Simla, the 13th June, 1893, was sent to the representatives of the Steamer Companies who memorialised Government on the matter with a portion of such despatch erased, and whether the Government will lay a copy of the despatch in full and the answer in full before the Council.

The Hon'ble SIR ANTONY MACDONNELL replied :—

"The answer to the first part of the question is yes. The Companies' solicitors applied on the 6th January for a copy of the despatch in question and a copy was sent them with the following remark :—'The last paragraph of the despatch refers to an individual opinion, and is omitted.' The answer to the last part of the question must be, I regret to say, in the negative, because the paragraph in question did not express the opinion of the Government, with which alone the Companies are concerned."

FINANCIAL STATEMENT FOR 1894-95.

The Hon'ble MR. WESTLAND said :—

"In accordance with the Statutory Rules for the discussion of the Financial Statement of the Governor General in Council, I have caused a printed copy of the Financial Statement of 1894-95 to be delivered to each Member; and I proceed to submit to the Council the explanations I desire to offer with reference to it. Following the example set last year by Sir David Barbour, the prescribed Financial Statement will form the Second Part of the published compilation, and will set forth and explain in detail the various figures of the receipts and outgoings of the Government, being intended both for the information of the public, and as a permanent official record of the financial arrangements and prospects of the current and the approaching year. My accompanying explanation, which will form the first part of the compilation, is intended to give Hon'ble Members a more general view of the accounts and estimates, leaving fuller information regarding the details to be sought for in the more elaborate compilation, which has been printed and distributed in accordance with the rules.

"I have so recently had occasion to lay before Hon'ble Members a review of our recent and present general financial position that I am to a certain

extent discharged from the obligation to look on this occasion beyond the figures of the three years, the finance of which I have to explain, *viz.*, the past year, the current year and the coming year. I do not think that any Finance Minister has yet had the evil fortune to present figures which for all three years shew a deficit of Revenue, but I shall not waste the time of the Council in again going over the ground covered by the statement I laid before them three weeks ago, and bemoaning the adverse fate which a continually dwindling rupee imposes upon us. I pass at once to the consideration of the accounts and estimates which it is my duty to explain.

"ACCOUNTS, 1892-93."

"The accounts of 1892-93, as finally made up, shew a deficit of Rx. 833,412, as compared with the deficit in the Revised Estimate of Rx. 1,081,900. The improvement, which amounts to Rx. 248,488, is composed of a number of small differences scattered over both the Revenue and Expenditure heads, none of which are large enough to require particular mention. In short, the Revised Estimate presented to the Council twelve months ago represented as accurately as an estimate could be expected to do the outturn of the year. The accounts were made up at an exchange a little less than 1s. 3d. per rupee; the total amount of Council Bills drawn during the year being £16,532,215 at the average rate of 1s. 2'985d.

"The usual appropriation report, containing the Comptroller and Auditor General's review and comparison of the estimates and accounts of the year, was published in last week's Gazette of India; and with it the year's accounts are consigned to past history.

"REVISED ESTIMATES, 1893-94."

"As compared with the Revised Estimates for 1892-93, which we have seen were very accurately justified by the final figures, the Budget Estimate of 1893-94 provided under *Revenue* heads for better Land Revenue Rx. 299,600, worse Opium Revenue Rx. 650,300, worse Salt Revenue Rx. 60,800, better Railway Revenue Rx. 487,500, and a number of minor differences. In the aggregate the difference was a difference for the worse of Rx. 15,500.

+	299,600
—	650,300
—	60,800
+	487,500
Net	— 76,000

"The Revised Estimates of 1893-94 shew that we have had a very favourable Land Revenue year, even after taking into account the fact that Rx. 207,200 of the increase comes in, in Madras and Bombay, by deduction from, or charge to, other heads. The return is about 25½ crores, whereas we have never yet come up to 25, and is Rx. 335,100 in excess of Budget. But, on the other hand, the loss of Opium Revenue is by Rx. 621,800 greater than anticipated, and whereas the lowest figure recorded for many years has been Rx. 7,879,182, we this year estimate to receive only Rx. 6,694,400. The loss under Salt Revenue has been much greater than anticipated, being Rx. 241,600 as compared with Budget Estimates. On the other principal Revenue heads taken together there has been a gain as compared with Budget of Rx. 252,000. Railways have done extremely well during the year, the Revenue being taken at Rx. 654,800 better than Budget, and more than a crore better than last year.

	335,100
	621,800
	241,600
+	252,000
+	654,800

"These differences and a number of minor ones give us a net improvement of Rx. 423,800 upon the Budget Estimates on the Revenue side,* of which Rx. 104,900 goes to Provincial account, leaving Rx. 318,900 for Imperial.

Net + 378,50

"The Budget Estimates of the year were for a deficit of Rx. 1,595,100 upon the year's account. With the improvement of Revenue which I have noticed, our Expenditure if kept within estimate would have brought out at the end of the year a deficit of only Rx. 1,276,200. Our deficit, however, stands at Rx. 1,792,800, or Rx. 516,600 greater than this figure. And indeed, as a short opium crop has saved us Rx. 370,100 on our estimated opium payments, I have really to explain Rx. 886,700 of excess of Expenditure over Estimate in 1893-94.

1,595,100
— 318,900
1,276,200

"The only heads of *Imperial Expenditure in India* which shew any noteworthy excess of Expenditure over Estimate are Interest on Debt (Rx. 159,500),

* I neglect for present purposes the fact that about Rx. 30,000 of this is due to the operation in 1893-94 of the new Tariff Act.

Working Expenses of State Railways (Rx. 151,500), and the Army Expenditure (Rx. 318,300). The excess under the first represents for the most part the discount on the Loan raised in August, which amounted to Rx. 133,000. The excess Expenditure under the second arises in connection with the larger traffic already referred to. Of the Army Expenditure Rx. 263,500 is due to Exchange Compensation Allowances: there has also been expenditure in excess of the Budget Grants of Rx. 21,500 for certain special military and political operations, of Rx. 48,100 for special expenditure in connection with the Gilgit Agency, and Rx. 26,700 for special purchases of horses and mules: on the other hand, savings are anticipated from some of the Budget Grants.

159,500
151,500
318,300
629,300
— 89,000
540,300

" We have saved Rx. 89,000 by short Expenditure upon Special Defences.

" The items I have mentioned account for excess Imperial Expenditure in India of Rx. 540,300. The smaller differences result in a net saving of Rx. 26,600, and the real excess in the total figures, after allowing for Opium, is Rx. 513,700. So that we have saved more than enough, in minor differences over the rest of the account, to pay for the Exchange Compensation Allowances to non-military officers. These were not included in the Budget, but are estimated at Rx. 137,800 under the non-military heads.

" The *sterling expenditure* account compared with Budget Estimate shows £104,100 excess payments under Interest; excess marine charges £27,300; short charges for special defence works £66,000, giving, with a few smaller differences, a net excess of £65,800.

104,100
27,300
—66,000
65,400

Net

" The *exchange* upon the expenditure was estimated, at 1s. 2½d., to cost Rx. 9,935,900; it is now estimated at Rx. 307,200 more.

" Adding together these items, the deterioration which I have explained on the expenditure side amounts to the figure above stated, namely:—

	Rx.
Imperial Expenditure in India	513,700
Sterling Expenditure	65,800
Exchange	307,200
TOTAL	886,700

and leaves the year's account in deficit by Rx. 1,792,800.

" I ought to mention, as a matter of some public interest in connexion with the estimates of 1893-94, that the Royal Commission on Opium is expected to cost in India about Rx. 20,000, and in England about £1,500; of these amounts, half will be charged to Indian Revenues. The smallness of the expenditure is for the most part due to the fact that the Commissioners (except the one who was placed on the Commission as an officer of the Government of India) neither required nor received any remuneration for their services, being determined that their laborious task should cost as little as possible to the people of India.

" BUDGET ESTIMATES, 1894-95.

" In explaining the Budget Estimates for 1894-95 I ask the Council first to go back to my statement that the Revenue in the Revised Estimates of 1893-94 falls short of the Budgetted Expenditure of that year by Rx. 1,276,200. Our revenue of the coming year is largely estimated upon the basis of the Revised Estimates of the current year, and I propose first to shew, as compared with those Revised Estimates, what additional Revenue under the same heads we may expect to come into our account during the year 1894-95.

" First, under the principal *Revenue* heads, the Estimates of Land Revenue show an increase of Rx. 211,300 upon the high figures of 1893-94; and Salt will, we hope, recover from its backward position of the current year, and bring us in an addition of Rx. 283,000. Under both these heads in fact we have some reason to think that certain short collections of February and March, 1894, will come into the accounts of April or May, that is, of 1894-95. On the other hand, we do not think it safe to take Opium at even the figure of 1893-94; our realisations are necessarily affected by the adverse exchange arising out of the low price of silver, and we estimate a falling-off of

+211,300
+283,000
—300,800
—1,600

Net . +191,900

Rx. 300,800. The remaining principal heads show some increases and some decreases, but on the net account a decrease of Rx. 1,600, giving for this section of the accounts a net increase of Rx. 191,900. To this we have to add the estimated increase in Railways of Rx. 201,900 and in Irrigation of Rx. 144,200; but, on the other hand, we lose Rx. 160,400 under Mint Receipts (by reason of discontinuance of coinage). The net amount of all these is an increase of Rx. 377,600, which, by a number of minor differences under other heads, becomes Rx. 395,400. Of this total amount of increase of our revenues, Rx. 240,300 belongs to the Provincial account, and Rx. 155,100 to Imperial. In respect of Revenue, therefore, we expect on the Imperial account to be better off in the approaching year by only Rx. 155,100, as compared with the Revised Estimates of 1893-94; and the result therefore is that if we had on our expenditure side merely to meet the same Imperial expenditure that was provided for in the Budget of last year, we would be, with the revenue we anticipate, in deficit by Rx. 1,276,200, less Rx. 155,100, or Rx. 1,121,100.

+191,900
+201,900
+144,200
—160,400

+377,600

"The deficit we will actually have to meet will be this amount *plus* any amount by which the expenditure for which we have to provide in the coming year exceeds that of the Budget Estimates of 1893-94. To find what this addition will be, take first the estimate of *Imperial expenditure in India*. The figures stand as follows:—

	Budget, 1893-94.	Budget, 1894-95.	Increase or Decrease.
	Rx.	Rx.	Rx.
Direct charges on Revenue	4,614,200	4,662,300	48,100
Interest	55,400	—113,400	—168,800
Post Office, etc.	2,081,400	2,073,200	—8,200
Civil Departments	3,134,500	3,240,100	105,600
Miscellaneous	688,400	700,000	11,600
Famine	1,119,300	1,121,200	1,900
Railway Revenue Account	11,597,400	12,051,100	463,700
Irrigation	1,349,300	1,373,200	23,900
Buildings and Roads	1,878,500	1,507,800	—370,700
Army	15,693,500	16,169,200	475,700
Special Defence	252,300	113,500	—138,800
TOTAL	42,464,200	42,908,200	+444,000

"The increases and decreases in this statement, which are less than Rx. 50,000, require no remark; they may be described as ordinary variations. The decrease under Interest merely means the transfer of more interest to the Railway Revenue account, the net increase under these two heads, Rx. 294,900, representing the additional working expenses and surplus-profits payments arising in connection with the larger traffic. Under Civil Departments we have a net increase of Rx. 105,600, of which the principal items are Rx. 28,500 under Administration (mostly Exchange Compensation allowance), Rx. 139,800 under Political (additional subsidy to the Amir Rx. 60,000, probable expenditure of demarcation under the treaty Rx. 50,000, Exchange Compensation Rx. 23,400); other increases Rx. 41,600 mostly due to the Exchange Compensation; savings in Police Rx. 26,900 (chiefly in Upper Burma); and savings under Marine Rx. 77,400 (mostly counterbalanced by short-receipts).

463,700
—168,800

294,900

28,500
139,800
41,600
—26,900
—77,400

Net . 105,600

"The decrease of Rx. 370,700 under Buildings and Roads is due to economies forced upon us by our present financial condition. We have saved Rx. 194,200 by reducing the grant for Military Works, and Rx. 176,500 by cutting out practically every new work upon the Civil side (under India, General, and in Upper Burma) to which we are not absolutely committed.

"The Army expenditure shows, as compared with the estimates presented last year, an increase of Rx. 475,700. Of this amount, the variations in pay and allowances which depend upon Exchange alone account for Rx. 390,100.

"For apart from the question of Exchange Compensation, the pay of the British soldier is fixed in sterling, and the rupee payment depends upon the rate of exchange annually fixed for the adjustment of transactions with the English Treasury. That rate was for 1894-95 fixed, as usual, upon the basis of the rates actually current in December last (namely 15½d.); but, owing to the peculiar circumstances of the year, the rate has been declared 'subject to revision hereafter, should it be deemed necessary, in consequence of the actual rate varying greatly from the official rate for any considerable length of time.'"

"The balance of the excess, or Rx. 85,600, is composed of several items, of which a fuller account is given in the second part of this statement.

<p>£</p> <p>+ 288,500</p> <hr/> <p>— 33,300</p> <p>— 12,600</p> <p>— 69,700</p> <p>— 152,100</p> <p>— 34,300</p> <hr/> <p>TOTAL . — 302,000</p> <hr/> <p>NET . — 13,500</p> <hr/>	<p>£33,300 on the Marine charges (as last year's estimates contained some special construction charges); of £12,600 under Territorial Pensions (due to the death of Maharaja Dhulip Singh); of £69,700 under Army charges (a balance between a large saving in Military stores and an increase in non-effective charges); and of £152,100 under Special Defence Works, the expenditure on which is coming to an end.</p> <p>"The other differences are small, and involve a net decrease of £34,300.</p> <p>"The <i>Exchange</i> upon our expenditure was in last year's Budget taken at 14½d., and came to Rx. 9,935,900. This year we take 14d. as our rate, and the <i>Exchange</i> comes to Rx. 11,307,400, so that we have an excess expenditure to provide for of Rx. 1,371,500.</p>
---	--

"Now, bringing all these increases of expenditure together, we have, as compared with Budget Expenditure of 1893-94,—

	Rx.
In India—Imperial account—increase	444,000
In England, decrease	—13,500
For Exchange, increase	1,371,500
NET INCREASE	1,802,000

"I have shown that our estimated revenue of 1894-95 falls short of the Budget expenditure of 1893-94 by Rx. 1,121,100; it therefore falls short of our budgetted expenditure of 1894-95 (so far as we have gone) by Rx. 2,923,100.

"The difference between this and the 3½ crores I gave in my Statement of March 1st is mainly in the reductions we have effected, chiefly under Buildings and Roads, both Military and Civil, in order to meet the shortness of our means.

"SPECIAL MEASURES TO MEET THE DEFICIT.

"This amount then, Rx. 2,923,100, is the deficit which we have to take special measures to meet. The first of these special measures is the re-imposition of Import-duties for which the Council passed a Bill on March 10th. The annual revenue to be obtained by that measure I then stated at Rx. 1,400,000, but the measure was modified in Select Committee by the reduction of the first-proposed duties on iron and steel, and I now put down the revenue at Rx. 1,350,000. I make a deduction of a little over ten per cent. for short collections the first year, and the actual figures passed into the estimates on account of the duties are—

	Rx.
Revenue (after deduction of Refunds)	1,200,000
Establishment	60,000
Net Produce	1,140,000

"The next measure is that we are obliged to suspend the famine grant for the time. This is, as has been often explained, the grant of surplus revenue to the construction of Protective Railways and Irrigation Works. Part of the

original Rx. 1,500,000 is already pledged, that is, it is used to meet the loss to Government on its contracts in respect of the Bengal-Nagpur and Indian Midland Railways. That loss, in the coming year, is estimated at Rx. 368,800, and there is also an estimate of Rx. 10,000 for actual famine charges; so that of the whole grant only Rx. 1,121,200 is capable of being resumed, or rather withheld. We have deemed it expedient to allow Rx. 45,000 on account of certain Irrigation works to remain charged against this head, but the remaining Rx. 1,076,200 will remain unspent in 1894-95. The principal Railway work which is being charged to this head at present is the East Coast Railway. And, as this work is classed also as a Productive work, a considerable grant has been given to it, under the head of Expenditure not charged against Revenue, so that this particular work will not very greatly suffer by the suspension of the grant. But this only means that the effect of the reduction is passed on to other Railway projects.

"One other measure we have been obliged to take, namely, to call on Provincial Governments for contributions to our aid, in other words, to force upon them severe economies, and appropriate the results to the benefit of our own account. The Government of India were most unwilling to have recourse to a measure which practically means the stoppage for the time of all administrative improvement, a measure which they feel must take all the heart out of Provincial Governments, by making them surrender all the fruits of careful administration, to fill the yawning gulf of our sterling payments. But, as the Government of India said in addressing its demand to them, 'the imperious necessity for imposing new taxation obliges the Government of India first to exhaust all available methods of increasing their resources; and this necessity is the only justification they can put forward for so soon making a practical revision of "contracts" made only two years ago, and calling in balances which the Local Governments might legitimately claim as pledged to them for the purpose of administrative improvement.'

"The Government of India wish to acknowledge the readiness with which this demand has been met. The demand was issued on March 1st; it had been complied with by March 12th. Though not very large in amount, except in one case (that of Lower Burma), the demand comes so closely after the adjustment of assigned revenue to assigned expenditure that it means in every case the adoption of active measures to restrict expenditure; and it must be remembered also that it comes after the Local Governments have already had, in the Exchange Compensation allowances, to meet new expenditure over and above their assignments.

"The total amounts obtained from the Local Governments come to Rx. 405,000, their balances being, in nearly every case, reduced by the demand to the minimum prescribed by the Secretary of State.

"By these three measures the deficit in our account is reduced by Rx. 2,621,200, namely:—

	Rx.
New Import-duties, net produce	1,140,000
Suspension of Famine Grant	1,076,200
Contributions from Local Governments	405,000
	<hr/>
	2,621,200

from Rx. 2,923,100 to Rx. 301,900, at which figure it stands in the final statements.

"I have already in my statement made in this place on March 10th given a full account of the reasons which have led to the Government accepting this deficit for the year 1894-95. I shall not weary the Council by a repetition of a subject then very elaborately discussed.

"CLOSING OF THE MINTS.

"The central fact of the Financial History of the year was the closing of the Mints on 26th June last. When the last Budget Estimates were presented to this Council, the Government of India were waiting for the Report of the

Committee assembled under Lord Herschell's presidency, to whom had been committed the examination of the Currency proposals of the Government of India. The Committee reported under date May 31st. Their recommendation was as follows :—

'It remains for us to state the conclusions at which we have arrived. While conscious of the gravity of the suggestion, we cannot, in view of the serious evils with which the Government of India may at any time be confronted if matters are left as they are, advise Your Lordship to overrule the proposals for the closing of the Mints and the adoption of a gold standard which that Government, with their responsibility and deep interest in the success of the measures suggested, have submitted to you.

'But we consider that the following modifications of these proposals are advisable. The closing of the Mints against the free coinage of silver should be accompanied by an announcement that, though closed to the public, they will be used by Government for the coinage of rupees in exchange for gold at a ratio to be then fixed, say 1s. 4d. per rupee; and that at the Government treasuries gold will be received in satisfaction of public dues at the same ratio.'

"The Government of India, having considered the Report, telegraphed to the Secretary of State on June 15th, proposing to take immediate action on this decision; the Secretary of State's consent was given on June 20th, and the necessary legislation was carried through on June 26th.

"It was, of course, expected that the value of silver would be immediately affected by this change. It stood at about 38d. till June 25th, and then in four days it fell to 30½d. In July it recovered in the first week to 34d., but settled afterwards at about 32½d. In August and September it stood at about 34d., but it fell during October, and its price from then till the middle of January stood at about 32d. After this, a renewed fall set in, and in the first week of March the price was quoted at 27d.; at that price the metallic value of the rupee is about ten pence farthing.

"Meantime, Silver legislation was taking place in the United States of America. Congress met on August 7th, and a Bill for the repeal of the silver purchase clause of the Law of 1890 was speedily introduced and was passed on August 28th by an unexpected majority. The Bill remained under discussion in the Senate from August 28th till October 30th, when it was passed after a strong opposition. It received the President's signature on November 1st. But it will be seen from my statement of the history of the price of silver that the legislation of the United States was practically a foregone conclusion. Its effect had been discounted, and the final passing of the law produced but little change in the price. The doubtful element in the case was the Indian legislation, and when that legislation became an accomplished fact the price of silver immediately assumed a lower level.

"During the months succeeding the closing of the Mints the price was favourably affected by a strong demand from India. The amounts imported into India during these months were Rx. 2,019,100, Rx. 781,400, Rx. 858,400, Rx. 1,127,400, Rx. 450,400, Rx. 926,600, Rx. 1,658,400, and in February Rx. 1,167,800. Total Rx. 8,989,500.

"We have naturally been very much interested in the question what became in this country of these large imports of silver, but our enquiries have satisfied us that there has really been a very large demand for it for private use and possibly also for hoarding. The divorce between the value of coined and of uncoined silver brought about a state of things utterly unknown in Indian history—in the experience at least of any of the present generation—*vis.*, that uncoined silver could be sold at a profit for considerably less than its weight in coined silver. Silver dealers rushed in to make a profit out of the inability of the ordinary Indian to understand that it was not necessarily a profitable transaction to buy a tola of rupee-silver for fifteen annas. The question was violently agitated of imposing a silver import-duty, so as to prevent a demand for silver that threatened to annihilate, by its own force, that balance of trade which had hitherto required settlement by Council Bills. But it was recognized that this demand for silver would have to be exhausted before our new Currency policy could have a fair chance, and it was determined to leave it to the operation of natural causes. The announcement was made upon January 18th that no duty would be placed on imported silver in aid of the Currency policy.

"A certain amount of this silver, but not, so far as we can find, a very large amount, passed into Native States for use in coinage. It was easy to foresee that, by the closing of our Mints, our rupees would be appreciated with reference to the silver coinage of Native States, especially if measures were not adopted in these States to restrict their coinage in a corresponding measure. We advised the various Durbars to watch the current rate of exchange between their rupees and the Government rupee, and most of them stopped coinage very shortly after we had done it. The Native States are not, however, so favourably situated as we are with reference to the maintenance of an appreciated coinage; for their rupees can, in most cases, be manufactured without elaborate machinery, and so far as we know (though we have not yet full information on the point), the local systems of currency are in very few cases strictly limited, like our own, to coin issued by the State in which it is current. We are, however, continuing to watch the effect of our policy upon the coin of Native States, and to advise them, from time to time, as to the economic effect of measures taken by ourselves or intended by them.

"This excessive import of silver was not the only obstacle which our Currency measures had to meet with. We had been obliged, for reasons for which we were not responsible, to initiate these measures at the most unfavourable time of the year, namely, the beginning of the slack season—that is, the season when our exports are smallest; and the refusal of the Secretary of State to issue his Bills under $15\frac{1}{4}d.$ brought other importers into competition besides the importers of silver, and the balance of trade on the whole actually turned against India for a time. I think it is now recognized that the policy of refusing to issue Bills was a mistaken policy, and that it would have been better to issue Bills moderately so as to meet the demands on the Home Treasury. But the circumstances we had created were altogether new, and both officials and merchants and bankers had all to learn, by actual experience, what new economic forces had been called into existence, and how they affected the question of the appreciation of the rupee. The Secretary of State announced, on January 20th, his abandonment of his attempt to maintain a forced value for his Bills, and since then the course of commerce has given us ground for expecting that we shall be able to maintain the rupee at a value considerably above its metallic value, though not as yet approaching the limit at which there is any chance of its functions as a Currency beginning to be replaced by gold.

"The first considerable issue of Council Bills was on 31st January, when a rate of $14\frac{3}{8}d.$ was obtained. The rate fell, till on the 26th February it stood at $13\frac{1}{2}d.$, but it has since then recovered to about $14d.$

"The question of the future value of silver is so doubtful that I hesitate to express any opinion regarding it. We are told that it has now touched bottom, but we have been told that very often, in past times, and yet it has sunk lower. I do not agree with those who think that if we were to open our Mints we would benefit by enhancing the value of silver. It should be remembered that we can enhance that value only by actually absorbing a considerable share of the world's produce of the metal. But the absorption and coinage of a large amount of silver is an effect that can only follow, and be concomitant with, a fall in the value of the rupee. It is, in fact, economically, the effort of the Currency of the country to adapt itself, by increase in volume, to its decrease in value. In other words, if the opening of our Mints is to enhance the value of silver, it can do so only by a process which involves the depreciation of the value of the rupee; and therefore, as it seems to me, no enhancement of the value of silver, brought about by our opening our Mints, can be of any advantage to us.

"I think that even those who do not believe in the ultimate success of our currency legislation must at all events admit that we have, by its means, escaped an immediate disaster; and those who believe that the only way of issue from the difficulty lies through bimetallism will admit that they are several steps nearer its realization when the rest of the world has ceased to rely on India's consent to bear the main portion of the burden of silver-depreciation.

"SECRETARY OF STATE'S OPERATIONS.

"By the circumstances to which I have alluded the sale of Council Bills was practically in suspense from July 1893 to January, 1894, inclusive. The Secretary of State had estimated to raise £18,700,000 by Bills, of which £1,189,200 was the estimated amount of net payments to Railway Companies, the remainder representing the current requirements of the year. During the first three months of the year he issued Bills for £5,722,799, an unusually large amount, which raised his sterling balance on June 30th to £4,173,925; but from that date till the end of January the amounts received were, in each of the seven months, £51,750, £78,250, £6,672, £4,791, £609,544 (in November), £20,937, £90,658; giving a total of only £862,602.

"During this period, therefore, the Secretary of State had to carry on his transactions by borrowing. The high balance of June 30th carried him over July and August, and besides this balance he had at that time over £400,000 in hand on account of a borrowing and repaying transaction provided for in the Budget Estimates. He had estimated to raise £1,300,000 of 3 per cent. stock to pay off Railway debentures, and, though he raised most of this amount in July, the repayments were not complete till October. His cash balance, however, was very low in the end of August, namely, £460,903. In September

he issued 3½ per cent. debentures for £1,386,000, and borrowed temporarily £500,000; and the net temporary borrowings in subsequent months were—October £1,500,000, November £750,000, December £750,000, January £2,750,000, giving a total of £6,250,000.

"The figures as made up on actual accounts till the end of January, and estimates received from the Secretary of State for the two last months, give us—

	Till January : Accounts.	February and March Ac- counts and Estimates.	Total for year.
Funds raised by Permanent Debt	1,386,000	...	1,386,000
Council Bills	6,585,400	2,814,600	9,400,000
Temporary Borrowing (net)	6,250,000	—250,000	6,000,000
	<hr/> 14,221,400	<hr/> 2,564,600	<hr/> 16,786,000

"It will be seen therefore that the Estimate of Council Bills now made falls short by £9,300,000 of the Estimate of last March, and that this amount has been made up by permanent debt £1,386,000, temporary debt £6,000,000, a reduction in the cash balance of £1,013,000: total £8,399,000; besides reductions in the payments to Railway Companies and on account of remittances.

"We have *per contra* an enormous accumulation of silver in our Treasury Balances in this country. The £8,399,000 of debt incurred, and cash balance reduced, during the year are represented, at an exchange of 15d., by Rx. 13,438,400 in this country, and our cash balances in India being practically increased by this amount, stand at the close of January, February and March at the unprecedented figures of Rx. 23,802,200, Rx. 25,016,500 and Rx. 26,251,800 (estimated).

"Next year, it will be seen that it is not the present intention of the Secretary of State to draw Bills on our accumulations of silver in order to pay off his temporary debt. He proposes to borrow £8,300,000, of which £6,000,000 will be used to discharge the temporary obligations outstanding at the end of the current year; and the rest is required for his ordinary transactions. The amount for which he proposes to draw, £17,000,000, is only the expenditure of the year, with the addition of the Capital outlay on account of State Railways, and a portion of his remittance payments. It must, as usual, be understood that these figures are given with reservation of entire liberty to the Secretary of State to vary his borrowings and his drawings as he may find occasion.

" LOANS IN INDIA.

"In the Budget Estimates of 1893-94 we proposed to raise a loan of Rx. 3,000,000. On July 14th, while we were still in ignorance of the approaching failure of Council Bills, a notification was issued calling for tenders for Rx. 3,500,000 at $3\frac{1}{2}$ per cent., and at the same time notice was issued for the discharge of such part of the $4\frac{1}{2}$ per cent. loans of 1878 and 1879 (excluding the 7 shillings per cent. portion) as still remained unconverted, under previous notifications, into four per cents. The loan was raised at an average of Rs. 96-3-2 $\frac{1}{2}$ per cent., producing Rx. 3,366,130, against a nominal value of Rx. 3,499,100 (as Rx. 900 remained unissued). Of the $4\frac{1}{2}$ per cent. loan we estimate to have paid off Rx. 1,100,000 during the current year, leaving Rx. 241,447 undischarged. The three-and-a-half per cents. are now above par.

"It is hardly necessary to say that with our huge silver balances we have no intention of raising a loan in India during the year for which estimates are now being presented.

" CONCLUSION.

"Such then is our programme for the approaching year—a programme of retrenchment and of vigilance, intended to tide us over what I have called a transition period. The means which we have adopted in our Budget Estimates of nearly balancing our Revenue and Expenditure are means which will hardly be available a second time. It is at some risk that we suspend even for one year the provision of a crore or a crore and a half which we shall certainly require if a famine season comes upon us: we cannot call our financial position safe till we find ourselves again with that crore to the good. The forty lakhs also which we obtain from the Provincial Governments exhausts for the time that source of relief from temporary difficulties. A year hence, as I said a fortnight ago, we shall certainly have to reconsider our position, and we hope by that time to have a much more definite knowledge of the conditions upon which our future financial position rests."

PRISONS BILL.

The Hon'ble SIR ANTONY MACDONNELL moved that the Report of the Select Committee on the Bill to amend the law relating to Prisons be taken into consideration. He said :—

"My Lord, in the remarks which I addressed to the Council, when asking leave to introduce this Bill, I gave a brief account of the reasons which had led the Government to propose legislation on this subject. The Council will perhaps not consider it necessary that I should repeat these reasons now. If I may judge from the undemonstrative reception which has been accorded to the Bill by the public, the reasons have on the whole been considered sufficient. In my introductory remarks I also briefly explained the framework of the Bill. That framework is preserved in the Bill as it is now presented to the Council. It is true that many alterations and additions have been made to the Bill during its passage through Select Committee; but the Bill remains, as to its scheme, practically the same as when it was introduced. The main features of that scheme consisted in the retention in the Act of as many principles of permanent operation as possible, and the relegation to rules of such matters of internal discipline and control as were liable to be influenced by circumstances, and to vary from time to time. This scheme has been challenged from two opposite quarters. From one side it has been said, why put so much into the Act and not leave more to executive discretion? From the other side it is objected, why leave so much to executive discretion and so little to the Act? There is no doubt an element of justice in both views; but the Committee thought that a middle course was preferable to either extreme—a course which aimed at borrowing what was good in the two extremes while avoiding their defects. How far we have succeeded experience alone can shew; but if we have failed it has not been for want of care and deliberation.

"I do not propose to detain the Council by going *seriatim* through all the changes which have been introduced into the Bill. The changes are printed in italics in the edition of the Bill which has been presented to Council, and are apparent at a glance. I may, however, call attention to a few of the more important alterations. It will be in the remembrance of the Council that I laid stress when introducing the Bill on the distinction drawn between a prison and a subsidiary jail. The latter institution is excluded from the operation of the Bill, unless by special order the Local Government brings it within the scope of the measure. This distinction has been preserved; but the definition of 'prison' has been so recast as to cover all the ground necessary in a neater and more effective manner than in the first draft. For this improvement I am primarily indebted to the Inspector General of Jails, Madras. Instead of endeavouring to describe in the Act what a subsidiary jail is, we now, having defined a 'prison,' leave the Local Governments free to declare what subordinate or minor institutions shall be treated as subsidiary jails and what provisions of the Act and the rules made under it shall apply to them.

"The chapter relating to the duties of prison-officers has been very carefully revised and expanded with a view to the clearer definition of each officer's responsibilities, and an important new provision has been inserted declaring convict-officers to be public servants within the meaning of the Indian Penal Code. This supplies a remedy for an inconvenience which has been felt in practice.

"In Chapter V of the Bill we have inserted a substantive provision that prisoners may be confined either in association or separately. My Lord, our present system of jail administration in India is based on the detention of prisoners in association with each other. There is, of course, classification of prisoners in our jails according to the heinousness or habitual character of their offences—a classification which is more or less complete according to the construction of the jail. But there is always association of the individuals composing the class. Against the association of prisoners while engaged in labour, I have nothing to say; I am in favour of it. But the association of prisoners at other times, and especially at night, is more open to objection. For financial and other reasons the full extension of the system of separate confinement is still a matter of the distant future, but the separation of prisoners at night is more within our means and power. Improvement has already begun in several jails of this and other provinces, by providing cubicles made of wire-netting, by which each prisoner is confined to a separate compartment without any alteration in the general structure of the ward being made necessary. I do trust that this system, or some other equally effectual system, will be as soon as possible introduced into every jail in the country, and that in this way prisoners may be restrained from communication with each other at night time, when control over them must be necessarily lax. The inter-class segregation of the more respectable and least culpable from the others would thus become easy, and the demoralizing influences of jail life would be proportionately reduced.

"The chapters of the Bill, my Lord, which relate to the Food and Clothing of Civil and Under-Trial prisoners, to the Employment of prisoners, their Health and their Communications with their friends have been carefully revised; and certain suggestions, in connexion therewith, emanating from a Calcutta Association which takes an interest in jail administration have been considered. I desire to call attention to two of these suggestions which seem to me to be typical of the ideas which are prevalent in Native circles on the subject of prison-discipline: One is that the rigour of prison-discipline should be moderated in regard to convicts of respectable social standing; the other is that prisoners sentenced to short terms of rigorous imprisonment should be dealt with more leniently than prisoners sentenced to similar imprisonment for longer periods.

"My Lord, I have no doubt that a feeling does prevail, among a considerable section of educated people in this country, that our system of jail-discipline imposes a specially heavy punishment on members of the better classes of Native society who have the misfortune to transgress the bounds of the law and to find themselves in jail. The section of Native society—I refer especially to Hindu society—to which I am alluding urges that, having regard to the sanctity

of caste in the eyes of all orthodox Hindus, and to the difficulties in the way of caste observances which prison-discipline imposes, it is a great punishment for, let me say, a zamindar or a professional man to find himself in jail; it is a greater punishment for him to have to do unaccustomed labour. Why subject him to the further punishment of association with criminals of the baser kind, and to a regimen which, though wholesome of its kind, is entirely different from what he has been accustomed to? This is the view of Native society—at least of a considerable section of it. It is of course easy to marshal reasons against that view; and I shall not trouble the Council by going over hackneyed arguments with which they are no doubt familiar. But I would say this much, that in India members of the respectable classes come much more frequently into collision with the law than in England. This I believe to be largely due not to the innate perversity of the Indian gentleman, but to the circumstances that the vast bulk of the people are connected with the land; that the relations between the land-owning and rent-paying classes have been and still are often strained; and that the land laws have not been as satisfactory as they might have been. But, however that may be, men of the middle classes, especially small landlords, do, I think, get into difficulties with the law more frequently in this country than in England; and, as these difficulties do not involve any particular moral depravity, there is a feeling that the circumstances ought to be allowed for, and that the theoretic ideas of equality in punishment which are rightly enforced in England ought, in such cases, to be modified when applied to this country. My Lord, I do not speak in this matter for the Select Committee, but for myself. I wish to say that the views I have referred to deserve consideration, and I am glad that, in the Bill as now presented to Council, the Government of India and the Local Governments have the widest executive powers, so that any arrangements which they may desire to introduce shall be covered by the provisions of the Act.

"In regard to the question of punishment for short-term prisoners, I cannot feel the same sympathy as in regard to the segregation of prisoners of the better classes sentenced for misdemeanours. It is an accepted principle that prison-discipline in the early days of rigorous imprisonment should be sharp and deterrent. If the sentence be short and the discipline mild, then the jail becomes, for malefactors, a pleasant retreat in hard times—a *sosur bari*, to use a suggestive Bengali term. But in this, as in all things, there is a 'sweet reasonableness' to be aimed at. In jail matters the best evidence of its attainment is shewn by prisoners leaving the jail better and wiser men. I would encourage jail-officers to make within the law the attainment of that end their guide in apportioning labour and in enforcing discipline.

"When introducing the Bill, my Lord, I anticipated that discussion was most likely to arise in connexion with Chapter XI of the Bill, which deals with prison-offences. I am glad, however, to say that the Chapter has proved non-contentious, and that the arguments in favour of the Bill as drafted were considered adequate. Some improvements have been introduced, but the Chapter remains substantially unaltered. I have great hopes that its provisions will be effectual in checking unnecessary divergencies in prison-discipline, while allowing to Local Governments as much discretion as is needed.

"I do not think, my Lord, that at this stage I need detain the Council any longer, and I shall therefore conclude by saying that the Select Committee appointed to consider this important Bill was an unusually strong one—strong not only in numbers but, if it be permitted to me to say so, also strong in the ability and experience of its members. The Committee have considered the Bill with the greatest care and deliberation, and have been able to make an unanimous report. I am in hopes, my Lord, that the result of the Committee's deliberation will be approved by this Council and by the public, and that the measure on which so much care has been bestowed will in practice be found to be a valuable addition to our statute-book."

The Hon'ble MR. LEE-WARNER said:—"My Lord, I had not intended to make any remarks, but in view of what has fallen from the Hon'ble Mover of the Bill I would beg to observe that in the Bombay Presidency at least the land-owning class of Native gentlemen do not furnish any considerable contingent

to the 'Native gentlemen' who unfortunately find themselves in jail. Any attempt, moreover, to treat the inmates of jails differentially as regards jail-discipline with reference only to their status out of jail would seem to me inexpedient. It is the function of the Magistrate to apportion his penalty with due regard to the personal and other circumstances of the case, but beyond that I think no further class differentiation based upon caste or social, and not on moral, grounds, is needed."

The Hon'ble GANGADHAR RAO MADHAV CHITNAVIS said :—" Before the Prisons Bill passes into law, I crave Your Lordship's permission to submit a few remarks on the system of separation of prisoners in our jails according to the nature and gravity of the offence they are guilty of. So much has just been said in* favour of this system by the Hon'ble Mover of the Bill that I need only confine my remarks to only a few words. An attempt has been made, my Lord, by the Select Committee to give effect to the principle of separation as far as may be. Section 28 of the Bill now presented lays down that convicted criminal prisoners may be confined either in association or individually or in cells, or partly in one way and partly in the other. Section 60 empowers the Local Government to make rules for the classification of prisons and description and construction of wards, cells and other places of detention, as well as for the classification and separation of prisoners. The carrying out of this principle is a measure which is called for alike in the interests of the prisoners themselves as well as of society. I am well aware that in the present state of the finances of the Empire we cannot reasonably look forward to any radical change or reform in this direction. Yet the recognition of the principle is something and its inclusion in the Act which consolidates the law relating to our prisons is a step gained. That indiscriminate mixing of prisoners guilty of offences of various degrees of moral delinquency both by day and by night, while working or otherwise, is undesirable, can scarcely be questioned.

" In the mufassal we often hear it complained that serious evil results from the practice of allowing prisoners summarily convicted for the first time for light offences to associate while in prison with prisoners who are hardened criminals or who have been convicted of serious offences.

" It often happens that such a system tends to augment that criminal fraternity which it is feared at the present day exists in many of the big towns like any other community in the midst of a well-ordered society. The way in which persons summarily convicted should be treated is a matter deserving of very careful consideration, but the very large number with which we have to deal and the limited accommodation of our prisons makes it especially incumbent upon us to act with the utmost caution and care, lest, as has been said, we 'should mingle with the corrective a sort of moral poison which would rather tend to the greater depravation of the offender than would the punishment to his intimidation or amendment.'

" When it is borne in mind that in the inmates of our prisons are to be found such characters as these—"the trivial offender of tender years and yet undepraved morals, the honest and industrious citizen whom a momentary impulse of passion or violence of provocation has betrayed into the commission of an assault, the modest female whom the strength of temptation or the pressure of distress has impelled into a breach of trust or a petty theft, the young and artless who have been the dupes of the more designing, the unhappy culprit guilty of a first offence and that too involving neither violence nor malevolence"—the serious consequences of allowing them to be contaminated and polluted by association with confirmed and hardened criminals in whom the moral sense is altogether dead would be at once apparent. The treatment which these new offenders receive in the jail and the experience they there imbibe constitute for them the crisis of their lives. They may either be restored to society, amended in morals, confirmed in habits of strict discipline and honest industry, shielded in reputation and thankful for such a change in their character, or they may leave the doors of the jail saturated with the moral poison received from their associates, thoroughly depraved in character by companionship with the more profligate of their class, and with their minds filled with deep and lasting resentment against the whole community. These

are the men who after they leave the jail form themselves into gangs and prey upon society at large.

"Humanity and policy alike thus call for a reformation of a system which has a tendency to lead to such dire results. The first attempt in the direction of the reforms I have attempted to indicate was made by the Committee of 1838, whose recommendations, as the Hon'ble Mover of the Bill told us the other day in his exhaustive speech, turned towards the congregation in central prisons or penitentiaries of all prisoners sentenced to more than one year's imprisonment and in the retention in district jails of prisoners sentenced to shorter terms. For the complete success of such a policy a much larger expenditure of money was necessary than the Government could see its way to incur. Yet it must be admitted that the principle has been kept in view and sustained efforts have been made to give it effect consistently with the funds that could be made available for the purpose. At the same time it goes without saying much yet remains to be done, and I believe that the provisions now embodied in the Bill will enable the Local Governments to arrange for a more rational treatment of first criminals, and as funds permit to carry out in prisons a thorough classification of prisoners according to the nature of their offences and their separation according to the degrees of their crimes.

"The present Bill is no doubt a great improvement on its predecessor, and although, like everything human, it may be susceptible of improvement, it will have justified its introduction if it had done nothing else than to bring about a uniformity of system in the matter of jail administration in various parts of the Empire—a uniformity without which no prison reform of a general nature is possible or practicable. It will also facilitate, as circumstances and means permit, the introduction of a system of complete classification as based upon the nature of the crime committed, which, while it will secure for the prisoner the elements of punishment, protection and reclamation, will act as a preventive against a prolific generation of crime with all its disastrous consequences to individuals and the community.

"With these words, my Lord, I submit that the Bill be passed."

The Hon'ble SIR GRIFFITH EVANS said that he wished first to draw attention to a small matter on which he thought a verbal amendment would be desirable. He was not moving an amendment, as he had not got one on the paper, and he only desired to make a suggestion for the consideration of the Hon'ble Member in charge of the Bill. Section 26, sub-section (3), provided "No prisoner shall be discharged against his will from prison if labouring under any acute or dangerous distemper," — that was one branch, and then followed the words "nor until, in the opinion of the Medical Officer, such discharge is safe." He apprehended that it was probably intended to provide that a sick prisoner was not to be discharged "unless" in the opinion of the Medical Officer such discharge was safe. It was very difficult to define what was an acute or dangerous distemper. As it stood it was absolutely illegal to discharge a prisoner suffering under a distemper which was acute or dangerous, and the opinion of the Medical Officer that it was safe to do so would be no protection to the person committing the illegal act. The prisoner so illegally discharged would have a right of action or might recover his expenses for medical attendance after discharge as damages. He only mentioned that because he thought that it would probably carry out the intention to substitute the word "unless" for "nor until". If that was so, probably the Hon'ble Member would be glad to make the change.

In addition to that he wished to make a few remarks about the Bill. This was rather one of those instances which showed how careful one had to be in putting what were really meant to be instructions into the form of positive law. Now, many of these instructions were very good in themselves, but when you came to putting such matters into law you had to remember that you were giving a prisoner the right to file a suit against the Government or the Superintendent of the jail supposing he could show that any damage had resulted to him from the neglect of such statutory obligations and making the rules rigid and impossible to relax without fresh legislation.

How many rights of that kind might be given to prisoners he did not know. He did not suppose that in section 36—in which it was stated that “provision shall be made by the Superintendent for the employment (as long as they so desire) of all criminal prisoners sentenced to simple imprisonment”—any lawsuit would be likely to arise out of that if a Superintendent, on being asked for employment by such a prisoner, replied that he had none to give at the time; he would be breaking the law, but, although he would be breaking the law by saying that, it would be difficult for the prisoner to prove any damage. But, supposing he could show that he suffered damage, of course he would be entitled to compensation, because it would be a breach of public duty. However, he did not suppose that anything of that kind would happen. He was merely pointing out that it was a little risky putting unnecessary things into the shape of law. And, with regard to those things, many of them seemed to him to be matters which could be better provided for by circulars or orders or by Jails Manuals. Here, for instance, was one matter in section 35, sub-section (2), which said:—

“The Medical Officer shall from time to time examine the labouring prisoners while they are employed, and shall at least once in every fortnight cause to be recorded upon the history-ticket of each prisoner employed on labour the weight of such prisoner at the time.”

That seemed to be exactly the kind of thing one would expect to find in a Jail Manual; but it did hardly appear that it was the function of this Council to arrange all such small matters as the periodical record of a man's weight, or he might even say the taking of his temperature. He was not going to oppose the Bill on that account, because he did not think that any particular harm would be done by providing for such matters; he only thought that it was unnecessary and an objectionable kind of legislation.

Another instance.—There were elaborate provisions with regard to how prisons were constructed. First of all, there was a wide definition of a “prison,” which “means any jail or place used permanently or temporarily under the general or special orders of a Local Government for the detention of prisoners.” Then there are certain exceptions, one of them being “any place which has been declared by the Local Government by general or special order, to be a subsidiary jail”. Subject to these exceptions section 4 provided that—

“The Local Government shall provide, for the prisoners in the territories under such Government, accommodation in prisons constructed and regulated in such manner as to comply with the requisitions of this Act in respect of the separation of prisoners.”

Now then you turn to the requisitions of the Act, and you find them in section 27. One of these requisitions is that—

“in a prison containing female as well as male prisoners the females shall be imprisoned in separate buildings, or separate parts of the same building, in such manner as to prevent their seeing, or conversing or holding any intercourse with, the male prisoners.”

Accordingly it would appear that a Lieutenant-Governor, who is the Local Government for this purpose, would be guilty of breaking the law if it were proved that in some out-of-the-way place and owing to faulty construction of a building, although there was segregation, the women were able to see the men at a distance. Putting these things into law seemed to be somewhat unnecessary. In England, where many of these jails, lunatic asylums and so on had to be constructed out of local rates, it was very necessary, when you wanted a particular stamp of jail, that you should put such matters into law, because it was necessary to have a law to enable the Local Government Board to compel the local authority to construct jails of the prescribed sort; but here, where we have to do with a Local Government, one did not see the use of it. The High Court had no power to issue a mandate against the Lieutenant-Governor. There was nobody except the Governor General in Council that could issue any mandate or order, and therefore it would appear that with regard to all these matters of construction, and so on, if the Government issued a circular stating that they desired that a jail should be constructed in this manner, so far as might be, they would be doing all that was necessary. No legislation was necessary to give the Governor General this power.

All he wished to say was that it struck him that there were a good many things in the Bill which might have been provided for in another way, and although it might be said that uniformity was desirable, still that uniformity must be tempered in some cases by local circumstances and necessities, and it was far more difficult to temper it when you had it in the form of an Act like this than when you had it in the form of a circular or resolution.

Then there were the varying circumstances of different parts of the country to be considered. With regard to many things no doubt the Local Governments had been allowed to make rules. What struck one on looking at the Bill was that there were altogether too many matters of detail dealt with in it; at the same time SIR GRIFFITH EVANS did not think that they would do any particular harm, and therefore he did not propose to oppose the Bill; but, having to speak upon it and upon the small amendment referred to, he was obliged to say that it went much too far in taking up matters which did not require legislation to settle them.

His Honour THE LIEUTENANT-GOVERNOR said:—"The opinion of the Local Government of Bengal has been laid before the Supreme Government on the subject of this Bill, and a copy of that opinion has been presented to every Member of the Select Committee and the Council. It is not necessary for me to recapitulate in any detail the views there expressed as to the grounds on which I think that the Bill which we are now discussing is open to objection. My hon'ble friend the mover referred in his speech to one of the principal classes of objection which was taken by me and which has been recapitulated with great force by my hon'ble friend who has just spoken. It was the objection that the Bill has become too much of the nature of a manual of instructions. In this respect it offends against the principles held by a large and important class in India, that the best form of legislating for the country is to pass Acts which shall contain as little substantive law as possible and shall provide that the execution of the principles laid down shall be carried out by rules to be passed by the Local Government. My hon'ble friend has already to a certain extent answered by anticipation my arguments on this subject by asserting that in this Bill we have only the main principles laid down, and that provision exists for the making of a large body of rules by the Supreme and Local Governments. But I venture to think that he has rather exaggerated the strength of his side in saying that the substantive provisions which this Bill contains are those which relate to important principles and to the grand provisions which it is right that the Supreme Council of India should lay down. I am satisfied that any one who studies this Bill will find in it many details which might with advantage have been omitted. My hon'ble friend who has just spoken has referred to one or two of them, and it would be unnecessary for me, especially as the Council is already aware of the instances which I am able to bring forward in support of my views, to follow up this point in detail. But there is a further expansion of the subject which has been touched on just now in the remarks made by Sir Griffith Evans where he said that whenever you constitute a legal offence you create a statutory right on the part of some one to prosecute the person who commits that offence. The objection which I am inclined to take is exactly in the contrary direction. It is this, that so long as you put into your manual of instructions that your subordinate officers should act in a certain manner, so long you are able swiftly and certainly to punish that man or those men if they transgress these rules; but once make their actions a statutory offence, so that these men must be taken before a Magistrate to have the offence proved judicially against them, and you open an enormous area for technical objections either by the offender or his pleader, and for arguments that the intention of offending cannot be proved, or that some formality has been omitted by the prosecution which has nothing whatever to do with the equity of the case or the spirit of the law.

"On grounds of that kind we see over and over again that transgressors are let off by our Courts, and therefore there is a considerable danger in turning acts which are departmentally punishable into acts which are criminal offences under the law. This is a great mistake which is often made by that class of amiable enthusiasts who are extremely anxious to see certain provisions which

they consider right established. They think that so long as an act is departmentally forbidden the offender may escape, and they will not be satisfied until the act is declared to be an offence against the law. It is easy to see the hand of these enthusiasts in the regulations which the Bill contains as to the actions of the Jailor and the Medical Officer and all the jail subordinates. A general opinion has been expressed by this class of persons that there is a great deal of cruelty in our jails and that a great deal of oppression is carried on by subordinate officials, and they yearn to put a stop to such oppression. My hon'ble friend Sir Antony MacDonnell has casually mentioned a fact which contradicts that impression. He has referred to the popular description of a jail as a '*sosur-bari*,' a father-in-law's house, a place of much comfort and contentment. My Lord, I believe that it is in proverbs of this kind, and not in representations from charitable bodies and bands of unpractical philanthropists, that the true mind of the people is to be found. But in spite of this we have had it urged upon us that there is great cruelty carried on in our jails, and it is mainly to satisfy this impression that these provisions have been laid down. They existed in the Manual already, but the public did not know of them. Once, however, put them into the law and constitute them an offence, and in the opinion of the philanthropists you secure that the object of the Government, which is to stop such oppression on the part of its subordinates, will be carried out. My contention is that you have done exactly the contrary; you have put your prisoners into a position of much greater danger, and made it much more difficult to convict and punish the persons in charge of them than was the case before when these acts were condemned by the Manual and punished departmentally but were not declared to be criminal offences to be taken before the Magistrate, judicially proved, and capable of appeal to a higher Court.

"There are two other points which I would wish to mention very briefly in regard to which I think this Bill has also taken a wrong direction. One is that there is too much of an attempt to secure uniformity. My hon'ble friend Sir Antony MacDonnell mentioned this in his opening speech. He said that he was the greatest possible upholder of the rights of the Local Governments and of the necessity of recognising variations according to varying circumstances, but that this was an exceptional case, in which it was necessary that there should be uniformity. I have not been able to satisfy myself that any such necessity has been proved. There are two special instances which I should wish to bring to notice in which this mistake has been made. There is a provision in section 46, clauses (6) and (7), under which the handcuffs and fetters to be used in jails must be prescribed as to pattern and weight by the Supreme Government, and I presume it is intended that the weight and pattern must be the same in all jails in every part of India. I cannot but think that in a country like this, where we have to deal with such varied peoples as the stalwart ruffians of the North-West and the weak, puny-limbed people of Eastern Bengal, uniformity in this respect is undesirable; handcuffs may easily be imagined which would be quite sufficient for a Bengali prisoner, but which a Kabuli prisoner, for instance, might readily break.

"Then you have made provision in the employment section (35) under which a nine hours' labour law is laid down for the whole of India. I have not been able to ascertain the grounds on which this rule has been arrived at or that there is *prima facie* evidence that a working day of the same number of hours should be prescribed for all the climates of India or for all the different races and for all the varying kinds of labour. I think there are many similar instances of this kind in which the Bill has aimed at uniformity where it would have been wise to leave matters in the hands of the Local Government. I may mention here that my hon'ble friend Dr. Lethbridge told me that the provision about fetters was thought necessary because it had been found that in one or more provinces the fetters were of undue weight, and this made it requisite that the Supreme Government should lay down a uniform pattern suitable for all places. Of course, it is possible that the Supreme Government should be wiser than any one Local Government: it is even conceivable that it should be wiser than all the Local Governments put together; but I venture to submit that the best way of controlling Local Governments in matters of this kind is not by providing passages in the law and making statutory offences in this way, but by a system

of inspection, by employing able and capable officers who would go round and see what was actually being done. The Hon'ble Finance Member will remember that when we were colleagues together on the Finance Committee we put that suggestion very strongly before the Government of India. We found as the result of our tour over India that wherever we had gone there was something to learn as well as something to teach, and we held that everybody who goes to inspect other provinces will be able to pick up improved methods of procedure there, for the use of his own province, as well as to suggest improvements from his own experience; that the best way of effecting reform is by sending our officers round, and in that way there would be a general diffusion of knowledge and a check upon any excess or irregularity which a Local Government might be guilty of. I believe, my Lord, that this is the way in which uniformity will be secured better than by provisions of this kind introduced into a law which may not equally suit all parts of India alike.

"I come now to my third point—the restriction of the powers of the Local Government by section 59, which conveys to the Supreme Government alone power to make rules in certain cases. My hon'ble friend referred to section 60, under which Local Governments can make rules, and spoke of it as if it were a large-minded and liberal section which considerably increased the powers of Local Governments. But I venture to think that it does not contain a single item which the Local Government has not already the power to carry out. There is no liberality and no expansion of the powers of Local Governments here; but in section 59 the clause under which the Governor General in Council has the power to make rules, there is a very considerable restriction of those powers. I will give an instance of this. Three years ago, when I was new to Bengal, one of the first things that struck me in the way of reform for the jails in this province was the desirability of releasing moribund or seemingly moribund prisoners, so as to give them a last chance for life, or, at any rate, the comfort of dying in their own homes. I issued rules to give effect to these views on my own responsibility. I did not refer the question to the Supreme Government. I have no doubt that, if I had so referred it, it would have been received with that consideration with which the Supreme Government always does receive such suggestions; but, at any rate, there would have been correspondence and considerable delay in carrying out my views. Discussion subsequently showed that I had not gone too far in the orders I passed, and the only restriction imposed upon me was that in the mortuary statistics the number of released moribund prisoners should be shown as actual deaths, so that the jails should not get undue credit for a low mortality by getting rid of prisoners before their death. That is an instance of a power which Local Governments did possess, which they ought to possess, and which is now taken from them by clause (7) of section 59 of this Bill. I venture to think that it would be a great calamity if any tendency should arise in this Council to interfere with the powers of the Local Governments, or not to give them credit for sufficient knowledge and for doing what is right under local circumstances.

"I make these remarks not with any intention of embarrassing the Government. I believe on the whole that the Bill is a good one, and the individual points to which I have taken objection are small points; but I think it right to make this respectful protest in case there should be any tendency on the part of the Legislature or of this Council to act in the direction in which it seemed to me that it has been acting in this case. I am anxious to impress—as far as my representation is able to impress—upon the Council the importance of not burdening the Supreme Government with more responsibility than it can bear and with the necessity of possessing more knowledge than it can possibly obtain, of carrying out legislation with a more complete confidence in the Local Governments, and of leaving the law so elastic as to enable them to provide for the widely varying conditions of the different parts and peoples of India."

The Hon'ble SIR ANTONY MACDONNELL said:—"I think I may congratulate the Select Committee upon the reception which on the whole the Council has accorded to the Bill. No doubt, the remarks which have fallen

from my friend His Honour the Lieutenant-Governor and from my hon'ble and learned friend Sir Griffith Evans cannot be taken as an approval of the Bill ; but I am glad to learn that they do not propose to oppose the passage of the measure through the Council, and that their remarks were more directed towards placing on record the views which they considered right and proper than with the object of preventing the measure from passing. The only possible objection I can have—and I hope my hon'ble friends will not think me ungracious in making it—is as to the tardiness of their remarks. Their remarks have reference to the framework of the Bill, and, being of that character, I respectfully submit that they would have come more appropriately on the introduction of the Bill, or on the motion to refer it to a Select Committee, which corresponds to the first and second reading of Parliamentary procedure. However, I am more than conscious of the considerate treatment which the Bill has received from Hon'ble Members, and I do not wish to take any further objection on that ground.

“ My hon'ble friend Mr. Lee-Warner made one remark which I think must have been made under a misapprehension. The observations I offered in regard to the treatment in jail of respectable classes of natives had no reference to the question of judicial punishment, but to the question of segregation, and possibly the regiment on which such prisoners should be placed. On the latter point, however, I would touch very delicately, because it is a question upon which I am not myself prepared to express a strong opinion. In regard to what I have said on the subject of segregation, I think I shall have the sense of the Council with me ; but that is a matter of jail administration, which may, with the utmost confidence, be left to the Local Governments.

“ In the remarks which fell from the Hon'ble Mr. Chitnavis I generally agree, and I think that under this Bill, when the jail rules are modified, wherever modification is necessary, all his wishes will be met—one of the principal of those being that habitual prisoners should be separated from prisoners who are not habitual. That, indeed, is one of the fundamental principles of the prison system which we desire to carry out in every jail in the country. It may be possible to go a little further in that direction, and that was what I had in view when suggesting that further segregation of misdemeanants from felons (to use English terms) might be possible.

“ Coming now to the observations of my hon'ble friend Sir Griffith Evans, I would first refer to his criticism of section 26, sub-section (3). The sub-section runs as follows :—

‘ No prisoner shall be discharged against his will from prison, if labouring under any acute or dangerous distemper, nor until, in the opinion of the Medical Officer, such discharge is safe.’

“ That, my Lord, is a reproduction *verbatim* of the existing law. I have much sympathy with Sir Griffith Evans' view that the word ‘unless’ would have been more appropriate in this section and that it should have been substituted for the words ‘nor until’. I was disposed at one time to divide the Council upon that matter, but, inasmuch as the Select Committee were in harmony on most points, I thought it better not to strike a discordant note on this, to ‘stand on the old ways’ and to allow matters to remain as they were. However, I am prepared to accept an amendment in the direction indicated by my hon'ble and learned friend should he be disposed to propose one and should the Council Rules allow.

The Hon'ble SIR ALEXANDER MILLER remarked :—“ I feel bound to say that I shall feel obliged, on behalf of the Select Committee, to oppose that amendment, if proposed.”

The Hon'ble SIR ANTONY MACDONNELL continued :—“ The next question to which my hon'ble friend Sir Griffith Evans has taken exception is section 36. That section runs :—

‘ Provision shall be made by the Superintendent for the employment (as long as they so desire) of all criminal prisoners sentenced to simple imprisonment,’ &c.

“ That is also a reproduction of the spirit of a section of the existing Act, which enables prisoners sentenced to simple imprisonment to engage, if they so

wish, on labour. By labouring they are placed upon a more generous scale of diet. My hon'ble and learned friend's criticism, so far as I understand it, is that, as the section is drafted, the Jail Superintendent who does not comply with the request of a prisoner to put him on hard labour lays himself open to a possible action for damages. How far there is practical danger in this my learned friend can perhaps judge better than I can. But if an action were brought—and there is no knowing what litigants may not be advised to do—I should expect the Judge to be guided by the maxims *de minimis non curat lex*.

"The next reference was made to section 35. The Hon'ble Sir Griffith Evans stated that the entry of the weight of a prisoner upon the history-ticket is a matter which might be better left to rules than put into the law. That was one point upon which we made a concession to what I may describe as one of the extreme parties. We had one party who would put everything in the Bill and leave nothing to rules; we had another party who would be anxious to have a Bill drafted of this sort: first section—name of the Act; second section—power to make rules; third and last section—repealing all previous laws. The work of the Select Committee was an endeavour to strike a happy mean. This was one of the concessions which we made, and I do not think that harmony on other, as I think, more important points was dearly purchased at the expense of such a concession as this.

"In regard to section 4, which states that Local Governments shall provide accommodation for the prisoners in the territories subject to their rule, my hon'ble and learned friend made some observations, but I am not quite certain that I have succeeded in catching the point of my hon'ble friend's objection. By section 4 the Local Government is placed under the obligation of providing certain accommodation to meet the requisitions of the Act, and the requisitions of the Act are stated in section 27. I was unable to see wherein the inconsistency lies in what the gravamen of my hon'ble friend's objection is."

The Hon'ble SIR GRIFFITH EVANS explained that, if in any prison it was possible for a female prisoner to see a male prisoner at any distance, such a state of things was contrary to law, but it was difficult to say that any particular result would take place from the illegality unless an action or prosecution were possible.

The Hon'ble SIR ANTONY MACDONNELL continued:—"My hon'ble friend explains that if it were possible, owing to some defect in a prison building, for a female to see the male prisoners, the Local Government or the Superintendent of the jail would be liable to prosecution or a suit for damages. This, if I may be pardoned for saying so, is one of those excursions into the realms of fancy with which my hon'ble and learned friend occasionally delights his many friends. But, with all respect for my friend's ingenuity, I venture to think that in these circumstances it is not a plaint that might reasonably be expected but a vote of thanks from the female prisoners for arrangements which, though defective, if judged by prison rules, had nevertheless gratified the natural curiosity of the female mind and lightened the tedium of their sojourn in jail.

"I now come to the remarks of my hon'ble friend the Lieutenant-Governor. The most important argument, it seems to me, which he raised was that under the Bill as presented to Council we make a number of statutory offences; that we introduce sections which provide for prosecuting prisoners before the Magistrate; that there would probably be a danger of not getting a conviction, and if a conviction were secured that there would be the further danger of an appeal with all the uncertainties of the law attendant thereon. My Lord, I do not know where in this Bill these dangers and uncertainties are to be found. We do not propose to prosecute prisoners before the Magistrate for prison-offences except in very extraordinary cases. It is true that we have section 54, but that is intended to apply to the officers of a prison rather than to the prisoners. We have to provide for the maintenance of control over our jail establishments, and therefore we had to take power either in this Act or to leave it to the general law or to the Penal Code. We thought it right, following the procedure under the Police Act, to

provide that offences against discipline should be punished by a special provision of the Act. We have therefore introduced a section (54), and I think that, from the remarks which have fallen from my friend the Lieutenant-Governor, he is labouring under the misapprehension that this section is meant to apply specially to prisoners.

His Honour THE LIEUTENANT-GOVERNOR said :—" I spoke about the subordinate officers of the jail oppressing prisoners, an offence which was formerly punishable departmentally under the Jail Manual but now is to be punished, on conviction before a Magistrate, under section 54 of the Bill.

The Hon'ble SIR ANTONY MACDONNELL continued :—" They may also be punished by executive order. We do not deprive ourselves of the power to make a manual and issue executive orders. We have thought it desirable, with reference to the procedure adopted in the Police Act, to impose certain statutory obligations on our prison-officers and to take power to punish them under this section 54 for neglect of duty, or gross malfeasance.

" In regard to His Honour's criticism on section 46 of the Bill, on the subject of fetters, I wish to explain that, because the Government of India takes power to determine the pattern and weight of handcuffs and other fetters, it does not follow that an uniform pattern or weight shall be prescribed for all the provinces of the country. There is no intention of having one pattern for the weak-limbed men of Eastern Bengal and the same for the muscular Pathans. Power is taken to prescribe the kind of fether which is found to be suitable to each province or even for each district. All orders on this subject would be framed with a view to the circumstances of the particular provinces concerned, and would be issued on the recommendations of the Local Governments. But so many instances of difficulties connected with the pattern of fetters have come to the notice of the Government of India in its executive capacity that we thought it desirable to introduce this provision.

In conclusion, my Lord, I may explain that for the Bill I am not myself personally responsible although I fully identify myself with each of its provisions. This measure is the result of fifteen years' consideration on the part of the Government of India. Three Commissions have sat upon it, and the Bill was thrown into its present shape before I joined the Council. I am only carrying out the conclusions come to by officers of greater experience and larger knowledge of this particular subject than, perhaps, I possess. At the same time I entirely agree with the principle of the Bill, and as regards its provisions your Excellency will see that there are only two entire sections printed in italics—the italics being the indication of the new matter introduced. This law has, as a matter of fact, been in force since 1870, and we are now only importing into it such matters as practical experience in the various provinces of India has shown to be desirable. I trust that the difficulties which His Honour the Lieutenant-Governor anticipates will not be found to be material, and that he will also find that the powers which the Act gives him under section 60 are fully adequate to save him from any unnecessary interference on the part of the Supreme Government. The object of the Government of India is not to withdraw from the Local Governments powers which they can exercise much more effectually than the Government of India can, but to co-ordinate and bring into line all local effort, and to that end to supplement local knowledge by larger information drawn from other provinces."

The Motion was put and agreed to.

The Hon'ble SIR ALEXANDER MILLER moved that in section 1, sub-section (4), of the Bill as amended, for the words " as those sections heretofore have been, or hereafter may be, amended by any Act passed, and for the time being in force, under the Indian Councils Acts, 1861 and 1894," the words " as amended by subsequent enactments " be substituted. He said :—" This is a purely formal amendment. Section 1, sub-section (4), was introduced in to the Bill by the direction of the Select Committee, but it was not settled in Committee and it has been put in in a different form from that which was before the Select

Committee. That form—after stating that ‘Nothing in this Act shall apply to civil jails in the Presidency of Bombay outside the city of Bombay, and those jails shall continue to be administered under the provisions of sections 9 to 16 (both inclusive) of Bombay Act II of 1874’—goes on—‘as those sections heretofore have been, or hereafter may be amended by any Act passed, and for the time being in force, under the Indian Councils Acts, 1861 and 1892.’ That is rather an unusual form, and it is open, I think, to two objections—one that it purports to control future legislation, which of course we cannot do. The future Act (if any) will determine for itself whether it is to be applied to these jails or not, and anything that we may say now will have no effect upon that question. Another objection is that the expression ‘under the Indian Councils Acts, 1861 and 1892,’ would apply rather to rules made directly under the authority of those Acts than to Acts passed by the Council established by those Acts, and I think it would be better to ask the Council simply to substitute for the words I have read the ordinary words which are well understood and used at least once a week in official documents—I mean the words ‘as amended by subsequent enactments.’ That, I think, will cover the whole ground.”

The amendment was put and agreed to.

The Hon'ble SIR ALEXANDER MILLER said:—“I have, with Your Excellency's permission, another small amendment to propose which is not on the notice-paper. As the Bill was drafted the words ‘on and after that day’ with which section 2, sub-section (1), begins, followed immediately after the words ‘the first day of July, 1894,’ with which section 1 then ended. Now that another sub-section has been introduced between these sets of words, it has been suggested that, instead of the words ‘on and after that day,’ section 2 ought to run ‘on and after the said first day of July.’ It means of course the same thing, but the latter form is more precise.”

The amendment was put and agreed to.

The Hon'ble SIR ANTONY MACDONNELL then moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

CODE OF CRIMINAL PROCEDURE, 1882, AMENDMENT BILL.

The Hon'ble SIR ANTONY MACDONNELL also presented the Report of the Select Committee on the Bill to amend the Code of Criminal Procedure, 1882. He said that he would ask the Council to take the Report into consideration on next Thursday.

INDIAN PENAL CODE AND ACT VI OF 1864 AMENDMENT BILL.

The Hon'ble Sir ALEXANDER MILLER moved for leave to introduce a Bill to amend the Indian Penal Code and Act VI of 1864. He said:—“The Bill is a very short one. The first section proposes to alter section 182 of the Code in respect of false information given to public servants. It arises out of a case in which, information having been given by a man to the police that he had been robbed at a certain village, the police went down and made inquiries and gave a great deal of trouble and annoyance to the people. It turned out that the information was absolutely false, but on prosecution of the informant under section 182 the High Court of Calcutta ruled that inasmuch as it was not intended, or could not be shown that it was intended, to injure or annoy any particular persons, the case did not fall within the section in question. The object of the section is to amend that, and to say that if such information is given the person giving it should be punished whether any particular person was aimed at or not.

“The second section of it is intended to give full effect to what is known as the Vienna Convention in respect of postage, and it provides for making it an offence to make fictitious stamps, which are defined to be stamps purporting to be used for purposes of postage whether by the British or any foreign Government.

"Section 3 is an amendment which is being proposed to section 294 in order to meet a case which I daresay a good many Hon'ble Members have seen—a case of indecency in the Presidency of Madras. I am not perfectly satisfied with the drafting of the section, but that is a mere question of detail and is a small matter, and can easily be settled at a future stage if the Council permit me to introduce the Bill.

"Section 4 is intended to meet a glaring defect in the law which was proved to exist in a somewhat celebrated case—the case of *Shama Churn Sen*—which occurred here in Calcutta shortly before I came out to India, in which a man was charged with defrauding a bank to the extent of three lakhs of rupees. He was acquitted because it could not be shown that the three lakhs had been abstracted upon any one particular occasion or in any particular sums. The section is intended to meet such cases and to make the falsification of books punishable even although no particular sum of money or particular occasion can be shown.

"Section 5 is only for the purpose of determining a point which seems doubtful; it seems that a question has been raised whether, when a higher punishment is authorised in case of the repetition of the same offence, the term 'same offence' will include the minor offences which go to make up the particulars of the offence. It is obvious that if you look at the section it ought to include them, especially where the offence is substantially the same though not identical. The only object of the section is to make this clear."

The Motion was put and agreed to.

The Hon'ble SIR ALEXANDER MILLER also introduced the Bill.

The Hon'ble SIR ALEXANDER MILLER also moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

CODE OF CRIMINAL PROCEDURE, 1882, AMENDMENT BILL.

The Hon'ble SIR ALEXANDER MILLER moved for leave to introduce a Bill to amend sections 366 and 371 of the Code of Criminal Procedure, 1882. He said:—"The Bill is introduced into the Council on a representation made to the Government of India by the High Court of the North-Western Provinces. According to their construction of the Code as it stands—and I am by no means prepared to say that the construction is not perfectly right, or that a sentence in a Criminal Court would be legal without that formality—it is absolutely necessary that not only should the judgment be written and signed before it is delivered, but that it should be read at length in open Court to the accused; the result being that very often it would be necessary to read a long legal judgment in English before a number of persons when none of those who were interested either in the prisoner or the case would perhaps understand one word of what was said. The object of the Bill is to remove that necessity, and on the other hand to make it necessary that the judgment shall be at the time explained to the prisoner, or his pleader, in some language which the prisoner, or his pleader, does understand. It is not to be necessary to read the whole judgment, but it is to be necessary to explain the substance of the judgment in an intelligible form. It is also intended to provide for another small difficulty which has been found in practice—that it is very often inconvenient that the judgment should be read by the Judge, who has a great many other matters to occupy his attention. The reading of the judgment is more or less a ministerial act; once settled and signed it can be read and explained as well by some one else as by the Judge whose judgment it is; therefore and it is proposed to give the Judge leave, for any cause which may appear to him sufficient, to delegate the duty of reading the judgment to some other person or Court.

"The second section of the Act is practically consequential on the first,

and is only the substitution of other words for words thereby rendered inappropriate."

The Hon'ble MR. WESTLAND said that he would like to know what was meant by the word "judgment". He had always understood that the judgment was the formal order of the Court, and it was the custom always to explain it to the prisoner. Was he to understand that according to the existing law the reasons for the judgment had to be recorded and explained?

The Hon'ble SIR ALEXANDER MILLER said that by the judgment was meant not the sentence itself but the reasons on which the sentence was founded. The judgment of the Court was not the sentence pronounced against the prisoner, but the statement of the case and the discussion of the evidence on which the Judge justified the decision at which he arrived. As the Code of Criminal Procedure stood at present, it was the duty—a duty, he thought, more honoured in the breach than in the observance—of the Judge to read the judgment at length in every case before pronouncing sentence, and what was intended was to get rid of that necessity.

The Hon'ble MR. WESTLAND said that the custom had always hitherto been to explain the general meaning of the judgment arrived at to the prisoner, and the Judge or other magisterial officer considered himself quite at liberty to record his decision that is, the reasons for the judgment, at greater leisure afterwards.

The Hon'ble SIR ALEXANDER MILLER said that the statement he had just made was not his reading of the law, but that of the High Court. More than one sentence in important cases had been set aside on the ground that the judgment had not been in fact written and signed before the sentence was pronounced. There was no reasonable doubt either as to the meaning of the Code or as to the fact that it was frequently, he might almost say necessarily, disobeyed.

The Motion was put and agreed to.

The Hon'ble SIR ALEXANDER MILLER also introduced the Bill.

The Hon'ble SIR ALEXANDER MILLER also moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

The Council adjourned to Tuesday, the 27th March, 1894.

CALCUTTA;
The 30th March, 1894.

S. HARVEY JAMES,
Secretary to the Govt. of India,
Legislative Department.

SUPPLEMENT TO
The Gazette of India.

No. 13.} CALCUTTA, SATURDAY, MARCH 31, 1894

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

REPEAL OF THE DUTY ON THE IMPORT OF SILVER AND GOLD PLATE INTO THE UNITED KINGDOM, AND THE SUBJECT OF HALL-MARKING OF SILVER-WARE.

No. 106S., Calcutta, the 30th March, 1894.

The following papers are published for general information :—

By order,

STEPHEN JACOB,
Offg. Secretary to the Government of India.

No. 5261, dated the 5th November, 1890.

RESOLUTION—By the Government of India, FINANCE AND COMMERCE DEPARTMENT.

READ—

Despatch from the Secretary of State for India, No. 45 (Statistics), dated the 15th May, 1890, and enclosures.

RESOLUTION.—In compliance with the representations made by the Government of India during the last ten years, Her Majesty's Government has repealed the duty on the

importation of silver plate into the United Kingdom, repealing at the same time the duty on gold plate.

2. The Government of India has always coupled with its representations against the duty a proposal for the repeal of the requirement of compulsory assay and of a fixed English standard of fineness of metal, because the retention of those requirements prevented equal competition between manufacturers in India and manufacturers in England. This part of the proposals has not been complied with, and the English law of assay and hall-marking remains unaltered; but Her Majesty's Government has proposed to provide in a Bill to be introduced in Parliament that Indian silverware bearing an Indian hall-mark affixed under the authority of the Government of India should be admitted into the United Kingdom without being subjected to the British hall-mark regulations, and the Secretary of State for India has invited an expression of the views of the Government of India on this subject. His Lordship suggests that, if a system of Indian hall-marking is adopted, it might be made voluntary and not compulsory, and enquires what standard of fineness should, with due regard to the practice of Indian silversmiths, be adopted for the Indian silver hall-mark.

3. The most serious difficulty hitherto in subjecting Indian goods to the English assay has been that the nature of that assay is such that the goods are materially injured in the process. Hence it is necessary to send the goods to the assay office in an unfinished condition, and after they have been marked to take them back to the workshop, and finish them for sale. This cannot be done with Indian ware, and therefore in the case of such ware intended for sale in England, it will be necessary, in order to ensure its admission to free competition with English goods, that, if assay is required, it should be made in this country. Another difficulty has been that the English standard is higher than the Indian (rupee) standard, but this will disappear with the admission of an Indian standard or standards.

4. The Government of India does not consider it possible to adopt any system of compulsory assay or hall-marking. No system of assay under Government regulation has ever been in operation in this country; it is not now desired by the trade in India, or by the purchasers of Indian gold and silver ware, and it would necessarily operate unequally and unfairly in a country of long distances, costly transit, and wide distribution of manufacture. Looking, however, to the stage which has been reached, it is desirable to obtain the opinions of the persons interested on the proposal for an Indian assay, and to consider, assuming that an Indian assay should be introduced, what sort of a system should be devised.

5. The points for consideration in connection with the introduction of a system of assay are:—

- (1) Should the assay be compulsory or optional?
- (2) What standard or standards of fineness should be adopted?
- (3) Where should assay offices be located? At the two Mints only, or at other centres also?
- (4) What process for assay should be adopted?
- (5) What fees should be charged?
- (6) What distinguishing marks should be applied to the wares assayed?

6. On the first point the Government is decidedly of opinion that no such restriction of trade as would accompany a compulsory assay and hall-mark can be contemplated. The law which would be required would be of a character entirely contrary to the economic policy of the Government of India, and would be vexatious and restrictive in operation wherever it could operate (as in the Presidency towns). Apart, moreover, from the objections of principle to such a system, it is clear that the law would constantly be evaded, and a serious result of compulsion would be the discouragement of trade in British territory and its encouragement in Native States.

If any assay is to be introduced, it must be optional, and none should be required for articles which under the English law do not require to be marked.

7. On the second and third points the Governor-General in Council will reserve any expression of opinion until he is placed in possession of the views of the Local Governments and the trading and manufacturing community. As regards assay offices, it must be remembered that the establishment of new offices will involve considerable expenditure, which must all be met from fees.

8. As to the fourth point, there are three processes in use in various countries—(a) cupellation, (b) the wet method, (c) the touchstone. The two first are the most accurate, but both involve the slicing or scraping off from the piece of work of a portion of the metal to be assayed, and consequently it is found necessary to send the work to the assay office in an unfinished state, and finish it off for sale after it has been marked. If either of these processes is adopted in India, the manufacturer who works at a distance from the assay office must incur a heavy expense in cost of transit. If, for instance, he is at Delhi, he must send his wares to Bombay; then get them back to Delhi; and then, after finishing off the work, send them to Bombay again for export. In each transit the goods must be insured.

The last method—that of the touchstone—does not involve any injury to the ware but it is not so accurate, varying, it is believed, about one per cent. in its results one way or the other. It is consequently in France and other Continental countries used only for small wares, which could not be treated by the other processes. In England it is not used at all. It would probably be best to adopt this process in India; the test is sufficiently good for practical purposes, and it has the advantage of placing manufacturers at a distance from the assay office more nearly on a level with manufacturers at an assaying centre than would be the case if the other processes were adopted.

9. On the fifth point, that of the fees to be charged, no suggestion can be made at present. The fees must bear some relation to the expenditure, and, as said above, that will be large if assays are allowed to be made elsewhere than at Calcutta and Bombay. The Mint and Assay Masters may, however, be asked to suggest a scale which would be sufficient if no new offices were established. The fees first-charged would be provisional only until it is seen how the scale operates.

10. The Mint and Assay Masters may be asked to advise on the sixth point also.

11. The Governor-General will be glad to learn at an early date the views of the local Governments and Administrations on all these points, and desires specially to be informed—

(a) whether the prospect of the admission of Indian artware in the precious metals to England without the necessity of undergoing there the assay by cutting and scraping is considered of sufficient importance to the trade to justify the introduction into India of a system which must necessarily be restrictive and operate unequally, whether it is compulsory or voluntary;

(b) whether the continuance of hall-marking in the United Kingdom has appreciably minimised the effects that might have been expected from the repeal of the duty on silver plate. The trade has had some experience of the effects of the repeal, and will probably be able to say what practical effect the abolition of the duty has had. It must have stimulated the transmission to England by private persons of articles not intended for sale, and therefore not requiring to be assayed; and in this way trade has probably benefited indirectly, but it is desirable to know whether there has been any substantial increase directly in the supply of articles to be placed on sale in England.

12. One matter deserves special consideration. Section 4 of Act 47 and 48 Vict. Chap. 62, is as follows:—

Articles of foreign plate which, in the opinion of the Commissioners of Customs, may be properly described as hand-chased, inlaid, bronzed, or filigree work of oriental pattern, shall, subject to the payment of the proper duties of customs, be exempted from assay in the United Kingdom.

The Governor-General in Council is not aware of the precise significance attached by the Commissioners of Customs in England to the terms "hand-chased, inland, bronzed, or filigree work of oriental pattern," but it seems possible that they cover most descriptions of Indian silverware exported to England. It is important to know how the exemption made by the section quoted above has worked in practice, and whether it has in fact given the substantial relief that it seems to give. The opinions of those engaged in the trade on these points are particularly invited. It is possible that the terms of the existing law are not generally known in India.

13. His Excellency in Council considers it important that the questions raised in this Resolution should be carefully explained to representative native manufacturers and their opinions obtained. It is also specially desirable that such opinions should be obtained from workers distant from the places where assay offices exist or are likely to be established: *e.g.*, the Chief Commissioner of Burma should obtain the opinions of workers at Mandalay and Rangoon, and the Government of Bombay from Kutch and elsewhere.

ORDER.—Ordered, that the Resolution, together with a copy of the Despatch and enclosures read in the preamble, be forwarded—

- (1) to the several local Governments and Administrations for the purpose indicated above;
- (2) to the Foreign Department with the request that it may obtain and furnish to this Department opinions from the Native States of Jaipur and Kashmir;
- (3) to the Chambers of Commerce of Calcutta, Bombay, Madras, Rangoon, and Upper India for opinion; and
- (4) to the Trades Associations of Calcutta and Madras with the request that the Government of India may be favoured with the fullest expression of their opinion and that of individual members and representative dealers and workers in the precious metals appertaining to those bodies.

Ordered also, that these papers be forwarded to the Mint and Assay Masters Calcutta and Bombay, with the request that this Department may be furnished with their

opinion on the question generally, and specially on the second, fifth and sixth points noticed in the Resolution; and that the papers be published in the *Gazette of India*.

[*Note.*—For the replies see Appendix.]

No. 362, dated 8th November, 1893.

From—The Government of India,

To—The Secretary of State for India.

We have the honour to address Your Lordship on the question of the institution in India of a system of hall-marking, which was referred to us for consideration by Lord Cross in his despatch of the 15th May, 1890, No. 45 (Statistics).

2. The circumstances which led up to that despatch are these: In compliance with repeated representations from the Government of India, Her Majesty's Government, in the beginning of 1890, repealed the duty on silver plate imported into the United Kingdom, repealing at the same time the duty on gold plate.

The representations of the Government of India on the subject of the import duty had always been accompanied by suggestions for the repeal of the requirement of compulsory assay and hall-marking; but this part of the proposals was not complied with, and the English system of hall-marking continued unaltered except as regards wares of the descriptions specified in section 4 of the Statute 47 and 48 Vict., Chapter 62. Her Majesty's Government, however, in 1890 proposed to provide in a Bill to be introduced in Parliament that Indian silverware, bearing an Indian hall-mark affixed under the authority of the Government of India, should be admitted into the United Kingdom without being subjected to the British hall-mark regulations, and an expression of the views of the Government of India on the subject was asked for in the despatch to which we are now replying. It was suggested in that despatch that if a system of Indian hall-marking should be adopted, it might be made voluntary and not compulsory, and we were asked what standard of fineness should, with due regard to the practice of Indian silversmiths, be adopted for the Indian silver hall-mark.

3. In a telegram dated the 5th July, 1890, we said that any system of hall-marking would be unsuitable to the conditions of Indian silver trade, and that we could not recommend any standard of fineness until after consultation with the local Governments and the trade generally. We at the same time suggested that, if the English system were retained, there seemed to be no reason why Indian wares should not be imported without being required to be hall-marked.

4. We were subsequently informed in Lord Cross's despatch No. 99 (Statistics), dated the 6th November 1890, that the introduction of the Bill into Parliament would be deferred until we should report on the standard or standards of fineness proposed for adoption for Indian silverware.

5. We referred the question, in a Resolution, No. 5261, dated the 5th November, 1890, for the opinions of the local Governments and Administrations, of the Mint and Assay Masters, and of the mercantile and trading community. Their opinions have now, with one exception, been received. The exception is the Madras Trades Association. As the firm of P. Orr and Sons, of Madras, make silverware for exportation and had interested themselves in the movement for the repeal of the English duties and the system of compulsory assay, we considered it desirable to hear what they and the Trades Association of Madras had to say; but as they have sent no answer to the communications addressed to them, we infer that they do not wish to make any representations in the matter. We do not propose to address them again, and having in view the recent debate on the subject in the House of Lords, we think it expedient to place Your Lordship in possession of the opinions we have received. We accordingly enclose copy of the Resolution of 5th November, 1890, and of the replies thereto.

6. These replies point to the conclusion that an Indian hall-mark such as would be accepted as sufficient by Her Majesty's Government, or such as we could institute without inordinate cost, is not wanted by the trade. So far as a system of hall-marking is wanted at all—and it appears to us that on the whole the great majority of the trade do not desire such a system—the conditions required are that assay should be voluntary, that it should be by the touchstone, that numerous centres of assay should be established, and that very low fees (which would not pay the cost involved) should be imposed.

7. In our Resolution of the 5th November, 1890, we expressed the opinion that the assay by touch might be adopted in India if a hall-marking system were introduced, but it appears that the data on which we based that opinion were not sufficiently accurate. In view of the facts stated by the Assay Master, Calcutta, in his letter of the 12th December, 1890, No. 78, it seems to us that that process cannot be adopted. Our Assay Offices would reasonably decline to be responsible for such a test, and the trade in England would no doubt oppose the importation of goods so tested. If that process is rejected, no other process could be adopted in India without inflicting injury on traders who are not located in either Calcutta or Bombay where the existing Assay Offices are, or without imposing a prohibitive expenditure in the establishment of Assay Offices elsewhere.

8. It is also clear that we should not be able to confine the standard to either the English standard of 925 or the rupee standard of 916·6, and that it would be necessary for us to have standards ranging from 900 upwards. But we have some reason to believe that the trade in England would oppose the admission of Indian silverware below the English standard of fineness.

9. On full consideration of the question, we have come to the conclusion that it would not be expedient to impose any restrictions on the Indian trade, such as would accompany the institution of hall-marking, whether voluntary or compulsory, and that, if Her Majesty's Government still adhere to the decision to maintain the English system of compulsory assay and hall-marking, it would be better that matters should remain in their present condition. That condition may be thus stated—

- (1) The trade in silverware in India is as entirely free and unrestricted between buyer and seller as is trade in any other commodity.
- (2) Indian silverware may be imported into England free of duty.
- (3) Certain articles which, when made in England, are exempt by law from compulsory assay, are also exempt when imported from India.
- (4) Articles which may properly be described as hand-chased, inlaid, bronzed, or filigree work of Oriental design are also specially exempt from compulsory assay.

10. All Indian silverware is thus exempt from duty, and a material proportion of the wares exported is also exempt from compulsory assay. Much as we desire that the remainder should also be exempt from assay, we are not prepared to introduce in India any system of hall-marking which would be accepted as satisfactory by Her Majesty's Government, for we are satisfied that any such system, while it would be contrary to our whole fiscal and commercial policy, would be more likely to injure than to benefit the trade as a whole. The system of compulsory assay, as it exists in England, was introduced at a time when Governments interfered with and restricted the operations of trade in every direction, and is, in our opinion, unsuited to the circumstances of the present time. We trust that Her Majesty's Government will, on consideration, come to the conclusion that it should be abolished, and that transactions between vendors and buyers of wares of silver and gold should be no more the subject of State intervention than transactions in wares of the other metals or any other commodity.

No. 164 (Revenue), dated 21st December, 1893.

From—The Secretary of State for India;

To—The Government of India.

I have considered the papers received with your Excellency's Financial letter No. 362, dated the 8th November, 1893, on the subject of establishing a system of hall-marking gold and silver plate in India.

2. I accept your view that hall-marking is not required in India by traders and workmen who supply local markets; that a satisfactory system of hall-marking in India could not be based upon assays by touch; that a sufficient system of hall-marking could not be established in India save at a heavy cost, which would not be covered by fees; and you add that much of the silver-ware sent from India to England is already exempted from the hall-marking rules, on the ground of its being of artistic and oriental design.

3. I observe that though the value of Indian exports of plate has increased since the British silver duties were abolished, still the value of the trade is small, having averaged only Rx. 10,795 a year during the period 1890—93, against Rx. 7,969 during the period 1883—86.

4. In all the circumstances, I agree that it is not expedient to establish a system of hall-marking for silverware manufactured in India. From the report of a discussion that took place in the House of Lords on the 7th August, 1893, you will have seen that other authorities agree with your Government in the opinion that compulsory hall-marking does more harm than good, and in the hope that the system will eventually be abolished in the United Kingdom.

No. 1735, dated 27th November, 1890.

I.] From—LIEUT.-COLONEL A. W. BAIRD, R.E., F. R. S., etc., Master of the Mint, Calcutta,
To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

In accordance with the orders conveyed in Government Resolution No. 5261 of 5th November, 1890, regarding the proposed hall-marking in this country of Indian silverware or goldware, so that it might be admitted into the United Kingdom for sale without being subject to the British hall-mark Regulations, I have the honour to report as follows:—

The first point for consideration is whether "the assaying and hall-marking should be compulsory or optional for India": I am of opinion it should be entirely optional for articles purchased in India. If some simple system of voluntary hall-marking was introduced, then it would be possible for any purchaser in India by paying a small amount extra for an article to have a guarantee of the fineness of the article, and this would meet all the requirements of the trade as far as selling in India was concerned. But it is understood that Her Majesty's Government have decided that no Indian plate will be allowed into England for sale unless hall-marked: thus the question in this case is practically decided and hall-marking is compulsory; however, such articles as chains, necklets, lockets, brooches, earrings, studs, filigree work, etc., which are exempted from *compulsory* hall-marking in England (but may be hall-marked if the purchaser wishes it and if the pattern will permit of it being done) ought to be allowed into England for sale without the Indian hall-mark. I understand the most recent statute concerning exemptions is the 7 and 8 Vict., chap. 22, sec. 11

2. The next point laid down for consideration is, what standard or standards should be fixed? I am of opinion that there should be no standard for hall-marking, except in so far that no Indian hall-mark should be punched on any article in gold which was below 377 per mille fine, or in silver which was below 800 per mille fine.

In the United Kingdom at present gold is marked as—

22 Carat which is equal to 916·6 per mille fine—the Indian standard for coinage.

20 Carat or 834 per mille fine (only used in Ireland).

18 Carat or about 750 per mille fine.

15 " " 625 "

12 " " 500 "

9 " " 375 "

Silver is marked in England with the old standard mark if it is 11 oz. 2 dwts. per lb fine or about 925 per mille.

New standard mark if it is 11 oz. 10 dwts. per lb or 959 per mille fine.

As regards the marking of 15, 12, and 9 carat gold, it is stamped 15·625, 12·500 and 9·375 respectively, to afford a guarantee of its true quality, the figures after the decimal point being the proportion per mille fine.

By lowering the touch for silverware, which would be eligible for hall-marking, to 800 per mille, the silversmiths would have freedom to alloy the metal down to that touch in any manner which practical experience might teach them was best suited to the various articles they produced. I understand that in the opinion of the English goldsmiths and jewellers, one of the greatest evils of the present system of hall-marking is that, if the goods are below the fineness required by the standards, they are returned defaced or broken up, and only fit for the melting pot. If silver were tendered in India for hall-marking and found to be below 80 per cent. fine, it should be returned unmarked, after the minimum fee had been paid as a withdrawal fee, but it should not be defaced or spoilt in any way. Gold under 37½ per cent. fine might be similarly treated. The Indian hall-mark should always be accompanied by figures representing the percentage of fineness.

3. The next point is "where should Assay Offices be located"? This seems to me to depend on the method which is to be adopted for testing before hall-marking, and also on the amount of work which is likely to be sent for marking. If the method of assay by touch-stone and needles is decided on, then the Assay Departments at the two Mints would be sufficient, because nearly all articles could be assayed in their finished state; of course, this does not apply to the small articles which are now exempted from hall-marking.

For up-country parcels sent for assay and despatch to England after being hall-marked either in Bombay or Calcutta, the postal authorities could doubtless arrange some plan by which the mofussil jeweller would not have to pay more for postage and insurance than he would have had to pay for the article if sent direct from the place of manufacture to England.

If, however, the "test" is to take the form of a more rigorous assay than that obtained by comparing the colour and streak made upon a piece of hard black stone, such as basalt, with the small bars or needles consisting of gold and silver alloyed with various definite proportions of copper, then it would seem necessary to establish up-country offices, because the plate would have to be tested and hall-marked in its unfinished state. One hall-marking inspector might test the work and stamp it at three or four towns in the circle of which he had charge, by visiting the various towns for a day several times during the month. The Assay Offices at the Mints in that case would probably have little to do with any hall-marking (except in testing the samples or musters sent by the inspectors). I am told the European jewellers at the presidency towns would rarely, if ever, ask for their goods to be hall-marked.

If mofussil offices are opened, then the scrapings or particles taken off for assay might be removed in the presence of the Collector or Assistant Collector, and half of the sample in each case could be kept by him in safe custody, while the inspector took the other half for assay. Batches of these samples, along with a list showing the assay values and hall-mark of fineness assigned by the inspector, should be sent to the Bombay or Calcutta Mint periodically, so that the inspector's work might be properly checked.

In the United Kingdom there are nine Assay offices. The London and Chester offices are opened every weekday for one hour in the morning for the reception of work to be hall marked; at Birmingham the office is open for five days in the week, while the Edinburgh office is open on three days per week. At Exeter New Castle, Sheffield and Glasgow the office opens only on two days in the week. I am not aware on what days the Dublin office opens.

Thus an inspector at Delhi to work Lucknow and Allahabad and Agra also would place each of those towns on much the same footing as Exeter, New Castle, Sheffield, or Glasgow. Similarly an inspector at Cutch Bhooj could work Ahmadabad, Baroda and Surat in the Bombay Presidency, while an inspector at Madras could also work Trichinopoly, Tanjore, and Madura, but he could hardly visit Coconada, Vizagapatam, or Cochin. As far as I am aware, the bulk of the work in silver done in the Madras towns is filigree work, which would require no hall-marking. But if these Assay offices are to be self-supporting I doubt very much if the amount of work which would be tendered would pay for the necessary establishment at any one of these centres. The information obtained from the civil authorities at the various places will determine this point.

4. As regards the method of assay, the reports of the Assay Masters will of course give Government the best information, and I feel diffident in offering any opinion on the subject.

If the "touchstone and needles" system can be worked, so as to determine the assay value within even 3 per cent. of the real value, I consider it ought to be adopted, and the figures representing the "fineness" or "quality" which are stamped on the article should be the *lowest estimate* of the test value; for instance, if the inspector was undecided between silver of 85 and 88 per cent. pure, 85 would be the figures punched alongside the Indian hall-mark. But as inferior silver articles might be heavily plated and sent for hall-marking, it would be necessary to make the rubbing sufficiently deep to go through any plating, and possibly this would injure the articles too much. The Assay Master will doubtless inform Government on this point.

Regarding the system of assay which should be adopted, I give the following quotation from a book entitled, "The hall-marking of Jewellery practically considered," by George E. Gee, Goldsmith and Silversmith, and published in London in 1882:—

The hall-mark on a watch case is a guarantee of the standard quality to a certain degree, but is not an absolute one. There is so much solder run in under the rims of some of them, and other inferior metal employed in connecting them together, that watch cases actually put into the melting pot and melted down do not assay at more than from 3s. 10d. to 4s. per ounce, being equivalent to from 10 dwts.* 12 grs. to 17 dwts. of fine silver per ounce, instead of 18 dwts.† 12 grains, which is the hall-marking standard. Anyone who has had anything to do with the melting and assaying of old watch cases for re-manufacture can bear out the observations.

* Equal to 825 per mille fine.
† 925 per mille fine.

Referring to the close imitations of our hall-marks put on American goods, the articles being composed of base metal cased with gold, Mr. Gee says:—

Besides these drawbacks, which cannot but be injurious to our trade, there is another exception which we take to the system of hall-marking in this country, and that is the manner of testing as well as the way in which the marking is done, and which gives rise to much annoyance to manufacturers. The system now in vogue of scraping and cutting the work is very unsatisfactory, practically speaking, inasmuch as it not only necessitates part of it being done over again, but to some extent destroys the true form and symmetry of the parts which are left, more especially when more than one assay has to be effected in ascertaining the correct fineness of the material under trial. In the case of a locket, the various parts are all required to be tested and marked; and to do this, it is necessary to cut out a portion of the material of one part to supply the substance to work upon: the other pieces may be scraped to provide the other portion, and the part that have been scraped may be finished when the stamps have been struck upon them, but that which has been cut is rendered perfectly useless and a new part has to be made in its place before the locket can be finished ready for sale. This causes no little annoyance, not only to the master, but also to the workman who originally made the article. Besides, what proof have the public that these additions to hall-marked wares so cut and defaced are of the same fineness as the originally prepared parts which were destroyed in the process of hall-marking.

* * * * *

They manage these things better in France. There the work is not as a general rule tested by fire after the manner of our assays, but by the acid test, and it has always given satisfaction. No cutting or scraping is required by such a method—merely a few bottles of acid, the touchstone, and a set of test needles are all that their system requires. Moreover, the work is not tested in the unfinished state like ours, but in the last stage of manufacture, and it may even be done on the way to the purchasers by calling at the Control office for that purpose. The process is so simple and the means so accessible, that it presents very little difficulty, and is not much different from ordinary business experience.

* * * * *

The laws relating to fraud and any infringement of the regulations are, however, much more severe than our own, being nothing less we believe than ten years' imprisonment for the slightest offence connected with fraudulent hall-marking.

5. Regarding the fees to be charged, as they would only be provisional until it was seen how the scale operated, I would suggest a charge of one anna per tola of silver or per article, with a minimum charge of ₹1 per batch of silver operated on. For gold I would double these rates, but hold to the same minimum fee.

6. As regards the distinguishing marks, I would propose the palm tree as the Indian hall-mark for silver, and the Imperial crown and palm tree for gold. At the base of the tree-mark, I think the date year in figures should be punched.

The fineness marked in figures representing the percentage pure might be placed before the palm tree if the metal were above the fineness of the Indian standard for coinage (i.e., for the figures above 91), and after the palm tree if the metal were of lower touch; or it might be considered better to have only one mark for gold and one mark for silver; for instance, a cobra with the year date punched between its coils, might be the Indian hall-mark for gold, and the palm tree might be that for silver. Each manufacturer might have a

"maker's mark" such as  which might mean a firm of silversmiths A. B. at

Delhi. Punches for these marks could be supplied by the Mint at a small cost, and the makers' names and addresses registered. I send herewith six brass-plates with the marks such as I would propose stamped on them.

Plate I has the imperial crown, the figures 95, the palm tree with 1890

below it, and the mark  This would mean Indian hall-marked

gold 95 per cent. pure, stamped in 1890, and made at Delhi by the firm A. B.

Plate II has the figures 50 after the palm tree instead of the 95 before it otherwise it is same as Plate I, and this would mean that the gold was only half pure.

Plate III is the same as Plate I, but without the imperial crown, and would mean Indian hall-marked silver of 95 touch.

Plate IV has the palm tree and date below, then the figures 80, followed by the maker's mark; and in this case it would represent Indian hall-marked silver of 80 touch manufactured at Delhi by A.B., and stamped in 1890.

Plate V is an alternative plate to No. I and represents a cobra* with 1890 stamped between its coils; the figures 95 precede the cobra, and the maker's mark follows. That would mean gold of 95 per cent. purity.

* The punch for the snake has been cut too large, but the mark shows what is meant.

Plate VI is similar to Plate V, but has the figures 50 between the cobra and the maker's mark, and means gold of 50 per cent. purity, or what is now known as 12 carat gold.

No. 95 C., dated 30th November, 1890.

2.] From—COLONEL G. H. TREVOR, Agent to the Govr.-Genl., Rajputana, and Chief Commr., Ajmere-Merwara.

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

With reference to Finance and Commerce Department Resolution No. 5261, dated the 5th instant, asking for an expression of opinion on the proposed establishment of a system of hall-marking in India, I have the honour to state that there are no representative native manufacturers in Rajputana whose opinions are likely to assist the discussion of the questions raised in the Resolution, and hence I do not think I can contribute any useful remarks on the points referred to in it. It may be said generally that the opinion of manufacturers in other parts of India which have established a reputation for silverware would be a useful guide for the limited trade of silver workers in Bikanir and Jeypore, and that there are no other towns in Rajputana which can boast of any such trade.

No. 1345, dated 9th December, 1890.

3.] From—LIEUT.-COLONEL R. V. RIDDELL, R.E., Mint Master, Bombay,
To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

The Government of India in Financial Resolution No. 5261, dated 5th November 1890, having asked for my opinion on the question therein discussed, both generally and on certain specific points, I have the honour to submit the following remarks.

2. Although the question of hall-marking or its equivalent generally applies to articles manufactured in gold as well as in silver, and in both cases to articles intended for sale in the country, as well as to articles made for export to other countries, I gather from the tenor of the above-quoted resolution, as well as from previous correspondence on the same subject, that this enquiry has reference only to silverware manufactured in India for export to Europe.

3. I believe that it would not be practically possible to establish a sufficient number of trustworthy assayers at places in various parts of the country where silverware is made, or even at the chief centres of the manufacture of these articles, for the assayers must be Europeans above suspicion of being open to bribery, otherwise no body acquainted with the customs of the country would trust the assay mark. This may seem a somewhat broadcast insinuation against the honesty of the native assayers; but a reference to the petition, dated 28th October 1885, from some native merchants in Bombay, published in Financial Resolution No. 254 of the Bombay Government, dated 1st February, 1886, in which from twenty to twenty-five persons are charged with stamping ornaments with a higher value than their real value, will show what sort of trust might be expected to be placed in native assayers. If, then, my view of this part of the subject is correct, assay establishments would necessarily have to be limited to a few of the principal centres of export, which should be suggested by the mercantile community.

4. A compulsory assay of silverwares made for export I believe to be quite out of the question, and an optional assay, if of a trustworthy nature, would presumably be to the advantage of the exporting merchants. Should they not, therefore, be required to show what prospect there would be of the cost of whatever assaying offices may be established being recouped by Government, or how many assays may reasonably be expected to be required monthly at each of the places where assay establishments are proposed?

5. I believe that the exporting merchant can get his silverware made of any fineness he likes. The arts of silver refining and approximate silver assaying are believed to be very well known at all the principal centres of the trade; and although it is generally supposed that native silver workers use rupee silver for their wares, Mint experience, based on a great many meltings of silver ornaments, show that they generally mix more or less of base metal with their silver. On the other hand—sometimes, though rarely,—the ornaments brought to the Mint to be melted are considerably higher in fineness than standard silver.

6. A very material item to be considered is the quantity or value of silver articles exported, exclusive of those referred to in paragraph 12 of the Resolution.

I have ascertained from the Chamber of Commerce here that the total value of Indian-made gold and silver plate exported from Bombay to foreign countries in each of the last five official years was as follows :—

	R										
1885-86	1,02,068
1886-87	20,101
1887-88	31,639
1888-89	61,162
1889-90	73,246

It would be interesting to know how much of this was gold, but the Chamber's statistics cannot give the information. Neither do they state how much of the above exports would come under the head of articles referred to in paragraph 12 of the Resolution; but it may be surmised that after deducting these two items, the balance of exports of silverware sent from this port, which would have remained for optional assay, would have been small, and perhaps smaller still from other ports, and perhaps so insignificant on the whole as to render legislation unnecessary. In any case, I should think it the business of the traders to establish proof of the necessity in some more convincing manner than they have yet adopted.

7. With the exceptions of questions 1 and 4 set forth in paragraph 5 of the Resolution, the answers to the other questions seem to me to depend so much on the information expected to be furnished by the mercantile and trading community that I would ask leave to defer making any suggestions regarding the point referred to in question 6 until questions 2 and 3 shall have been satisfactorily answered.

No. 78, dated 12th December, 1890.

4.]

From—SURGEON-MAJOR J. SCULLY, Assay Master, Calcutta,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

In compliance with the order appended to Resolution of the Government of India in the Finance and Commerce Department, No. 5261, dated the 5th November 1890, I have the honour to submit the following report on (i) the general question of assaying and stamping Indian silver ware intended for exportation, and especially on (ii) the standard or standards of fineness which should be adopted, (iii) the fees which should be charged, and (iv) the distinguishing marks which should be applied to wares assayed.

2. (i) *The General Question.*—In my opinion the whole system of hall-marking gold and silver wares is radically wrong, and it should not be introduced into this country in any shape whatever. The practice, as is well-known, originated in England in barbarous times, and had for its real object quite other purposes than the protection of purchasers of plate. At the present time there are obvious reasons why every enlightened Government should refrain from any such interference between seller and buyer as is involved in hall-marking. The cases of adulteration of food, testing of gun barrels, etc., sometimes cited in support of the opposite view, are quite foreign to the argument. The State does not intervene to protect the public against cheating in the purchase of precious stones, and yet the sums spent on these articles vastly exceed what is paid for hall-marked plate. The rational solution of the question under notice appears to be that the makers of gold and silver wares should themselves stamp figures denoting the fineness, and their name or registered mark, on the articles they offer for sale. The purchasers would then, as in all other like transactions, have to bear in mind the legal maxim "*Caveat emptor*," and if they suspected fraud, the nearest Assay office and police court would furnish them with information and remedy. No legislation of any kind is needed for the solution above indicated.

3. Compulsory hall-marking for India has been decisively rejected by Government, so nothing further need be said in condemnation of such a measure, but I desire to set forth some of the objections which may be fairly urged against optional hall-marking in this country—

- (a) In the Resolution it is justly stated that even the voluntary system must necessarily be restrictive and operate unequally. If optional hall-marking be introduced, there is a risk of the system becoming so general as to become in time compulsory in effect, though not declared so by law. It is clear, to begin with, that optional hall-marking cannot be restricted to articles intended for exportation, unless the sale here of articles so marked is made penal—a measure not to be thought of. Consequently, articles voluntarily marked will be exposed for sale in this country, at first probably in the presidency towns. Now there is a large section of our public which attaches a great—almost superstitious—importance to a Government mark or stamp. For this cherished sign of a guarantee on the part of the State it will pay a heavy percentage, and a general demand will spring up for articles of silverware so distinguished. The silversmiths will find it to their advantage, as in England, to get as many of their wares as possible stamped, and in the end nearly the full measure of evil that would be wrought by compulsory marking will be established by the permissive system.
- (b) There is a well-known tendency on the part of natives of this country to hoard the precious metals in the shape of domestic utensils, ornaments, etc., which have no artistic merit whatever. An optional hall-mark would presumably serve as a stimulus to this deplorable tendency, and this is, I conceive, a cogent reason against the measure. There is already sufficient scope for the hoarding propensity in the popular habit of burying rupees in the ground.
- (c) If a permissive hall-mark be introduced, it is certain that it will soon be extensively counterfeited or otherwise unlawfully dealt with in the ways known in England as substitution, addition, and so forth. The mark must be protected by pains and penalties, or its introduction will be nearly useless. It will be difficult to protect the mark from imitation in Native States; but in British territory one result of the measure under discussion will be an addition to the work of our criminal courts in investigating such cases, and of the Assay offices in proving the offences. In the preceding remarks it has been suggested that permissive hall-marking, if introduced, may prove agreeable to silversmiths, and to a large section of the Indian public; it is unnecessary, I think, to show that the Government of India need not therefore sanction any such measure.

4. If permissive hall-marking were to be introduced into this country, what process for assay should be adopted? Unquestionably, in my opinion, the articles to be tested must be submitted to the Assay office in an unfinished state in order that samples may be taken from them by scraping, and the samples so obtained must be regularly assayed by the operation

adopted in the case of bullion tendered for coinage. This view is based on the following considerations :—

(a) The plan above mentioned is the only test that can be relied upon to yield accurate results. It is the one adopted in England, and certainly the guarantee or stamp of the Government of India should not be given for any less trustworthy process. The object of introducing optional hall-marking is to get Indian silverware admitted into the English market. There is no reason to suppose that English silversmiths will agree to any test in India that is not as rigorous as the one to which they submit their wares at home. The general public has also to be considered. Any explanation now offered by the Government that only a rough sort of test is to be applied to silverwares before stamping will be unnoticed or quickly forgotten. Purchasers of stamped Indian wares will have a right to expect that the Government stamp has been based on a thoroughly accurate process of assay.

(b) In the resolution it is stated that the test by the touchstone is sufficiently good for practical purposes, and that it is believed to vary in its results only about one per cent. one way or the other. I regret that I am quite unable to confirm either of these views. In some at least of the European countries where the touchstone is used in exceptional cases for testing the fineness of gold and silver wares, the assayers are careful to say that the method is "extremely untrustworthy." All assayers know that testing by the touchstone is extremely untrustworthy; but instead of merely making a general statement of that kind in a matter where I may be naturally supposed to be biased, I venture to submit to Government a practical test of the results yielded by the touchstone specially made within the last few days for the purpose of this report. A touchstone does not form part of the equipment of this office, and no European official here has the smallest skill in testing the precious metal that way. There is, however, a native subordinate on the establishment who, having been a jeweller before he was entertained as junior weighman, is acquainted with the use of a touchstone; his results will be given presently as representing the best that can be done here at the present time in the way of assaying by touch. Although the touchstone is not used in this office, no difficulty has been found in getting persons experienced in its use to favour me with a specimen of their skill in testing. The process is extensively employed by native bullion dealers and jewellers, and recourse was had to several experts of this class reputed to be the most skilled of any in Calcutta in the application of the test. Curiously enough these same experts are constantly in the habit of bringing samples of bullion to this office for private assay. A series of eleven silver alloys of different fineness, and one of a whitish alloy of base metal not containing any silver, though plated superficially with that metal, was made up in the office and submitted to eleven testers. When the results of the different observers had been recorded, the pieces tested by them (numbered 1 to 12 in the following table) were assayed. The assays were made as usual to one-tenthousandth part, but it has been deemed superfluous to insert more than the bare percentage in the table. Instead of giving the percentage of silver reported by the testers, it has been considered simpler merely to enter the errors per cent. of their results.

Table showing Results of Touchstone Tests of Silver Alloys.

No. of Alloy.	Silver per cent. ascertained by assay.	ERRORS PER CENT. OF DIFFERENT TESTERS USING THE TOUCHSTONE.											
		A.	B.	C.	D.	E.	F.	G.	H.	I.	J.	K.	L.
1	62	—6	—6	—6	—12	—12	+13	+19	+13	+19	Low touch, but cannot assign the exact quality of the alloy.	+6	—19
2	66	—23	—4	+2	+2	—7	+15	+18	+9	+19		—23	—23
3	71	—21	—9	—9	—21	—6	+16	+13	+4	+14		—21	—21
4	78	3	+3	+3	+6	0	+12	+12	+3	+11		—9	—3
5	76	—14	—9	—8	—8	—6	+11	+11	—1	+11		—1	—20
6	83	—15	+4	+4	+4	+4	+4	+10	+7	+4		—2	—8
7	83	—46	—5	+4	+1	—5	+4	+7	—2	+4		—8	—12
8	92	—24	—14	—17	—2	—8	+1	0	—2	—2		—5	+1
9	90	—15	—3	—5	—6	—6	+5	+3	0	0		—17	+3
10	91	—31	—2	—10	—2	—7	+2	+2	—1	—2		—15	—3
11	93	—18	—3	—6	—6	—8	—3	—3	—3	—3		—11	+2
12	Nil	+50	+37	+34	+31	+34	+78	+75	+75	+75	+2	+3	
Average error		22%	8%	8%	8%	8%	13%	14%	10%	13%	Not tested.	+43	+43
		22%	8%	8%	8%	8%	13%	14%	10%	13%	11%	9%	13%

In the above table the first line shows that alloy No. 1 was found on assay to contain 62 per cent. of silver, and that testers A, B and C each

reported it to contain 56 per cent. of silver only, thus undervaluing it by 6 per cent.; tester D reported it to contain 50 per cent.; and so on. Tester A is the native subordinate in this office already mentioned; B, C, D and E are native bullion dealers; F, G, H, and I are the results of four different testers kindly furnished by a European silversmith; J is a European expert; K and L are given by one man, a professional touchstone tester, who considers that the results tabulated in column L would be found more accurate than his first attempt exhibited in column K. It seems almost superfluous to make any comments on the gross errors disclosed in this table, but attention may be called to a few points. In five instances the touchstone report is correct, and the error per cent. is marked O. I regard this accordance as merely accidental for the following reason:—Alloy No. 11 is correctly reported in column K, but an hour afterwards the same tester reports it 3 per cent. higher, and he considers the last result is the more accurate of the two. In the other four cases where the report by touch is correct, no re-trial was asked for, but twelve re-trials of different alloys were obtained. Only in two cases (or 16 per cent.) did the testers repeat their first report, the discrepancies in the remaining cases being 2, 6, 8, 9, 13 and 28 per cent. Alloy No. 10 is standard silver, by assay 917·6 per mille, and might therefore be supposed to be thoroughly familiar to the touchstone testers. Not one of the eleven persons who tried it has recognised the alloy. The smallest error in this case is 1 per cent., and the other errors are 2, 4, 7, 10, 11 and 31 per cent. The most serious matter of all, however, is that all the ten testers to whom alloy No. 12 was submitted have reported it to be a silver alloy; it is variously stated to contain from a minimum of 31 per cent. to a maximum of 78 per cent. of silver. The alloy in question is merely base metal plated, and does not contain even one per cent. of silver.

- (c) If testing by the touchstone be introduced, it is evidently intended that the Assay Departments should apply the test. The method is grossly inaccurate, and the reputation of the Department will certainly suffer if it has to employ the touchstone for ascertaining the fineness of silver wares. The trade in England will keenly watch India silverwares exposed for sale, and will have samples of them assayed with the certain result of exposing our errors; and publication of the assays made on Indian silverwares at home will follow of course. Now the reputation of this Department for accuracy is a matter of serious importance to the Government of India.

* Resolution No. 5576 Finance and Commerce Department, dated 21st October, 1887.

I need only recall the fact that a short time ago the Government * accepted the view that the mere publication of the results of Pyx trials on the coinage might lead to a questioning by the public of the weight and fineness of the silver coinage of this country. It is difficult to imagine a more effective method for crying down the credit of the Assay Department than to order it to assay by the touchstone; for, if our results are bad for stamped silverware—and very bad they certainly will be if we must trust to the touchstone alone—the obvious inference will be that our results for the bullion tendered for coinage and for the coinage itself must be equally untrustworthy. It is true that the inference would not be justified, but the mischief would be done all the same. I feel satisfied that this view has only to be placed before the Government of India to gain its assent to the following proposition.

If assay of silverwares by the touchstone is to be introduced, the Assay Department must have nothing whatever to do with applying the test.

5. (ii) *The Standard or Standards of Fineness which should be adopted.*—On this point it would seem advisable to give effect as far as possible to the views of the silver-smiths. They know best the particular alloys that suit their different styles of work; and if they prefer several standards, no sufficient grounds can be shown for restricting them to one arbitrary standard. The most reasonable plan would be not to fix any standard at all, but simply to stamp on the ware the fineness, ascertained by assay, of the metal of which it is composed. If one standard is decided upon, and account is to be taken of the fact that silverwares in this country are often made from rupees melted down, then that standard might be fixed at 900 per mille to cover deterioration resulting from solder.

6. (iii) *The Fees which should be charged.*—An assay of gold is more complicated and costly than an assay of silver, so that a higher rate must be charged for the former metal. It is clear that the fee for assaying cannot be made to vary according to the size or weight of the article to be tested, any differential scale would savour unpleasantly of duty imposed by Government, and moreover the cost of the assay operation to Government will be precisely the same, whether the ware be large or small. The only exception would be in the case of a number of small articles of one shape stated by the manufacturer to have been made from a single piece of metal. Here the assays would be made on a few of the articles,

selected as a sample by the assayer, and only one fee would be charged for assaying. There is already a scale of fees laid down by Government for the assay of gold and silver for private individuals, *vis.*, four rupees for gold and two rupees for silver, with an additional fee of eight annas in each case for registration and certificate. The fees for assaying and stamping should be according to the scale now in force, that is, ₹4-8 for gold and ₹2-8 for silver. It would evidently not be fair to charge more for the assay of a piece of unwrought gold or silver than for fashioned wares of those of metals which might be greater intrinsic value, and from the sale of which the owner would certainly derive greater profit. On the other hand, there are good reasons, on public grounds, why the scale of fees now sanctioned by Government for ordinary assays should rather be increased than diminished. The scale of fees here suggested is, of course, for a regular and accurate assay, and not for guesses dependent on the employment of a touchstone. It is difficult to say what fee should be charged for a test by means of the touchstone. The operation is one of extreme simplicity, and if appraised merely according to the value of the result, perhaps one anna would be a sufficient fee to charge for it. Untrustworthy as the test is, however, it would have to be made by a European official skilled in touchstone work and sufficiently well remunerated to be above suspicion; and as has already been indicated, no such agency is available here.

7. (iv) *The Distinguishing Marks which should be applied to Wares assayed.*—On every article assayed it will be necessary to have the following marks stamped by means of steel punches:—

- (1) The maker's mark or initials.
- (2) A variable letter denoting the year of assay and stamping.
- (3) The mark of the particular Assay office in which the ware has been assayed and stamped. For Calcutta this might be the letter C surmounted by an Imperial Crown
- (4) Three figures (*e.g.*, 916) denoting the fineness per mille. If only one standard were adopted for India, this mark would not be required.

A brief description and the weight of every article assayed and stamped would be registered in the Assay office. The maker's mark and the variable letter would afford important and necessary information in furtherance of prosecutions for fraudulent marking.

5.]

No. 142, dated 5th December 1890.

From—MAJOR GERALD MARTINS, F.R.G.S., F.C.S., Assay Master, Bombay,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

I attach this summary to the accompanying opinion I have expressed on the subject of the Government of India's Resolution with regard to hall-marking, as, owing to my experience in this office, and the views I hold, my letter has grown to greater length than I at first intended, and deals with many details that perhaps you may not at first require to consider. My reasons for statements made in this summary will be found if required in the letter.

Thus briefly—

On the Question generally.—It is no use to introduce a system of marking for export only; it must also be for the local market. Any system that is introduced must deal with both gold and silver. It must be generous—almost unlimited—in the matter of standards: any restrictions in this respect will, if heeded, hamper the manufacturer and ruin the artistic nature of the work; more freedom in this respect is required in England. I am sceptical as to many statements that have been made, such as the demand for Indian silver jewellery in England, and the character of the native artificer's work, the standards, methods of assay necessary, etc.

If a system is introduced to deal with articles for export only, it is hopeless to expect it to pay Government. If a system on a broad basis is introduced, both for the local market as well as export, then much of the expense of the introduction for some time to come will fall on Government.

Next, assuming a system of marking is to be introduced—

Question I.—Should the assay be compulsory or optional?

Opinion.—Voluntary.

Question II.—What standard or standards of fineness should be adopted?

Opinion.—The decimal system, 1,000 representing pure gold or silver, should be used. I give two views as to the standards necessary:—

- (a) Is the one I personally advocate, *vis.*, the standards to be marked at every ten, 990, 980, etc., down to a minimum of 300 for gold and 900 for silver, with one other mark 916, it being the standard of the coinage of India and the gold coinage of England. The remedy in case of gold to be 2 per mille and in the case of silver 4 per mille.
- (b) In case Government does not feel inclined to give so free a field, then I submit that the following are the least number of standards Government can have,

as they are those in use in India and the legal standards in England; but if these legal standards are recognized, then the remedy must be the legal remedy :—

Gold.	Silver.
970	958·3
916·6	940
833·3	925
750	916·6
625	
500	
375	

To my mind (a) is the better procedure.

Question III.—Where should Assay offices be located?

Opinion.—The person responsible for the assay must be the person responsible for stamping; articles must be brought or sent direct to him only and pass through his hands. The Assay office establishment here, as at present constituted, could not deal with it: it would have to be enlarged, but a separate office altogether would be better.

Offices at other centres would be absolutely necessary, but it would be better only to commence with Calcutta, Bombay, Madras, and Delhi; they can be extended afterwards if required.

At first starting there may be difficulty in getting work sent in the rough, but if the system is to become general, this difficulty will to a great extent disappear.

All officers must be under a competent European, who must be uninterested in the result of the tests, and above suspicion, so that perfect confidence may be established.

Question IV.—What processes of assay should be adopted?

Opinion.—Cupellation for gold; the chloride method for silver. I have dealt with this question at some length. No certificate should be given and no standard stamped on touchstone tests only, though the stone might be introduced here and there in certain cases as an auxiliary check to test the homogeneous nature of the article.

Question V.—What fees should be charged?

Opinion.—This is a point with which I have great difficulty in dealing, and, though I give suggestions as to a scale of fees for gold and silver assaying and stamping, which might perhaps be tried, I have no great faith in them, and experience might show it necessary to alter them.

Question VI.—What distinguishing marks should be applied?

Opinion.—It is impossible to do with less than the following—

The maker's mark.
The date mark.
The place of assay.
The fineness.
The Government mark.

I have given much thought to this matter, with a view to having fewer marks, but there are so many objections to their reduction that I have come to the conclusion they must stand.

Besides these, there should be a separate symbol to be placed on such delicate parts of any article as have been checked by the stone.

The fineness of punches must be made to take all the standards I have mentioned.

6.]

No. 142A., dated 5th December 1890.

From—MAJOR GERALD MARTINS, F.R.G.S., F.C.S., Assay Master, Bombay,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

In compliance with the last paragraph of Resolution No. 5261 of the Government of India, Finance and Commerce Department, dated Simla, 5th November 1890, I have the honour to give my opinion, as requested, on the subject of marking jewellery and plate, etc., in India.

I understand that this opinion is to be "on the question generally, and especially on the second, fifth and sixth points in the Resolution."

Assuming that an Indian assay should be introduced, what sort of a system should be devised, and the six points referred for consideration are as follows :—

- I.—Should the assay be compulsory or optional?
- II.—What standard or standards of fineness should be adopted?
- III.—Where should Assay offices be located? At the two Mints only, or at other centres also?
- IV.—What process for assay should be adopted?
- V.—What fees should be charged?
- VI.—What distinguishing marks should be applied to the wares assayed?

The two most important heads, however, are the second and fourth, and I shall have to deal with them at most length.

I.

I may say that I have always held (and have already expressed my opinion on a former occasion) that some sort of safeguard is required in India with regard to the fineness of jewellery. The native purchaser, however, even amongst the poorest, is, I consider, much more careful in this matter to get his jewellery examined in some way than Europeans are ; but still my experience leads me to say that, apart from the mere fact of export, it would be a boon could some system be introduced by which the purchaser would at least have some sort of guide as to the true character of the article he purchases.

Again, I do not regard the technical difficulties in the way of introducing such a system into India as insuperable ; but, as shown further on, the great stumbling block to my mind is the financial aspect of the step.

I know that a number of persons consider that hall-marking should be abolished ; some in England consider that Government should leave the Halls, as at present in that country, and others again that Government should take it over.

In my opinion marking is most desirable, but I think the mark should be a Government mark, and should be a mark that can be easily understood, and the punishment for forgery, false stamping, etc., should be very severe. And this is a system that I believe could be introduced into India. I am not sure that I am not in a minority in this opinion, but still such is my belief.

Compulsory marking I believe to be a mistake in England, and it would be a still greater mistake in India. The advantage of compulsory marking on certain articles and not on others has never to my mind been clearly demonstrated. Thus, though I advocate a system of marking, I hold that it should be purely voluntary, and should be carried out at the wish of either the maker, salesman or purchaser.

II.

As regards the second question of standards. This is a technical point with which I am asked specially to deal. My opinion is, speaking generally, that for jewellery or plate it would be an advantage to have no standards fixed by law. Why should a maker who is at heart an artist, and who has made some beautiful vessel or ornament, either have it destroyed, as in England, or leave it unstamped, or have it stamped at the next lower standard perhaps very much below its real value, as is done in some countries, simply because in the working he has unintentionally not allowed enough margin for the necessity of the assay ?

I believe the absence of all duty, and the marking of the fineness of the article at what it turns if introduced into England, India and in all countries, would tend to the improvement of the manufacture ; that the jewellery would be what it is represented to be ; and that the opening of the market would cause greater scope for the true artistic workman, and give finer designs to the public.

My view is that every bit of jewellery or plate voluntarily brought for assay should be (roughly speaking) stamped at the fineness it turns on assay. Now I use the expression "roughly speaking" because I recognize that practically it might be difficult to have a series of punches to represent all the varying decimals of fineness that jewellers might work to, but the marking could be much closer than at present.

Now I cannot deal with this question, and give an opinion solely from a silver point of view, or as regards silver work alone being exported from India. If marking is introduced into India at all, it must be regarded from the point of view of both the local and foreign markets, and it must deal with gold also. Any system that did not do that would, in my opinion, be useless.

Turning to English standards, we have the following legal standards :—

Gold.

In Carats fine.	Fine Gold per lb Troy.		Fine Gold per oz. Troy.		Fractionally.	Decimally 1,000 representing fine gold.
	Oz.	Dwt.	Dwt.	Grs.		
22	11	0	18	8	$\frac{11}{16}$	916·66
20	10	0	16	16	$\frac{5}{8}$	833·33
18	9	0	15	0	$\frac{3}{4}$	750·00
15	7	10	12	12	$\frac{1}{2}$	625·00
12	6	0	10	0	$\frac{1}{3}$	500·00
9	4	10	7	12	$\frac{1}{4}$	375·00

Silver.

Fine Silver per lb Troy.		Decimally 1,000= fine silver.	
11 oz.	10 dwts.	.	958·33
11 "	2 "	.	925·00

Now I confess to thinking that in modern times all the old-fashioned signs for fineness should be abolished.

With 1,000 supposed to represent fine gold, or fine silver, an assayer can by the decimal system represent very much more accurately the true fineness of the article, and I submit the more accurately the assay report represents the fineness of the article, the fairer it is for the maker, jeweller, and purchaser. Another advantage is that every native gold merchant, Sowcar, jeweller, the community generally, and the bankers, understand and talk of fineness in this way in India.

Turning to India, there are of course no legal standards for jewellery, and we have to consider at what fineness the jewellery of the country is generally made.

The good gold jewellery is as a rule of a fineness from about 960 to 970. That is, it is very much finer than anything ever made in Europe, and it consists of an alloy of gold and silver only. In fact its very purity is its drawback, as it is too soft to wear well, but if marking is to be established, it must provide for such a standard.

Even comparatively poor women and children (whose bodies are made the banks of their husbands and parents) wear ornaments as fine as this, and I have assayed jewellery as high as 980 fine. Indeed, I believe I am not in error in saying that any native who has saved enough to be able to afford to buy gold ornaments, would not condescend to buy gold below 700 fineness, *i.e.*, nearly 17 carats fine.

Turning to the silver jewellery, the best ornaments are manufactured out of what is called "China Chandee" (China Silver). Why it is called so I do not know, unless it is that Sycee used to be originally used for the purpose. This "China Chandee" is generally 17½ London silver, *i.e.*, bar silver of a touch varying from 997.9 to 999, to which copper is added, bringing it to a fineness of from 940 to 950. Ornaments made of this silver 940 to 950 fine are of course soft, and can hardly perhaps be said to be very common, but they are a regular article in the market, and must be provided for in a system of marking. Indeed, poor natives, who have saved money, often have a piece of fine silver tied on to their arm or leg with a common piece of string, and they have absolutely paid a "Rubber" in the bazar to take its touch, in order that they shall not be cheated.

The ordinary fineness of silver work is of course 916.6, the standard of the coin, and nearly all the ordinary work done for Europeans is of this fineness. But I look on the work done for Europeans as being generally of an inferior character.

I may, before going any further, refer here to a very important point, for if I ignore it as not being a point on which my opinion is asked, I may as well express no opinion at all.

There is a great talk about opening the English market to Indian silverware. Now the Government, in their resolution, paragraphs 11 and 12, have hit the right nail on the head, *i.e.*, whether the prospect is considered of sufficient importance to justify the introduction of an Indian system of assay? whether the continuance of hall-marking in the United Kingdom has appreciably minimised the effects that might have been expected from the repeal of the duty on silver plate? and whether Section 4 of Act 47 and 48 Vic., Cap. 62, has given the relief to India required?

I confess that among the mass of correspondence Government has printed and I have received since this question first arose, there are many sentences which require modification: for example, "the work in which native silversmiths excel all others," "the Indian silversmith is not a refiner," "the Indian jeweller with his tasteful designs and delicate workmanship," "the most perfect machinery cannot turn out work more artistic or more honest than that which the Hindoo jeweller does every day before the eyes of his employés."

Now, there is of course a certain amount of truth in some of these, but deprived of the "froth" the facts really are that the Indian silversmith does not excel all others; the Indian gold and silversmith is a refiner, not of course on a large scale, but is so to suit his own purposes; the tasteful designs, which are purely oriental, were designed years ago and have been handed down, and are never improved on, and originality is seldom seen, and if you now go to a native for a design for work, for any purpose not to be the usual pattern of his mould, he says he will give you one, and promptly copies designs out of the Goldsmiths Company's catalogue, or that of some other large European firm. As for honesty, yes, they are as honest as their neighbours, and that they are not more so the records of my laboratory show; but that they are very clever in the power of deception, when they are dishonest, is very certain, and the retailer of the goods has an oriental mildness about him that gets round any doubts or scruples on the part of the purchaser in a wonderful way. And the picture of the man who used to work in one's verandah in the old days is a thing of the past; a man who would do that now would in all probability only be able to do very common work. I do not wish to condemn Indian work; no one admires that which is good more than I do, but in a matter of this sort it is as well to avoid the exaggerated ideas to which I refer.

I believe that the English market for ordinary Indian silverware as at present made for Europeans, and European shops, will be comparatively small. In the first place, I consider this ware as a rule poor; even that which is supposed to be art

work is most of it inferior in design, and where there is a good design it is done to death—the same thing over and over again on every salver, every cup, every bowl—the same bangles and either the same gods or the same scroll work in every shop. At first it might be considered curious, and be bought by some, but people in Europe would soon tire of it. Again, Indian silver jewellery can but seldom be worn by English ladies, as it is only now and then that it looks well with European dress, and what is worn can only be the more delicate work; the more massive work, though handsome enough as a curiosity, is too heavy, large, and barbaric for ordinary use.

I submit that this opinion of mine in one respect has been strangely confirmed by a sentence in Mr. E. J. Watherston's letter regarding Messrs. Orr & Co., being desirous of returning goods to India. He says "Native gods being unattractive to English buyers."

As to plate, useful articles, and copies of English designs, the Indian silversmith is not in it with the European. He cannot work as well; cannot make handles or hinges as well; cannot burnish as well, or generally finish as well; and I do not think many people would buy Indian silver work for ordinary use in preference to English.

Thus the only way in which the Indian silver work would get much hold on the English market would be by Indian silversmiths showing originality—a thing that seems to have died with their forefathers—or trying to learn in the English school to work with European finish, which will take time.

Thus if the Government of India intend to have marking on "silver work for exportation" only, the whole matter lies in the reply they may receive to their question as to how Section 4 has acted. If this section has given relief, no more need be done; and my report might stop here; but if, as I understand, I am to assume that an Indian assay and system of marking is to be introduced, there is much more detail to consider.

In my opinion the gold work is far more likely to find a market in Europe. In the first place (with the exception of some heavy bracelets and such like hideous articles), it is carried on by more skilled workmen than the silver work, and the work is better finished. The designs are, therefore, also better, the work lighter and more likely to be worn and used by Europeans; it is also more varied and, as I have shown, the gold is very fine, and in many cases enamel work of excellent quality is on very fine gold.

The mixtures of the alloy are also often carried out with infinite judgment, producing exquisite shades to suit the work—a thing in which, owing to the stringent laws of standards in England, the British workman is much handicapped. I therefore believe that if once the native work is sold publicly in England, it is the better gold work rather than the silver that will find a market.

The only fear I have is that, owing to the fixed European standards, if once it does find a market, articles of less value will be made, and in course of time poorer gold will be used, and the little remaining originality, quaintness, or beauty vanish.

I believe that in Europe the power to produce work the brain has conceived is often checked by the standard laws; and that were they and duty removed, the brains of European gold workers would be prolific in originality of design combined with a finish, compared with which Asiatic work would be very poor. But it is the quaintness, irregularity and other peculiarities that give the characteristic beauty to Asiatic work, and once that departs much of its beauty disappears.

To take a simple example. English people, on seeing a fine Indian necklace, and being told its price, would at first consider it too expensive, and when told its high price was due to the gold 980 fine (alloyed with silver), would demand the same thing to be made of English standard gold 916.6 with copper! Will its beauty be the same? Certainly not from an artist's or a goldsmith's point of view; but once this is done, the English workman will produce plenty of them, and probably, working in standard gold, finish them better, *i.e.*, more evenly and uniformly, but the quaint beauty of the original will be absent. If the Indian then tries to imitate the hard and severe lines and beautiful finish of Europe, he generally fails—I am speaking of course of fine work. There is, however, a quantity of rubbish sold in this country to Europeans as "fine Indian gold," although once marking is established, Europeans will not buy unmarked ware, and will ask for good quality, and this poor and false stuff may be driven out of the market.

On account of its fineness the good Indian gold work carries precious stones insecurely and the stones generally have to be re-set by some English jeweller, and even when advised to use poorer and harder gold, the native dislikes doing so, because at present it would not find a sale in the native market. Once he gets an English market, he will have to make all ornaments intended to carry stones of poorer gold, or he will get no sale for his ware.

I deal with these matters because to my mind they are the soul of the whole question. The amount of assaying for ornaments for export I look on as likely to be comparatively small, but it is the local market which must be touched. The only chance of Government

working this without loss will be by work for the local market. To any one who has seen the splendid gold ornaments, the great chains several feet long, the *golubdams*, *pandans*, *pick-danies*, gods, etc., that have been melted in this office, it is quite evident where the stamping has to be done. Natives grow rich, and where they figuratively do not bury their gold, they turn it into these ornaments and articles, and when a bad time comes these gold articles have to be melted in order to be sold.

These men at the time those articles are made have no guarantee that they can really trust as to their fineness, but a rubber in the bazar will, however, have probably been consulted.

One word more about the local market. Almost every native, even among the very poor, has his bangle, anklet, armlet or ornament tested. There are in this city some fifteen to twenty rubbers, and many more I believe in Delhi, who work with a touchstone. The competition among them is the only guarantee for their honesty, and from all I can gather they are not all regarded as above bribery. In my experience I have had many references made to me to decide disputes. The very existence of these men is a sign that the want of some check and some mark made by an independent party is felt.

Knowing this by my own experience, it was with some surprise that I read that marking was not considered desirable by the trade. Compulsory marking I do not believe to be a sound principle in any country, but voluntary marking, I submit, is desired by the trade of India.

In 1885 I was referred to by the Local Government regarding an application on this point by a firm in Bombay, and I have asked many native merchants and jewellers and they are all agreed in saying it is required, as they are otherwise at the mercy of native rubbers in the bazar whom they do not trust. They all say, however, it should be under a *sahib* and under Government control. Whether it is financially possible to meet their wishes is another question, but the desire for it certainly exists.

The next important point, if standards have to be fixed, is the "remedy."

The "remedy" for jewellery allowed in England is generally considered by the trade as too small, less than a quarter of a grain under standard being sufficient to condemn the work.

This remedy should be larger, and I would suggest 2 per mille for gold and 4 per mille for silver.

I have said that, generally speaking, the work should be stamped as near the true fineness as possible, and this view naturally does away with the necessity of a fixed minimum, for let the stamping be free, and the minimum of utility would fix itself.

The necessity, or otherwise, for having a fixed minimum figure of fineness is a subject which would require more discussion than I can bring to bear in a report of this nature, turning, as it would, on the nature of the work, the hardness, appearance, purpose for which the work was required, the different effects of alloying, comparative difficulties in working, and so on. Thus though I do not personally admit the necessity for fixing a minimum point of fineness, I am ready to allow it is a subject that can stand aside for the present, and I therefore suggest that for gold the minimum fineness to be stamped be 300, and for silver the minimum be 900, with the proposed remedy already suggested in each case.

I feel firmly convinced that something like what I suggest—if not even a more open course—will in course of time have to be introduced by all civilized Governments, and that they will find it better for the country, the dealer, workman, and purchaser, and better for the art as an art; but as I fear that I may at present be in a minority in this view, I put before you two suggestions (*a*) what I personally believe best, (*b*) what I look on as a compromise and the very least the Government can have in the way of standards.

(*a*) My own opinion is that Government should have a series of stamps ranging by tens, *i.e.*, 990, 980, 970, etc., down to 300 for gold, and down to 900 for silver; and one other, to be called the standard stamp, for 916·6, which standard, it must be remembered, is the same as the English sovereign standard of 22 carats fine, the British Indian gold mohur and the British Indian rupee standard.

The remedy for gold will be 2 per mille and for silver 4 per mille, except that the standard mark will only be used between 918·6 and 914·6.

Thus, for example, all gold work which on assay turned from 978 fine to 982 fine would be stamped 980.

Gold work turning 914·6 to 918·6 would be stamped Indian standard.

Silver, for example, turning from 936 to 944 would all be stamped 940, and in the case of silver turning from 914·6 to 918·6, it would be stamped standard.

The advantage also in this to my mind is that it gives in the case of silver a large range of marking about the standard; the difference in value due to remedy as regards the purchaser would be very small, and to the maker the loss in one case would be made up in gain in another.

(b) In case my idea is considered too sweeping, I submit that the least number of marks the Government can have are as follows :—

For Gold.	For Silver
970°	958°3
916°6	940°
833°3	925°
750°	916°6
625°	
500°	
375°	

These are the legal standards in England and those in use in India, but if this point of legal standards is recognised, I would point out that the remedy in the one case will have to be the English legal remedy and in the other the Indian legal remedy.

III.

The next point is one which can be shortly answered. To commence with, however, I must point out that the person in charge of the office where the assay is done is the person who must be responsible for the assay and the marking. I know from experience that it requires all care and is quite anxious enough a responsibility, as it is, to see that gold bars and leaf are stamped correctly, and I would never agree to having things assayed by myself or under my supervision, and for which I am responsible, stamped elsewhere. Thus I presume the stamping, as the assaying, will be carried on in the Assay office, and of course articles would be sent here and that no one but the assayer in charge would have anything whatsoever to do with it, and thus I consider this question first from the point of view of the present Assay offices.

I may, to commence with, say that I am certain that it cannot be done with our present establishment. That would have to be enlarged. The work we receive from the Mint is very large, and of late it has been enormous, and that of course must be done before all else. It is therefore most difficult to do even such comparatively small amount of extra work as at present comes to hand; but if the marking of jewellery and plate is to be added to my duties, it will be impossible for me to carry it out without increased establishment, and the men must devote their time to it.

The responsibility added to my post would be great, but I should not mind that as long as I had a free hand and was allowed to make the provision I thought fit. The large sums that yearly change hands represented by assays done in this office, even apart from ordinary minting requirements, make me feel that as far as responsibility goes a crore or two of value more or less would be of no consequence, provided I am left perfectly free to do that which experience has taught me is the best. However, though I am not afraid of taking the work if required, I allow I think it would get more attention if in a separate office. One of the principal native merchants suggested that an office or a branch of my office should be in the Marwaree bazar. However, without going into the Marwaree bazar, if it is decided to have a separate office, it will be a matter for future consideration as to where it should be situated, so as to be convenient and near enough to attract manufacturers.

But supposing it is decided to have Indian stamping, it is quite clear to my mind that it will be absolutely necessary to have offices at other centres than Calcutta and Bombay.

In my conversations with the manufacturers on this point, the least number I can get them to name is Calcutta, Bombay, Madras, Delhi, Lucknow, Cutch, Cashmere and Burma; some even wish to add Jeypur and other places because of the fine gold work.

Personally I should feel inclined to recommend—supposing a system is introduced—starting at first with only offices at Calcutta, Bombay, Madras, and Delhi. The other places might be left till it is seen how the above pay, and if those interested at the other places find themselves injured, they can represent the same, and should then have to show that there is enough work to support an office.

Calcutta would take Cuttack and other work; Delhi is, of course, a large centre; Madras would get Travancore jewellery; Bombay would receive the Cutch, Jeypur, and probably the largest assortment of all kinds. There are of course many places where a small amount of jewellery is made which cannot be looked on as worth consideration, and it would be no loss if the trade, such as it is, vanished.

I have said nothing about Cashmere, because I feel that, though there is plenty of work and good work done there, there may yet be political matter connected with the question, and there are better opinions than mine to be obtained; and again, although I know Burmese work, and there is some in the market here, it does not seem to be in large quantity, and never having been in Burma, I do not feel competent to speak as regards that country.

IV.

The fourth question is a technical one of much importance.

As regards methods of assay—

Gold cupellation is a perfect method of assay; nothing could be better.

With regard to silver, however, silver cupellation is not as satisfactory. It is not that in practised hands excellent results may not, and are not obtained, for it can be carried out with accuracy, but it does require great care; and without entering into the many technical details in this respect, I need only say that it is generally considered among assayers as not so satisfactory where great accuracy is required, though most useful where the approximate fineness is not known.

The "Humid" or "Volumetric" method, as practised in Europe, is a beautiful method of assay where the fineness is approximately known; but the manner in which the work has to be carried on, the difficulty experienced with the standard solution in this climate, and many other reasons, render it unsuited to India.

The best method for this country (which is not mentioned in the Government Resolution) is that which is called the "chloride method," *i.e.*, the weighment of the precipitated chloride of silver; it is a little longer than the other method; but it admits of native aid. It dispenses with the necessity of approximating assays, as any variety of fineness can be at once dealt with, admits of a constant weight being used, the presence of outside metals is at once shown, and the assay is very accurate.

Thus we are reduced to two methods of assay:
For gold, of course, cupellation.
For silver, the chloride method.

As for the touchstone—well, it is not assaying at all; but before I deal with that I must say I think the so-called impossibility of presenting work for assay in the rough is exaggerated. Certainly articles will have to be sent or carried backwards and forwards; but as far as I can learn, that does not seem to have been considered of much consequence in England; indeed, the tendency appears to have been to decrease the number of Halls, and I believe that some people in England who think marking should be under Government control would even close some of the existing Halls.*

The great complaint has been as to the manner in which the sample for assay was taken, but even in this respect it is allowed that the Halls do not now use ware as cruelly as they formerly did, and though doubtless there is still room for improvement in this respect, yet with the recognition of the advantage of marking and the present appreciation of the fact that it is not right to utterly destroy a man's work in taking a sample, surely means will be gradually evolved by which disfigurement would be reduced to a minimum.

Now, if marking in India is once established, and the fact generally known, I submit that the manufacture ought gradually to converge to the assay centres. I do not mean to say that work at places as far distant as Srinaggar or Mandalay will cease and come to Calcutta and Bombay, as in such cases we are dealing with what must be considered separate countries, but I mean that where there are judiciously chosen centres, it is to be expected that the workmen with their families from a large portion of the surrounding country will gradually be attracted together, and if this occurs, much of the difficulty connected with carriage will disappear.

Indeed, if something of this sort does not happen, I do not see how any assay centre can become self-supporting, and only on such a hypothesis could the establishment of Assay offices be tried.

Next, let us turn to the much-lauded "touchstone." Rubbing—there is no necessity to use any grander name—is not assaying, and though with gold under certain conditions it is approximate, with silver, in my opinion, it is not even approximate. The very term generally used "touch" illustrates what it is. It gives no assay, no guide to anything that may be present, and can only deal with the surface. The surface, it will be replied, can be removed, and to that I say, that if it is removed to the extent that is often necessary in this country, it does not save the article from disfigurement.

As to accuracy, let me first refer to gold, in which I admit rubbing to be often very near the truth. I have known a man with the same description of alloy† of different fineness obtain time after time results correct to within 5 per mille, and then suddenly go very far from the truth per cent. I have often had a cupellation furnace charged with, say, twenty-five to thirty assays of absolutely different kinds of gold—Pekin bars, gold leaf, China leaf, melted ornaments, melted coins, bits of various sorts of gold from the bazar of every imaginable sort and character. Each sample to be assayed has been previously rubbed and the "touch" registered by an experienced rubber, and the "touch" so registered afterwards compared with the result of the assay.

Where the alloy has been a common one which the rubber was accustomed to, the results have generally been approximately right, sometimes marvellously near, and sometimes incomprehensibly wrong; but in the case of ornaments, queer mixtures, etc., melted in the office, he would often be nowhere near the truth, and the man was not to blame, for he was but mortal, and the eye cannot always guess right.

* It is quite possible that the removal of duty in England will cause an increase in the work to be done at the Halls, and should more freedom as to standards be also introduced, the demand for stamping might possibly be so great as to make it necessary to again increase the number of Assay offices.

† I use the word "alloy" all through this paper in its true sense, *i.e.*, "a mixture of two or more metals;" the word "alloy" properly speaking does not mean (as it is often improperly used to denote) the poorer or base metal present. Coinage, jewellery, brass, gun-metal, etc., are all alloys, and no one metal composing them is by itself an alloy.

I admit that if a law is passed of strict standards, *i.e.*, that all gold work is only to be made of gold, silver and copper in certain proportions, or of gold and copper in certain proportions, and no other mixture is allowed, and test needles are made only of that alloy and extending to the decimals allowed for remedy, that on seeing a shade did not match any needle it would be easy for an assayer to say this gold is not the same as my needles, and so condemn the work, and damp the artistic spirit in the artist at the same time.

I have seen a man fairly puzzled by gold of exactly the same fineness as his needle, but it not being the same composition, it was not the same colour. Every goldsmith knows this is possible. Yet this is a method that some people will insist on calling assaying, and consider sufficient in a country where men mix their alloys as they like and as they think best.

If in India the liberty of the workmen in this respect is to be hedged about by fixed standards, I believe it will spoil, if not kill, their art; and I understand from the resolution that Government recognizes this and is not in favour of compulsory standards.

Turning to silver, my objection to the touchstone is still stronger. I do not believe that any man, be he ever so experienced a rubber, could tell the "touch" of all the various kinds of jewellery dignified by the name of silver work in this country.

The men in the bazar who gain their livelihood by giving the touch to natives do not pretend to anything approaching the real thing in silver, and they confess they cannot do it. But what is more to the point, these native rubbers in the bazar here will not give a "touch" on a large number of silver articles (although the touchstone is the only method they know and the only one they employ) without cutting or drilling.

One of the best ways of taking a sample is to drill small holes, collecting the dust (as these holes can be filled up again), and this dust these men melt up and use as a sample piece; thus even here with the "touchstone" it is considered necessary to disfigure the article.

If the touchstone is so reliable in this country, I am at a loss to understand the nature of certain cases that occur. I believe it is not too much to assume that in respectable firms of standing, trouble is taken to approximately test goods, and to be sure that the articles they offer for sale are what they represent them to be; yet it is no uncommon thing, when such articles have been by accident broken, for the mending jeweller to throw doubt on their genuineness, and when the same are then sent here for assay, for them to turn much lower than they were said to be at the time of purchase; and yet it would be wrong to say under the circumstances that the retail jeweller was anything but taken in himself.

I have often been asked to settle disputes between two parties by the touchstone, and I have invariably refused to do so. The risk of mistake is too great, and it is often a very difficult thing for the parties to make up their minds as to whether they shall back their opinions to the extent of having the ornament destroyed.

I consider the English Halls are quite right in insisting on making proper assays, and the argument that what is good for one country is good enough for another does not carry weight; no plate has the high character in the world that English plate has. I fail to find authority for the statement that the system of touch proves adequate in France.

They have two classes of punches, the superior and the countermark, and the former are divided into standard, guarantee, importation, exportation, and recense. But let us turn to their own report. They give the usual summary and explanations of the usual methods of assay.

They deal with assaying silver by cupellation, then with assaying gold by cupellation, and then go on to say "the second method of assay by the touch is too well-known to require description; it only gives approximately the required standard." Then they say, "the third kind of assay is that of silver by the damp method, etc."

Again, let me quote their report—

The standard mark is impressed on works of size, such as have been analysed by processes scientifically exact. The mark of guarantee is placed on small jewellery assayed by the touch; a special mark is reserved for gold chains.

The import marks are of two kinds, the foreign and watch marks, and these are again sub-divided.

As for the export work—like most of the continental countries—they do not seem to be much concerned about its quality.

Again, in giving the prices, they say—

For an assay on gold or gilt or silver bearing gold
For an assay of silver if by reduction in a crucible	:	:	:	:	:	:	:
Assays of small articles of gold by touch

Thus they do not have a general assay by touchstone, the small gold articles that are examined on the stone are not stamped standard, and I cannot find anything said about silver being stamped by assays on the stone; and all these precautions are taken in a country with fixed standards.

I have dealt with this question at length, because it is most important, and to me it naturally is of great interest and importance, and all I can say is that if the jeweller in this country is to have a free hand as to composition, and the only method of assaying

gold and silver is to be the touchstone, I sincerely hope that the Government will not require me to certify to the accuracy of the assays by "rubbing," or hold me responsible for error.

Although I am against giving any certificate on rubbing alone, I am not prepared to go the length of saying it may not be useful as an auxiliary test.

The whole point lies in the way in which the sample is taken, and this must be left to the judgment of the assayer. He may be forced to cut a piece out, or he may be able to get a sufficiently good sample by scraping, or he may be able to obtain a good sample by boring with fine drills in various parts of the work until he gets enough dust.

In the case of gold this would be tested by cupellation, in the case of silver by the chloride method. A portion of the sample so taken could be turned into a needle and the lighter portions of the work be tested by touchstone after slight removal of the surface to see it was of the same fineness as that scientifically assayed. I think that manufacturers ought soon to learn the best state in which to send their work for assay without entire finishing, and it is impossible to lay down exact rules as to how samples are to be taken; they must be taken so as to disfigure the work as little as possible, and yet to represent the true composition of the article throughout in order to be of any value, and no certificate should be given by mere touchstone test.

V.

The question of fees is one to which the Government call my special attention; but the fact is I can hardly form any idea as to what scale of fees is at all likely to make these offices self-supporting. There is such a quantity of information as to the expense of starting these offices which I require for this part of my reply, and cannot procure, that an estimate from that side seems impossible at present.

Turning to the other side, the fees must be fairly in proportion to the work to be assayed, and yet not prohibitive, and it must be remembered that there is no duty to be paid.

In considering the question of fees, however, it must be clearly understood that I am purely dealing with works of art, jewellery, ornaments, *goolabdans*, *pandans*, plate, etc., and not with mercantile business between merchants and bankers, refiners, etc., or any such work as I have at times to deal with at present, where one assay on some small piece may represent very large sums, a transaction of from Rs20,000 to Rs50,000, or may be a question of contract which is referred to me for decision.

All I am here dealing with is work which in England would be "hall-marked."

In the bazar the native rubbers charge one anna per tola for rubbing gold, the minimum charge being one anna, and they charge twelve annas per 100 tolas for silver.

It is quite evident that at such rates no properly conducted Assay office could be worked; still at the same time the fees must not be too high, although there is no duty to pay.

I therefore merely suggest the following as being as low as could be tried, but I confess to feeling very uncertain that they are near the truth.

Gold.

For an assay and stamping of any gold ornament, piece of jewellery, piece of plate etc.—

												R
Weighing 5 tolas or under	2
" from 5 to 10 tolas	3
" " 10 " 20 "	4
" " 20 " 50 "	5
" " 50 " 500 "	10
" " 500 " 1,000 "	15

For every 100 tolas or part of 100 tolas in weight above 1,000 tolas, a fee of one rupee.

Silver.

For an assay and stamping of any silver ornament, piece of jewellery, piece of plate, etc.—

												R
Weighing 5 tolas or under	1
" from 5 to 10 tolas	1-8
" " 10 " 20 "	1-12
" " 20 " 50 "	2
" " 50 " 100 "	3
" " 100 " 500 "	4
" " 500 " 1,000 "	5

For every 100 tolas or part of 100 tolas above 1,000 tolas in weight, a fee of eight annas.

At first, in a place like Bombay, there might be a rush of work with a view to the foreign market, but when it was found (as I believe it will be found) that there is not so large a demand in Europe as is supposed for this work, there will be a lull, and the only chance of the offices paying will be when it is generally known throughout the country that stamping is done under Government control, and it may take time for this knowledge to spread.

That the persons most interested wish to have a system of marking I am aware, but they would like to have it for nothing, or next to nothing, and it would be absurd for Government to attempt to carry out the work at rates such as they would suggest.

Some of the native rubbers or their relatives might find employment under Government and be taught a certain amount of work in the laboratory, but there must be a European in charge and one to take his place in case of sickness.

This view might perhaps call forth a protest from many natives of this country; but in reply, I can only say that not only do I think this necessary, but that in saying so, I am expressing not the opinion of only one of their countrymen, but every one of them I know who is in any way interested in the question.

There must be a *Sahib* in charge and responsible, or they would be no better off than with the bazar rubbers, who are more or less kept in order by competition.

Thus in giving these figures I cannot say I honestly have any great faith in them. I have made out the scale more with the idea of what would be perhaps proportionately fair according to the relative value of the goods and yet not be prohibitive, than with any decided view as to the probable amount of the Government expenditure and receipts, which I feel are very uncertain.

It is therefore the financial aspect of the question, the difficulty of arriving at anything definite as to the amount of work likely to come to the offices, that makes me doubt the advisability of the step, and causes me to say that if Section 4, Act 47 and 48 Vic., Cap. 62, has given relief as regards oriental work exported to the United Kingdom, that it might be better for the Government to leave matters as they are.

· VI.

With regard to the nature of marks. It will be desirable to avoid the long series of hieroglyphics that, owing to a separate sign for each standard and different standard marks at different halls, have grown up in England and are now so numerous that hardly any one in the trade can at once interpret them accurately.

If this is the case in a country with a few fixed standards, it would become very much worse in a country where a free hand is to be allowed to the maker, and thus I propose only to have figures to denote the fineness.

The marks in England are six in number on gold and five on silver:—

The maker's mark.	The hall-mark.
The carat mark.	The date mark.
The standard mark.	The duty mark.

In gold the standard mark and the carat mark together denote the fineness; the standard mark being either the crown, the thistle, lion rampant, harp crowned, plume of feathers or unicorn's head, according to the various places, and the carats being given in figures.

In silver the carat mark of course disappears, and the standard mark, *i.e.*, Britannia, or lion passant, or thistle or harp crowned, as the case may be, denote the fineness.

The duty mark may be dispensed with in the case under consideration as useless.

This leaves the maker's mark, carat mark, standard mark, hall-mark, and date mark to be considered.

The maker's mark—in England it is generally the two initials of the maker's name—is essential, and this should be a mark registered in the Assay office by being stamped on a leaden sheet, the name and address of the man and all particulars being written alongside, and signed by himself and the officer in charge.

This mark should be stamped by the maker on the goods before they are sent to the Assay office and on the spot near which he wishes the goods to be marked. The article in question should be in an unfinished state, but as far advanced as the maker believes compatible with good finishing.

Besides this, I think that the number of the article produced by the maker and sent for assay each year should be registered, and at the end of the year he would begin afresh at 1.

For example, a goldsmith, "Balcrishna Ramchunder Hate," would begin in January with marking his articles 1 B.R.H., 2 B.R.H., and so on.

I do not say that initials should be obligatory; a mark might do as long as it is registered.

The advantage to my mind of having the number of the article as well as the maker's private mark is that it increases the chance of proving a case of forgery, as, if the article bearing the forged stamp and showing (as it would be obliged to do) some number on being brought to the Assay office does not agree with the register against that number and mark, the forgery is evident.

For example, suppose an inferior silver bowl marked as 102 of the work of "Sakharam Gidh" in the year 1891 is brought to the office, and the register shows that the article bearing such a mark was really a gold *pándán*; the forgery is practically proved.

If there was a good Government mark, I am not sure that the hall-mark, *i.e.*, the mark showing the place of assay, might not be dispensed with, but in this enormous country I think it will be necessary to retain something showing the Assay office. It is also essential to have a date mark in order to trace the article, and this in England is done by a letter. In some place the twenty-six letters are used to denote a cycle, in some twenty, and so on. The first letter of the alphabet is then again taken in a different style of character and begins a new cycle. Of course, without a reference it becomes after some time very difficult to know to what year the letter refers, and thus in this respect, as with the maker's mark above referred to, an additional security against forgery is provided.

For example, say Roman capitals begin in 1891 A, and so on, then 1916 will be Z; 1917 will be, say, small Roman (a) to 1942, which will be (z) and 1943 will be, say, Italian A, and so on.

The letter used for the date must be the same in every Assay office throughout India.

I see that Mr. Gee makes a suggestion in his work with regard to marks that date letters might be placed in the middle of the Government mark together with the standard.

It is, I admit, desirable to reduce marks if it can be done, but the date, place of assay, fineness, and Government mark must be put on, and I have striven to design punches as Mr. Gee suggests with such details combined, but I find this makes the stamps too large, heavy and coarse.

It must also be remembered that round surfaces have to be dealt with.

I have most reluctantly therefore come to the conclusion that the stamps must be separate.

I have tried to use the city arms of the municipality in order to make an office mark, but with no great success. However, I think, portions out of the arms can be taken, and in the arms of Bombay, I think, the boats give us a characteristic sign for this city; and one of these might be used as the Bombay Assay office stamp, or two of them with the fineness between, or the crest might give a good mark.

The first of these given below is probably the best:—

The fineness must be stamped in figures that can be read, and alongside should be the Government stamp, which might be either the Royal Arms, the Crown or the Star of India.

The office stamp and Government stamp should be on the flanks of the date and fineness.

Thus an article fully stamped would have from the left—

- | | | |
|--------------------------------------|---|---|
| 1. The number of the work. | } | These to be put on by the artificer before the work goes for assay. |
| 2. Maker's mark. | | |
| 3. The sign giving the Assay office. | } | These to be stamped in the Assay office. |
| 4. The date letter. | | |
| 5. The fineness in figures. | | |
| 6. The Government stamp. | | |

I am afraid we cannot do well with less than six marks.

A goldsmith or silversmith would have to fill up a form when he sends his goods—a nearly finished as possible, but not quite finished—to the Assay office, stamped with his mark and number of article, and this form must be signed by the maker whose signature is registered against the mark in the office. This form can then be filled up with the fineness after assay, and be signed by the assayer, and it would even be a good thing if each article could have such a certificate, although that might perhaps be found too tedious in a case such as a set of forks and spoons, and thus a question like that would have to be left to the judgment of the officer in charge.

Apart from this, however, I think it would be advisible to have a separate stamp to be placed on such portions of the work as have been only compared by touchstone with the sample taken for proper assay. This might be a palm tree, or lotus, or any other characteristic sign, but should show no fineness, as it cannot be more than a token that the work has been so checked to see if it appears homogeneous.

I believe it would be cheaper to have a series of punches made for each touch to be stamped; the only one that would have to be changed would be the date stamp, the others would go on for both gold and silver for a long period.

There are of course many details yet to be considered which will have to be gone into afterwards, but I have dealt with the practical portion of the marking at some length to show that I do not believe it would be so difficult to introduce.

Still I must point out that even simple rubbing is a thing that cannot be rapidly learnt, and that the subject of having trained men for the assaying and also for delicate stamping will have to be carefully considered; it will not do to commence spoiling articles by bad marking, and it requires experience to stamp well, and I at present know of no trained hands in this country.

In conclusion, I would give it as my opinion that it will be of no use to have a single mark for one standard, and if it was enforced it would ruin the native work. It would be equally useless to have only silver marked, and certainly not worth while to establish a system of marking simply for the sake of the amount of silver ornaments, etc., likely to be exported to England. If the marking is to be of use, it must, as I have said, deal with the local markets, and if it does do so, it must then cover a generous field as to fineness; and if that is recognised, then the marks used must convey information as to maker, place of assay, and fineness. Any system that does not do this would be in my opinion worse than useless.

I am sure that if gold and silver work in this country is to improve—and it is only by improvement that it can possibly have a chance of competing in Europe—there must be no petty restrictions, and as indeed removal of duty will tend to improve the goldsmith and silversmith's work in England, so would a greater freedom of standards there also help to improve it; and I therefore do not think that any system introduced into India should be started with laws that must more or less hamper the manufacturer. He should be given a free hand, the marking only being a guarantee as to the quality of the composition.

Even if it is decided to introduce into India a free system as regards standards and marking, so as to cover the wants of both the local and foreign markets, I fear that for some little time much of the expense of its introduction will have to be met by Government.

7.]

Dated 27th December 1890.

From—THE HON'BLE L. R. W. FORREST, Chairman, Bombay Chamber of Commerce,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

I have the honour to acknowledge the receipt of copies of the Resolution (and enclosures) of the Government of India, No 5261, under date of 5th November 1890, on the subject of the abolition of the English plate duties, and the proposed establishment of a system of hall-marking in India.

2. With respect to the latter question, on which the Chamber is invited to express an opinion, my Committee have consulted those immediately concerned in the trade, and now beg to forward copies of the accompanying letters on the subject, addressed to the Chamber by Mr. J. P. Watson, of Messrs. Watson & Co., and Messrs. Ardeshir & Byramjee, the two most important firms in Bombay, who export silver goods in large quantities to Europe. The Committee of the Chamber agree generally with the views expressed by Mr. Watson, and they trust the same may receive due consideration.

8.]

Dated 3rd December 1890.

From—J. P. WATSON, Esq., of Messrs Watson and Co., Bombay,

To—The Chairman, Bombay Chamber of Commerce.

In reply to yours of the 14th November, *re* hall-marking in India, and referring to Government of India letter No. 5261:

(1) "Should the assay be compulsory or optional?" A hall-mark would, I consider, be a great advantage and lead to a much larger sale for Indian silver plate in England than at present. It would show at once its quality and hence give it a standard value in the market; whereas, if not stamped, each piece would have to be tested by the individual, buyer or dealer who would be sure to save himself by valuing at less than its real quality. It would thus have an uncertain value instead of a standard value and would militate greatly against the steady and free sale or exchange for Indian silver plate. It should, however, be optional.

(2) "What standard or standards of fineness should be adopted?" I would adopt the quality of the rupee, but though articles might be made of finer quality than this, I would only have one stamp.

(3) "Where should Assay offices be located? At the two Mints only, or at other centres also?" In the following twelve towns, where any considerable amount of silver plate is manufactured, *viz.*, Bombay, Poona, Ahmedabad, Calcutta, Lucknow, Delhi, Lahore,

Madras, Bangalore, Trichinopoly, Rangoon, and Mandalay, I would appoint the Mint where such existed, and the Government Treasury, where there was no Mint.

(4) "What process for assay should be adopted?" The usual native process of rubbing on a test stone, and also trying with acid. There is always a native official at the Treasury, who is a thorough judge of the different qualities of silver, and I would leave it to him to decide the quality, and have the articles stamped if up to rupee quality.

The tester, however, should have the right, if he had any doubt about the quality, which the usual test did not satisfy, of drilling into the article or cutting into same with a file; but, before resorting to this extreme measure, reference should be made to the owner, who, if he refused permission for this extra test, should have the article returned, and of course unstamped.

(5) "What fees should be charged?" Six pies or half an anna per tola weight of the article submitted for stamping.

(6) "What distinguishing marks should be applied to the wares assayed?" I would propose a stamp resembling the pointed Star of the Star of India, and another stamp taking the first two letters of the town where the test was made, *Bo., Ca., Ma., De.*, abbreviations for Bombay, Calcutta, Madras, Delhi, and so on. One letter might have sufficed, but there are several that commence with the same letter, hence the necessity for the double letter; besides A. Ahmedabad, B. Bombay, if put this way, might be mistaken for two different qualities, A quality, B. quality.

This idea of applying a stamp for quality would not in any way clash with native customs, as it is nearly universal in all large towns to have the gold or silver tested after it is made up by an authority who is recognised both by buyer and seller, and a small fee is willingly paid for this service, which fee in many cases goes 2rds to some charitable fund and the other 1rd is retained by the stamper.

In most Native States, it is a criminal offence (in Jeypore, the punishment is that of having the hand cut off) to make up or use other than silver considerably purer than the rupee.

Since the passing of Act 47-48 Vict., and the English Customs have applied section 4 of said Act to imports, a great impetus has been given to the export of silver plate from this country by private individuals in consequence of the old restrictions being removed.

The fact that the duty has also been taken off is not as yet thoroughly known, and so far has not had any appreciable effect on the export, as far as I can judge.

Section 4 of Act 47 and 48 Vict., Cap. 62, is as follows:—

Articles of foreign plate which, in the opinion of the Commissioners of Customs, may be properly described as hand-chased, inlaid, bronzed or filigree work of oriental pattern, shall, subject to the payment of the proper duties of Customs, be exempted from assay in the United Kingdom.

For some little time now the Customs Authorities in England have put a liberal translation on the above section, and it has practically amounted to admitting Indian silver ware, when in any way chased or decorated, free from the Goldsmith's Hall Examination.

There are occasionally instances of doubtful origin, but in these cases the Customs Authorities notify the importer of this, and if he cannot satisfy them of its oriental character, he simply re-exports it under bond.

9.]

Dated 4th December 1890.

From—MESSRS. ARDESHIR & BYRAMJEE, Bombay.

To—The Secretary, Bombay Chamber of Commerce.

We beg to forward Rao Saheb B. A. Gupte's opinion on the hall-mark questions. While we were working in London at the Colonial and Indian Exhibition, that gentleman was asked by Lord Northbrook to write for our firm a Note on the inconvenience felt by the Indian Trade on account of the duty which then existed, and we have obtained his opinion now under the conviction that it is likely to be useful and worthy of consideration.

We quite concur with him on the subject.

Note on the introduction of Hall-Mark in India by RAO SAHEB B. A. GUPTÉ.

For Messrs. Ardeshir & Byramjee, Bombay.

Hall-mark, if made obligatory in this country, will prove prejudicial to the interests of the Indian Silver Trade, as it will involve some expenditure and considerable delay.

The information as given by Mr. W. Carlton Wood, regarding the melting of the rupee

* These amalgams are :

(A) 17 Penny English silver, tolas	100
Copper, tolas	6½
(B) 17½ Penny English silver, tolas	100
Copper, tolas	6½
(C) Chinese dollars, tolas	100
17½ Penny silver, tolas	125
(D) American dollars, tolas	100
17½ Penny silver, tolas	125
(E) French dollars, tolas	232
17½ Penny silver, tolas	125

is true only to a certain extent. The bulk of the work done by the Indian silversmith is, however, done on London silver,* called 17 penny and 17½ penny, mixed with 6½ and 6½ tolas, respectively, of copper, or in an amalgam of 100 tolas of China dollars, American dollars with 125 tolas of 7½ penny London silver as well as in an amalgam of 232 tolas of French dollars, with 125 tolas of that metal.

The metal used for the joints varies from 1 tola of silver to 1½ to 2 of copper.

The silver generally used in India for the European market is superior to that of the London hall-marked, as will be seen from the two samples selected in the Bombay market.

There already exists a voluntary hall-mark system in India, and the following silver-smiths among others do follow :—

Ramji Bhagvan.
Narrottam Bhau.
Laxuman Jalla.
Luna Vira.

Luna Deoji.
Narayan Shamji.
Manji Keranji.

The sale in Ramji's shop amounts to three to four lakhs a year, and in those of the others from Rs 25,000 to two lakhs and a half. They mark their own articles, and when they are returned to them after use they pay their customers back the weight of the broken ornament or plate in British Indian coins. It will thus be seen that the most convenient and economical course would be to develop the native voluntary system of hall-marking to such an extent as to make it suit the requirements of the European customers.

10.]

Dated 30th December 1890.

From—W. B. WISHART, Esq., Secretary to the Upper India Chamber of Commerce, Cawnpore,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

I am directed to acknowledge receipt of copy of Government of India Resolution No. 5261, dated the 5th November 1890, and its accompaniments, on the subject of the repeal of the duty on, and the hall-marking of, Indian silver plate.

2. The Committee regret that as none of the Members of the Chamber are engaged in the silver-ware trade, they are unable to offer opinions in respect of the technical points on which expressions of their views have been called for.

3. With reference to the general bearing of the subject, they beg leave to state that they consider the silversmith industry of this country to be of sufficient importance to warrant the removal, as far as possible, of all obstructions in the way of a free admission of silver goods into the United Kingdom. Some conception may be had of the extent of the trade and of the number of individuals to whom it affords employment by reference to the last published Official Statistical Abstract relating to British India, which shows that there are no less than about 473,000 persons who earn their livelihood as "workers in gold, silver and precious stones."

4. As regards hall-marking in India, the Committee are of opinion that no system of Government assay, whether optional or compulsory, would be practicable. Not alone would it hamper the export trade, but it is also reasonable to anticipate that local trade would be detrimentally affected thereby, inasmuch as the great body of artificers in the precious metals are dispersed all over the country, for the most part in villages remote from centres where Assay offices could be conveniently located.

5. On the other hand, it appears that as long as Indian plate is subject to the embargo laid upon it by hall-marking in England, the repeal of the import duty must remain virtually a dead-letter; and that if the alternative of permitting free entry to goods bearing an Indian hall-mark were adopted, it would utterly fail to alleviate the existing state of affairs or to allow scope for improvement in the trade.

6. The only remedy lies, the Committee consider, in free importation being allowed to Indian silverware, with the sole proviso that all articles should be stamped with a distinctive mark denoting their origin; in fact, that they should be subject to the restrictions of the Merchandise Marks Act similarly to all other imported goods, and nothing further.

7. It would seem, however, from the Act of Parliament quoted in paragraph 12 of the Government Resolution under discussion, that the existing law, as set forth in Act 47 and 48 Vict., Cap. 62, actually exempts from assay in the United Kingdom all silver goods which may be properly described as "hand-chased, inland, bronzed, or filigree work of oriental pattern." It is well known that the great bulk of Indian silverware answers to this description; but the Committee understand that such wares are not, on this account, exempted by the British Customs officials. I am, therefore, to respectfully suggest, with reference to the remarks made in the paragraph of Resolution referred to, that, before taking action in the matter of hall-marking in India, it should be ascertained whether, and

in what degree, the terms of the Statute above quoted apply to Indian silverwork, *i.e.*, goods produced by manual labour without the aid of machinery. *

11.]

Dated 21st January 1891.

From—S. R. TURNBULL, Esq., Chairman, Madras Chamber of Commerce,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

I have the honour to acknowledge the receipt of the Resolution of the Government of India, Finance and Commerce Department, under date Simla, the 5th November 1890, in which the Chamber is invited to reply to the six questions enumerated in the fifth paragraph.

In reply I am desired to state that the Chamber is glad to observe that the Secretary of State, in his letter of the 15th May last, to the Governor General in Council, suggests that if a hall-mark is established for India, it might be permissive, and not obligatory. It seems to the Chamber desirable that the assay should be optional. As to the standard or standards of fineness, the Chamber considers that rupee silver should be adopted. If Assay offices are established, their location at the capital of each Presidency, and perhaps at Karachi, would, the Chamber thinks, be desirable.

It is observed that the Government suggest that these offices might be confined to the two Mints at Calcutta and Bombay; but the Chamber would represent that silverware is largely produced in the Presidency of Madras, and that great inconvenience would be experienced by the manufacturers at Madras, Trichinopoly, and elsewhere, if they had to send it at their own risk to Calcutta or Bombay for assay. The touchstone process will probably be the best test to be adopted. As for the fees to be charged and the distinguishing marks to be applied to the wares assayed, the Chamber is unable, for want of practical experience, to offer a useful opinion.

12.]

Dated London, 12th December 1890.

From—EDWARD J. WATHERSTON, Esq.,

To—The MARQUESS OF LANSDOWNE, G.C.M.G.

Hall-marking.

My attention has been directed to the action now being taken by the Government of India upon this subject, and I venture with much respect to express an earnest hope that the Government of India will make a vigorous protest against the principle of "compulsion" as applied to the marking of Indian plates and in favour of a voluntary system of marking by means of "the touch" which would permit finished goods to be marked here without the smallest injury to work, however elaborate. Some time ago I tested the respective systems of France and England in the case of two cups, the property of Messrs. Orr of Madras. One was sent to Goldsmiths' Hall, the other to Paris. The former was returned to me scraped and injured beyond hope of recovery; the other was returned with the bloom upon it, as it left my possession and I failed to see how it had been tested. Had I sent cup to Vienna, it would have been marked as well: there the system of the "touch" prevails.

It is not too much to say that our system with regard to finished goods is simply barbarous. Of course its origin was in the interests of protection, and protectionists support the principle now.

It is right that Your Lordship should know that the policy of the Board of Trade, as reflected by Sir Thomas Farrer and Dr. Giffen before the Select Committee of 1878-79, was, and there is reason to believe still is, a thorough free trade policy.

I am still at work in the direction of freedom, as will be seen by papers sent by same post, and in the coming session of Parliament Mr. Bradlaugh will press the subject upon the Government in his place in Parliament. I am very hopeful as to result.

All I hope is that the Government of India will help us by insisting upon the free entry of Indian plate into the United Kingdom, as now permitted under the Revenue Act of 1884, with a facility for those goods, if of '925, to be marked by "the touch" at the option of importer.

As at present advised, the Association which I represent is much against the introduction of a separate standard for India, *i.e.*, '916. It must be recollected that although the rupee is '916, solder would reduce the quality, and thus difficulties would arise day by day if '916 were adopted.

There should be a good margin, '900 for example. But if goods were stamped "Rupee Silver," or, in the case of goods known to be '925 full, "sterling 925-1,000ths," no hall-mark would be necessary.

The danger which I see before us, and which I earnestly wish to counteract, is that if our Government proceed to legislate in manner indicated by Mr. Goschen, good-bye to any near prospect of the abolition of "compulsory" hall-marking in this country.

For reasons which Your Lordship will see in papers sent, I should regard this as a catastrophe! I hold it to be absolutely essential to (a) abolish compulsion, and (b) to

adopt the system of "the touch" for finished goods. There are other reforms which I need not allude to, as they would be uninteresting to India.

In haste to catch this mail.

Reasons in favour of abolishing the principle of "compulsion," as applied to the Hall-marking of certain Gold and Silver Wares. [Received with the preceding letter.]

1. It is a recognised fact that hall-marking, one of the most ancient institutions of this country, is a good one, and there is not the slightest proposal for abolishing it. On the contrary, it is held to be certain that the proposed reform will strengthen the position of hall-marking, in the case of our home trade.

2. The following fact establishes this proposition. It is but little known that hall-marking now, under prevailing legislation, is partly a "voluntary" and partly a "compulsory" institution. By law, everything manufactured must be of British standards (of gold there are five, of silver there are two), and must be hall-marked, if not especially mentioned in lists of exemptions, 12 Geo. II., c. 26, and 30 Geo. III., c. 31. As a result, practically, jewellery is exempted; plate is liable; wedding rings are liable. By a recent decision of the late Mr. Justice Manisty, in case "*Buckley v. Alexander*," tried last year in Birmingham, all plain gold rings are liable.

3. These lists of exemptions, as may be imagined from their dates, are vexatious in the greatest degree. Every novelty is liable. Enterprise, therefore, is checked accordingly.

4. The fine for non-compliance with the law is £50 for every article.

5. But,—such is the respect on the part of the public for the hall-mark,—during the last ten years, 4,750,000 ounces of gold and silver wares have been marked under a voluntary system, and 6,600,000 under compulsory system.

6. It is argued, therefore, that if, only under the simple law of supply and demand, 4,750,000 ounces have been marked, it is quite certain that the public will still continue to demand, and to get, a hall-mark, in the case of 6,600,000 ounces, if they too be under a "voluntary" system of marking.

7. It is a fact, beyond the possibility of contradiction, that un-hall-marked plate is unsaleable in this country. It is manifest, therefore, that, if the law of "compulsion" were abolished, none would be made or imported. This gets rid at once of the fallacy that "the trade would be inundated with rubbish;" rubbish could not be marked; none, therefore, would be made or imported. Indian plate will sell, as it does now, on its artistic merits, without reference to exact intrinsic value.

8. The argument for abolishing the principle of "compulsion" is unanswerable; it absolutely prohibits the exportation of British-made plate to any countries, unless they are prepared to accept our British standard and our hall-mark.

9. But, foreign (Continental) countries want neither our standard nor our hall-mark. As shown by Parliamentary paper, No. 59, "Foreign Countries (Gold and Silver marking)," the standards of all Continental countries differ from ours, and, for the most part, theirs from each other, and nearly all have strict systems of marking, based, of course, upon their own standard or standards.

10. Therefore, as a result, our customers are limited. We do no trade with the Continent. Our only wholesale customers are India, Australia, the Cape, and South America, and our total exports to all countries never exceed about 100,000 ounces per annum—a mere bagatelle.

11. But even with our own colony, Canada, we do no business. Canada used to be a good customer. Shop-keepers prefer our standard, '925, but they will not have our hall-mark at any price, because years ago, when they did have it, it was forged by American manufacturers, and applied to wares of inferior quality, and thus it became a by-word and reproach. Canadians now buy in America, and insist upon the mark, "Sterling 925-1,000ths," which is easily protected in police or county court.

12. Directly we can mark as desired by Canada, this trade is at once recoverable, seeing that we can easily compete with American manufacturers; our rate of wages being, say, 40s to 45s. per week, against 20 to 22 dollars in America.

13. The only result, therefore, of reform will be to open the export door, now closed, to British enterprise.

14. The injustice of the present condition of the law is manifest, and can be seen at once upon reference to the Parliamentary paper, "Foreign Countries (Gold and Silver marking)."

15. The import door of this country is wide open to foreign manufacturers, if they make wares of our British standard, and like to avail themselves of our hall-marking facilities. They do so avail themselves.

16. The import door is also (by the Revenue Act, 1884) wide open to foreigners, upon a "voluntary" system of hall-marking, for plate of "Oriental" design:—Clause 4. "Arti-

cles of foreign plate, which, in the opinion of the Commissioners of Customs, may be properly described as hand-chased, inlaid, bronzed or filigree work of oriental pattern, shall be exempted from assay in the United Kingdom." If it be of standard '925, it can be sent for assay; if doubtful, it can be offered for sale as it is.

17. If sent to Hall, and it be found to be below standard, it is not smashed, but is returned to importer. If British-made plate be sent to Hall, and it be found to be wrong, it is smashed. If one hundred pieces be sent, and if, by accident or malice on part of a workman, one piece be wrong, the whole hundred or more are smashed.

18. But, in the case of foreigners, although they have strict systems of standards and marking for their own countries, manufacturers may make whatever they like for exportation.

19. So the British position is this:—Imports are permitted: exports are prohibited, excepting under such conditions as render trade absolutely impossible.

20. The trades in the precious metals are now governed by forty-two unrepealed Acts of Parliament: Mr. Goschen proposes, this year, to add a forty-third. The Acts all of course, "bristle" with pains and penalties.

21. Mr. Goschen proposes to give Indian manufacturers a new standard. Rupee silver '916. It might seem to be easy and politic to adopt this proposal; on the contrary, it would be difficult and most impolitic. Native workmen, it is true, work upon rupee silver; but they use "solder" in many degrees; some more, some less; so that to fix a standard would be most inexpedient. If Mr. Goschen's proposal were understood in India, it would be unanimously condemned.

22. It would also be impolitic, from a British standpoint, to extend the privilege of hall-marking to a quality lower than the British standard, '925.

13.]

Dated 12th February 1891.

From—G. HICKIE, Esq., Secretary to the Calcutta Trades Association,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

I am directed by the Committee of the Trades Association to acknowledge receipt of the Resolution of the Government of India in the Finance and Commerce Department, No. 5261, dated 5th November 1890, in which it is stated that Her Majesty's Government have repealed the duty on the importation of gold and silver plate into the United Kingdom, but have not complied with the proposal for the abolition of compulsory hall-marking. That Government have, however, it is added, proposed to legislate for the introduction of a system of Indian hall-marking under the authority of the Government of India, by which silverware bearing the Indian hall-mark should be admitted into the United Kingdom without being subjected to the British hall-mark regulations.

2. In connection with the above proposal, the Government of India request to be furnished with information on several points, and I have now the honour to place before you the conclusions which the Committee of the Association have arrived at in the matter.

3. In the first place, the Committee submit that it is greatly to be regretted that the full measure of relief for the Indian silverware trade, for which the Government of India and the various public bodies in this country have so earnestly sought, has not been granted. While the abolition of the duty only is doubtless calculated to lessen, to some extent, the disabilities under which the Indian manufacturer of silver goods has hitherto laboured in connection with the exportation of his goods to the United Kingdom, yet it must be held that the concession made is, at the best, of a very limited and partial nature, and that the matter has not been dealt with in the liberal spirit and with the thoroughness its importance required.

4. In regard to the introduction of a system of hall-marking in India, the Committee feel no hesitation in stating that the proposed measure would be both undesirable and inexpedient as being unsuited to the circumstances of the trade in this country, and to the conditions and means of the several classes of artificers engaged in it. The Committee are also of opinion that the adoption of the proposed system would be rather detrimental than otherwise to the trade, for the expense and trouble to which the manufacturer would be subjected would be considerable, and he would not unnaturally be led to regard the expense as a new form of taxation. The details which must attach to the working of the system, the distances to which goods would have to be sent to be hall-marked, the delays of transit, the locking up for the time being of the small capital of the artificers, and the enhancement of the cost of his goods, form a body of circumstances which must be held to be strongly unfavourable to the introduction of the proposed system.

5. The Committee are not unmindful of the fact that, on introduction, the system in question is proposed to be made voluntary and not compulsory. Nevertheless, it must be seen that if it be established at all, it must, in connection with the export trade, be recognized as a test of value, and that in such a case it must needs also affect to a material extent the interests of the manufacturer in the event of his not availing himself of the hall-mark for his goods.

6. In regard to the points submitted for consideration, I am directed to state :—

- (1) That if a system of hall-marking be introduced into India, the Committee are strongly of opinion that it should not be compulsory.
- (2) That as to the standard of fineness which should be adopted, the Committee would advocate the adoption of the rupee standard as being, in their opinion, the only one understood and acted up to by native artificers. The question of the difference between the English standard of fineness and the Indian rupee standard occupies a prominent place in the correspondence on the subject of the English plate duties; but it is admitted that the difference of the rupee standard as compared with the English standard is very slight, and the Committee submit that no substantial injustice would be done to the English buyer or manufacturer by the admission into the English market of goods of the former standard. It would, indeed, be difficult to lay down any other standard without causing considerable inconvenience to manufacturers in India.
- (3) That for the present, and until more experience has been acquired, the Assay offices should be located in the two Mints which, from their situation at the principal ports of exportation, would be the most convenient for Government and the trade. There might also be an additional office at Madras for silver manufactured in the southern Presidency. It is, however, very doubtful whether three offices will be sufficient for the whole of India, and the multiplication of such establishments must necessarily be attended with a large expenditure, the burden of which must eventually fall on the manufacturer.
- (4) That in regard to the process for assay, the Committee are in favour of the "scrape" as being the least objectionable process which is in any way reliable.
- (5) & (6) That as to the fees which should be charged, the Committee are unable at this stage of the question to suggest any particular scale of fees. The Mint and Assay Masters might, as proposed in the Resolution, be asked to deal tentatively with this matter, and with that of the affixing of distinguishing marks on the wares assayed.

7. On the points on which information is particularly asked, the Committee would respectfully submit, in regard to clause "a" of paragraph 11 of the Resolution, that trade with England, if hampered with a system of hall-marking, is likely to be so limited as to render the system practically inoperative: its introduction, therefore, would not be justifiable.

8. In regard to clause "b" of the above-quoted paragraph, the Committee have been unable to find any appreciable improvement in the manufacture of silverware intended for transmission to England, but the repeal of the duty can scarcely be said to be widely known yet, and there is still the uncertainty attending the necessity of hall-marking.

9. The terms of section 4 of Act 47 and 48 Vict., Cap. 62, do not seem to be generally known; but if they cover, as the Governor General in Council surmises, "most descriptions of silverware exported to England," the Committee are of opinion that now the duty is abolished the section, if made more widely known, is calculated to give the relief required.

10. In conclusion, the Committee fully endorse the declaration of the Government in the Resolution under notice, that a system of assay is "not desired by the trade in India, or by the purchasers of Indian gold and silverware, and that it would necessarily operate unequally and unfairly in a country of long distances, costly transit, and wide distribution of manufacture;" and they desire to add that the successful working of the system appears to them to be almost impracticable.

14.]

No. 292, dated 28th February 1891.

From—S. E. J. CLARKE, Esq., Secretary to the Bengal Chamber of Commerce.

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

The Committee of the Chamber of Commerce have had under consideration the question of the hall-marking in India of silver plate, dealt with in the Resolution of the Government of India, Finance and Commerce Department, No. 5261, dated 5th November 1890.

The Committee agreed with the conclusion expressed in paragraph 4 of the Resolution that it is not possible to adopt any system in this country of compulsory assay or hall-marking; at the same time they are of opinion that, when experience should have made Native silversmiths acquainted with the advantages of a system of hall-marking, such a system would prove beneficial to the trade in Indian silver work. They, therefore, think that it should be introduced but should be optional, and that no assay should be required for articles which under the English law do not require to be marked. The principle being admitted, details would have to be worked out as requirements might demand. (On

the points to which attention is drawn in paragraph 5 of the Resolution, the Committee would reply as follows:—

(1) The assay should be optional.

(2) India has already a standard of fineness for silver which is practically the standard adopted for the best silver work in all the Provinces.

The Committee think that, that standard being that of the rupee, should be maintained, a matter of general convenience and acceptance.

(3) It would be inconvenient for traders in Sindh, Madras, and Burma if Assay offices were located at the two Mints only.

The Committee are of opinion that the points for assay should be Calcutta, Bombay, Madras, Karachi, and Rangoon.

(4) This question might be left to the Mint Masters of Calcutta and Bombay.

(5) & (6) The question of fees and of the mark to be applied to wares assayed might also be determined by the Mint Masters.

As regards the latter, the simpler the mark used the better.

15.]

Dated Bangalore, the 6th February 1891.

From—MESSRS. ORR AND BARTON,

To—The Secretary to the Chief Commissioner of Coorg.

Your No. 1927—23290, dated 15th December 1890. We have carefully considered the questions in the Government of India Resolution of 5th November 1890, respecting a system of hall-marking for India-made silver plate, and we beg to submit that, in our opinion, honest traders would not find their interests served were the assaying process established in *this* country. But, recognizing the need for some guarantee of the quality of silver goods made in India for export to the United Kingdom, we would suggest that all such goods be subjected to assay at home, by the "touch" test, and that the standard of fineness be the rupee.

By adopting the "touch" trial there would be no possible damage to the articles treated which might then be readily saleable as imported.

16.]

Dated Madras, the 4th March 1891.

From—MESSRS. FRAMJEE PESTONJEE BHUMBARA,

To—The Secretary to the Chief Commissioner of Coorg.

With reference to your favour of the 2nd instant, I beg to inform you, and my candid opinion in favour of, regarding the proposed establishment by the Government of India, Financial Department, of the system of hall-marking introduced in India, it would be beneficial to the traders as well as customers, and they will be thankful to the Government if this scheme is passed. I did not reply you earlier, because I had already communicated my opinion to the Commissioner of the Financial Department of Madras a few days ago.

17.]

No. 807, dated 14th April 1891.

From—H. C. FANSHAWE, Esq., Offg. Chief Secy. to the Govt. of the Punjab,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

I am directed by the Lieutenant-Governor to reply as follows to the Resolution of the Government of India, in the Department of Finance and Commerce, No. 5261, dated the 5th November 1890, on the subject of a proposed system of assay and hall-marking of Indian silverware.

2. The manufacture of silverware in the Punjab is mostly confined to the jewellery and other articles worn or used by the people of the country. Little, if any, of it is exported in trade with the United Kingdom, and it may be said that the questions discussed in the Resolution above quoted have no practical significance in the province. The opinions of manufacturers and dealers residing at the places where such jewellery is principally manufactured in the province were invited, but none of value has been received, and the subject is not one on which much official opinion is forthcoming.

18.]

Dated 21st February 1891.

From—PRIYARI LAL, late Tehsildar and Honorary Extra Assistant Commissioner, Delhi.

To—The Deputy Commissioner, Delhi.

In compliance with your order I sent for a few dealers in silver articles, and asked them if articles of silverware were sent to England for sale, and I have come to know that no trade of silverware is carried on between this city and England, either direct or through Presidency towns, nor are silver plates, etc., made here for sale or for trade.

The travellers only purchase silver articles made at Lucknow or Kashmir from here, but no such articles are made here even for the sale to travellers and gentlemen visiting this city, nor are they generally exposed for sale.

As the manufacture of silver plates, etc., is not carried on in this city, the traders could not reply the other points noted in the papers circulated for opinion.

19.]

Dated 25th February 1891.

From—SRI KRISHN DASS, Banker of Delhi.

To—RAI BAHADAR RAMKISHN DASS SAHIB.

Having assembled some of the leading traders of this town in silver plate, and making enquiries respecting the matter referred to, I am told that no such trade is carried on between Delhi and England; that the remission of duty has not stimulated the production of silver plate, and that there is prospect of its increase for the future. Enclosures received with your favour of the 22nd are returned herewith.

20.]

Dated 21st January 1891.

From—MESSRS. E. GILLON & Co., Lahore.

To—The Deputy Commissioner, Lahore.

We beg to return the accompanying papers on the subject of the proposed compulsory assay of Indian silver plate on which our opinion has been invited.

We concur with Mr. W. Carlton Wood in his letter, dated 29th April last, to the Secretary of State for India.

We note that articles of foreign plate (including Indian, we presume) which in the opinion of Commissioner of Customs, may be properly described as hand-chased, inlaid bronzed or filigree work of oriental patterns, are exempted from assay in the United Kingdom. We believe that this is not generally known by the native silversmiths in India, and we do not think that there is much silverware exported to the United Kingdom which does not come within the foregoing descriptions.

21.]

Dated 6th February 1891.

From—MR. MAX MINCK, Lahore,

To—The Deputy Commissioner, Lahore.

With reference to the proposed compulsory assay of Indian silver plate, I would offer my opinion on this subject to the effect that, by introducing an Indian hall-mark on all gold and silver articles sold by European and Native jewellers, a great boon would be conferred on the public in general, as all risks of the sale of spurious goods, under the pretence of their being genuine, would be abolished.

I, as an old Indian trader, beg to state, from my own personal experience, that such counterfeit transactions are carried on in India in great many cases, for the simple reason that traders are not compelled to have a Government stamp put on their goods before they are offered for sale.

Regarding export goods manufactured in the Punjab, there is very little of it leaves India for England.

22.]

No. 156, dated 26th February 1891.

From—Secretary, Municipal Committee, Amritsar,

To—The Deputy Commissioner, Amritsar.

In reply to your endorsement No. 3, dated 5th January last, forwarding, for enquiry and report, Commissioner's Circular No. 222, dated 18th December last, and printed enclosures, relating to assay and hall-marking of silver plate of Indian manufacture, I have the honour inform you that the opinion of the members of the Municipal Committee acquainted with the subject is that—

- (i) there should be an optional assay;
- (ii) that the standard should be what is technically known as '916 or rupee silver;
- (iii) that for facility of marking there should be an Assay office in each province;
- (iv) the process for assay should be the "touchstone."

2. On points 5 and 6 of paragraph 5 of Government of India's Resolution No. 5261, no opinion is offered.

3. I annex copy of a reply to a letter addressed by me to the firm of Devi Sahai, Chumba Mull, who do a considerable amount of trade in silver plate. My reply has been delayed by the late receipt of their letter.

23.]

No. 281, dated 23rd February 1891.

From—MESSRS. DEVI SAHAI, CHUMBA MULL,

To—The Secretary, Municipal Committee, Amritsar.

In reply to your letter No. 30, dated 10th January 1891, we beg to state that we consider that—

- (1) there should be an assay of silver plates made in India and exported to England for sale, and that the assay should be optional;

- (2) that there should be one Assay office in each province ;
- (3) that the standard of fineness to be adopted should be rupee standard ; and
- (4) the process of assay we would suggest is the "touchstone."

24.]

No. 204-11 C., dated 11th April 1891.

From—C. G. BAYNE, Esq., Secretary to the Chief Commissioner, Burma,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

With reference to Finance and Commerce Department Resolution No. 5261, dated the 5th November 1890, concerning the hall-marking of Indian silver, I am directed to submit the following remarks. As directed in paragraph 13 of the Resolution, endeavours were made to ascertain the views on the subject of silver workers in Rangoon and Mandalay. The leading silversmiths in Rangoon were questioned and were found to be unanimously opposed to hall-marking. They represented that their business is confined to the manufacture of articles ordered locally, that they export nothing for sale, and that their trade would be in no way improved by the introduction of hall-marking. The principal silversmiths of Mandalay also were invited to express an opinion, but declined to do so on the ground that their trade is of a purely local character. They are reported to take absolutely no interest in the matter. Rangoon and Mandalay are the head-quarters of the silversmiths' trade in Burma, and the views of silversmiths in the rest of the province are doubtless the same as those of their fellow-craftsmen in the two principal towns. Under these circumstances it is not possible for the Chief Commissioner to submit any statement of the views of Burma silversmiths on the specific questions asked in paragraph 5 of the Resolution.

2. I am to submit the following observations on the questions asked in paragraph 5 :—

- (a) If an assay is introduced it must, so far as Burma is concerned, be optional. A compulsory system would operate most harshly in Burma, where silversmiths are found in all parts of the province. A law requiring articles to be brought for assay to distant centres would cripple, if not kill, the trade outside the centres in which Assay offices were established, and would cause great hardship and discontent.
- (b) Any standard which may be fixed should, in the Chief Commissioner's opinion, be one which would include silver-ware of average quality as at present manufactured by ordinary silversmiths. A high standard which included none but first class work would be open to the objection that it might cause excessive disturbance to the trade. Silver smiths in Burma, as elsewhere, obtain the raw material of their trade, as a general rule, by melting down rupees. Any standard which may be fixed should, in the Chief Commissioner's opinion, be based on the rupee standard, but should be slightly lower than that standard, in order to allow for solder and for the dirt which clings to rupees.
- (c) The only point for consideration, so far as Burma is concerned, under this head is whether there should be an Assay office in Rangoon or not. As all expenditure must be met from fees, an Assay office could not be established in Rangoon because the fees would not cover the expenditure. In view of the distaste with which the silversmiths of Rangoon and Mandalay regard the proposal to introduce hall-marking, it is certain that few articles would be brought to an Assay office in Rangoon and, consequently that the sum obtained from fees would be small.
- (d) The Chief Commissioner considers that the process of the touchstone is the process of assay which should be adopted in India. The other processes mentioned in paragraph 8 appear, for the reasons stated there, to be unsuitable.
- (e) & (f) The Chief Commissioner has no remarks to offer on the 5th and 6th questions asked in paragraph 5 of the Resolution.

3. With reference to the question asked in paragraph 11 of the Resolution, I am to observe that the prospect of the introduction of silverware into England without undergoing a destructive assay would have no effect on the Burma silver industry, because at present there is no trade in silverware between Burma and England. It is believed that the statements of the Rangoon and Mandalay silversmiths, which are given in the first paragraph of this letter, are fairly correct. So far as can be ascertained, silversmiths in Burma invariably work to the order either of their own countrymen or of foreign residents, and any Burmese silverware which leaves the country is taken out of it by private persons for their own use. Consequently the system of hall-marking in England has no effect on the Burma silver trade. Before the abolition of the silver duty there was no trade between Burma and England, and there is none now.

4. So far as Burma is concerned, the question asked in paragraph 12 of the Resolution cannot be answered. As there is no trade in silverware between Burma and England, no occasion has arisen for the application of the statute quoted. If a trade between Burma and England ever sprang up the section quoted would, it is believed, exempt almost all

Burmese silver-ware from assay. I am to enclose a copy of a memorandum* of Burmese arts and crafts which was drawn up in 1883, from which it will be seen that Burmese silverware is ordinarily hand-chased.

25.]

No. 396, dated 4th May 1891.

From—C. A. GALTON, Esq., M.A., C.S., Secretary to the Government of Madras,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

I am directed to forward the marginally noted proceedings of this Government, embodying a report from the Board of Revenue on the various points referred to in the Government of India Resolution, dated 5th November 1890, No. 5261 ^{State, and Com.} _{State.}, and to add that His Excellency the Governor in Council entirely concurs in the remarks and recommendations made by the Board.

26.]

No. 2819G., dated 18th December 1890.

From—W. P. AUSTIN, Esq., Acting Collector of Sea Customs, Madras,

To—The Acting Secretary to the Commissioner of Salt, Abkari, and Separate Revenue, Madras.

Resolution of the Government of India, No. 5261, dated 5th ultimo, Finance and Commerce Department, and enclosures.

In returning the marginally noted papers received with Board's Proceedings No. 3457, Mis. (Separate Revenue), dated 21st ultimo, I have the honour to report as follows:—

2. The papers open up two questions—

First.—Whether, since the repeal of duty on silver plate, the effect on the trade has been directly to increase the supply to England of articles intended for sale.

Secondly.—Whether the transmission by private parties, or the imports into England as private effects of articles not intended for sale, and therefore not requiring to be assayed, has to that extent benefited the trade indirectly so as to call for special legislation and the establishment of new offices involving expenditure, which can only be met from fees.

3. As regards the first, Customs statistics go to show that during the past three years

For 1887-88	.	.	.	Rs 10,820	there has been no substantial increase in the export of
1888-89	.	.	.	200	silver plate from this port to the United Kingdom, and
1889-90	.	.	.	10,650	the figures quoted in the margin do not disclose any tendency
1890-91	.	.	.		to a development of the trade since the abolition

of duty. Of the exports in 1889-90, there appears to have been only one consignment valued at Rs 6,500 belonging to Messrs. P. Orr & Sons, which presumably was intended for the English markets. The others were of trifling value, and were probably private packages.

4. I can form no estimate of the value of articles transmitted by private persons, or imported into England as private effects, and, with a view to ascertaining the extent to which the post had been availed of for the transmission of private parcels, containing valuables, to England, I addressed the Postmaster General, who, in reply, informs me his inability to supply me with the information, as declarations, giving particulars of contents presented by senders with foreign parcels, are forwarded to the officer of Exchange at Bombay, which sends them on to their destination with the parcels.

5. Passengers' baggage is not subject to examination, and I do not suppose that the abolition of duty on plate has made any appreciable difference on the supply so as to affect the trade indirectly.

6. As far as my knowledge of the Presidency goes, the Indian silversmith is, even at the best manufacturing centres of the petty trader class, lacking both the capital and enterprise to send his wares (which, as a rule, he only makes to order) to a market in England. Any system of hall-marking which may be introduced would therefore be for the special benefit of a few European and Parsee firms in Madras; and if the fees realized from them to maintain an establishment are prohibitive, which they must necessarily be with the small demand there can be for Indian plate in England with the existing system of exemption from hall-marking of wares imported into the United Kingdom for private use and not for sale, I am inclined to think that one Assay office in Bombay should suffice, the exporter wishing to place his wares in the English market having the option of assaying and hall-marking there, or in England, as suits him best.

27.]

No. 442 G., dated 25th February 1891.

From—W. P. AUSTIN, Esq., Acting Collector of Sea Customs, Madras,

To—The Secretary to the Commissioner of Salt, Abkari, and Separate Revenue, Madras.

In reply to the Board's reference on G. R. No. 11337, dated 9th instant, I have the

1890-91, up to 31st December 1891,
Rs 4,000.

honour to annex in the margin figures showing the exports of silver plate during the current official year up to 31st January, the whole of which would appear from

* Not printed with these papers.

the addresses recorded in the shipping bills, to have been private property not and merchandise; and to observe that, of the exports during 1889-90—figures for which have already been furnished—a single shipment of ₹6,500 worth of plate appears to have been made about the end of March by Messrs. P. Orr & Sons, probably with a view to its arriving in England after the repeal of the duties.

2. No definite reasons can be urged for the entire absence of exports in 1888-89, but it may have been due to an overstocked market.

No. 28.] *Extract from the Proceedings of the Board of Revenue, Madras, No. 877 (Misc.), dated the 21st March 1891.*

RESOLUTION.—The Board has the honour to submit the report called for in G. O. dated 18th November 1890, No. 7070, regarding the hall-marking of Indian silverware in India.

2. With reference to the points noted in paragraph 5 of the Government of India Resolution of 5th November 1890, No. 5261 (Finance and Commerce Department), the Board entirely agrees with the Government of India that any assay to be introduced in this country should be optional, and that the method adopted should be that of the touchstone.

3. The standard of fineness to be adopted should be somewhat below that of the rupee, as the Indian workman almost invariably uses rupee silver, and allowance has to be made for solder and for the dirt adhering to the coins melted down. The rupee standard being '916, the assay standard might be '900. This standard is, the Board believes, that adopted by most of the countries in continental Europe, while some of them, *e.g.*, France and Spain, have a standard considerably lower.

4. Assuming that the assay is to be optional, and that the touchstone process which does not involve the return of the goods for finishing after marking is adopted, the Board consider that it will be sufficient to establish Assay offices at the two Mints of Calcutta and Bombay. The export of silver plate from India for trade purposes is mainly confined to the Presidency towns, and it would be no hardship to Madras exporters, wishing to get their goods hall-marked, to send them *via* Bombay. The fees which would have to be charged to maintain an independent Assay office at Madras or elsewhere would probably be prohibitive, while those in connection with Mints could be worked much more economically. As regards the amount of fees to be charged, that must be left to the Mint and Assay Masters, who can alone judge of the cost of the extra establishments which will be required to report on. The fees should of course be limited to the recovery of such cost, and the rates must necessarily be tentative.

5. The distinguishing mark to be applied to silverwares assayed in India is a matter for experts to determine; some distinctly oriental emblem, such as the lotus on the elephant, would be preferable.

6. With reference to paragraph 11 (a) of the Government of India Resolution, the Board is not very sanguine that the establishment of an assay in India, in lieu of the hall-marking now required in England, will cause any large expansion in the export of silverware to the latter country. But it seems advisable to try the experiment. It will remove a grievance of which the Indian exporters at present complain, and if purely optional and worked on the lines suggested by the Government of India, it can do no harm.

7. With reference to the question asked in paragraph 11 (b) of the Resolution, it will be seen from the letters of the Collector of Sea Customs read above, that the statistics available are not such as to furnish any satisfactory answer. The Board thinks that the repeal of the plate duties is still too recent to enable a valid judgment to be formed of its effects, but it will no doubt give a certain stimulus to export, more specially on the part of private persons sending home articles not intended for sale. It must be remembered, however, that to such persons the silver duty would, as a rule, probably not be of much account, because the individual values are, as a rule, comparatively small.

8. In regard to paragraph 12 of the Government of India Resolution, the Board understands from enquiries made that the exemption allowed by section 4 of 47 and 48 Vict., Cap. 62, does not grant the substantial relief that it appears to do, since most of the articles exported contained portions which are *not* hand-chased, etc., and in such cases the exemption is held not to apply. It must also be remembered that buyers in England attach much importance to the hall-mark as a guarantee of quality, and that articles unmarked, owing to the operation of this section, would probably not unfrequently be looked on with suspicion.

No. 395, dated 4th May 1891.

Order on the above by the Government of Madras.

Ordered to be forwarded to the Government of India.

29.]

No. 556 G., dated 13th April 1891.

From—T. CHICHELS PLOWDEN, Esq., Commissioner, Hyderabad Assigned Districts,
To—The Secretary for Berar to the Resident at Hyderabad.

With reference to the Government of India Resolution No. 5261, dated the 5th November 1890, forwarded to me for opinion under

No. 291, dated 2nd February 1891, from Deputy Commissioner, Wun.

No. 400, dated 7th February 1891, from Deputy Commissioner, Buldana.

No. 370, dated 14th February 1891, from Deputy Commissioner, Akola, with enclosures.

No. 541, dated 15th February 1891, from Deputy Commissioner, Basim.

No. 168, dated 10th March 1891, from Deputy Commissioner, Ellichpur.

No. 1836, dated 26th March 1891, from Deputy Commissioner, Amraoti.

your endorsement No. 3998, dated 11th December last, I have the honour to submit copy of the letters cited in the margin from the Deputy Commissioners, whom I have consulted on the matter.

2. No silverware other than of the most ordinary description is manufactured in the Hyderabad Assigned Districts, and the interests of the Province will not be affected one way or the other by the adoption of a system of Indian hall-

marking for Indian silver plate intended for export and sale.

3. I should think that the assay should certainly be optional and not compulsory; that the method should be that of the touchstone; and that, so far as this part of India is concerned, it will be quite sufficient to have an office of Assay at Bombay.

30.]

No. 291, dated 2nd February 1891.

From—A. ELLIOTT, Esq., Deputy Commissioner, Wun.

To—The Commissioner, Hyderabad Assigned Districts.

In reply to your endorsement No. 8098, dated 22nd December 1890, I have the honour to report that there is no exportation of Indian artware in the precious metals to England from this district.

2. There are no dealers, traders, or collectors in this district who purchase articles of Indian artware in the precious metals for transmission to England for sale, and none of the sonars, gold and silversmiths, consulted had ever heard of English assay and hall-marking, and state that their business is unaffected by its existence, and would be unaffected by its abolition. The questions put in paragraph 11 (a), (b) of Government of India Resolution No. 5261, dated 5th November 1890, in the Finance and Commerce Department, may, therefore, as far as this Department is concerned, be answered in the negative.

31.]

No. 400, dated 7th February 1891.

From—COLONEL H. C. A. SZCZEPANSKI, Deputy Commissioner, Buldana,

To—The Commissioner, Hyderabad Assigned Districts.

With reference to your office No. 8055, dated 22nd December 1890, asking for opinion, after consulting such officials and non-officials as may think fit, and the subject dealt with in the Government Resolution No. 5261, dated 5th November 1890, I have the honour to state that I asked Mr. Harbanji, Officiating Assistant Commissioner, for his opinion, which I herewith forward. As there is no trade in silverware to England from this district, I am unable to submit the opinion of any person who is concerned in the matter, and whose opinion therefore might be expected to be of value.

2. Personally, I admit that I know nothing about the subject, so, not pretending to speak from knowledge, but as a mere matter of opinion, I think it would be quite impossible to make the assay of silver plate compulsory. It would smother what trade at present exists, which, instead, requires encouragement. With assay available, but optional, the increased value of assay-marked articles would make itself felt; and if assay was available in the centres where this kind of ware is produced, no doubt assay-marking would gradually become general.

3. I can give no opinion as to what standard of fineness should be adopted.

4. As above stated, Assay offices should be located in the centres where silver plate-ware is produced, otherwise I doubt if any of the up-country work would ever be submitted for assay by the producers. The touchstone process is clearly the one best adapted to the circumstances in India; a variation of one per cent. would not form a practical objection to this process.

5. I am unable to give any opinion as to what fees should be charged or what marks should be applied; but on the latter point, perhaps, the same kind of mark might be issued in India as is used in England, substituting a tiger's head for the lion's.

32.]

No. 7330, dated 14th February 1891.

From—The Deputy Commissioner, Akola,

To—The Commissioner, Hyderabad Assigned Districts.

In reply to your No. 8064, dated 22nd December 1890, regarding the hall-marking of silver plate, I have the honour to forward the opinion given by Rao Sahib Deorao Vinayek,

Pleader, and Mr. Ganesh Bapuji, Tehsildar of Akola; and to state that in my opinion I consider such a process will hamper the export trade, and probably the local trade will be affected thereby, because the great body of artificers in silverware are dispersed all over the country, generally in villages remote from where an Assay office could be located. From what I can see, the only measure which can possibly free the Indian silver trade from restrictions would be the abolition of hall-marking altogether.

33.]

No. 439, dated 11th February 1891.

From—GANESH BAPUJI, Tehsildar of Akola, and RAO SANIB DEORAO VINAYEK, Pleader,
To—The Deputy Commissioner, Akola.

With reference to your endorsement, dated 13th January 1891, on Government of India's Resolution No. 5261, dated 7th November 1890, asking us to give opinion on the subject taken up by the Government of suggesting a system best suited to the circumstances of the country for guarding against improper admixture in gold and silver Indian manufacture exported to England for sale, we beg to say that Berar is the last province in our opinion to be in any way affected by any system, as to our knowledge there are no articles prepared here for export. We are therefore unable to ascertain and give the mercantile views on the subject. Neither have we studied it in all its details, nor are there any means enabling us to do so.

The plate duty was unpopular in this country, and the Government of India were thoroughly cognizant of this fact. They had, as the Resolution would show, exerted and succeeded ultimately in getting the said duty repealed by Her Majesty's Government in England. We have here the free trade principle adhered to, and, when we see any restrictions imposed on free trade, it is in our humble opinion contrary to the principle. In this behalf we have to remark that since Her Majesty's Government have been pleased to do away with the duty, it is desirable that hall-marking should also be given up altogether.

In these days of free and equal competition in trade it would be fair to leave the matters alone. Law of supply and demand will, in this as well as in other manufactures of all countries, protect its own interests. To have some system to scrutinize articles made here, either in India or in England, whether compulsory or optional, is an unnecessary block to the trade in addition to its benign quite opposed to the free-trade policy, and we therefore trust the Government of India will kindly continue on behalf of this country agitating against introduction of any system.

34.]

No. 168, dated 10th March 1891.

From—H. DE P. RENNICK, Esq., Deputy Commissioner, Ellichpur,
To—The Commissioner, Hyderabad Assigned Districts.

With reference to your No. 8067 of the 22nd December last, I have the honour to state that the opinions of the several officials and non-officials whom I had consulted have just reached me. The consensus of opinion is that—

- (1) The assay should be optional.
- (2) The standard should be the rupee standard.
- (3) There is a great diversity of opinion as regards the location and number of Assay offices, one non-official going so far as to suggest "that Assay offices should be 100 miles from one another, and where there is railway communication, about 200 miles distant."
- (4) The process of assay be by scraping.
- (5) No opinion can be given as regards fees.
- (6) The distinguishing marks be "the name of the Assay office," with the addition of the word "India."

2. As regards my opinion, I have to state that the game is not worth the candle, for it is the case that no Indian plate proper, table appointments, and such like would ever find a large sale in the United Kingdom, because it has not the finish nor symmetry of English-made articles of the same kind. There may be occasional imports of fancy articles for private use; whether this would largely affect the trade, I have my doubts. This last remark would be equally applicable for articles for personal wear.

35.]

No. 1836, dated 26th March 1891.

From—E. J. GUNTHER, Esq., Deputy Commissioner, Amraoti,
To—The Commissioner, Hyderabad Assigned Districts.

With reference to your endorsement No. 8036, dated 22nd December 1890, forwarding, for opinion, copy of Resolution of the Government of India in the Finance and Com-

merce Department, No. 5261, dated 5th November, relative to the abolition of the English plate duties, and, as a consequence of this measure, the proposed establishment of a system of hall-marking in India, I have the honour to reply as follows to the several queries contained in the Resolution :—

- (1) Should the assay be compulsory or optional? There can be no doubt that, as suggested by His Excellency the Governor-General, should an assay be introduced, it would be well to make it optional, and not compulsory. Optional hall-marking would not affect the trade in any way, whereas a compulsory system would involve hardships and greater expense upon manufacturers in outlying districts besides hampering the trade considerably.
- (2) What standard or standards of fineness should be adopted? In my opinion, and those whom I have consulted, the Indian rupee standard would be the best that could be adopted. Indian silversmiths use our rupee coins to a large extent in the manufactory operations, and when bar silver is used, add a quantity of tin alloy, so that the rupee standard which contain a small alloy, probably 2 per cent., would fully meet all requirements.
- (3) Where should Assay offices be located? At the two Mints only, or at other centres also. Seeing that Bombay is in close proximity to the several districts in Berar, at Bombay would be all that we needed.
- (4) What process for assay should be adopted? Of the various methods adopted in most countries, and which are described in the Resolution, the *touchstone* process, which is simple and does not injure the ware, would answer all practical purposes.

2. The fifth and sixth questions have to be answered by the Mint and Assay Masters; but I would here note that the fees to be charged should be a very small percentage on the value of the article, and the distinguishing mark to be used should be on that part of the article which is not easily observable, and might consist of the letter "I", which would denote both Indian assay and Indian manufacture.

3. With reference to paragraph 11 of the Resolution above quoted, I have the honour to state that, in so far as my district is concerned, I do not anticipate in the least the slightest prospect of a greater trade with England in the precious metals, even if the British Hall-mark Regulations were rescinded, but in large manufacturing centres, I have no doubt that advantageous results would follow; and as regards the enquiry whether there has been any substantial increase directly in the supply of articles for sale in England, since the repeal of the duty on silver plate, it seems to me that it must have had the effect of stimulating trade both privately and publicly; and statistics, which will be available in the Presidency towns, will confirm what I say.

36.]

No. 790, dated 6th April 1891.

From—RAJA AMAR SINGH, President of the Kashmir State Council,
To—The Assistant Resident in Kashmir.

In continuation of my letter No. 1528, dated 29th December last, I beg to enclose copy of a letter No. 136, dated 12th idem, from W. R. Lawrence, Esq., to whom the enquiry was entrusted, and of the vernacular letter signed by the chief workers in silver plate of Srinagar, expressing their views on the hall-marking question. I hope the Government of India will kindly pay due regard to the representations of the silversmiths of Kashmir in deciding the hall-marking question, with a view to encourage the trade of Kashmir in silver plate, for which it is so well known from olden times.

2. I have not been able to elicit further information from the enquiries I made after the receipt of the papers submitted herewith.

37.]

No. 136, dated 12th December 1890.

From—W. R. LAWRENCE, Esq., Settlement Officer, Kashmir State,
To—The President of the Kashmir State Council.

With reference to your letter No. 1370 of the 26th ultimo, I have the honour to report that I assenbled the chief goldsmiths of Srinagar on December 6th, and explained to them the purport of the Resolution of the Government of India, No. 5261, dated November 5th, 1890. I also handed to them a translation which they promised to consider. On the 11th instant the goldsmiths again attended my office, and on the 12th instant I had another interview with them, and I now forward their opinion for your information, with the following brief remarks, which are founded upon notes taken during the three interviews I had here with the representatives of the gold and silver plate industry in Kashmir.

There are four important houses of gold and silversmiths in Srinagar in the hands of Habibju, Nabju, Kudju, and Sabhanju. Some ten years ago copper work came into

fashion, and these four houses, who then employed 195 men in the manufacture of silver, now have only hundred men at work. They say that the trade in silver plate has fallen off by one-half, and that it is steadily falling off, and the practice of electro-plating copperware is causing injury to the silver industry.

Silver is brought to Kashmir from Yarkand in the form of bars, known to the trade as *Youn*, and from Amritsar in large wedges, known as *Hatipur*.

The latter is the purer kind of silver, but the difference is trifling, amounting to one anna in twenty rupees.

As will be seen from the enclosure in vernacular,* there is no direct trade with England, and the manufacturers in Srinagar merely work on orders given by European visitors. They are, however, alive to the fact that recent legislation may eventually lead to a direct export to England, and they are quite ready to accept any system of marking which can be adopted, provided that such system does not involve the expense and risk of sending unsold articles out of Srinagar. They prefer the *touch* system (Kaswati), though at present this system is only applied to gold, and they would welcome any assay, not only in the hope that this might lead to a trade with England, but also as a means of avoiding disputes with European visitors in Kashmir, regarding the standard of fineness.

They would adopt as a standard of fineness the British rupee, and they are prepared to meet the difficulty offered by the use of solder.

Finally, they would prefer that any system of assay which may be introduced should be compulsory, not optional. The preference is, I think, based on a feeling of mutual distrust, and is due to the wish that if any vexatious restrictions followed on the introduction of a new system, they should apply equally to the whole trade.

With reference to the information asked for in paragraph 11 of the Resolution of the Government, it may be said in regard to (a) that at present the English market is a matter of indifference to the Kashmir trade, but that the Srinagar manufacturers recognize the fact that a trade may spring up in consequence of the repeal of duty on the importation of silver plate; and in regard to (b) I have to report that the manufacturers declare that up to the present they were ignorant of recent legislation, and that there has been no substantial increase in the output of silverware.

I need hardly observe that the Kashmir gold and silversmiths under-estimate the dimensions of their trade, but I think their statement that legislation has not stimulated production this year may be accepted.

You are good enough to ask me for my own opinion on the subject, but as I know little of the subject, and as I have hitherto had no opportunity of making myself acquainted with the artwares of Srinagar, I offer the following opinion with diffidence.

I think that the assay should be optional; that there should be only one standard of fineness, and that the British rupee; that the Assay office should be in Srinagar, and that the touchstone should be the process.

My reason for suggesting that the Assay office for Kashmir silver plate should be located in Srinagar is that the distance to India is so great that if any optional system of assay is adopted, it will be inoperative in Kashmir if the Assay office is located at any Indian centre. It seems to me that, considering the distance of Kashmir from the Railway, it might be advisable to have a distinguishing mark for Kashmir silver plate as a separate article of trade, and it also seems to me that the State has establishments where the touchstone process could be followed with satisfaction to the manufacturer and purchaser.

It might result that Kashmir silver plate would neither command the confidence nor the price in England which would be obtained by India silver plate assayed at the Mints, but this disadvantage would be more than made up for by the absence of trouble and risk which would be caused by sending Kashmir silverware to a distant Assay office.

38.] Translation of a letter, dated 12th December 1891, submitted by SUBHANJU, HABIBJU, and KUDJU, gold and silversmiths of Srinagar.

We most respectfully beg to state that we have perused the translation of the Secretary of State for India's letter No. 45, dated 15th May 1890, which we had received from you (Mr. Lawrence), and we beg to state as follows:—

- (1) That we pray for Her Majesty the Queen Victoria and the Empress of India in that Her Gracious Majesty repealed the duty on the importation of silver plates, etc., to England, which will produce a good result for the increase of trade of the whole of India, and especially of Kashmir;
- (2) That we are not traders in Kashmir, but we manufacture gold and silverwares, and that we do not export our trade articles to England, but we prepare them in accordance with the orders of their purchasers;
- (3) That during winter we prepare gold and silverwares in our workshops worth Rs. 2,000 as samples, and that in spring we show them to the European visitors in Kashmir, and that in accordance with the orders received from European gentlemen we manufacture silver articles, etc., for them within the promised time;

* Translation only printed.

- (4) That the value of the whole gold and silverwares, etc., manufactured during summer by the orders of the gentlemen is about Rs20,000, on which we all earn Rs3,000 or 4,000 for our labour or manufacturing ;
- (5) That the trade in silverwares is daily falling off, as the European gentlemen prefer to purchase electro-plated copperwares instead of silver plate, and owing to this the trade of copperwares is on the increase ;
- (6) That we agree to get our silver plate marked, but we pray that the Assay office be established in Kashmir ;
- (7) That we have adopted as a standard of fineness of silver the British rupee, and for this we often give written guarantees for our silverwares to European gentlemen ;
- (8) That in Kashmir to test the silver of some plate we scratch a little silver from the plate, and putting it in a little clay basin put in fire and test the silver, and that if it be tested by *touchstone* the difference will be of Rs1-4 per 100 ;
- (9) That in summer when European visitors come to Kashmir, they order us to prepare silverwares for them within eight days or some time more or less than this period. So if our wares will be sent to some distant Assay office it will take a month at least to get them back, and that owing to such a delay the purchaser of our wares will not wait and they will remain with us unsold. Accordingly, it will be much better for us that Assay office be established in Kashmir ;
- (10) That by our sending silverwares to some Assay office for marking, we have to incur the postage of the British and Kashmir State Post Offices, and also for insurance ;
- (11) That we agree that gold and silverwares be marked in accordance with the order issued by the officials.

39.]

No. 83 T. F., dated 2nd June 1891.

From—H. H. RISLEY, Esq., Offg. Secretary to the Government of Bengal, Financial Department,
To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

I am directed to acknowledge the receipt of the Resolution of the Government of India, No. 5261, dated 5th November 1890, inviting an expression of the views of this Government regarding the introduction of a system of hall-marking silver plate in India.

2. In reply, I am directed to submit, for the information of the Government of India, the enclosed copies of letters from the National Chamber of Commerce and from the Commissioner of Dacca, containing their views on the subject ; and to say that, with regard to the points enumerated in paragraph 5 of the Resolution, the Lieutenant-Governor generally concurs in the opinion expressed by the Chamber, except that, so far as Bengal is concerned, it does not seem necessary at present to consider the question of establishing Assay offices anywhere except at Calcutta. Silverware exported from Bengal is, as a rule, despatched from Calcutta, and the process of having it assayed by touchstone at the Mint there would, it is believed, present little practical difficulty.

3. If the elaborate system of assay marks adopted in England is to be followed in this country, it would apparently be necessary to adopt some characteristic mark, such for example as an elephant's head, to denote the fact of assay, and other marks to indicate the place of manufacture and date. It may seem superfluous to enter upon such details, but it is well known that a mark may exercise considerable influence on the prospects of a trade, and there may possibly be advantages in distinguishing place of manufacture, e.g., Orissa, Dacca, Delhi, Lucknow, Trichinopoly, all of which in some measure use different processes and turn out distinct and characteristic styles of work.

40.]

From—SITA NATH RAY, Honorary Secretary, Bengal National Chamber of Commerce,
To—The Secretary to the Government of Bengal, Financial Department.

I have the honour, by desire of the Committee of the Bengal National Chamber of Commerce, to acknowledge with thanks the receipt of your favour of the 19th November last, No. F.2—D -7, forwarding copy of a Resolution of the Government of India, No. 5261, dated the 5th November 1891, regarding the proposed establishment of a system of hall-marking of silver plate in India, and inviting an expression of Native opinion on the subject. In reply, I beg to observe that the Committee have been at considerable pains to ascertain, as far as they could, the opinions of intelligent Native artists on the points set forth for enquiry, and the conclusion they have arrived at from such enquiries is, that the large class of Native silversmiths, for whose benefit the proposal has been made, do not, at present, seem to appreciate the advantages that are likely to accrue from the proposed establishment of hall-marking. They seem to labour under a misapprehension that, with their present scanty knowledge of the wants and demands of the European market and of their admitted inability to compete with the more wealthy European firms of the Presi-

dency towns who can always command higher and more skilled labour, there would be but slight chances left to them of making a profitable bargain under such keen competition; nevertheless the more advanced among them are of opinion that if the proposed system of hall-marking is established in India, it will be the means of settling all cases of disputes and differences in respect of the quality and value of the articles manufactured here, and that gradually it will have the effect of stimulating the more enterprising and energetic men of their class to enter into competition with European manufactures in selling silver articles of their making in English markets.

With reference to the several questions formulated in the Government Resolution, the opinions of the Native artists are generally in accord with those entertained by the Committee of the Chamber.

With regard to the first question, the opinion of the Committee of the Chamber is that the assay should be optional and by no means compulsory, otherwise it would have the effect of hampering and ultimately destroying the trade in silverware, especially that carried on in outlying places, far off from the two Mints.

Their opinion on the second question is that as silver of finer quality is not at all available in the mofussil, it would be to the advantage of trade if the standard of the rupee were adopted.

With reference to the fourth question, the Committee of the Chamber are of opinion that the only practical and convenient process open in this country is that of assay by means of the touchstone, for in a country of such large distances, where the silver artists are very poor, living from hand to mouth, the worry and trouble, and the heavy costs incidental to the several transits of the wares to the Mints, and the necessity of insuring them as often, are all insuperable obstacles in the way of adopting any other method. Again the adoption of any other method, the Committee beg to submit, would place the silversmiths living in the Presidency towns at a great advantage over their rival artists living a long way off.

With reference to the third question, the Committee are of opinion that if the test by touchstone is adopted, there would be no occasion for entertaining costly establishments for assay, and that much less costly offices for assay might be established at a few other centres besides those at Calcutta and Bombay.

The opinion of the Committee on the fifth question is that the fee should not at present be above one per cent. on the value of the articles to be assayed. The imposition of a higher scale of fees would deter people from resorting to any office for assay.

With reference to the last question, No. 6, the opinion of the Committee is that the word "India" should be affixed to silverwares of the country as a distinguishing mark.

41.]

No. 8 T., dated 10th April 1891.

From—J. BOXWELL, Esq., Commissioner of the Dacca Division,

To—The Secretary to the Government of Bengal, Financial Department.

I have the honour to reply to your No. F.2-D.—7-2, dated 19th November 1890.

2. I have now received reports from all the districts, that from Dacca having come in on the 31st ultimo.

3. The two districts of Faridpore and Backerganj are practically mute. The Backerganj gold and silversmiths would never dream of sending articles for assay unless it was compulsory, and would greatly dislike compulsory assay. Faridpore simply protests against compulsory assay.

4. From Mymensingh and Dacca something more is obtained. Mr. Phillips says the Mymensingh tradesmen did not readily take in the idea of assay, and were suspicious of it as of some new method of taxation.

5. He himself, however, answers clearly—

- (a) that the standard of fineness should be the rupee;
- (b) that assay should be by the touchstone;
- (c) that the fee should be one per cent. *ad valorem*;
- (d) that assayed wares should bear the mark "India";
- (e) that assay should be permissive.

6. From Dacca Mr. Hare says very much the same. The Dacca tradesmen are generally content that there should be a permissive system of assay, but they wish to have an office in Dacca.

7. They do not seem clearly to understand the question, because they at the same time wish for the touchstone process, and fear transit cost. But the touchstone process is intended expressly to save transit cost.

8. The fee proposed is one per cent. *ad valorem*, and the word "India" or "Bengal." Mr Hare adds, "the abolition of the duty on silver plate has been appreciated by the manufacturers."

9. Therefore I subscribe to Mr. Phillip's proposals, and think the adoption of the touchstone process makes an office in Dacca, or anywhere outside the Presidency town, unnecessary.

42.]

No. 1410, dated 17th June 1891.

From—The Hon'ble J. WOODBURN, Chief Secretary to the Government of the N.-W. Provinces and Oudh,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

With reference to Finance and Commerce Department Resolution No. 5261, dated

(1) From Commissioner, Benares, No. ¹¹³⁰³XIII-4439, dated 21st November 1890.

(2) From Secretary, Upper India Chamber of Commerce, dated 2nd January 1891, with enclosures.

(3) From Commissioner, Agra Division, No. ²²¹⁷XIII-29, dated 12th January 1891.

(4) From Commissioner, Lucknow, No. ³³XII-4, dated 14th January 1891.

(5) From Director of Land Records and Agriculture, North-Western Provinces and Oudh, No. ³⁵35, dated 3rd April 1891, with four enclosures.

5th November 1890, I am directed to submit, for the information of the Government of India, copies of the papers marginally noted, containing the opinions obtained by this Government on the subject of the proposal to introduce into India a system of hall-marking of silver plate.

2. The total value of silver articles annually exported to England from these Provinces is estimated by the Director of Land Records and Agriculture to be not more than ₹24,000, of which the greater portion is purchased by private persons, and is not intended for sale in England. There are no firms who export silver-made articles except on a very small scale; and there is so far no evidence that the repeal of the duty on silver has affected the trade in these Provinces. This trade is indeed so backward and so small that it would probably not be materially modified by any system of optional assay that might be introduced.

3. The Lucknow work, which comprises over 80 per cent. of the silver exports, is certainly "hand-chased," and is therefore probably exempt from hall-marking; but the trade is so insignificant that it has not been possible to discover what the practice on arrival in England is. The highest fees in assay that could possibly be levied would not pay for the maintenance of an assay office in these Provinces; and therefore if any system of assay is introduced, these Provinces will be at a disadvantage as compared with those in which assay offices may be established, but will not be materially injured. From the point of view of these Provinces, therefore, no specific reply is sent to questions 2 to 6 contained in paragraph 5 of your letter, while the reply to the two points indicated in your 11th and 12th paragraphs will be found in the foregoing remarks.

43.]

No. 11303-XIII-442, dated 21st November 1890.

From—G. ADAMS, Esq., Commissioner, Benares Division,

To—The Chief Secretary to the Government, N.-W. Provinces and Oudh.

I have the honour to acknowledge your No. 1876 I-686 A., dated 14th instant, calling for an opinion on the subject of the hall-marking of Indian silver.

2. I cannot profess to have any particular acquaintance with the trade in Indian silverware, but I believe that Indian silverware reaches England in two ways only—

First—transmitted to England by persons who purchase it here otherwise than for sale;

Second—by large firms, mostly, if not all, European, who purchase from the actual manufacturers.

The matter concerns the actual manufacturers so far only as the presence or absence of a hall-mark might affect the sale of Indian silverware in England, thereby affecting the demand of the exporting firms.

3. It has been accepted by the Government of India that compulsory hall-marking in India is not to be thought of; while it seems very evident that under the circumstances of the trade the assay by the touchstone is the only practicable method of determining the fineness of the silver. But having regard to the native methods of manufacture, there might, I imagine, be considerable practical difficulty in fixing a standard without interfering with trade. This difficulty has been noted by Mr. Carlton Wood. It seems to me that it would be sufficient if Indian silverware, all kinds of which now exported would, I believe, come under the terms of section 4 of 47 and 48 Vict., cap. 62, should simply bear a stipulated mark as suggested by Mr. Carlton Wood.

44.]

No. 33-XII-4, dated 14th January 1891.

From—H. D'O. MOUTER, Esq., Commissioner, Lucknow Division,

To—The Chief Secretary to Government, N.-W. Provinces and Oudh.

In reply to your No. 1876 of the 14th November, I have the honour to forward a note drawn up by Mr. Cobb, the City Magistrate of Lucknow.

2. From that note it appears that there is at present no direct export of silver goods from Lucknow to England. Our local silversmiths are, therefore, not immediately interested in the question of a hall-mark. Nevertheless the trade is said to be on the increase and doubtless more English travellers and residents will take home silverware with them now that the import duty has been removed.

3. On the general question, I should say that it would be best if the proposal contained in Mr. Wood's last paragraph but one could be accepted, *vis.*, that Indian plate exported to England should be stamped with a simple mark showing it to be Indian; and then allowed free sale without assay. Purchasers would buy at their own risk and could take their own precautions against fraud, just as they have to do out here.

4. If this cannot be allowed, then I can only say that any assay that may be fixed on should of course be optional, and of the rupee standard. On other points mentioned in the Government Resolution, I do not feel qualified to offer an opinion.

5. Reverting, in conclusion, to Lucknow, I would observe that almost all the silver goods manufactured here would certainly fall within the description "hand-chased."

45.]

Dated the 19th December 1890.

From—W. H. COBB, Esq., City Magistrate, Lucknow,
To—The Commissioner, Lucknow Division.

I have consulted the leading Lucknow silversmiths. There are only four or five firms which do business to any considerable extent. Rs. 4,000 would probably represent the average monthly value of silver articles manufactured in Lucknow. There is no export. All the plate that is sold is sold in Lucknow itself, and only that finds its way to England which is purchased by European ladies and gentlemen for themselves or for their friends. The trade, however, is on the increase.

Their views are as follows:—

Point (2). "Messrs. Orr's representations do not apply to us. The silver we use is purer than English hall-marked silver. We *can* purify silver. We find it difficult to work in alloyed silver: pure silver is much softer. We are quite prepared to submit our plate to be assayed according to a standard of fineness equal to the hall standard."

Points (3) and (4). "We are of opinion that the touchstone process of assay is practically useless on account of its inaccuracy, and that its adoption is out of the question. For the other processes it is necessary that plate should be submitted for assay in an unfinished state, and finished off for sale later. Unless we could have an assay office in Lucknow (and the trade is probably not sufficiently extensive to support one), we think the expense and delay incurred in transit of work to and from an assay office situate at a distance would be prohibitive. It is also obvious that the amount of assay fees has some connection with the question. Whether it would be worth our while to get our plate assayed, if they cannot now be determined, we cannot say whether the extra charge which we should have to put on our plate would not perhaps deduce its sale in a greater proportion than the hall-mark guarantee would increase it. In fact, we should be glad to avail ourselves of the privilege of an optional assay office if it were to our advantage to do so; but we have not sufficient data to be able to give a decided opinion."

46.]

No. 356—35, dated 3rd April 1891.

From—T. W. HOLDERNESS, Esq., Director of Land Records and Agriculture, N.-W. P. and Oudh.

To—The Chief Secretary to Government, N.-W. Provinces and Oudh.

I have the honour to reply to G. O. No. ¹⁸⁷⁷_{1-386A}, dated 14th November 1890, requesting an expression of opinion on the proposals contained in Resolution No. 5261, dated the 5th November 1890, of the Government of India (Finance Department) relative to the introduction into India of a system of assay for Indian silverware.

2. I enclose replies received from Messrs. Bechtler & Co. and Messrs. Hanhart & Co., of Allahabad, and also notes on the silver trade of Lucknow and Agra, prepared, respectively, by the Assistant Curator of the Provincial Museum, Lucknow, and my Personal Assistant.

3. The only towns in these Provinces noted for the production of artistic silverware are Lucknow, Agra, Muttra, Jhansi, and Hamirpur. The sales in Lucknow to purchasers intending to take their purchases to England may be roughly put at Rs. 20,000 a year. In the other towns the value of such sales do not exceed in each case Rs. 1,000 a year. In none of these towns, however, is there any considerable trade direct with silver dealers in England for sale in that country. The usual purchasers are cold-weather visitors who buy for themselves and not for sale, and the articles thus purchased are admitted into England under the existing law without assay and hall-marking.

4. I have not been able to obtain evidence that the continuance of hall-marking in the United Kingdom has appreciably minimised the effects that might have been expected from the repeal of the duty on silver plate. My inquiries show that the abolition of the duty has, so far, not increased purchases of Indian silverware for export to Europe, whether by private persons or by traders. If purchases by private persons had increased, while purchases by the trade, on the contrary, showed no increase, then it might be inferred that the continuance of hall-marking—which affects the trade alone—has minimised the effects of the repeal of the duty. But as neither class of purchases has, so far, increased, it is difficult to affirm from the facts ascertained in these Provinces that the hall-marking and assay regulations of the United Kingdom prevent the development of a direct trade in Indian silverware. I have little doubt that in other parts of India where silver manufactures are more extensively practised, the evidence asked for by the Government of India will be forthcoming; but I refer to a province in which the art of working in silver is in a relatively backward state.

5. This replies to question (b) in paragraph 11 of the Government of India's Resolution. With regard to question (a), I am unable for the same reasons to affirm that the introduction into India of a system of assay with a view to exempting Indian silverware from further assay and marking on arrival in the United Kingdom is a matter of material importance to the silversmiths of these Provinces. Their art is so backward and their trade so badly organized that the effect of establishing assay offices in India would probably be to confine direct trade with England to other parts of India where the industry is more skilful and more prepared to avail itself of changed conditions. I can form no estimate of what the probable expense of establishing assay offices in India, elsewhere than at the Calcutta or Bombay Mint, would be. But I imagine that the expense of an assay office in these Provinces would be considerably more than would be covered by possible fee-receipts, and that probably our silversmiths would have to send their goods to Calcutta, Bombay or the Punjab for assay before transmitting them to a correspondent in London. That being the case, the silver workers and silver dealers in the towns in which assay offices could be established would be placed at a considerable advantage compared with the up-country producer, and they would obtain the practical monopoly of orders for Indian silverwork from firms in England.

6. But while I anticipate no advantage to the silverware trade of these Provinces from the establishment of an Indian system of assay, I do not apprehend that it would be materially injured. The private custom on which it depends would still continue, and it would not be deprived of any source of gain at present open to it. If the choice lies between the subjection of Indian silverware to the assay regulations of the United Kingdom and the establishment of an optional system of assay in India, I consider that, in the interests of India at large, the latter is preferable, even though it may benefit some localities more than others. It is clear that the English standard is unsuited to Indian silver work and the English system of hall-marking to the form it usually takes. Our main object, I take it, is to free a particular trade from restrictions it cannot well comply with and to increase thereby the volume of exports from India; and in this view the objection that the benefit will be unevenly distributed throughout the country appears of minor importance.

7. In paragraph 12 of the Resolution information is sought as to how section 4 of 47 and 48 Vict., cap. 62, is worked in practice, and whether it is allowed by the Custom House authorities in England to exempt from assay and hall-marking most descriptions of Indian silverware exported to England. I regret I am unable to throw much light on this point. One case in which, before the duty was repealed, a Lucknow merchant sent to Messrs. Liberty & Co., when complying with an order for Lucknow muslin fabrics, a few silver articles on commission sale. They were of the ordinary Lucknow work, which closely resembles Cutch silverware. The articles on arrival in London were subject to duty, but not, I believe, to assay and hall-marking. This seems to show that silver articles on which patterns are beaten out and which are subsequently finished off by the hand are considered by the Custom House authorities to come within the description of "hand chased."

8. Turning to the six points specified in paragraph 5 of the Resolution, I consider (1) that the assay should be optional; (2) that the rupee should be adopted as the standard of fineness; (3) that as many assay offices as are compatible with financial considerations should be established; (4) that the touchstone system of assay be used. I am unable to express an opinion as to the scale of fees. The question of what distinguishing marks should be applied is one for experts.

9. I would invite attention to the alternative scheme of marking suggested by Messrs. Bechtler & Co. in their enclosed letter. Briefly they would require every Indian silversmith exporting silverware for sale to the United Kingdom to stamp each article with a stamp prescribed by Government and with his own trade mark, thereby guaranteeing that it is of the required standard of fineness. The Custom House authorities in England would pass all such articles without examination, but the Indian producer would be liable to penalty on proof that his goods were not of the guaranteed quality. Action against him would, I understand, be left to the aggrieved buyer, and it is easy to imagine that many frauds would occur without entailing prosecution. The scheme, though ingenious, is not in my opinion likely to satisfy the requirements of the Secretary of State for India as an alternative to the present system of compulsory hall-marking for silverware admitted for sale within the limits of the United Kingdom.

47.]

Dated 28th February 1891.

From—MESSRS. BECHTLER & Co., Allahabad,

To—The Director of Land Records and Agriculture, N.-W. Provinces and Oudh.

In reply to your No 84—35 S. of 28th January regarding hall-marking of Indian silverware, we beg to say that we consider it impossible to apply a system of hall-marking as in force in India without injuring the small silversmiths, etc., in villages; that it would be difficult for the same class of silversmiths to work in any other standard but the rupee standard.

After carefully considering the question, we give a general idea of a scheme for hall-marking which would work equally well for export, and which would give to the public all desirable security, at the same time doing away with expensive assay offices:—

1.—All silverware should be stamped with a punch, *supplied* by Government, showing the standard of the silver—

(a) this punch should be, for each Presidency, of a different pattern: for instance for Calcutta an elephant, for Bombay a tiger, for Madras a peacock, &c.;

(b) this punch should be given by Government against a written declaration that he will only stamp goods of standard silver with the same;

(c) each punch to have a running number, which should be registered by Government;

(d) heavy penalties should be attached to stamp goods with the Government stamp not of standard *fineness*.

2.—Each article, besides having the Government stamp, should be stamped with the initials of the maker or any adopted trade mark—

(a) this punch to be registered by Government to prevent fraud;

(b) export firms to register *their* punch, also by the Custom House authorities in England.

3.—Purchasers of silver articles may have the articles tested by a Mint Master in Calcutta or Bombay against a nominal fee.

4.—The Government of England should be asked to recognise the rupee standard for goods imported from India to England and to pass articles duly stamped with the Indian Government stamp as hall-marked.

The above is a rough outline of a scheme which would meet the requirements of the silversmith's trade in India without interfering too much with the old customs prevailing in India.

48.]

Dated 7th March 1891.

From—MESSRS. HANHART & Co., Allahabad,

To—The Director of Land Records and Agriculture, N.-W. Provinces and Oudh.

Replying to your communication dated 28th January, in which you ask our opinion, regarding the proposed introduction of an Indian hall-mark system, we beg to state that, from our point of view, the demand for Indian silverware would scarcely be large enough to entertain the great expense which is involved in establishing the hall-mark system in this country.

Allahabad not being such an extensive market for Indian jewellery as Delhi, Cutch, Trichinopoly, and other places, we therefore can only give a reserved opinion in this matter, besides mentioning that our firm, like most other European jewellers' firms in this country, chiefly import and deal in English manufacture.

49.] Report on the Lucknow Silver Trade by BABU GANGADHAR GANGOLI, Assistant Curator, Provincial Museum, Lucknow.

The Lucknow dealers in silver plate work with a limited capital, and in a few instances the value of the work of individual producers exceeds Rs500 to Rs600 a month. As a rule, they sell their wares to retail customers at Lucknow, and seldom carry on an export trade with any of the large centres in India or with England. They usually keep a stock of small articles for sale in the local markets and produce large and expensive articles to order. Thus carrying on their business on a limited scale, they do not consider that the prospects of the trade would be in any way improved by the establishment of assay offices in this country—a system which, in their opinion, would rather hinder than facilitate business, whether the assay be obligatory or voluntary. The main objections to the system being—

(1) that it will occasion delay in executing orders which they receive from persons who, in many instances, cannot wait for their things longer than a few days. Sometimes they have to deliver the articles at a very short notice or within the time occupied by the purchaser in visiting the place. An assay office (even if one is established at Lucknow), with fixed days and hours, will prevent their doing any business of this kind;

(2) it will cause trouble and expense to the party presenting his wares for assay.

On the second point—whether the continuance of hall-marking in the United Kingdom has appreciably minimised the effects which might have been expected from the repeal of the duty on silver plate—the Lucknow dealers are unanimous in stating that no appreciable amount of advantage has yet resulted from the repeal. On the other hand, they say that the sales, since the repeal, have not reached the amount they realise in ordinary years. This may be due to other causes, *e.g.*, comparatively small number of purchasers visiting the place, or increased competition among the manufacturers. In my opinion it would be premature now to make any calculations on this head, taking two facts in consideration: *first*, the fact of the repeal is not widely known among the purchasing public; and *secondly*, the first selling season after the repeal is not completely over yet.

I have recorded the above remarks after consulting about a dozen houses in Lucknow which turn out things suited to European taste. In addition to what has been stated above as to the prospects of the trade if a system of half-marking were introduced in this country, the following facts may be noted regarding the quality of the silver used by the manufacturers and the standard of fineness adopted by them.

The Lucknow workers get their metal by melting old vessels and articles of native jewellery, and they also procure it in ingots from Bombay. The Lucknow rupee (which is less in weight than the Government rupee by four *ratis*—about six grains troy) is supposed to contain the purest silver and is valued at 16 annas, which is the standard. They test silver by heating. If the metal retains its white colour after the heating, it is considered pure, that is, 16 annas in value; if it loses colour, the result varies from one to three annas in the rupee. The touchstone is not an accurate test for silver, but it might be adopted for practical purposes with results not varying considerably from that obtained by the other process.

50.] Report on the Agra Silver Trade by BABU LAKHSHMAN PARSHAD BURMAH, Personal Assistant to Director of Land Records and Agriculture, N-W. P. and Oudh.

In Agra there are about two hundred *sonars*, but none of them make any articles specially suited to the English market, nor is there any direct export of silver articles from Agra to England. In winter, however, when English gentlemen visit the place, they generally buy, along with shawls, carpets, marble articles, cups and plates made of silver as also silver toys received from Muttra. They are usually made of brick silver (silver in ingots) received from Bombay, 100 *tolas* of which sell at present for ₹107. They are very seldom made of English rupees, though sometimes silver of a worse quality than the rupee is employed. Sometimes they are said to contain only 75 per cent. of genuine silver, but these are rare cases. The total value of silver articles sold in a season to European gentlemen visiting the place does not exceed ₹1,000. The articles sold are, as a rule, ornamental, not plain.

51.]

No. 2484, dated 14th July 1891.

From—T. D. MACKENZIE, Esq., C.S., Chief Secretary to the Government of Bombay,

To—The Secretary to the Government of India, DEPARTMENT OF FINANCE AND COMMERCE.

With reference to the Resolution of the Government of India, No. 5261, dated 5th November 1890, requesting the opinion of this

Government on the subject of the proposed establishment of a system of hall-marking in India, I am directed to forward herewith copies of the papers noted in the margin, together with a summary of the opinions of Government officers and others consulted on the subject, and to solicit the attention of the Government of India to the letter from Messrs. Kharsedji & Sons, No. 342, dated 19th February last, accompanying the letter from the Commissioner, Central Division, No. R.—1456, dated 21st April last.

Letter from the Commissioner, Southern Division, No. S.R.—43, dated 3rd February 1891, with accompaniment.

Letter from the Commissioner, Northern Division, No. 496, dated 7th February 1891, with accompaniments.

Letter from the Secretary, Bombay Trades Association, dated 13th February 1891.

Memorandum from the Commissioner in Sind, No. 561, dated 16th February 1891, with accompaniment.

Letter from the Commissioner, Central Division, No. R.—1456, dated 21st April 1891, with accompaniments.

Letter from the Divan of Cutch, No. 286, dated 6th April 1891.

2 I am to state that if the hall-marking system is to be introduced into India, it would, in the opinion of the Governor in Council, appear desirable, so far as the manufacturers of gold and silverware in the mofussil of this Presidency are concerned,—

(a) that the assays should be optional;

(b) that the trade should be left to fix for itself the standard of purity in each case, as suggested by Messrs. Kharsedji & Sons, of Ahmednagar, which opinion the Assay Master also shares;

- (c) that the Assay Office should be at the local Mint, the Bhuj Mint being recognized for the purpose so far as the silverware manufactured in Cutch is concerned, and the postage charges for sending the article to be tested at the Mint being reduced by, say, 50 per cent.
- (d) that the fees to be charged for the assay should be so small that the assay could be largely availed of by the public ;
- (e) that some suitable mark indicating the place of assay and the fineness of the metal might be adopted.

3. I am to add that gold or silverware is tested in Bombay by authorities recognised both by the buyer and seller, and that thus a voluntary system of applying a stamp for quality is already in vogue.

53.] Summary of the opinions of Government Officers and others in the Bombay Presidency on the proposed establishment of a system of Hall-Marking in India.

No.	Subject.	The Mint Master.	The Assay Master.	The Chamber of Commerce, Bombay	The Bombay Trades Association.	The Commissioner, Southern Division.	The Commissioner, Central Division.	The Commissioner, Northern Division.	The Commissioner in Sind.	The Minister of Cutch.
1	2	3	4	5	6	7	8	9	10	11
1	Should the assay be compulsory or optional.	Optional	Optional	Optional	Optional	Poona, Satara and Khandesh.—Optional. The Commissioner also forwards copy of a letter from Messrs. Cursetji & Sons of Ahmednagar, who deal largely in silverware and think that the hall-mark system would be quite unsuitable to India.	Optional	Optional	Cutch manufacturers are not in favour of the introduction of hall-marking. If, however, it is necessary, the assay should be optional.
2	What standard or standards of fineness should be adopted?	Exporting merchant can get his silverware made of any fineness he likes. The arts of silver refining and approximate silver assaying are believed to be very well known at all the principal centres of the trade.	Generally speaking, it would be an advantage to have no standards fixed by law. If, however, they are required, the decimal system is suggested, 1000 representing fine gold or silver. Two views are expressed as to the standards: 1. The standards to be marked at every ten, 990, 980, &c., down to a minimum of 300 for gold, and 900 for silver, with one other mark 916.6, it being the standard of the coinage of India and the gold coinage of England: the "remedy" in the case of gold to be 2 per mille and in the case of silver 4 per mille. 2. The following standards which are in use in India and are legal standards in England:— Gold. 970 958.3 916.6 940 833.3 925 750 916.6 625 500 375 Silver.	The quality of a rupee. Even if articles be made of finer quality than that of a rupee, only one stamp should be used.	Two standards of 15 annas and 12 annas are recommended by the Commissioner, S. D., in preference to those of 18, 14 and 12 suggested by representative workers in silver in the Belgium District consulted by the Collector of Belgium.	Poona.—The rupee standard. The bulion standard, of fineness. Messrs. Cursetji & Sons suggest that the buyer and seller ought to be left free to buy and sell articles of any standard of purity.	The Collector of Ahmedabad writes, though with diffidence, that the rupee standard would do more harm than good, as being too low.	The Commissioner merely states that the Karachi manufacturers think that the standard should be the English standard.	The Commissioner states that the Karachi manufacturers should be made compulsory.

3	Where should Assay Offices be located? At the two Mints only or at other centres also?	They should be limited to a few centres of the principal centres of export which should be suggested by the mercantile community. It is practically impossible to establish a sufficient number of trustworthy assayers at places in various parts of India where silverware is manufactured, or even at the chief centres of manufacture of these articles, for the assayers must be Europeans above suspicion of being open to bribery. The Mint Master thinks that the exporting merchants should be required to show what prospects there would be of the cost of whatever assaying offices may be established being recouped by Government, or how many assays may reasonably be expected to be required monthly at each of the places where assay establishments are proposed.	The "remedy" in both cases should be the legal remedy. The Assay Master personally advocates the first view and suggests the second as an alternative.	In Bombay, Poona, Ahmedabad, Calcutta, Lucknow, Delhi, Lahore, Madras, Bangalore, Trichinopoly, Rangoon, and Mandalay: the Mint where such existed and the Government Treasury where there was no Mint.	...	At the two Mints for the present.	The Collector of Poona thinks the Assay office should be located at the Presidency, and the Collector of Satara sees no necessity for additional Assay offices.	At Calcutta, Bombay, perhaps also Madras.	Being ignorant of what the cost of an office for assay by the touchstone process would be, the Commissioner cannot form an opinion on this point. 2. According to the manufacturers of Karachi, the Assay offices should be located at the Mints at Calcutta and Bombay, and the Customs Houses at Rangoon, Madras and Karachi, and there should be an Assay officer at each of the three Customs Houses. If Assay Officers cannot be appointed for the three Customs Houses then the postage charges for sending plate to Bombay or Calcutta to be hall-marked should be reduced fifty per cent.	At Bhuj Mint for Cutch.
---	--	--	--	---	-----	-----------------------------------	---	---	--	-------------------------

Summary of the opinions of Government Officers and others on the subject of the proposed establishment of a system of Hall-Marking in India.—continued.

No.	Subject.	The Mint Master	The Assay Master.	The Chamber of Commerce, Bombay.	The Bombay Trades Association.	The Commissioner, Southern Division.	The Commissioner, Central Division.	The Commissioner, Northern Division.	The Commissioner in Sind.	The Minister of Cutch.
1	2	3	4	5	6	7	8	9	10	11
4	What process for assay should be adopted?	Cupellation for gold, and the chloride method for silver, as being both practicable in India and accurate. The touchstone might be introduced here and there in certain cases as an auxiliary check to test the homogeneous nature of the article.	The usual native process of rubbing on a test-stone and also trying with acid. The testing work might be left to the Treasury where there is always a competent native official. The tester should have the right, if necessary and if allowed by the owner, to drill into the article or cut into same with a file. Half-anna per tola weight of the article submitted for stamping.	Touchstone.	Satara and Khandesh.—Touchstone.	Touchstone process should be adopted at Bombay Mint for this Presidency, and purchasers should be warned that in cases of doubt all articles should be taken to the Mint and hall-marked.	Touchstone.	For gold, the touchstone; for silver, any most convenient process.
5	What fees should be charged?	It is difficult to say anything definite at present.	It cannot be stated what scale of fees is likely to make the Assay office self-supporting; but the following scale is suggested as a general guide:— Gold. Silver. R R a. Ware weighing:— 5 tolas or under 2 1 0 " 5-10 tolas 3 1 8 " 10-20 " 4 1 12 " 20-50 " 5 2 0 " 50-100 " ... 3 0 " 50-500 " 10 ... 100-500 " ... 4 0 500-1,000, 15 5 0 For every 100 tolas or part of 100 tolas in weight above 1,000 tolas, a fee of one rupee for gold and a fee of 8 annas for silver. But the Assay Master thinks that it is for Government to leave matters as they are, if sec-	Proportional to the expenditure incidental to the process of assay.	...	The fees should be as small as possible.	The Commissioner's reply is similar to his reply to point No. 3 above mentioned. According to the manufacturers of Karachi, the fees should be one anna per tola for gold and two annas per cent. for silver plate.	As light as possible.	

6	What distinguishing mark should be applied to the wares assayed?	The Mint Master reserves his opinion on this question until questions 2 and 3 are satisfactorily answered.	The maker's mark and number to be put by the maker. The date-mark, the place of assay, the fineness and the Government mark to be stamped in the Assay office. Besides these, there should be a separate symbol to be placed on such delicate parts of any article as have been checked by the touchstone.	A stamp resembling the pointed Star of India and another stamp taking the first two letters of the town where the test is made.	According to the Commissioner, a tiger mark with figure 2 after it in the case of silver under the 15 annas standard. According to the Collector of Belgaum, 1-16, 1-14, or 1-12, 1 meaning Indian.	P o o n a.—There would be no objection to Indian plate bearing a mark or letter defining it as Indian.	The Star of India, with an initial denoting the Mint where the assay was conducted.	A conventional sign indicating the standard of fineness and another indicating the office of assay.	For Cutch, one of the signs of the coat of arms of H. H. the Rao.
7	Is the prospect of the admission of Indian artware in the precious metals to England, without the necessity of undergoing there the assay by cutting and scraping, considered of sufficient importance to the trade to justify the introduction into India of a system which must necessarily be restrictive and operate unequally whether it is compulsory or voluntary?	The exports of silverware other than hand-chased, inlaid, bronzed or filigree work of oriental pattern sent from this port may be taken to be small and perhaps smaller still from other parts, and perhaps so insignificant on the whole as to render legislation unnecessary.	P o o n a.—The adoption of an Indian silver hall-mark will not probably be availed of locally on account of the cost and risk attending the transit of articles to Bombay for purposes of assay.	If possible, a system should be devised for indicating on Indian plate that it has been manufactured in India and for securing plate so marked free entry into the United Kingdom. There is no manufacture of plate in Sind except on a small scale in Karachi.

Summary of the opinions of Government Officers and others in the Bombay Presidency on the proposed establishment of a system of Hall-Marking in India—concluded.

No.	Subject.	The Mint Master.	The Assay Master.	The Chamber of Commerce, Bombay.	The Bombay Trades' Association.	The Commissioner, Southern Division.	The Commissioner, Central Division.	The Commissioner, Northern Division.	The Commissioner, in Sind.	The Minister of Cutch.
1	8	3	4	5	6	7	8	9	10	11
8	Has the continuance of hall-marking in the United Kingdom appreciably minimized the effects that might have been expected from the repeal of the duty on silver plate?	Poona.—The repeal of the duty on silver and gold plate would not appreciably encourage the local manufacturers to manufacture for exportation.	The repeal of the duty will not be of much importance till compulsory hall-marking in England is abolished.	As a general rule, the gold and silver manufacturers in Cutch do not make their articles for consignment to England or other foreign countries for sale on their own account, and the abolition of duties on gold and silver plate in the United Kingdom has apparently hitherto had no material effect on their trade.
9	How has the exception made by section 4 of Act 47 and 48 Vict., cap. 62, worked in practice, and has it given any substantial relief that it seems to give?	Since the passing of Act 47-48 Vict. and the English Customs have applied section 4 of that Act to imports, a great impetus has been given to the export of silver plate from this country by private individuals in consequence of the old restrictions being removed. The fact that the duty has also been taken off is not as yet thoroughly known and so far has not had any appreciable effect on the export. For some little time the Customs author-	No direct export is made and therefore the Commissioner is unable to afford information on this point, but thinks that the section ought to exempt every kind of article of plate manufactured in Ahmedabad, and, if so, provision for their assay would not apply.

<p><i>General remarks.</i></p>	<p>The answers to the questions except 1 and 4 depend much upon the information expected to be furnished by the trade whose business it is to establish proof of the necessity of legislation in the matter.</p>	<p>It is no use to introduce a system of marking for export only; it must also be for the local market. Any system that is introduced must deal with both gold and silver. It must be generous (almost unlimited) in the matter of standards; any restrictions in this respect will, if heeded, hamper the manufacturer and ruin the artistic nature of the work. More freedom in this respect is required in England. If a system is introduced to deal with articles for export only, it is hopeless to expect it to pay Government. If a system on a broad basis is introduced, both for the local market as well as export, then much of the expense of the introduction for some time to come will fall on Government.</p>	<p>The remarks noted above were made by Mr. J. P. Watson, of Messrs. Watson & Co., and the Committee of the Chamber agree generally with them.</p>	<p>The Association has no special observations to make beyond coinciding with such as have been put forward by the Bombay Chamber of Commerce to which body those who are chiefly interested have already submitted their views.</p>	<p>There is little silver manufacture in any part of the Southern Division.</p>	<p>The Commissioner forwards a précis of the reports of the Collectors in the Central Division and observes that they furnish little information which is likely to be of use. The necessary notes from this précis have been made above for the districts mentioned.</p>
--------------------------------	--	---	--	--	---	---

53.]

No. 43-S. R., dated 3rd February 1891.

From—A. KEYSER, Esq., Acting Commissioner, Southern Division,

To—The Acting Chief Secretary to the Government of Bombay, Financial Department.

I have the honour to report, with reference to Government Resolution No. 3916 of the 1st December 1890, that there is little silver manufacture in any part of Southern Division.

Hall-marking in India.

Mr. Fairlie Muir is the only one of the Collectors whom I have consulted, who has submitted any replies to the questions asked in paragraph 5 of the Government of India's Resolution.

2. I forward his letter and would intimate my general agreement with the answers he gives except that it is doubtful if the standards of fineness suggested in the second answer would be those best suited to the trade generally. I should say that two standards would be sufficient—15 annas and 12 annas—and I think also it would be preferable to have a mark more approximate to the English mark, *e. g.*, tiger with a figure 2 after it in the case of the silver under the 15 annas standard.

54.]

No. 383, dated 21st January 1891.

From—J. F. MUIR, Esq., Collector, Belgaum District.

To—The Commissioner, Southern Division.

I have the honour, after consulting representative workers in silver in this district, to reply to your letter No. 4677, dated 6th ultimo.

2. I learn from them that no silver work is made in this district for export to England. Silver is tested by the touchstone, and, also, to a lesser degree by heating. Sonars do not harden silver when manufacturing it, or solder it or adulterate it in any way.

• Chini Chandi.

3. They use, as a rule, pure silver, bought as bullion at Shahapur and other markets. Its fineness is as a rule $\frac{1}{8}$.

4. For articles that require to be hard, they use an inferior kind of silver† bought as above. Government coin is also sometimes given them to be melted down and manufactured.

† Jawari Chandi.

The fineness of these two sorts of silver ranges from $\frac{1}{8}$ to $\frac{1}{16}$.

5. They state that the above applies to all workers in silver in the district. They hold that hall-marking should, most certainly, be optional; that silver should be tested, therefore, by touchstone; and that there should be three qualities of fineness— $\frac{1}{8}$, $\frac{1}{16}$ and $\frac{1}{32}$.

6. My opinion on the points stated in section 5 of Government of India's Resolution No. 5261, is as follows:—

- (1) The assay should be optional. Indeed, it must be so for the reasons given in section 6 of the Government Resolution.
- (2) Special standards of fineness should be adopted to suit the local practice and requirements. These should be $\frac{1}{8}$, $\frac{1}{16}$, and $\frac{1}{32}$.
- (3) For the present Assay offices are required only at the two Mints.
- (4) Silver should be tested by touchstone, for the reasons given in section 8 of the Government Resolution and in accordance with the local practice.
- (5) The rates of the fees should be such as to cover the costs incidental to the process of assay.
- (6) The standards might be marked I-16, I-14 and I-12, *i.e.*, Indian silver of one or other of the three standards.

55.]

No. 496, dated 7th February 1891.

From—H. E. M. JAMES, Esq., Commissioner, Northern Division,

To—The Chief Secretary to the Government of Bombay, Financial Department.

Referring to Government Resolution No. 3916, dated 1st December last, I have the honour to forward a copy of a communication, with accompaniments, from the Collector of Ahmedabad, which, as far as I am aware, is the only city of this Division in which such silver articles are manufactured as are likely to be exported to the United Kingdom. Unfortunately no direct export is made, and therefore I am unable to afford any information in reference to paragraph 12 of the Government of India's Resolution. I cannot help thinking, however, that the section of the English Act quoted in that paragraph ought to exempt every kind of article of plate manufactured in Ahmadabad, and, if so, provisions for their assay would not apply.

2. Assuming, however, that articles are manufactured in India which would require assays, I concur with the opinion of the Collector. The touchstone method of assay should be adopted at the Bombay Mint for this Presidency, and dealers and purchasers should be warned that, in case of doubt, all articles should be taken to the Mint and hall-

marked. The tendency of this will naturally be to concentrate the trade in these articles in the City of Bombay, where the dealers can take the precaution of having their articles assayed beforehand. This, however, cannot be avoided.

3. The Star of India would, it appears to me, be the most suitable hall-mark, with an initial denoting the mint in which the assay was conducted.

56.]

No. 64, dated 29th January 1891.

From—P. H. DASTUR, Esq., City Magistrate, Ahmadabad,

To—The Collector of Ahmedabad.

In returning the accompanying, I have the honour to report that I have consulted the Cutch goldsmith and many other dealers in gold and silver plate in this city and find that there is no direct export trade in gold and silver ornaments from Ahmedabad to the United Kingdom, and there appears, therefore, no necessity for introducing any hall-marking system in this place.

With regard, however, to the several points noticed in the Government Resolution under reference, I beg to state that the local opinion, as far as it could at present be ascertained, is as follows:—

- (1) The assay, if any, is to be introduced, should be optional. Here the silversmiths use metals of two or three descriptions while making an ornament, and this, they say, is absolutely necessary for the delicate carving which has to be done, and if any compulsory assay is introduced, it would be difficult for these ignorant workmen to conform accurately to the standard fixed, and might result in a serious discouragement of the industry which it is the intention of Government to foster.
- (2) The rupee standard should be adopted. It is scarcely true, as far as this and many other large cities are concerned, that the majority of the silversmiths use silver obtained by melting coins. They use the metal obtained from the bullion dealers in the market, and they can easily conform to the rupee standard, if introduced. Those who fail to do so will not get the advantage of the hall-marking, but need not otherwise be debarred from exporting their goods.
- (3) Assay offices should be located in Bombay, Calcutta, and, perhaps, Madras. These are the only three places where silverware in any quantity is likely to be exported to the United Kingdom, and if any silversmith in other towns and cities is desirous of exporting direct, he could easily arrange with his agent in the capital cities to take his ware to the mint for hall-marking. This would cost him less than if hall-marking centres were introduced in all large places.
- (4) The touchstone method of assay should be adopted. This process being the easiest, is well known for testing ready-made ornaments, and no difficulty has yet been experienced in getting the articles assayed approximately by this method.
- (5) As to the fees to be charged, it must depend entirely on the additional expenditure to be incurred for hall-marking, and so long as this is not known, no opinion could be expressed. It should, however, be as small as possible, in order that the assay, though voluntary, may be availed of largely by the people and the export stimulated. For the touchstone method, one pice alone is charged in the market here.
- (6) The sixth point is one on which I am not competent to give my opinion, nor can the dealers here express any desire on this subject. Of course it should be one which would be easily distinguishable and at the same time not such as would disfigure the articles assayed.

57.]

No. 355, dated 31st January 1891.

From—C. E. FROST, Esq., Collector of Ahmedabad,

To—The Commissioner, Northern Division.

In reply to your No. 5140, dated 8th ultimo, I have the honour to forward copy of a

Proposed establishment of a system of hall-marking in India.

report by the City Magistrate after consulting the Cutch silversmith as requested by you and other dealers in silverware in the city of Ahmedabad.

2. On the five points touched upon in the report, the conclusions appear reasonable, and like the manufacturers and the City Magistrate, I am unable to offer an opinion on the sixth point. I write with diffidence on the subject, but I am of opinion that the rupee standard would do more harm than good as being too low. If you want to get good silver work done in India, it is usual to bargain for a higher class of silver being used; that is my impression.

58.]

Dated 13th February 1891.

From—W. F. PARSON, Esq., Secretary, Bombay Trades Association,
To—The Under Secretary to the Government of Bombay, Financial Department.

I am directed by the Committee of the Bombay Trades Association to acknowledge receipt of Government letter No. 3916B., dated 1st December 1890, on the subject of the proposed introduction of a system of hall-marking in India, requesting the opinion of the Association thereon, and to state in reply that, as the Association has but little concern with the subject, they have no special observations to make beyond coinciding with such as have been put forward by the Bombay Chamber of Commerce, to which body those who are chiefly interested have already submitted their views.

59.]

No. 561, dated 16th February 1891.

Memo. by—COLONEL E. W. TREVOR, Acting Commissioner in Sind.

The Commissioner in Sind has the honour, with reference to Government Resolution, Financial Department, No. 3916 of 1st December 1890, to report on the proposed establishment of a system of hall-marking, to forward copy of a letter from the Secretary to the Karachi Chamber of Commerce, giving the views of the Chamber on the subject.

2. There is no manufacture of plate in Sind, except on a small scale in the town of Karachi. The Karachi manufacturers are of opinion that—

- (a) Hall-marking should be made compulsory.
- (b) The standard should be the same as in England.
- (c) Hall-marking should be done at the Mints at Calcutta and Bombay, and the Customs Houses at Rangoon, Madras, and Karachi, and that for this purpose there should be an Assay Officer at each of the three Customs Houses. The fees to be charged to be those charged at Bombay, *viz.*, one anna per tola for gold and two annas per cent. for silver plate.
- (d) If Assay Officers cannot be appointed for the three Customs Houses, then the postage charges for sending plate to Bombay or Calcutta to be hall-marked, to be reduced 50 per cent.
- (e) The hall-mark to be an impression indicating the Assay Office and the standard of fineness of the metal.

3. The Acting Commissioner concurs in the views of the Karachi Chamber of Commerce—

- (a) That compulsory hall-marking, under the conditions that obtain in India, is impracticable.
- (b) That optional hall-marking may prove useful to manufacturers who wish to establish a position for their wares.
- (c) That the repeal of the duty will not be of much benefit to Indian silversmiths till compulsory hall-marking in England is abolished.
- (d) That, if possible, a system should be devised for indicating on Indian plate that it has been manufactured in India, and for securing plate so marked free entry into the United Kingdom.

4. The touchstone process would probably be quite accurate enough for the purposes of trade. Being ignorant of what the cost of an office for assay by the touchstone process would be, the Acting Commissioner is unable to form an opinion as to where such offices should be located or what fees should be charged.

5. The distinguishing marks might be a conventional sign indicating the standard of fineness and another indicating the office of assay.

60.]

Dated 31st January 1891.

From—J. L. F. BEAUMONT, Esq., Chairman, Karachi Chamber of Commerce,
To—The Acting Commissioner in Sind.

I have the honour to acknowledge receipt of your No. 4279, asking for the Chamber's opinion on the proposed establishment of a system of hall-marking in India.

While admitting the desirability of some system of marking which will establish a certain position for Indian silver plate, my Committee are of opinion that the difficulties attendant upon the fixing of an arbitrary standard, such as will really meet the requirements of Indian trade, are sufficiently great to preclude compulsory marking.

My Committee think that optional hall-marking in India may prove useful, inasmuch as it will enable silversmiths, who may be desirous of doing so, to establish a position for their plate, while it will not interfere with those who, by reason of distance from the Mints or from other causes, may be prevented from submitting their manufactures for the necessary testing.

I am further desired to say that the repeal of duty is of no practical benefit to Indian silversmiths, unless compulsory hall-marking in England is abolished; at the same time my Committee would suggest some distinguishing mark being put on all Indian plate, clearly

defining it as manufactured in this country, and that this distinguishing mark should entitle all plate bearing it to a free entry into the United Kingdom.

61.]

No. 342—1891, dated 19th February 1891.

From—Mr. N. CURSETJI, Merchant,

To—The Collector of Ahmednagar.

In returning herewith Government Resolution No. 3916, dated 1st December 1890, and its accompaniments, which you have so kindly sent me for expressing my opinion about the introduction of hall-marking system in India, I beg to observe as follows :—

The abolition of import duty on silver in England has no doubt to a small extent benefited the manufacturers of silver artware in India, and I know in Nagar. Orders from private gentlemen have increased from the date of the abolition of the duty, but no orders to speak of are received from any dealers or merchants for the Indian silverware for sale in England, although the work has made quite a name there during the recent Colonial Exhibition. The reason I think may be the compulsory hall-marking system in England made applicable even to the manufactured and finished articles of India when sent there for sale. The hall-marking system in England renders Indian articles generally unsaleable, as I believe it requires chipping or dissolving a portion of the articles which disfigure the work, and the articles themselves are made useless.

As regards the remedy suggested of getting over the hall-mark difficulty in England on Indian art manufacture in silver, namely, of introducing the hall-marking system in India itself, whether of a compulsory or voluntary nature, I would point out that nearly all the silversmiths in this country are families of very moderate means and work for labour with their own hands and with very small capital at their commands, and these will certainly have to give up their business if a compulsory hall-marking system were introduced, but even if a voluntary system were introduced, few will ever take the trouble, risk and expenditure to send their goods to the central places where the hall-mark offices might be opened. The native silversmith hardly knows the process of refining silver by separating it from other inferior metals which is so easily done in England. This makes the silver used in ornaments impure every time it is melted and re-made into ornaments, owing to the base metal being used in soldering; if the standard of test were fixed at the rupee silver or the like, they will never be able to produce metal of the test purity. In India silverware are generally sold according to their purity ascertained by the touchstone generally, and very rarely by putting the article in the fire; so that the seller and the purchaser both know what purity of articles the one sells and the other buys. This leaves no necessity of the hall-marking. If in the same manner the hall-marking system were abolished in England, it would certainly give a great impetus to the silver art manufacture of India, and our rupee will certainly improve in value as regards the English money. Hall-marking system is, I think, a block in the way of free trade in silverware. The buyer and seller ought to be left free to buy and sell articles of any standard of purity. And to assist them in ascertaining the standard of purity, private enterprise for hall-marking amongst the dealers in gold and silver in both the countries may be encouraged. From the above, it will be seen how unsuitable is the introduction of any system of hall-marking in India and that if it were introduced, it would altogether discourage rather than give any encouragement to the manufacture of silverware in the mofussil, at least amongst the poor labouring class of silversmiths who are earning their livelihood by their retail small industry.

62.] *Précis of the reports of the Collectors in the Central Division, on the subject of the proposed establishment of a system of Hall-marking in India.*

Sholapur.—From the enquiries made by the Huzur Deputy Collector among some leading sonars and shroffs, he learnt that there were no artizans at Sholapur who prepared articles for sending to England or any other country in Europe, and that they knew nothing and had no idea of hall-marking. They consequently expressed their inability to give any opinion on the subject under consideration.

Nasik.—Mr. Porteous reports that several of the leading workers in gold and silver have been consulted, that they all avow their ignorance of everything connected with the export of silver and goldware to England, and that, therefore, they are unable to give any opinion on the points raised. He states that the fineness of silver is usually stated in annas. Silver, finer than 17½ annas, is never used by manufacturers in Nasik; what is generally used in the manufacture of goods for export to Bombay and elsewhere is assayed at 16, 16½ or 17 annas; what is used in making ornaments for local sale is inferior. The Collector adds that Government silver coins are very rarely melted down to be re-manufactured into silver goods; that their fineness is taken to be much less than 16 annas; that silver goods are assayed at Nasik either by the *Rava* or cupellation process or by the touchstone; and that the *Rava* process is invariably used in assaying wares of the fineness of 16 annas and above, while inferior silver is commonly tested by the touchstone.

Poona.—The City Magistrate, Mr. Plunkett, who was referred to by the Collector, reports that several of the leading dealers in gold and silver and sonars in Poona city were invited to meet him, and that their opinions were asked on the passage in the Government Resolution, when they agreed unanimously—

- (1) that the repeal of the duty on silver and gold plate would not appreciably encourage the local manufacturers to manufacture for exportation ;
- (2) that the adoption of an Indian silver hall-mark would not probably be availed of locally on account of the cost and risk attending the transit of articles to Bombay for purposes of assay ;
- (3) that there would be no objection to Indian plate bearing a mark or letter defining it as Indian, and that, when so marked, it should be allowed free sale in England without assay ;
- (4) that as regards a standard of fineness the rupee standard should be recognised ;
- (5) that the assay, if introduced, should be made optional to suit the circumstances of manufacturers working at a distance from an Assay office ; and
- (6) that the Assay office should be at the Presidency Mint.

Mr. Plunkett adds that the persons invited were unable to give a decided opinion on the process for assay, but that they were in favour of the touchstone process.

Satara.—Mr. Candy reports that he consulted some of the leading sonars in Satara, and has elicited the following information on the first four points of paragraph 5 of the Government of India's letter :—

- (1) The assay should be optional.
- (2) The bullion standard of fineness should be adopted.
- (3) There is no necessity for additional Assay offices.
- (4) The process of the touchstone, which is simple and convenient, should be adopted as it does not involve any injury to the ware.

Mr. Candy adds that, though silverwares are manufactured in his district, there does not exist a regular trade of such articles with foreign countries, and that, therefore, no opinion likely to throw light could be obtained from the native traders on the points touched on in paragraphs 11 and 12 of the Government of India's letter.

Ahmednagar.—Mr. Waddington consulted Messrs. Cursetji & Sons, as being the only persons in Nagar having any interest in the matter, who were likely to give an opinion of value.

Mr. Cursetji is of opinion that the introduction of any system of hall-marking in India is unsuitable, and that if one were introduced, it will altogether discourage rather than encourage the manufacturer of silverware in the mofussil, at least amongst the poor labouring class of silversmiths, who are earning their livelihood by their small retail industry.

Khandesh.—Mr. Loch states that he endeavoured to obtain the opinions of the sonars in some of the chief towns of Khandesh, but that it is evident from their answers that they do not understand the assay question, as they have never had anything to do with the export trade.

The Collector further states that the sonars consulted wish the assay to be optional, that their answers as to the standard of fineness are not intelligible ; that the Chopda sonars suggest that the Assay Office should be at the Mint ; that the Parola sonars wish it to be in the district, and that the others have no views in the matter.

Mr. Loch adds that the test by the touchstone is generally approved, and that, as to the fees the Chopda sonars suggest two pies in the rupee, and that there should be an official stamp to show that goods have been assayed.

(Sd.) J. MOORE,
Commissioner, Central Division.

63.]

No. 286, dated 6th April 1891.

From—MOTILAL LALSHAI, Dewan of Cutch,
To—The Political Agent, Cutch.

With reference to your office letter No. 914 of the 24th December last, I have the honour to state that the principal manufacturers of gold and silverwares in Cutch have been consulted on the points noted in paragraphs 5, 11, and 12 of the Government of India Resolution No. 5261 of 5th November 1890, and it appears, from what they have urged, that they do not view with much favour the introduction of a system of assay and hall-marking, apprehending that it will cause several inconveniences and obstacles, and owing to the payment of fees it will entail from which they are at present free.

2. As a general rule, they do not make their articles for consignment to England or other foreign countries for sale on their own account, and the abolition of duties on gold and silver plate in the United Kingdom has apparently hitherto had no material effect on their trade.

3. They confine themselves mostly to the manufacture of silver articles on orders received from Native and European gentlemen, and for sale in different parts of India, and as they are generally made of pure unalloyed metal, the fact can be easily certified by a mark to be impressed on them at the Durbar Mint at Bhuj, if necessary.

4. But if the introduction of a system of assay is for any reasons considered necessary,—

- (1) the assay should be optional;
- (2) the standard should be 14½ wals per half tola;
- (3) the Assay office for Cutch should be the Bhuj Mint;
- (4) the method of assay for gold should be the touchstone, and for silver any that may be most convenient;
- (5) the rate of fees should be as light as possible.
- (6) the mark for Cutch wares should be one of the signs of the coat-of-arms of His Highness the Rao.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Extract from the Proceedings of the Government of India, Department of Revenue and Agriculture, No. $\frac{1315}{8}$ M. & E., dated 28th March 1894.

MUSEUMS and EXHIBITIONS.

READ—

Resolution of the Government of India in the Department of Revenue and Agriculture, No. 7--3, dated 19th February 1894, intimating the arrangements that had been made by the Government of India in connection with the Antwerp Exhibition.

RESOLUTION.

In continuation of the Resolution read in the preamble, the Government of India desire to intimate that they have availed themselves of the services of Mr. Gerald R. deCourcy-Perry, Her Majesty's Consul-General at Antwerp, as Commissioner for the Government of India at the Exhibition, to officially represent their interests at the Exhibition.

ORDER.—Ordered that this Resolution be published in the Supplement to the *Gazette of India* for general information, and that copies be forwarded to all Local Governments and Administrations with the request that it be republished in the local Gazettes.

(True Extract.)

M. FINUCANE,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. Saturday, March 17th, 1894.

General Summary.—The first part of the week was marked by anti-cyclonic conditions prevailing in Northern India, accompanied by unusually low temperatures and generally fine weather. On the 15th the anti-cyclonic conditions began to give way and there was a rapid increase of temperature, which continued to the end of the week, giving rise to irregular changes of pressure which in their turn, caused slightly unsettled weather with local thunderstorms and duststorms over a large part of the country. On the 17th a slight depression appeared over Malabar which gave moderately heavy rain in Southern India and Ceylon. By the close of the week ordinary hot-weather conditions were established over the greater part of the country. The mean temperature for the whole week for the whole of India was nearly 2° below normal.

Daily Summary.—*Sunday.*—Pressure increased rapidly in the East Punjab and Rajputana and slightly to rapidly at the Punjab Hill stations, but gave way slightly at the North-Western Provinces Hill stations. The depression noticed the day before had thus filled up to a great extent and had moved eastwards. Pressure also had given way in North-Eastern India and a shallow depression covered Chota Nagpur. Winds had strengthened on the Bengal and Orissa coasts. Thunderstorms with hail and snowstorms were reported from the Upper India Hill stations and rain from a few other stations. Trivandrum received 1.47 inches. Strongly marked anticyclonic condition obtained in North-Western India.

Monday.—Pressure continued considerably in defect at the Upper India Hill stations; but higher pressure than usual, accompanied by a continuance of anticyclonic conditions, prevailed in North-Western India. The depression in Chota Nagpur had partially filled up and had moved eastwards to East Bengal. Strong westerly winds were blowing in the Gangetic plain and had extended into West Bengal; and northerly winds were reported from False Point, Saugor Island, and from stations in Central India, the Central Provinces, and on the Sind and Kathiawar coasts. These caused an unusually large decrease of humidity at many stations, at several the decrease exceeding 50. The lowest humidity percentage recorded was 11 at Hyderabad (Sind). Thunderstorms and rain were reported from some stations in Bengal and Assam and from Colombo. Calcutta received 1.01 inches. Unusually cool weather prevailed over Northern and Central India.

Tuesday.—The decrease of temperature in North-Eastern India caused a rapid rise of pressure in that area and pressure was there considerably in excess. Winds had fallen off in strength in Northern India, and the great majority of the Punjab stations reported calms. Light showers fell in Baluchistan, Sibsagar, and Gnatong. Chittagong received 1.80 inches.

Wednesday.—Pressure increased briskly in the Punjab and Upper Sind, thus emphasizing the anticyclonic conditions in Northern India. Pressure was

everywhere above the normal. Southerly winds were re-established on the Bengal and Orissa coasts, but were feeble in strength. Very light showers of no importance were reported from stations in the North Punjab.

Thursday.—Pressure changed very irregularly, and differed considerably in amount at neighbouring stations. It continued considerably above the normal in the North Punjab and North-Eastern India, but anticyclonic conditions were giving way slowly in Northern India. Winds increased in strength in the Bengal and Orissa coast districts. The humidity percentage was very low in Central India, Berar, and the Central Provinces; Pachmarhi registering 19 and Khandwa 20 per cent. Light showers were reported from a few stations.

Friday—The barometer continued to change irregularly, but generally by small amounts, and the distribution of pressure was practically unchanged. Winds were very unsteady on the Madras and Bombay coasts. Light rain of no great importance fell in Upper India and in the extreme south.

Saturday.—Pressure increased in North-Western India and was considerably in excess in that part of the country, but it had commenced to give way in North-Eastern India and was normal in that area. Barometric changes in the Peninsula were irregular and a shallow depression was formed off the Malabar coast, giving moderately heavy rain in Southern India and West Ceylon. Tinneveli received nearly 3 inches, Trivandrum 2·14 inches, and Colombo 1·81 inches. Abnormal northerly winds continued in Sind and Kathiawar due to the high pressure conditions in Upper India. Duststorms and thunderstorms occurred in Berar and the Central Provinces.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different Provinces of India :—

PROVINCE.	MARCH 1894.							Mean variation of week.
	11th.	12th.	13th.	14th.	15th.	16th.	17th.	
Burma	− 0·2	0	+ 0·4	0	− 1·2	− 0·4	+ 0·5	− 0·1
Bengal and Assam	+ 0·2	− 2·1	− 5·7	− 3·6	− 1·8		+ 0·9	− 1·8
North-Western Provinces and Oudh						− 0·6		
Punjab	− 3·3	− 8·3	− 7·1	− 4·3	− 2·2	+ 1·2	+ 2·2	− 3·1
Bombay	− 9·1	− 8·3	− 5·0	− 3·5	+ 0·8	− 2·8	− 1·6	− 4·2
Central Provinces and Berar	− 0·8	− 3·0	− 1·0	− 0·3	+ 1·0	+ 1·7	+ 1·7	− 0·1
Central India and Gujarat	− 1·3	− 5·7	− 7·1	− 3·2	− 1·5	+ 1·8	+ 4·0	− 1·9
Sind and Rajputana	− 7·2	− 9·7	− 8·8	− 3·4	− 0·1	+ 2·2	+ 3·8	− 3·3
Madras	− 10·4	− 9·0	− 5·2	− 1·0	+ 1·0	+ 3·0	+ 2·5	− 2·7
	+ 1·5	+ 1·2	+ 1·4	+ 0·2	− 1·0	− 1·4	− 1·7	0
MEAN FOR WHOLE OF INDIA	− 3·4	− 5·0	− 4·2	− 2·1	− 0·5	+ 0·5	+ 1·4	− 1·9

The mean temperature for the whole of India was considerably below the normal during the first three days of the week, but it rose rapidly on the 14th and continued to rise steadily till the close of the week, when it was 1·4° in excess. In the Punjab temperature was in defect on every day of the week, though the defect decreased from as much as 9·1° on the 11th to only 1·6° on the 17th. The greatest differences in temperature, however, occurred in Sind and Rajputana where temperature ranged from 10·4° below normal at the commencement of the week to 3° above on the 16th. In Burma and Madras the variations were small, and the mean temperature for the whole week was normal

in these provinces and in Bombay. The mean temperature for the whole week for the whole of India was $1^{\circ}9'$ in defect.

Rainfall.—The rainfall of the week has been below the normal. Of the 52 rainfall divisions only 21 received rain, the average fall for the week not exceeding a tenth of an inch in the case of 12 of them. Only two received over an inch, namely, Madras (South) 1.46 inches and Assam (Surma) 1.14 inches. The fall exceeded the normal in 8 divisions, *viz.*, East Bengal, Khandeish, Berar, Central Provinces (West); and, in the south, Malabar, Mysore East Coast (South) and Madras (South). In Madras (South) the excess amounted to 1.26 inches and in Malabar 0.49 inches: in all the other divisions the excess was very small, only in one case exceeding a tenth of an inch. From the following rainfall table it will be seen that during the period 4th to 17th March the rainfall has been in excess in most divisions of the Punjab, in the submontane (B) division of the North-Western Provinces, in East Bengal, Central Provinces (West); and in Malabar, East Coast (South), and Madras (South). The variations from the normal are, however, in all cases small.

The stations at which the largest amounts were received during the week are Tenkarai (Tinneveli) 4.11 inches, Trivandrum 3.86 inches, and Tinneveli 3.02 inches, of which nearly 3 inches fell on one day, the 17th March.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WEEK ENDING 17TH MARCH 1894.			RAINFALL DATA FROM 4TH MARCH TO 17 H MARCH 1894.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall. 4th March to 17th March.	Excess of defect o (seasonal) rainfall expressed as a per- centage.

W. A. BION,

Actg. Assistant Meteorological Reporter to the
Government of India.

Simla, the 22nd March 1894.

M. FINUCANE,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 24th March.*—Heavy showers in the Nilgiris, and the Southern, and parts of West coast and Central districts. Cultivation generally at a standstill, except under wells. Standing crops generally good, except cotton in parts. Harvest almost over, yielding about average. Pasture scarce, but fodder sufficient and cattle in good condition. Prices almost unaltered, though slightly easier in the Central and Southern districts.

Bombay.—*For week ending 28th March.*—Rain generally slight in parts of thirteen districts. Standing crops damaged by blight, frost, hail, or rain in parts of three districts; otherwise good, except cotton in parts of Gujrat. Reaping of late crops progressing throughout the presidency, and ploughing and sowing operations in progress in eight districts. Cotton-picking progressing in five districts. Prices steady, except in one district. Agricultural stock good, and fodder sufficient, except in parts of Baroda. Numbers on relief works in Baroda 670.

Bengal.—*For week ending 24th March.*—There was practically no rain during the week. In some districts rain is required for spring rice and for the cultivation of lands for autumn rice and jute. In North and East Bengal the sowing of autumn rice and jute has begun. The spring harvest is in full progress, and prospects are generally good, except in Noakhali and Chittagong, where the crop lately suffered from excessive rain. In Nadia the outturn of the spring crops is estimated to be below the average. The collection of opium is nearly finished; the yield has been reduced by blight, the loss being considerable in Shahabad and about one-third in Sewan. A good crop of *Mahua* (*Bassia latifolia*) is being gathered in Chota Nagpur and the Sonthal Parganas. Fodder and water are generally sufficient. Cattle are in good condition, except in parts of the Madaripur Sub-division of Faridpur. Prices of common rice are stationary.

North-Western Provinces and Oudh.—*For week ending 28th March.*—Weather clear and seasonable. Spring harvesting continues and threshing operations commenced in places. Opium collections nearing completion. Sowing and irrigation of sugarcane in progress. Slight damage has been caused by hail in part of the Almora district and in a few villages in the Saharanpur district. Prospects good. Supplies and fodder abundant. Prices fairly steady, but are falling in Lucknow, Partabgarh, and Aligarh.

Punjab.—*For week ending 28th March.*—Light rain fell in seven districts. Sowings of extra spring crops in progress. Sugarcane juice being expressed. Land is being prepared for the coming autumn crops. Cotton cultivation commenced. Condition of standing crops good. Crops have been injured by field rats in parts of Lahore. The recent rain has produced rust in parts of Dera Ismail Khan. Cattle generally in good condition, and fodder is said to be sufficient throughout the province. The poppy crop is in good condition. Prices stationary in four districts; falling elsewhere.

Central Provinces.—*For week ending 28th March.*—Weather occasionally cloudy with slight falls of rain in places. Prospects growing very serious in Saugor. Wheat and other winter crops in Damoh a complete failure. Linseed very considerably damaged in Damoh and Jubbulpore. The pulse crops are very fair. Fears are entertained that the supply of fodder will probably run out in Saugor as there will be little or no chaff. Prospects fair in Nagpur and Chhattisgarh country.

Burma.—*For week ending 24th March.*—A slight shower of rain fell in Yeu only. In Lower Burma harvesting of wet-weather paddy completed everywhere. In Upper Burma cultivation of dry-weather paddy progressing, and gram and wheat harvest in progress. Standing crops in good condition and prospects generally favourable, except in Pakokku and Myingyan, where the sudden rise of the river has caused some damage. Supply of fodder and water sufficient. There have been slight local fluctuations in the price of paddy in eight districts and a considerable fall in the price of rice in Pakokku and the Southern Shan States; elsewhere prices are stationary.

Assam.—*For week ending 27th March.*—Weather warm. Early rice ploughing and sugarcane-pressing continue. Tea-plucking commenced. Condition of cattle good. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 28th March.*—**MYSORE:** Crops and prospects good. *Ragi* (*Eleusine coracana*) harvested in parts of Bangalore. Rice sown in parts of Tumkur and Shimoga. Prices fallen in two districts.

COORG: Rain excessive in some parts. Manuring of rice fields and threshing of *ragi* (*Eleusine coracana*) in progress. Coffee blossomed. Prices stationary. Water and fodder sufficient for cattle.

Berar and Hyderabad.—*For week ending 28th March.*—**BERAR:** Rain-fall moderate during the week. Weather warm. Land being prepared for ensuing crops. Fodder reported scanty in parts of the Akola district. Water-supply sufficient. Slight variation in the price of wheat in one taluka only.

HYDERABAD: No rain during the week. Harvesting of spring crops continues. Weeding of hot-weather crops in progress. Prices steady.

Central India.—*For week ending 28th March.*—Report not received.

Rajputana.—*For week ending 28th March.*—Agricultural operations, standing crops, and cattle, generally satisfactory. Prospects generally good, but damage to crops from rats and insects is reported from Marwar, Ajmere, and Dholepore. Signs of scarcity in some villages of Bikaner. Harvesting continues. Pasturage or fodder sufficient. Prices falling in three States; steady elsewhere.

Kashmir.—**KASHMIR VALLEY.**—*For week ending 27th March.*—Weather again fine. Prospects of spring crops good. Rapeseed healthy. Ploughings for autumn crops going on. Water ample. Prices stationary.

JAMMU PROVINCE.—*For week ending 22nd March.*—Weather bad in Skardu; snowfall unusually heavy and spring sowings delayed. In other districts crops fair. Prices stationary.

Nepal.—*For week ending 24th March.*—Weather fine and warm. Prospects fair.
